Attention: Education Service.

Dear Mr. Phelan:

I have your letter of the 10th instant regarding the request made by Reverend Father J. Brachet, Principal of the McIntosh Indian Residential School, for a small boat.

I quite understand that your Department has spent a large amount of money for the construction of the road from the school to the station of McIntosh and that it is also yearly spending a fairly large sum for its maintenance.

But there is a problem of recruitment which must not be forgotten at McIntosh. All the reserves that send students to this school are north of it and there are no roads of any kind which can be used. For recruiting purposes a boat is therefore essential.

So that the Department would not be put to too much expense, I forwarded to Father Brachet the letter that I received from the Peterborough Canoe Co., and told him to select the cheapest boat capable of doing his recruitment. Personally, I would have advised him a much more expensive one, but he chose a 15 ft. boat without a canopy and powered with an out-board motor. That is possibly, the cheapest boat that you ever purchased for a residential school. I therefore hope that you may want to reconsider your decision.

Thanking you in anticipation, I remain,

Yours very truly,

J.O. Plourde

DEPARTMENTAL PURCHASING BRANCH

Re: Garbage Burner for McIntosh
Residential School

With reference to your memorandum of the 11th instant, I enclose tenders which we have received for the above.

It is considered that the equipment of Alsip Brick Tile and Lumber Company, Winnipeg, the lowest tender would be suitable and it is recommended that you purchase this.

Department of Indian Affairs

Sir,

The following property has been proposed for the proposed Indian boarding school at the above place. It has been inspected for a good location and is well adapted for the purpose to You and to the Department a good Indian Boarding School.

This land is situated in the Province of Ontario, 3 miles, more or less North of the village of ... and is well adapted for the purpose to You and to the Department a good Indian Boarding School.

The land has been surveyed by the ... surveyor. It is well adapted for the purpose to You and to the Department a good Indian Boarding School.

ALEXANDER MARQUHART, LL.B.
BARRISTER, NOTARY PUBLIC,
SOLICITOR, ETC.

Winnipeg.

January 4th, 1924.

Ott, Esq.,
Agent General of Indian Affairs,

I am advised by Rev. Father Beys of the Oblate Fathers that he has chosen as a suitable site for an Indian School certain lands near McIntosh, Ontario, comprising 320 acres more or less, and being known as Locations L.K. 174 and 175 Canyon Lake.

I am acting for Mrs. Margaret Wilson of this city who is interested in the property. The property was surveyed for her late husband James A. Wilson the intention being that one-quarter section would be occupied by Mr. Wilson and the other quarter by his son William Wilson. Some improvements were made on the property but the son went away to the war, and was killed at the front. Mr. Wilson Sr. was killed accidentally on the C.N.R. in the early part of 1918. Owing to these happenings Mrs. Wilson was unable to go into occupation of the property.

Mrs. Wilson is prepared to release all claim to the property upon payment of \$775.00. Out of this amount she would pay the price of the land asked by the Ontario Government, namely \$1.00 per acre. There are also expenses of surveying which are still unpaid. These would also be paid from the said amount. As Mrs. Wilson's solicitor I would undertake to obtain from her a Quit Claim Deed or such other documents as may be necessary to release her claim, and would also undertake to see that the said accounts are paid before handing any balance over to Mrs. Wilson.

I may say that in 1918 I had certain correspondence with the Department of Lands, Forests & Mines at Toronto with a view to obtaining title to the properties for Mrs. Wilson without the necessity of performing the usual homestead duties. The Department did not agree to this but they stated that they would consent to Mrs. Wilson disposing of her interest in the land to any other party who would undertake to do the settlement duties. I presume therefore that there would be no difficulty in arranging the matter satisfactorily.

AM/LM

Yours truly

Indian Affairs. (RG 10, Volume 6220, file 472-9, part 1)

Sir,-

This Department has been considering establishing an Indian school near McIntosh, Ontario, and one of the the 320 acres comprising locations 174 and 175, Canyon Lake.

Would you be good enough to inform me if these locations are now recorded as Provincial Crown lands or if the fee has passed to private individuals? In event of the fee having passed from the Crown, kindly advise me as to the name and address of the party or parties from whom it would be necessary to obtain title to this property.

Your obedient servant,

(J. DeLoe)
Assistant Deputy and Secretary.

SUMMER RESORT REGULATIONS

1. Crown lands in such districts and localities as may be considered advisable in the discretion of the Minister may be purchased or leased as locations for summer cottages, hunting or fishing lakes or other similar purposes, subject to the following regulations:

2. It is provided, no such location shall be laid out, surveyed or disposed of exceeding five acres in area. If the nature of the ground will permit, the frontage along the water of any one location shall be approximately half the depth thereof, and in no case shall exceed the depth provided, however, that the Minister, in his discretion, may authorize the sale to one person of an area exceeding five acres, or authorize a survey in any such manner as the circumstances of the application may warrant.

3. Land on the main shore or parts of such large islands as may be considered advisable by the Minister, may be sold for the price of \$10.00 per acre, the minimum price to be \$10.00.

4. On other islands the price shall be \$20.00 an acre and not included within the survey when made by the Minister, such cost to be determined by the said Minister or Director of Surveys.

5. If an application be made for a parcel of land containing more than five acres and less than ten acres, where it is not considered advisable by the Minister to subdivide, the Minister may authorize a sale of the whole area to one person, but the price shall be \$10.00 per acre for mainland.

6. The Minister has the right to subdivide any parcel of land into resort or park lots with such areas and at such prices therefor as may be deemed advisable by the Minister.

7. The purchase price of surveyed land shall be paid before the application thereof is accepted. Where a survey is required to be made on the ground, six weeks from the acceptance of the application will be allowed for the filing of the survey, provided a deposit of \$10.00 has been paid on or before the expiration of fifteen days from the acceptance of the application. In default of the payment or filing of survey as above, the application will be treated as having lapsed, and the deposit shall be forfeited.

8. The application shall state the purpose to which the land is to be applied, and shall be accompanied by evidence satisfactory to the Minister, proving that there is no adverse claim to or occupancy of the land.

9. A building of the value of not less than Five Hundred Dollars (\$500.00) and improvements (including said building of not less than Five Hundred Dollars) shall be erected, and made upon the land sold, within eighteen months from the date of sale.

10. If said building is not erected or said other improvements are not made within said period of eighteen months, the sale shall be cancelled without notice to the purchaser.

11. No patent shall issue until evidence, satisfactory to the Minister, has been filed with the Department showing that said house has been erected and said improvements made.

12. In laying out locations along the shore of large islands where the rear line of the location does not extend to the centre of the island, a road allowance, 66 feet in width, reserved between such locations and in such manner as to be considered expedient to afford access to the interior of the island, or along the shore thereof.

13. All lands shall be sold subject to the provisions of Act to preserve the forests from destruction by fire and any special regulations which may hereafter be made regarding the use of fire or otherwise.

14. The pine timber shall be reserved to the Crown with the right to enter upon the land and operate for and remove the said timber and minerals. No pine timber shall be cut except in the process of clearing for building sites and then only with the written consent of the Minister. Any pine timber cut and used for building purposes or in the course of clearing, shall be paid for at such price as the Minister may fix. Cutting without authority will be treated as a trespass and subject to the Crown regulations in respect to proceedings. And as to the lands mentioned in the succeeding regulations hereof (No 16) an additional condition shall be that the Province shall be freed from any and all liability to the owner or occupants or other persons having any title or interest in the said lands for damages or injury which may arise from the flooding of said lands, resulting from the raising of the lakes or stream mentioned in the said regulations hereof, Number 16.

15. By and with the consent of the Minister the pine timber on a summer resort may be sold to the owner thereof after an inspection and valuation has been made by the Department and a price set thereon.

16. The Order in Council dated the 8th day of November, 1910, withdrawing from sale or location the islands in Kaskaskia Lake of the Woods and the Winnipeg River is hereby rescinded. Any sale of islands in these waters shall be subject to a flooding clause relieving the person of any liability by reason of the raising of the levels of the stream.

17. The Minister may lease lands for summer resort purposes or grant a license of occupation therefor, for periods not exceeding five years subject to the annual rental, in the case of islands at \$10.00 an acre and in the case of mainland at \$5.00 per acre. All timber upon the lands shall be reserved to the Crown, the area of land to be limited as in the case of sales.

18. Not more than one parcel shall be leased, sold or patented to any one person except in the discretion of the Minister. A purchaser or lessee of land under these regulations shall not transfer or assign his interests therein without the consent in writing of the Minister.

19. No survey of any summer resort either island or mainland shall be made without the permission of the Department.

20. Islands heretofore used for farming, grazing or other wise held and used in connection with farming lands immediately adjacent thereto, and lands for which applications for purchase have been made prior to the adoption of these regulations, may be disposed of in the discretion of the Minister and without being subject to the preceding regulations Number 1 to 19.

21. The Minister may require prices or rentals higher than the prices or rentals provided for in the preceding regulations to be paid for.

22. The word "Minister" when used in these regulations shall be deemed to mean the Minister of Lands and Forests for the Province.

23. These regulations shall not apply to lands in Provincial or Forest Reserves.

ARMAN HOWMAN

DEPARTMENT OF LANDS AND FORESTS
SURVEYS BRANCH

JAN 17 1924

Toronto, January 15th, 1924.

Dear Sir:-

Replying to your letter of the 12th inst. in reference to obtaining a school site at McIntosh for an Indian school, I have to say that locations L K 174 and 175 were squatted on by James A. Wilson who had them surveyed as farm locations.

The locations lie within the English River Pulp Limit and Mr. Wilson, the squatter on the lands, died and his widow has not been able to procure the lands.

In any event, the Department would not consider granting so large an area for a school site and if your Department desire to procure 5 acres in that vicinity for school site purposes it may be taken up under the regulations regarding the disposal of summer resorts, trading posts and other lots required in small areas.

I enclose you a copy of these regulations for your information.

Ottawa, Jan. 18, 1924.

Sir:

I have your No. 9763 of the 15th instant, relative to this Department's application for a school site near McIntosh. I have to state, in reply, that the intention is to erect an Indian residential school, and, as the pupils are taught farming, gardening and the care of stock, it is important that adequate facilities for such training are provided. At other institutions of this type as much as 1000 acres is used for school purposes.

It would be to this Department's advantage to secure locations L K 174 and 175 and I should be pleased if you would indicate what steps will be necessary to arrange title.

I note that the heirs of Mr. J. A. Wilson, who was a squatter and who had the lands surveyed, may have an adverse claim and you might inform me whether it would be better to have the Department of Indian Affairs settle this claim or whether this could be adjusted by your office.

Your obedient servant,

J. D. McLean,
Asst. Secy. & Treasurer.

ONTARIO
DEPARTMENT OF LANDS AND FORESTS
SURVEYS BRANCH

Toronto, April 23rd, 1924.

Dear Sir:- Re locations L K 174 and 175.

Referring to your letter of the 18th January, 1924,
and the application of the Department of Indian Affairs to secure
the above mentioned farm locations which were surveyed on behalf
of one J.A. Wilson, situate in the district of Kenora, I have to
state that your application has been given favorable consideration.

The lands may be disposed of to the Department of Indian
Affairs to be used for the purpose of Indian residential school at \$3
per acre provided your Department makes a settlement with the Wilson
family who, I think, may be found through their legal representatives
in Winnipeg, Messrs. Farquhar, Myers, Hastings & McNabb, 406 Sterling
Bank Bldg. Winnipeg, Man. If no settlement can be arrived at with
the Wilson family a sale may be carried out at \$5 per acre cash.

Yours truly,

JVR/WK

Ottawa, 14th May 1924

Sirs

The Department is contemplating the survey of a parcel of 250 acres for the purposes of an Indian residential school approximately 2 miles S.W. of McIntosh, a station on the Canadian Pacific Railway. The survey requires to be made at an early date.

Kindly inform me if you could take charge of this work and if so, would the other work you have on hand permit you to make the survey immediately after receiving instructions.

Your obedient servant,

(J. W. McLean)

Assistant Deputy and Secretary.

Copy of an Order-in-Council

APPROVED BY HIS HONOUR THE LIEUTENANT-GOVERNOR
THE 16TH DAY OF JANUARY, A.D. 1907

Upon the recommendation of the Honourable the Minister of Lands, Forests and Mines, the Committee of Council advise that Regulations adopted by Order-in-Council of 21st June, 1898, under 61 Victoria, chapter 8, entitled "An Act respecting Water Powers" be rescinded, and that the annexed Regulations be adopted in their stead.

The Committee further advise that the accompanying form of be approved for leases of water powers issued under the said Act and Regulations, subject to such changes as may be necessary and authorized in individual cases.

Certified:

J. LONSDALE CAPREOL.

Clerk, Executive Council

REGULATIONS RE WATER POWERS

1. These rules and regulations shall not apply to water privilege which in their natural condition at the average low stage of water have not greater capacity than 150 horse power.

2. In granting or leasing, otherwise than under these regulations, any Crown Lands upon which a water privilege is situated or which may be flooded or overflowed in consequence of the development and utilization thereof, the said privilege shall be reserved to the Crown, together with such an area of land in

...the Minister may, in his discretion, require the applicant to deposit with the Minister a sum of money to be named by the Minister, conditional upon the carrying out of the works of construction and development specified in the lease within the period therein named; such sum to be returned to the lessee upon the due fulfilment of such condition, otherwise to be forfeited to His Majesty the King for the use of the Province of Ontario.

1. The right to lay out and use such roads as may be necessary for the passage to and from such water privilege or land shall be

4. The applicant for a water privilege situated on Crown Lands shall file in the Department of Lands, Forests and Mines, a plan and report by a competent engineer satisfactory to the Minister showing:

(a) The location of the water privilege applied for, and a description of the land required in connection therewith.

(b) The height of the fall or rapid, the volume of water at the average high and low stages of same, the estimated capacity in which it is proposed to construct, and the increase in the level of the water which such dams or weirs will bring about.

(c) The plan by which the applicant proposes to develop the water privilege, showing the dams, weirs, tunnels, races, flumes, and the form in which the power is to be used or transmitted, that is, whether by direct energy, electricity, compressed air, etc.

The applicant shall also show the nature and location of the business, plant or manufactory in connection with which it is proposed by the applicant to utilize the water privilege, and the number of horse power which the applicant proposes to develop and utilize, and shall furnish proof satisfactory to the Minister that the said water privilege is required for the applicant's own mechanical or industrial purposes or to supply an actual or anticipated demand for power in the neighbourhood of the privilege.

...the Minister may, in his discretion, require the applicant to deposit with the Minister a sum of money to be named by the Minister, conditional upon the carrying out of the works of construction and development specified in the lease within the period therein named; such sum to be returned to the lessee upon the due fulfilment of such condition, otherwise to be forfeited to His Majesty the King for the use of the Province of Ontario.

2. As required by the Minister the applicant shall furnish a plan and report by a competent engineer satisfactory to the Minister showing the proposed works for the development of the said privilege, and such works shall not be proceeded with until the said Power Commission has approved the same.

3. The applicant shall submit such proof of his financial standing and ability and intention to develop the said water privilege as shall be satisfactory to the Minister.

4. Before the lease of a water power is granted the Minister may require the applicant to deposit with the Province a sum of money to be named by the Minister, conditional upon the carrying out of the works of construction and development specified in the lease within the period therein named; such sum to be returned to the lessee upon the due fulfilment of such condition, otherwise to be forfeited to His Majesty the King for the use of the Province of Ontario.

5. Upon compliance with the foregoing regulations and upon payment of the rental, the lease shall be granted to the lessee upon such terms and conditions and at such rental as may be fixed by the Minister. The rental reserved by any such lease or any renewal thereof shall be payable yearly in advance.

6. No such lease shall be granted for a longer term than twenty years, and for two further and successive terms of ten years each upon terms and conditions as may be agreed upon or may be fixed by the Minister.

7. No dam, weir, or other structure shall be erected or built in connection with the development of any such privilege, with the object, intention or effect of damming the water or impeding the flow thereof, full and proper provision, as now by law required, shall be made by the lessee for the safe and convenient passage of logs and timber over and through the same.

8. The lessee under any such lease shall not destroy or obstruct the navigation of any river, stream or body of water.

Indian Affairs. (RG 10, Volume 6220, file 472-9, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES

previously navigable; but shall provide such locks, canals, passages and other means as may be necessary for the proper and safe surmounting or passing of any dam, weir or other work made or erected by the lessee, and as may be required for purposes of navigation by the Government of Canada.

12. In addition to any other conditions or provisions required by the Minister, the lease shall contain conditions and provision to the following effect:

(a) Requiring the development and use within a period or periods to be named in the lease of a specified quantity of quantity of power or energy, estimated in horse power.

b) If the quantity of power required by the lease to be developed within a period or periods therein named is less than the full capacity of the said privilege, upon report being made by the said Hydro-Electric Power Commission to that effect, and also that there is a *bona fide* demand for power which can be supplied therefrom, the Lieutenant-Governor-in-Council may, by Order-in-Council require the lessee to develop the said privilege to its full capacity or to such other extent as he may deem proper or requisite within a period or periods of time to be named in the said Order.

c) For the use by other parties than the lessee of surplus or unused water or power not required by him for the purpose of his business, plant or manufactory, on such terms as may be agreed upon.

(d) Failing an agreement between the parties concerned as to the rates or conditions for supplying power by the lessee to any person, company or corporation, or by any person, company or corporation receiving power from the said lessee, and any other person, company or corporation, either party may submit the matter to the said Power Commission, and any Order made by the Lieutenant-Governor-in-Council upon report thereon by the said Power Commission fixing and determining the said rates and conditions shall be final and conclusive and binding upon all parties concerned.

(e) In case of submission to the Hydro-Electric Power Commission as in Paragraph "(d)" herein mentioned, the said lessee on being so required by the said Commission shall produce all books, accounts, records and statements verified by affidavit showing the cost of constructing, equipping and maintaining the works for the development of the said privilege and delivering the power therefrom.

f) Upon complaint in writing being made that any municipal corporation is granting bonuses by supplying power, light or heat below cost to manufacturers or others, whether the said corporation is the lessee of a water privilege or is receiving power therefrom or through such lessee, the Lieutenant-Governor-in-Council may refer the matter to the said Hydro-Electric Power

Commission, who may dispose of the same in manner provided by Chapter 16 of the Ontario Statutes of 1896, or any amendment thereto.

g) For the purpose of ascertaining the quantity of power actually developed or capable of development from any water privilege, or the amount of rental payable under a lease thereof, said Power Commission or any engineer appointed by it for that purpose, shall have free access to all parts of the works, and all books, plans or records bearing on the quantity of power, and may make measurements, take observations, etc., and any calculation as to the quantity of power so developed or capable of development made by the said Commission or by such engineer shall be binding upon the lessee.

The power and authority to acquire water powers and works by purchase, lease or otherwise, or without the consent of the owners thereof conferred upon the said Power Commission by Chapter 16 of the Statutes of Ontario of 1896, shall be exercisable by the said Power Commission in respect of any water power leased under these regulations or any works connected therewith.

(4) During the construction of the works for the development of any water power, the said Power Commission or any engineer appointed by it for that purpose shall have free access to all parts of the works for the purpose of inspecting the same and of ascertaining that the construction thereof is in accordance with the plans and specifications approved by the said Power Commission.

(5) For the erection and maintenance by the lessee of a durable and efficient fishway when so required by the proper officer or authority in that behalf.

During the continuance of the lease, the lessee shall keep and maintain all dams, weirs, tunnels, races, flumes, sluices, pits and other structures and works necessary for the development and use of such privilege in good repair and condition, and shall not wilfully or otherwise injure or destroy the same or any part thereof, but at the expiry or sooner determination of the lease shall leave all such structures and works in good repair and condition, reasonable use and wear thereof and damage by fire and tempest only excepted, and so that their subsequent usefulness shall not be lessened by any act of the said lessee.

(6) At the expiry or sooner determination of the lease, the water privilege shall revert to and become the property of the Crown as fully as if no such lease had been granted, together with all dams, weirs, tunnels, races, flumes, sluices, pits and other structures or works made or erected by the lessee in connection therewith, and all buildings erected on land covered by the lease, but the lessee shall be allowed a reasonable time to be fixed by the Minister in which to remove all machinery employed by him in the development and use of the privilege, failing which removal such machinery shall become the property of the Crown. Provided that where any such buildings or structures are of a permanent

Indian Affairs. (RG 10, Volume 6220, file 472-9, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

character and necessary or useful for the proper development or utilization of the water privilege, the Lieutenant Governor-in-Council may upon report in that behalf by the said Hydro-Electric Power Commission, pay the lessee by way of compensation therefor and purchase thereof such sum or sums as he may deem proper upon the same being appropriated for the purpose by the Legislative Assembly of the Province.

(m) The lease shall at all times be subject to any general regulations thereafter made by the Lieutenant Governor-in-Council affecting the construction and operation of works for the development of water privileges or the supply of water therefrom.

13. The Lieutenant Governor-in-Council may cancel any water power lease issued under these regulations for non-payment of rental within 90 days after the same is due and payable, whether the same shall have been demanded or not, or upon report by the said Power Commission that the conditions as to construction of the works or the development or supply of power have not been complied with, or that at any time after the water privilege has been developed, either in whole or to the extent to which the lessee is bound or required to develop the same the said lessee has continuously failed or neglected for the space of one year effectually to produce power from the said privilege, either for his own use or that of other persons, unless hindered by unavoidable accident, or that the lessee has failed or neglected to comply with any of the conditions of the lease or any Order-in-Council respecting any matter or thing arising under the lease concerning which such Order is made; and publication of any Order-in-Council cancelling such lease shall be sufficient proof that the same has been duly and lawfully cancelled. Provided due notice shall be given a lessee before such cancellation in order that he may have an opportunity of being heard, should he so desire.

14. Where a water privilege is applied for by a municipal corporation for the purpose of supplying water, power, light or heat for the use of the inhabitants of the said municipality, the Minister may issue a lease of said privilege to such corporation if other persons are entitled to receive and hold the same, on such special terms and conditions as may be recommended by the said Power Commission, and at such rental as he may deem proper.

15. The word "Minister" in these regulations shall mean the Minister of Lands, Forests and Mines, or any Minister of the Crown performing the duties of the Minister of Lands, Forests and Mines in his absence or during a vacancy in that office; and the Minister may refer to the Hydro-Electric Power Commission of Ontario any application for the leasing of any water privilege or any matter arising out of such application or any lease made in pursuance thereof, whether hereafter or heretofore issued, for consideration, investigation and report.

16. No water power lease shall be valid or effective unless the same is issued under the Great Seal of the Province, and is signed by the said Minister.

DEPT. OF INDIAN AFFAIRS

MAY 21 1924

SURVEYS

DEPARTMENT OF LANDS FORESTS & MINES
OFFICE OF DIRECTOR OF SURVEYS

Toronto, May 19th, 1924.

Donald Robertson Esq.,
Chief Surveyor,
Department of Indian Affairs,
Ottawa, Ont.

Dear Major Robertson:-

Replying to your letter of the 14th inst. in reference to the application of the Department of Indian Affairs for a parcel of land for an Indian Industrial School in the vicinity of McIntosh, I am forwarding you under separate cover blue print plan of the township of Smellie, also a copy of the original field notes of survey along the west boundary of said township, also a blue print copy showing the several summer resort locations surveyed in the vicinity of Canyon Lake.

With reference to water power which is said to exist on the lands applied for, there is no application at present before the Department for said water power.

Water powers on Crown lands which will develop 150 horsepower and over are subject to the regulations respecting the disposal of water powers but those under 150 horsepower are dealt with on such terms and conditions as the Minister of Lands and Forests may deem advisable and in any case full information regarding the power is required before an application is considered.

I am enclosing you herewith a copy of the regulations in reference to powers over 150.

Yours very truly,

Send map

Director of Surveys.

SURVEYS

Indian Affairs. (RG 10, Volume 6220, file 472-9, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa, 2nd May 1924

Rev. S. R., -

The Department is arranging to have the firm of Phillips and Benner, Ontario Land Surveyors of Port Arthur, undertake the survey of the parcel required for the purposes of the boarding school at McIntosh.

This survey is necessary as plans of the property must be filed with the Province of Ontario before the Province will definitely state that it will be made available, but I have every reason to hope that the application will be favourably considered.

In order that the surveyor be not delayed on his arrival, it is desired that the site which is satisfactory to you be definitely settled before he proceeds to do the work and I would request that you arrange to have your agricultural representative proceed there in advance of the surveyor and make this selection, on completion of which he could wire the surveyor that he was ready for him to commence work.

If your representative could on his first arrival at McIntosh advise Messrs. Phillips and Benner as to what labour would be available there for his survey party, it would assist him greatly and if labour can be obtained would greatly reduce the expense of survey.

I am asking Messrs. Phillips and Benner to communicate with you so that you may arrange the details of the above points to your mutual satisfaction.

(J.D. McLean)
Assistant Deputy and Secretary.

Very Rev. G.B. Eys, O.M.I.,
222 Provencher Ave.,
St. Boniface, Man.

Indian Affairs. (RG 10, Volume 6220, file 472-9, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa, 22nd May 1924

Referring to my letter of the 14th instant, I have to request that you arrange to survey as soon as possible a parcel of approximately 250 acres in the vicinity of McIntosh Station for the purposes of the Indian boarding school. The site according to information to hand is approximately two miles South-West of McIntosh, fronting on the stream between Forest Lake and Canyon Lake. The survey is to be made in conformity with the regulations governing surveys in the Province of Ontario.

The selection of the parcel is to be made under the instructions of the Very Rev. G. B. Beys, O.M.I., 222 Provencher Ave., St. Boniface, Man. For your information I am enclosing a copy of a letter sent this date to him. Please communicate with him. It is desirable that as much of the necessary labour in connection with this survey be obtained at McIntosh, or as near to the point of survey as possible.

It is reported that there is a small water power on the stream which it is hoped to utilize in connection with the boarding school, but that it is well under the 150 H.P. minimum, in fact about 40 H.P. and I have to request that your returns include such information as to volume, height of fall etc., as may be required in order to establish it sufficiently under the 150 H.P. to warrant them being treated outside the Regulations regarding Water Powers and enabled to grant this Department the use of this power. Your returns should also show the height of dam needed to develop this power and the extent of the lands which would be flooded as a result of its construction. Payment will be at the rate of \$20.00 per day.

The following are enclosed, - Field books, sheets, Pay lists, Blueprint of the Township of St. Charles, Blueprint of resort locations on Canyon Lake, Field notes of the West boundary of Smellie and a copy of letter to Very Rev. G. B. Beys, O.M.I., Ontario Section sheet.

Your returns should consist of a report, accounts and vouchers in duplicate, all to be prepared in this Department.

Herewith please find Departmental cheque for \$100.00 on account of this survey.

Yours obedient servant,

[Signature]

J. B. McLean, Esq.,
Assistant Deputy and Secretary,
Dept. of Indian Affairs, Ottawa.

Dear Sir:-

Enclosed

McIntosh, Ont.

In regard to water power between Forest and Canon Lakes,
we say that we do not regard the result given in the field
indicating the actual theoretical available horsepower,
probably considerably too high as the water is no longer
available at this season. There is a dam
outlet of Forest lake
fill at the opening
lake. The water in
influence of the

slide and taking the del
and entrance to the slide are leaking badly it was estimated
that 75% of the water was going through the slide. The information
in regard to the watershed drained by this stream appears to be
very vague and there is probably no reliable information in regard
to rainfall at this point so that this method
power does not appear to be available without
further

normal high

Ottawa, 26th June 1924

Sir,-

With further reference to the correspondence relating to the site required for an Indian residential school in the vicinity of McIntosh, I am enclosing a blueprint showing the lands which have been selected and surveyed for this purpose. Plans on linen in triplicate will be completed and forwarded to you in a few days.

In addition to the parcel which the Department had surveyed, it is also desired to acquire the S. 1 Lot 12, Con. 6, Tp. of Smellie.

As previously mentioned there is a small water power within the limits of the property selected which it is desired to utilize for lighting and pumping purposes and from the surveyor's report, a copy of which I enclose, you will note it is well below the 150 horse power limit.

A school of this nature requires considerable arable land and as the soil suitable for cultivation is in scattered parcels as will be seen from the enclosed blueprint of the sketch plan showing the nature of the land in the vicinity, it is hoped you will favourably consider this application although the area exceeds that mentioned in your letter of 10th May last.

It is intended to commence building this summer and to accomplish this, it is necessary for tenders to be called for immediately. This of course can not be done until contractors can be informed definitely as to the site. Will you please give this matter your consideration?

The Deputy Minister,
Department of Lands &
Toronto, Ont.

Your obedient servant,

(J.D. McLean)
Asst. Deputy and Secretary.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

Ottawa, 18th June 1924

Deputy Minister,-

I have to report that on Thursday the 26th instant I proceeded to Toronto and as requested, interviewed the Director of Surveys and the Deputy Minister of the Department of Lands and Forests on Friday the 27th and secured the verbal assurance of the Deputy Minister, Mr. Cain, that the Department would be allowed to acquire the property that had been selected for the Indian residential school near McIntosh. It may be that the Province cannot reduce the rate below a minimum of \$5.00 per acre, but on account of it being for educational purposes I endeavoured to obtain a rate of \$3.00 per acre. A final rate was not decided upon but the Department will be informed as to that when reply is received to our letter to the Deputy Minister, Department of Lands and Forests, dated the 26th instant.

However, in view of the fact that this property as surveyed included so much water front, it was decided that the Province would reserve a road allowance one chain in width along the water front. The above assurance was given with the understanding that no squatters or improvements of any kind were on the property with the exception of the old dam at Forest Lake and the slide between Forest Lake and Canyon Lake. As the Department has the assurance of Father Beys and also of the surveyor who made the survey that there no squatters or other improvements, it may be taken that the transaction will be completed and that preparations for construction of the buildings may be immediately undertaken. The Department may expect official confirmation of this from the Province early in coming week.

ONTARIO
DEPARTMENT OF LANDS AND FORESTS
SURVEYS BRANCH

Toronto, July 3rd, 1911

Dear Sir:-

Referring to the application of Department of Indian Affairs to procure certain lands in the vicinity of McIntosh for the purpose of establishing an Indian school and following the interview with Major Robertson of your Department recently, I have to advise you that your application to purchase this land will be favorably entertained on the following conditions:-

- (1) Payment of the purchase price of the land.
- (2) Filing of plans in triplicate and descriptive by an Ontario Land Surveyor of the parcel lying to the west of the township of Smellie. This plan to show a reserve of one chain in width around the lake adjoining the parcel, which reserve will not be included in the area.
- (3) Filing of a declaration that there are no squatters or improvements on the land and also a declaration setting out the purpose for which the land is to be used.

Major Robertson was advised that on your undertaking to comply with these necessary requirements the sale would be carried out and would include the south half of lot 12, concession 6, township of Smellie and that permission was granted to proceed forthwith to occupy the land.

Université d'Ottawa

University of Ottawa

Ottawa, Canada

Ottawa, July 3 1924

Mr. Duncan C. Scott,
Deputy Superintendent General,
Department of Indian Affairs,
Ottawa.

Dear Mr. Scott:-

Reverend Father Boys has requested me to apply for authority to undertake a preliminary clearing work in connection with the construction of the new school at McIntosh.

The Reverend Father states that gasoline boat and a crew will be necessary, and tools for cleaning the land, cutting roads, constructing a wharf, etc. Reverend Father Boys is ready to have this work done by day labour and he expects that it will require an approximate cost of \$1,000 for the construction of this work.

Will you kindly communicate with him at your earliest convenience as the Reverend Father is prepared to have this work started immediately, in order to facilitate the immediate inception of the construction of the school as soon as the tenders will be given.

Believe me,

Yours very truly,

Indian Affairs. (RG 10. Volume 6220. file 472-9, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

DEPARTMENT OF INDIAN AFFAIRS
CANADA

Ottawa, July 16, 1924.

Mr. Scott.

A request has been received from the Reverend Father [unclear] for authority to undertake the preliminary clearing work on the site of the new Macintosh School, also the purchase of a gasoline boat and scow and the necessary tools for clearing the land and cutting roads and constructing a wharf. He estimates the cost of this work to be \$5,000, and states that he is prepared to have this work started immediately in order to facilitate the immediate inception of the construction of the school as soon as a contract is awarded.

With reference to any work required such as the building of a wharf for the facilitating of delivery of materials to the school, this work will have to be done by the contractors, and is provided for in the specifications.

Regarding the gasoline boat and scow and the tools for the clearing of the land, I have no doubt that these are needed and will be very useful to the school after same is erected.

Before any of the items asked for by the Reverend Father are considered, I am of the opinion that he should be asked to furnish a full report outlining the extent of the clearing he proposes to undertake and also an estimate of the cost of the necessary tools required. He should also furnish the Department with some idea of the style of motor boat and scow which he would recommend.

J. J. [unclear], Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

FILE:-13C-7-9.

Dear Sir:-

In answer to your letter of July 21st, addressed to Very Rev. Fr Beys O.M.I., St Boniface, in the matter of preliminary work at McIntosh, Ont, in view of the erection of an indian residential school, I am directed to submit to the Department a list of different works to be undertaken without delay:

Clearing of land (if possible to the extent of 40 acres)
— Building of docks at the station and at the school site;
" " a slide for unloading of cars;
" " 2 temporary shelters for men;
" " 1 " " horses;
" " 1 " kitchen;
Blazing of trail from station to the school (over 1 mile).

As already mentioned in my letter of July 3rd, the approximate cost will be about \$5,000.00 (including material, freight, salaries, use of gasoline boat, etc).

However, Very Rev. Fr Beys is prepared to have all this work done by day labor and to supply in due time the salary sheets and vouchers for material and freight. Regarding the gasoline launch referred to in your letter this matter will not be taken up presently.

2-11-24
In my opinion the above would be the most practical course to follow as it would be rather difficult to give a definite estimate for the total work. I beg to state again that this work is most urgent as the tenders will be opened on the 18th inst and the erection of the building should be proceeded with immediately on account of the late season.

Yours truly,

Joseph [unclear]

Dear Father Guy:-

I have your letter of the 2nd. inst. with reference to the building of a school.

With reference to the building of docks at the station, I have been in communication with the Board of Trade and the City Council. It is planned to build a dock at the station and the City Council will be asked to grant the necessary land. It is also planned to build a dock at the station and the City Council will be asked to grant the necessary land. It is also planned to build a dock at the station and the City Council will be asked to grant the necessary land.

Regarding the clearing of land, approximately 100 acres, and the building of a school, I have been in communication with the Board of Trade and the City Council. It is planned to build a school at the station and the City Council will be asked to grant the necessary land. It is also planned to build a school at the station and the City Council will be asked to grant the necessary land.

With reference to the building of two schools, I have been in communication with the Board of Trade and the City Council. It is planned to build two schools at the station and the City Council will be asked to grant the necessary land. It is also planned to build two schools at the station and the City Council will be asked to grant the necessary land.

UNIVERSITY OF OTTAWA

Ottawa, Ont., August 13th, 1924.

Mr Duncan C. Scott,
Deputy Supt General,
Department of Indian Affairs,
OTTAWA, Ont.

File:-130-7-9.

Dear Mr Scott:-

Referring to your letter of the 5th inst., in the matter of land at McIntosh Indian Residential School, I wish to thank you for the authority given for the clearing of approximately forty acres and the clearing of a trail from the school to the road. In connection with the same matter I wish to state the following.

Your remarks about the docks and slide have been noted and we will govern ourselves accordingly.

The clearing of the land in our estimation and according to work already done will cost approximately \$110.00 an acre. This is a total of about \$4.40 for the forty acres required. As already stated, the site of the industrial school and surroundings are heavily wooded and the work of clearing is extremely difficult, but this work has to be done for the protection of the school from fire and also for the purpose of having land for cultivation.

The temporary shelters referred to are exclusively for the use of the men presently working on the site and cost from \$500 to \$600.

As you are aware, the Oblate Fathers have already spent a considerable amount of money at McIntosh for protection work and I have the liberty, in the name of the Holy See, to advance for an advance of \$1,000. I herewith enclose a list of the money already received and spent. The total amount is \$1,000.00 which partly accounts for the request of an advance.

Hoping that this request will receive favorable consideration, I remain

Sincerely yours,

Joseph Henry Smith

Ottawa, 15th August 1924

Description

All that parcel of land situate in the District of
Kenora, Province of Ontario and Dominion of Canada, containing
by admeasurement one hundred and sixty-six acres and thirty-
five hundredths of an acre, more or less, described as follows,-
Commencing at a wooden post and stone mound on the northerly
shore of Forest Lake distant sixty-two chains and twenty-
four links South and fifty-eight chains West astronomically
from the North-west corner of the Township of Smellie; thence
North, twenty-two chains and twenty-four links to a wooden
post and stone mound; thence East, fifty-eight ^{chains} to a wooden
post and stone mound planted on the West boundary of the
Township of Smellie forty chains distant from the North-
West corner of the Township; thence South one minute and
thirty seconds West thirty-nine chains and twenty-nine links
and six-tenths of a link; thence continuing southerly along
the westerly boundary of the Township of Smellie ^{South} two minutes
and thirty seconds East twenty-six chains to a wooden post;
thence West twenty-eight chains to a wooden post and stone
mound; thence North, eleven chains and forty-seven links

J. W. Scott;
Indian Affairs,

Very Rev. Fr. Beys O.M.I., has forwarded me the enclosed accounts for your kind consideration and payment. As you will note the expenses were incurred in connection with the inspection of the country surrounding McIntosh, the choice of the site, the inspection of the water fall and the special trip to receive and accommodate the land surveyor.

Kindly give your attention to this matter and if cheque is issued kindly send it to my address.

Yours very truly,

Joseph Guy O.M.I.

In accordance with the conditions of your letter
the 3rd ultimo, I am forwarding to you to-day under
separate cover plans in triplicate of a survey made by
me of the land of the Government of the State of New
York also enclosing a description of this property made
by W. A. White, Esq., and a statement showing that there
are no squatters or improvements on the land and
that the property is required for educational purposes.

On receipt of advice that this plan is approved
all bonds will be a percentage of the total number of bonds
of this issue. The bonds will be sold to you at the rate of \$3.00 per acre, as arranged.

The Deputy Minister,
Department of Lands & Forests,
Toronto, Ont.

such as lighting, water supply, pump etc. A report on this power has been made by C.H. Attwood, Chief Engineer of the Dominion Water Power Branch, Department of the Interior. For your information I submit the following extract from his report,-

Possible Power

Under the maximum regulated head of 17 feet and the estimated low-water flow of 14 c.f.s. the power available at the site is 22 h.p. By the use of the storage, however, it is estimated that the minimum flow may be increased to 25 c.f.s., although the head will be decreased as the storage is used until it is 14 feet. Under these conditions the estimated minimum power available is 32 h.p.

Use of Power

The amount of power available is sufficient only for small local uses such as lighting, pumping for water supply, sawing wood, etc. There is at present no market at the site, but it is proposed to establish there a small Indian mission-school, for the purpose of which the power could be very advantageously employed.

Your obedient servant,

(J.D. McLean)
Assistant Deputy and Secretary.

SURVEYS BRANCH

Toronto, September 5th, 1924.

Dear Sir:-

Your letter of the 21st ult. in reference to the application of your Department for a parcel of land in Smellie township, northwest thereof, district of Kenora, only reached this Department on the 2nd inst. and the plans referred to in your letter were duly received and the necessary declarations as requested made by Duncan Scott, Deputy Superintendent General of Indian Affairs, have been placed on file.

There seems now to be no reason why a sale of this land should not be carried out to your Department for the purposes of the Indian School. The total area involved

is ~~100 acres more or less~~. On receipt of this amount a sale may be carried out as stipulated in my letter to you on the 3rd July, last.

Yours truly,

Deputy Minister ~~Lands and Forests~~.

With cheque

Ottawa, 18th September 1924

Gentlemen,-

With reference to your letter of the 12th instant, please find enclosed Departmental cheque for \$193.45, being balance due you on account of survey made for this Department at McIntosh, Ontario.

The filing of your plan with the Province and their acceptance of same in connection with this Department's application to acquire the land surveyed was somewhat delayed and has just now been completed. Your account had not been previously closed, as it was desired to ensure that no further survey was needed in connection with this matter.

Dear Sir:-

Your letter of the 9th inst. forwarding Departmental
order for \$100.00 covering the purchase price of lands being
acquired for Indian school your Survey No. 1 and in the township
of Smellie has been duly received.

I presume the best method of transferring these lands
to your Department will be by an Order in Council but in any
case I would desire to know in whose name the vesting order
should be made. I am advised by the solicitor of our Department
that the granting of a patent from the Crown to the Crown is not
considered proper form of transfer.

I would be glad if you will advise me what your
wishes are in this matter.

October 11th 1900.

Dear Mr. Hunter,

The Department is building a residential school on the west shore of the south end of Canyon Lake near Mountain Lake on the Canadian National Railway, (C.N.R.) about 165 miles east of Winnipeg.

When this line was constructed the right of way was given to the railway company and the lake is now filled in with a culvert. The railway company, however, constructed the culvert close to the shore of the lake and as a consequence navigation is not practicable.

All the supplies for the school have to be taken by snow from McIntosh Station to the school, a distance of about three miles, and to reach the destination on the lake it is necessary to pass through this culvert.

Will you be kind enough to advise me whether the railway company obtained authority from your Department for filling in the right of way across the lake and if so, what restriction, if any, was made for navigation.

Yours very truly,

Deputy Superintendent General.

J. B. Hunter, Esq.,

EXECUTIVE COUNCIL OFFICE.

Report of the Committee of Council, dated the 11th day of October, A.D., 1924.

The Committee of Council have had under consideration the report of the Honourable the Minister of Lands and Forests, dated September 27th, 1924, wherein he states that the Department of Indian Affairs, Ottawa, has made application to purchase some lands for the purpose of establishing an Indian school in the vicinity of McIntosh, in the district of Kenora. These lands may be more particularly described as follows:-

(1) All that parcel of tract of land situate in the district of Kenora, Province of Ontario and Dominion of Canada, containing by admeasurement one hundred and fifty acres more or less, described as follows,- Commencing at a wooden post and stone mound on the north shore of Forest Lake distant sixty-two chains and twenty-four links south and fifty-eight links east from the northwest corner of the township of Smellie; thence north twenty-two chains and twenty-four links to a wooden post and stone mound; thence east fifty-eight chains to a wooden post and stone mound planted on the west boundary of the township of Smellie forty chains distant from the northwest corner of the township; thence south one minute and thirty seconds west thirty-nine chains and twenty nine links and six tenths of a link; thence continuing southerly along the westerly boundary of the township of Smellie south two minutes and thirty seconds east twenty-six chains to a wooden post; thence west twenty-eight chains to a wooden post and stone mound; thence north eleven chains and forty seven links and five tenths of a link to a wooden post on the southerly shore of Forest Lake and continuing north across the lake to the northerly shore of Forest Lake; thence northwesterly following the northerly shore of Forest Lake to the point directly south of the place of commencement; thence due north to the place of commencement; Reserving thereout and therefrom the waters of Forest Lake and Forest Lake and a road allowance one chain in width along the entire shore lines herein included. This parcel of land is shown on a plan of site for the McIntosh Indian School from a survey by S.P.A. Phillips, Ontario Land Surveyor, dated at Fort Arthur on the 7th June, 1924, of record in the Department of Indian Affairs, Ottawa, and in the Department of Lands and Forests, Toronto.

(2) The south half of lot No. 12, Concession 6, Township of Smellie, containing one chain wide along the shore of Canyon Lake containing 169 acres more or less.

Indian Affairs. (RG 10, Volume 6220, file 472-9, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

A sale has been carried out for these lands containing a total area of 325.35 acres at a purchase price of \$1. per acre amounting to \$325.35. The purchase was made by the Government of Canada and it is desired to vest these lands in the Minister of Indian Affairs, in the right of Canada as represented by the Superintendent General of Indian Affairs.

The Minister recommends that these lands be vested as above stated.

The Committee concur in the recommendation of the Honourable the Minister and advise that the same be acted on.

Certified.

Ottawa, 7th November 1924

Sir,-

Your file No. 56021

I am in receipt of your letter of the 20th ultimo
1924 conveying lands in the Township of Exellie and imme-
diately West thereof adjoining Canyon Lake to this Department
for the purpose of a school site.

I regret to state that on the plan of the school
site the distance along Concession 5 is noted as 25.17; this
should be 22.17. We are having this corrected on our plan
and would suggest that you make the correction on your copies.
The total distance of the site is 23 chains, is correct and the distance given in our
description, 25 chains, should be 23 chains.

It is further noted that an apparent clerical error
has been made in the Order in Council in stating the area
in Parcel 1 as one hundred and sixty acres and thirty-five
hundredths of an acre, which should be one hundred and sixty-
six acres and thirty-five hundredths of an acre.

It is also noted that in your description you have
left out the portion excepting the connecting waters between
Canyon Lake and Forest Lake. Is it to be presumed that this
was done with the intention of conveying to this Department
the water power which it is necessary to use for our school
purposes?

Department of Lands
and Forests,
Toronto, Ont.

Ottawa, January 15, 1925.

Very Reverend Sir.-

I beg to say the Department has received the voucher which you submitted recently accounting for expenditure in connection with the McIntosh Indian Residential School. Inclosed herewith you will find cheque No. 5172 in your favour for \$607.99, the balance due.

With reference to the amount at which payment has been made, I may say that there was an error of \$10.00 in the addition of the payroll under date the 30th August, which mistake has been corrected. I have to point out also that the amount of the Ashdown Hardware Company's account, namely, \$10.23, has been deducted from the voucher which you presented. I may say also that seemingly there was an error in the amount paid John Land on the 23rd August as per payroll.

Your obedient servant,

J.D. McLean
Asst. Deputy and Secretary.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

1. The first step in the process of the development of a new product is the identification of a market need. This is often done through market research, which can be conducted in a variety of ways, including surveys, focus groups, and interviews. The goal of market research is to identify the needs and wants of potential customers, and to determine the size and growth potential of the market.

2. Once a market need has been identified, the next step is to develop a product concept. This involves creating a detailed description of the product, including its features, benefits, and target market. The product concept is then used to develop a business plan, which outlines the company's strategy for developing and marketing the product.

3. The third step in the process is to develop a prototype of the product. This is a physical model of the product that is used to test the product concept and to gather feedback from potential customers. The prototype is typically made from a material that is easy to work with, such as wood or plastic, and it is often used to demonstrate the product's features and benefits to potential customers.

4. The fourth step in the process is to conduct a pilot test of the product. This involves selling a small number of units of the product to a group of potential customers, and then gathering feedback from them. The pilot test is used to determine whether the product is feasible, and to identify any problems that need to be addressed.

5. The final step in the process is to launch the product into the market. This involves developing a marketing plan, which outlines the company's strategy for promoting the product and reaching potential customers. The marketing plan typically includes a budget, a timeline, and a list of marketing activities, such as advertising, public relations, and sales.

J. W. Pugsley, Esq.,
S e c r e t a r y ,
Department of Railways & Canals,
O t t a w a , O n t ,

Dear Sir,-

Referring to your letter of the 12th instant, with reference to the alleged blocking of navigation on Canyon Lake near McIntosh on the Quibell Subdivision. I was informed some time ago that the trouble being experienced was partly caused by unusually low water; however, we have taken no steps to deepen the channel and no such action is contemplated by us, as our Legal Department advise us that this is not our obligation.

My understanding is that, in previous seasons, supplies for the Indian School have been taken through the opening on a scow towed by a gasoline launch. I am not informed as to whether there is now sufficient depth of water to enable this to be done. The report I have on the subject indicates that to deepen the opening now would be a hazardous undertaking, with the possibility of causing interruption to traffic.

It is presumed that the Department of Indian Affairs will be informed of the views of our Legal Department to the effect that no statute was infringed when this fill and diversion were made by the Government.

Yours truly,

(Sgd) S. J. Hungerford,

Indian Affairs. (RG 10, Volume 6220, file 472-0, part 1)

Winnipeg, Man. January

Silver - Canyon Lake, Near McIntosh, Ontario.

Memorandum to Mr. Warren.

Answering yours of the 21st instant, the National Transcontinental Railway Act is silent on the matter of obstructing or diverting navigable waters.

The Government Railways Act does not, in my opinion, apply, first because its provisions are not incorporated in the N.T.R. Act, and secondly because it only applies to Railways vested in the Crown and under the control of the Minister of Railways. This Act provides that the "Minister" shall not obstruct any navigable waters. The work on the N.T.R. was done not by the Minister but by the Commissioners of the N.T.R.

The Dominion Railway Act is only made applicable in a limited way, that is certain powers are given, but no obligations, duties or restrictions are imposed. Accordingly, I do not think the navigable waters provisions of the Dominion Railway Act apply to this work.

The only other Act that has any bearing on the subject is the Navigable Waters Protection Act in force in 1909 when the work was done. This Act did not forbid such as that at Canyon Lake. In any event as the Act is not specifically named in the Act it is not bound by its provisions.

Accordingly it seems to me that when this fill and diversion were made by the Government no statute was infringed.

Even if this work had been done in contravention of a statute, it seems to me the deepening of the stream to permit of navigation would be a matter of construction and not one of "operation and management" which latter are the only powers entrusted to us in relation to the N.T.R.

I would suggest, therefore, that reply be made to the Dominion Government that no sanctions were required for the work done either under the Navigable Waters Act, or any other Railway Act, and that the matter being one of construction is one for consideration by the Dominion Government alone.

"H. Hair"
Solicitor.

S. J. Hungerford,
Vice-President.

J. W. Pugsley, Esq.,
Secretary,
Department of Railways & Canals.
Ottawa, Ont.

Dear Sir:

Referring to your letter of the 5th instant, file 21912, respecting the alleged blocking of navigation on Canyon Lake near McIntosh, Ontario; we have no wish to enter into a controversy on the subject of whether the work of deepening the channel would be hazardous, expensive or otherwise, but you will probably appreciate that in a matter of railway engineering we naturally put reliance on the considered views of our engineering staff.

There is this about it, however, that as it is a matter for the Government to deal with in any case, according to the advice of our Legal Department, the Government may accept the views of the Indian Department's Architect that the work could be easily done, and undertake the work under our supervision. For your information I enclose copy of Mr. G. M. Hair's opinion of January 27th, 1925, which is concurred in by our Vice-President and General Counsel.

The whole trouble seems to have been caused by the failure of the Indian Department to inform the Commissioners of the navigation requirements when the line was being constructed.

Yours truly,

(Sgd) S. J. Hungerford
Vice-President

Dear Sir:

Referring to your letter of January 19th, file 21912, respecting the blocking of navigation on Canyon Lake near McIntosh, Ontario; our division engineers at Port Arthur after conferring with the Principal of the School, estimates it will cost \$2000.00 to provide four feet of water ten feet wide under the opening, which is the depth required by the barges belonging to the Indian School.

The present depth of water is 1.5 to 2 ft.

Yours truly,

of the land.

It will be necessary for you to keep returns, in
indicate, of the labour employed. The names of the men employed
and all the other columns on the form should be filled in.
Each man should also be given a number.
You should certify to the Department the number of the authority
He will forward
payment of the labour to the
amount of the grant. Should there be any balance on hand after
the work is completed, you should hand same to Mr. Bureau for
transmission to the Department. The amount of \$500 is all we
can provide at the present time towards the cost of clearing the
land.

Your obedient servant,

Acting Asst. Deputy and Secretary.

Very Reverend Sir:

Mr. Indian Agent Edwards writes that Father Perreault, Principal of the McIntosh Indian Residential School, gave you, in the fall of 1927, copy of a contract entered into by the Divisional Engineer of the C. N. R. - such contract having to do with the deepening of the channel under the railway culvert near the school. If you have this contract, I would be grateful if you would forward it to the Department for consideration.

Your obedient servant,

J. D. McLean

Dear Mr. Hungerford:

I wish to refer to my letter of September 22nd, last, and to your answering telegram of October 4th. I should be grateful if you could now arrange with your Division Engineer at Fort Arthur to have the channel in question deepened. The boats of the McIntosh Indian Residential School are using the culvert on the railway, a few hundred yards west of McIntosh station, and it is quite urgent that a channel, 4 ft. deep and 10 ft. wide, be prepared without delay. This Department will be responsible for the cost of the work.

Yours very truly,

J. D. McLean,

Acting Deputy Superintendent General.

EXTRACT FROM LETTER OF MR. FRANK EDWARDS,
INDIAN AGENT, KENORA, DATED APRIL 22nd, 1929,
ON THE MCINTOSH INDIAN RESIDENTIAL SCHOOL.

[Handwritten signature]

An amount for clearing and brushing land.

attached
The Principal informs me that nothing has been done as regards deepening the culvert under the C.N. Ry. It will only be possible to get through with a small boat unless this is done and he has over 1000 logs he wishes to get through and has to use the large boat for bringing the supplies from the station to the school.

There is also a large hole in the concrete dam which should be attended to while the water is low. This has been reported before.

The Principal wishes to know if the Department will purchase for the school a piece of land as shown on the attached rough sketch. He requires this to get wood for fuel, and to protect the school from fire.

ARCHIVES PUBLIQUES
CANADA

Ottawa, 23rd May 1929

Sir,

ref. your file #56021

By Order in Council approved by His Honour the Lieutenant Governor on the 2nd October 1924, this Department received title to 525.35 acres of land for the McIntosh Indian boarding school, being the S. 1/2 Lot 12, Con. 6 of the Township of Swellie and other lands in unsurveyed territory immediately to the West of the Township of Swellie.

The Principal of the boarding school now reports that it is desirable to acquire that point of land between Forest Lake and the western boundary of the Township of Swellie. This land is required for the purpose of supplying fuel. It is also noted that its control will lessen the fire hazard for the school.

Kindly state whether your Department is prepared to sell this land to this Department and upon what terms. A blueprint is enclosed showing the portion of land already in possession of this Department and used in connection with this school bordered in red, and the parcel of land it is now desired to acquire tinted in red.

Your obedient servant,

(J.D. McLean)

J. D. McLean, Esq.,
Acting Deputy Superintendent General,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sir,-

I have your letter of the thirtieth ultimo, regarding the deepening of the channel at the culvert under our embankment near Moitosh.

On taking this up with the local officers, I am informed that, owing to the volume of water passing through the culvert at the present time, the work could not be undertaken just now in an efficient and economical manner, and that it would be very much better to wait until about the fifteenth of July, when it is hoped that the water will be lower and the current less. It is expected that, under favorable conditions, the work can be done for about two thousand dollars, but to undertake it at the present time would cost very much more.

Will you please advise if this is satisfactory to you? I wish to assure you that we are anxious to oblige your Department in any way but at the same time do not think that the Department should be put to any unnecessary cost.

Yours truly,

S. J. Hungerford

ONTARIO
DEPARTMENT OF SURVEYS
OFFICE OF SURVEYOR GENERAL

Toronto, May 28th, 1929.

Dear Sir,-

I have received the application of your Department on behalf of the Indian Boarding School, for a further area of land West of the township of Smellie, in the district of Kenora.

There have already been disposed of for that purpose, (as recited in your letter) 325 acres of land, which were granted by Vesting Order in 1924, and I may say that the present application is for an additional 500 to 600 acres of land, lying adjacent to Forest Lake and adjoining the lands already granted.

This application cannot be considered until an officer of this Department has had an opportunity of making an inspection on the ground and finding out the conditions as they exist. This will be given attention at the earliest opportunity.

In this connection I would also like to refer you to a letter of the 4th July, 1928, regarding the situation of land along the shores of Alexander Indian, Alexander and Boulder Lakes, caused by the operation of the dam constructed to supply electrical energy at the school.

(J. D. McLean, Esq.,)

DEPARTMENT OF SURVEYS

Toronto, July 24th 1929

Dear Sir,-

Re. McIntosh Indian School Lands

x

x

x

Our Inspector also reports that the method of clearing land in the vicinity of the school has not been carried out very satisfactorily, that instead of culling the timber and making a park near the school, they have cut down all tree-growth, making an unsightly waste, probably in excess of fire protection requirements.

The land which is now being applied for contains one of the best stands of timber in that vicinity, about 50% Jackpine, and 10% Spruce, and the Inspector was informed that this was not required for fuel, but rather for pasture for cattle and horses. Under the circumstances, the Department cannot favourably entertain the application for further lands in that vicinity.

The Assistant Deputy & Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sir,

Referring to Mr. A. F. McKenzie's telegram of the 28th instant, authorizing me to have work completed to insure three feet of water in the McIntosh culvert on the C.N. Railway near McIntosh School. On the 26th instant I received a telegram from Mr. E.W. Robinson, District Engineer of the C.N.R. Port Arthur, saying:

"Have gang now working on concrete culvert McIntosh. Clearing loose rock from channel and when this is done suggest it will not be necessary to deepen waterway in the solid rock. Stop. If possible wish you meet foreman Welsh at McIntosh on Wednesday."

I went to McIntosh arriving there midnight Tuesday. On Wednesday in company with the Rev. Principal and the Brother, we met Foreman Welsh and looked over the situation. The foreman explained it would be a very expensive job to put in coffer dams and take out much of the solid rock, and also that the amount of the appropriation, \$2,000, was just about exceeded. He informed me that with the expenditure of a little more money and providing the water kept warm, he could guarantee a depth of three feet of water for very little more expense, and as the Principal informed me they could manage with this amount, I sent the following telegram to Mr. Robinson:

"Foreman Welsh guarantees at least three feet of water in culvert at present water level when all loose rock and a few points of solid rock are out. Stop. School could manage with this providing this depth absolutely guaranteed. Please instruct your foreman. (signed) Frank Edwards."

DEPARTMENT OF INDIAN AFFAIRS
CANADA

INDIAN AGENT

Kenora, Ont

Sept. 9th, 1929

The Assistant Secretary,
of Indian Affairs,
Ottawa, Ont.

Dear Sir,

Referring to your letter #130-7-9 of the 4th instant re improvements on culvert Canadian National Railways near McIntosh School. I visited this School on Saturday and Sunday, the 7th and 8th, and found that the Railway Company had moved their men from the work and the depth in the culvert at one point was only 2 ft. 6 inches and not 3 feet as promised. It is impossible for the School to take their launch through with any supplies and in going through with a row boat and outboard motor, they even hit bottom. The Principal is letting the water through the dam from the lakes higher up so as to enable the water power branch to do the necessary work in repairing the hole in the culvert. This will bring up the water a little and perhaps they will then be able to go through. They have to bring gravel from the lake North of the track through the culvert to the School for the repair work to the dam, which is being started in a few days, and as they are unable to bring the launch through, they request authority to purchase a large Johnson Outboard engine. The Father Provincial from St. Boniface was at the School and we discussed the matter. I suggested he should ask the Principal of the Kenora Residential School if he would be willing to give them his large Johnson, and he was agreeable to do so, and the same is being shipped today. The Principal of the Kenora School would like, if possible, to have authority to purchase a smaller one, namely a Johnson Sea Horse to replace it. This would be the cheapest way of surmounting the difficulties. I shall be glad if you can see your way clear to purchase a Sea Horse Johnson Outboard Motor for the Kenora School and charge the big one to McIntosh School.

This Summer has been exceptionally dry and I personally do not think the water will be as low as this again for some time so perhaps the school could manage without deepening the culvert any more.

Your obedient servant,

[Signature] Agent

Ottawa, September 14th, 1929.

I have your 108-20 of the 9th instant, with reference to the improvements to the culvert at the McIntosh Indian Residential School. I note that, as they required a large Johnson Outboard Motor, you have arranged shipment from the Kenora Indian Residential School with the approval of the Church authorities.

As a small outboard motor is now required for the Kenora School, you may make the purchase.

Your obedient servant,

Acting Asst. Deputy and Secretary.

Frank Edwards, Esq..

McIntosh Ont. Oct. 7th. 1929

Dear Sir,

My dear Sir,

I am sorry to hear that you are having trouble with the engine of your canoe. I am most sure that it is not more than a foot deeper, which is not sufficient. I regret of not being capable to O.K. the work and trust all in your care.

I remain, Sincerely Yours

R. McIntosh

7-
OFFICE OF INDIAN AGENT
Kenora,

October 14th, 1929

Assistant Deputy & Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sir,

Enclosed please find voucher for \$2,744.20 in favor of the Canadian National Railways for work on culvert at McIntosh. The Principal refuses to O.K. the account as he says what was done was absolutely of no use. The arrangement was that the culvert was to be deepened four feet but the Principal states it has not been deepened more than a foot, and cannot pass through with a large boat. He says they are even obliged to lift the outboard engine on the canoe.

This work was authorized from Ottawa and the Railway Company promised at first to deepen the culvert four feet as the Principal states, but this was not done. As I presume the account will be paid, I have, therefore, O.K'd it, although the work is not satisfactory.

Your obedient servant,

[Handwritten signature]
Indian Agent

Ottawa, October 18, 1929.

Dear Sir:

Mr. Indian Agent Edwards, of Kenora, has forwarded accounts Nos. W.9068-9 from your office, which have reference to deepening of culvert near McIntosh, Ont., so that it will be passable by boats of the Indian Residential School there. At the request of your District Engineer, Mr. E. W. Robinson, Mr. Edwards went to McIntosh on August 20th and learned from your foreman, a Mr. Wilson, that, with an expenditure of a little more money (evidently over and above the \$8,500 authorized) and provided the water kept down, he could guarantee a depth of three feet of water at the then present level. On the 29th, after Mr. Edwards had returned to Kenora, he received a telegram from Mr. Robinson that he could not guarantee three feet of water, and he suggested shallower draft barges and boats rather than face expensive excavation of solid rock.

The Rev. Principal of the School at McIntosh writes on the 7th instant that it is necessary to lift the outboard engine of the canoe and that their larger boat cannot go through at all. This Department is satisfied that your District Engineer has done what he could for the present authorized; but, before paying the account, I should be glad to have on our file a report from your District Engineer, showing just what has been done and indicating, with estimate if possible, what additional work would be necessary to prepare a really satisfactory channel for the purposes of our school. If this report could be sent to me in duplicate, I should be very grateful.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

A. C. Egan, Esq.,

secured and deposited in a pile of timber
in anticipation of coffer-damming the channel, which
later considered too expensive and abandoned.

The additional depth secured from this work in places ex-
ceeded 3 ft., but on the average was slightly less. I made an in-
spection of this Culvert three weeks ago, and in testing the depth of
water, found it about 2.5 ft.

Canyon Lake at present, on account of the low precipitation
this past Summer and Fall, is about 1 ft. 6 inches, or 2 ft., lower
than normal. This condition, alone, in my opinion, accounts for
difficulty experienced by the Indian Canal Authority in
navigating the channel. Under normal water levels they should
experience no difficulty whatever.

Estimated it will cost about \$4000.00 to lower
approaches an additional 2 ft., through solid rock, which
estimate includes the de-watering of the existing channel
to enable blasting to be done. The most expensive part of
operation is the coffer-damming of the open ends and the
work in the rock side walls of the approach, in order
to prevent seepage through the walls.

I am still of the opinion that
warranted, and that the Indian Dept. would
use of similar work and design.

Signed (H. J. Holison)

Division Engineer

Re: Bills W-9068 and W-9069.

Sir:

I have to acknowledge, with thanks, receipt of your letter of the 11th instant, enclosing a report, in duplicate, from your Divisional Engineer at Port Arthur, in connection with the design of the culvert at the McIntosh Indian Residential School. The cost involved in further widening the channel has been noted, and it is hoped that, under normal conditions, the school will experience no difficulty in maintaining the channel. A cheque in payment of the amount covering the cost of the work that was carried out in the widening of the channel under the culvert will be forwarded in due course.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy & Secretary.

OFFICE OF
INDIAN AGENT

March 31st. 1930

The Principal of the Mc.Intosh Indian Residential has just been in to see me and informs me that the Narrows & Wabuskang Indians are in a terrible state of destitution and I have therefore given Authority to the Hudson's Bay Co. to issue the necessary relief but to keep the expense down as much as possible.

The Principal informs me that they have got Flu, that Dr. Day of Day & Bell Souix Lookout has attended to them, and also says that under the circumstances he has had to take a number of Children into the School who are under the School age, to help relieve the destitution.

He has not sent in any applications for admission yet, but considers the department should pay compensation to the School for what they may do.

I told him that I could do nothing without authority from Ottawa so he requests the department to make him an allowance of \$500:00 as soon as possible for the purpose of clearing the land. *as well as paying for relief money given*
He would put the Indians to work immediately to clear them out as well as doing the work necessary at the School.

the necessary instructions,

servant,

Indian Agent,

Assistant Deputy & Secretary,

Ottawa, November 23rd, 1940.

Sir,-

Reference is made to the question of your letter of the 17th instant regarding the request of the President of the National Indian Council for a grant of \$500 for the purpose of carrying out the work of the Council for the year 1940-41. The Council has been advised that the Government will be unable to provide the amount requested.

It is suggested, however, that the President will consider to what extent the Council is responsible for the amount of the grant and that the Council should be advised of the amount of the grant which it is requested to pay under cover of official letter dated April 1st, 1941. This grant should be considered as being by the Council's subscription as it is for the benefit of the Council. The Council should be advised accordingly.

As suggested above, the President should be advised that the Council should be responsible for the amount of the grant and that the Council should be advised of the amount of the grant which it is requested to pay under cover of official letter dated April 1st, 1941. This grant should be considered as being by the Council's subscription as it is for the benefit of the Council. The Council should be advised accordingly.

Very respectfully,
A. P. Macdonald.

INDIAN AFFAIRS

Kenora, Ontario.
January, 15th. 1931.

Dear Sir,

On my trip of inspection to Mc.Intosh School last week, the Principal asked me if the Department could not do something re raising the water in Canyon Lake, so that his boat could pass rough the culvert. The work the C.N.Railway has not deepened channel enough. He informs me a dam was put at the outlet of Canyon Lake, it would raise the water sufficiently for his purpose. He says that Mr. E.Wallace a small lumber man operating there, has authority from Toronto to put in a dam, but he is not going to do so.

If the Department made a grant of \$1000:00 for this purpose, the school would put in the dam under the superintendence of Brother Eugene Gauthier, so as to keep the water up to normal height, and the water would not be raised in the lake enough to do any damage to the settlers, campers or anyone else.

He asks that the Department purchase the material, about \$600:00 for a Chicken House and the School would supply the labour and if the Department agrees, the Principal would go ahead with the work, and render the account after the 31st. March.

Ottawa, January 24, 1931.

Sir:

I have your 108-20 of the 15th instant, with reference to a grant of \$1,000 for the erection of a dam near the McIntosh Indian Residential School, so that the level of Canyon Lake will be raised and the passage under the C. N. R. culvert made deep enough for the school boats. There are no funds available for this purpose at the present time, nor will there be any during 1931. Further, there has been so much difficulty in connection with the raising of waters in this section, that the Department wishes the school to see if the present situation is not satisfactory before we even consider making application to the provincial authorities for the right to change the level of the lake.

Your obedient servant.

A. P. MacKenzie,
Secretary.

Frank Edwards, Esq.,
Indian Agent,

CAN.

Sir:-

I visited the McIntosh Indian Residential School on Sunday, the 3rd instant. I found conditions here to be satisfactory, the school well managed, and in a most cleanly condition. The pupils had all returned from their holidays.

Owing to the low water in Canyon Lake, the school launch, which brings in all supplies, has difficulty in getting under the culvert of the C.N.R. track. The Principal suggested that the Department provide a grant to build a dam at the outlet of the lake. I told him it would be impossible at the present time to consider making any grant for this purpose.

Your obedient servant,

J. D. Sutherland

J. D. Sutherland

Sionx Lookout

MAY 5 1942

Indian Agency

Mr. G. Swartman,
Indian Agent
Sionx Lookout, Ont.

Dear Sir:-

I intend to have the following pupils discharged
at the end of June; being of age limit

32 Laurent Abraham
42 Albert Tahpahtah
75 Joseph Kijik
76 Maurice Pitikwan
90 Yvon Nicanipinens
91 Wilfrid Stone
124 Georges Spence
0121 Florence Tenesoo
0132 Revina Abraham

And I would like to keep for another year the
three following girls:

046 Emerentienne Menaogijik
048 Sarah Menaogijik
081 Therese Kapeskang

These three girls like the school and wish to stay for
another year.

046 and 048 Emerentienne and Sarah Menaogijik are orphans
and have no place where to go. With another year they
would be old enough to get a place and we would try to
find a good one for them. Being very good girls, it would
be very sad if, after their school time, they get spoiled,
for the reason of having no body and no place where they
can be protected.

As for 081 Therese Kapeskang, this girl was 16 years old
a few days ago; she is half blind and also neglected by both
parents who do not live together. During the last summer ho-
lidays she stayed with her mother who died last winter. She
is homeless and unable to earn her living being so blind.

For these reasons I ask the Department to grant us
the authorization of keeping these three girls for another
year.

Yours very truly

E. Bureau
Principal

July 11, 1942.

Dear Sir:

In checking the June quarter return of the McIntosh School it is noted that the pupils ~~mentioned in the return have not been in the school~~ during the year:

No. 68	No. 121
" 73	" 122
" 110	" 123

Apparently these children were allowed home on holidays last year and did not return. If there is no likelihood of their coming back for the academic year 1942-43, the Principal ~~should notify the Training Division, so that it will~~ enable him to delete their names from the return.

Yours truly,

Philip Phelan,
Chief, Training Division.

Mr. G. Swartman,
Indian Agent,
Sioux Lookout, Ont.

Mr. G. Swartman, Indian Agent, Sioux Lookout, Ont.

I have your letter of the 18th instant, with reference to certain Grassy Narrows children who failed to return to the McIntosh Indian Residential School at the commencement of the current academic year.

If you consider that the R.C.M.P. would be able to reach any appreciable number of these children, you may arrange to have one of the officers visit Grassy Narrows. However, the Department does not see any necessity for this

DIARY DATE

1. The following letter has been received from Mr. J. Swartman, Indian Agent, Sioux Lookout, Ont.:-

"We have been authorized by our Department to make arrangements with the R.C.M.P. to proceed to Grassy Narrows in order to secure several children there for the McIntosh Residential School. We have ~~received from Mr. Swartman~~ ~~by letter~~ ~~that~~ ~~there are~~ ~~about~~ ~~ten~~ ~~children~~ ~~now~~ ~~at~~ ~~Grassy Narrows~~ ~~and~~ ~~about~~ ~~to~~ ~~be~~ ~~sent~~ ~~to~~ ~~the~~ ~~school~~. A list of their names is enclosed. We have already notified most of them by letter that they should take the ~~mm~~ children to school immediately.

If you contemplate making a trip to Grassy Narrows in the near future, please let me know & I shall endeavour to get in at the same time."

2. The only means of transportation from Kenora to Grassy Narrows is by aeroplane & the return fare via C.P. Airlines Ltd. plane is \$20.70.

3. May authority for this patrol be granted as soon as possible, please, in order that I can communicate with Indian Agent Swartman & arrange a date to make the patrol with him.

DETACHMENT

46 X 902-1

P.C.R.

3-3-43

Further reference is made to previous correspondence.

We have been advised by the Reverend Principal of the school at Linton that as a result of your recent visit to the Reserve, I believe this represents practically all the children of school age, with the possible exception of one or two sickly ones, who are

taking any further action at this time. The Reverend Principal has expressed himself as being well satisfied

that the reason given by the parents not having their children sent to the school is insufficient cloth-

A. R. V. NO

ing of the children at Linton was better than at other schools in his inspectorate. I have occasion to investigate cases of punishment at this point of this nature. I mention this for purposes of record only.

It is with thanks to you for your co-operation in this matter."

3. In view of the above no further action will be taken in this connection.

Mr. G. Swartman, Indian Agent, Sioux Lookout, Ont.

I desire to refer to official letter of January 25, with reference to returning certain Grassy Narrows children to the McIntosh Indian Residential School.

From recent reports received from the R.C.M.P. it is noted that through their co-operation 6 children have now been returned to the school. We have also received a copy of your letter of March 17 addressed to the R.C.M.P. and feel that you took the proper action in supplying them with the information contained in your letter.

Mr. G. Swartman, Indian Agent, Sioux Lookout, Ont.

With reference to the March quarter return of the McIntosh Residential School, you may inform the Principal that the admission of the following children is approved:

Felice Adele Paul
David Beaver
Catherine Land

Louisa Kapeskang
Marguerite Rose Swain
James Swain

Pupils 046 and 048 are over 17 years of age and pupils 046, 048 and 081 are over 17 years of age. It is presumed that the Principal intends to apply for their discharge at the end of June.

Philip Phelan,
Chief, Training Division.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Sioux Lookout, Ont., May 17th, 1943.

Indian Affairs Branch, Dept. of Mines and Resources, Ottawa.

We have been requested by the Reverend Principal of the McIntosh Indian Residential School to have the following pupils remain at the school for another year:

✓Therese Kapeskang, No. 081 ✓
Sarah Nenaokijic, No. 048 ✓
Emerentienne " , No. 046
Suzanna Ferguson, No. 086

The reasons given are as follows and my investigations reveal them to be correct: The parents of Therese Kapeskang do not live together. This girl is almost blind having undergone an operation for cataracts about eighteen months ago. She has no place to go and is not employable. The Nenaokijic girls are orphans and also have no place to go, although we will endeavour to have them employed if suitable work can be found for them. Suzanna Ferguson is an illegitimate orphan, consequently there is nowhere for her to go when she leaves the school unless we are able to find employment for her as well as the others.

It is recommended that these girls be allowed to continue at the school for another year or until such time as arrangements can be made for their employment.

Indian Agent.

Mr. G. Swartman, Indian Agent, Sioux Lookout, Ont.

With reference to your letter of the 17th
No. 081, remaining in the McIntosh Residential
School for another year.

There is a considerable demand for domestic
servants in Ottawa and the Department has been
successful in placing several Indian girls in
such positions where they are giving reasonable
satisfaction. We are anxious to obtain bright,
intelligent girls for other positions of a
similar nature and under the circumstances we
would appreciate receiving from the Principal
and yourself detailed information regarding
each of the other three girls mentioned in your
letter. Please state if they have had any training in domestic
work while at the school and also express an
opinion regarding their ability as domestic
servants. If any of the school staff or yourself
have a camera you might let us have pictures of
the girls.

Philip Phelan,
Chief, Training Division.

July 15, 1943.

Mr. G. Swartman, Indian Agent, Sioux Lookout, Ont.

With reference to the June Quarter return of the McIntosh Indian Residential School the admission of the following children is approved:

169 David Landa
0179 Annie Gielok
0180 Marie Rose Iacene

The discharge of pupils numbered as follows is also approved:

85 Louis Ajopinens	87 Robert Assin
89 Jean Louis Assin	126 Marc Spence
0101 Jeannette Strong	0167 Rosalie Anakone
and 0168 Annie Anakone	

On May 19 I wrote you regarding three girls from the McIntosh school who were over 16 years of age. Pupil No. 046 must be 17 years of age and pupil No. 048 must be 18 years of age. It will not be possible to allow a grant for pupil No. 048 and her name should be taken off the return at once. In the case of 046 the Principal should either apply for her discharge or request permission to keep her for another year. In the latter event he should state his reasons for wishing to retain her.

Philip Inolan,
Chief, Training Division.

McIntosh Indian Residential School
McIntosh Ont. August 2nd. 1943

Mr. C. Swartman,
Indian Agent,
Sioux Lookout, Ont.

Dear Sir:-

Re: Suzanne Ferguson O 86

We would greatly appreciate if you could obtain that this young girl be granted another year at School.

We won't by no means let her out of school to work for any one and we do hope she gets married during the coming year. It would be the only way to assure her a safe future.

Poor illegitimate child of an abused young girl she would surely follow her mother's path judging by her attitude and disposition.

We believe that the only means to save her is to let her choose here the man she likes and we prefer to keep the girl at school even at our own expense than to let her go out and work for any one.

The child given to the school by her dying mother must and will find here happiness and protection.

Trusting you fully understand this request
I am Yours truly

C. Peneault O.M.

Principal

FILE 144:EM

Sioux Lookout, August 4th, 1943.

Indian Affairs Branch, Department of Mines & Resources, Ottawa.

Enclosed please find copy of letter received from the Principal of the K.I.L. Indian Residential School with request to reconsider girl in the school for another year. This is one of the pupils referred to in Mr. Phelan's letter of April 20th.

This girl is not a Band member of this Agency consequently I know nothing of her history but I believe Father Herr's reasons for wishing her to remain at the School for another year are very sound.

Please advise with respect to this matter.

Yours very truly,

Indian Agent.

CANADA
DEPARTMENT
OF
MINES AND RESOURCES
INDIAN AFFAIRS BRANCH

144:7M

Sioux Lookout, Ont., Oct. 7th, 1943.

Indian Affairs Branch, Dept. of Mines & Resources, Ottawa.

We are enclosing herewith Quarterly Returns from the McIntosh Indian Residential School for the quarter ended September 30th, 1943, also nineteen applications for admission, as well as discharge forms for the same quarter.

It is noted that Rita Ajopinace, listed as pupil No. 0190 is under school age, but since she has no one to look after her, it is recommended that she be admitted to the McIntosh school.

DEPARTMENT
OF
MINES AND RESOURCES
INDIAN AFFAIRS BRANCH

141:7M
:73

Sioux Lookout, Ont., Oct. 6th, 1943.

Indian Affairs Branch, Dept. of Mines and Resources, Ottawa.

From time to time we have applications for admission from the Indian Residential Schools in this Agency listing pupils whose names are spelled entirely different from those shown in our Census books and Treaty Pay-Lists. We have suggested to the school authorities that the names be shown exactly as on the Treaty tickets in order that there will be no confusion or difficulty in identifying the children at a later date. Since this request has not always been complied with, it is recommended that the Department issue instructions to the school authorities that the children's names must be listed the same as appears on their Treaty tickets.

Ottawa, October 15, 1943.

Mr. G. Swartman, Indian Agent, Sioux Lookout, Ontario.

With reference to the September Quarter return of the McIntosh Indian Residential School, the Department approves the admission of the following pupils:

Elizabeth Muscu,	Martin Ackmeopines am,	Stephen Konkane,
Helene Sagady,	Michel Moniane,	Joseph Sagady,
Stephen Gossie,	Wilfréd Gossie	Sara Sagady,
Suzanna Sagay,	Marcelline Moniane,	Christine Guinnal,
Charlotte Mikonnab,	Ktiennette Muscu,	Vernique Muscu,
	and Peter Sagay.	

The discharge of the following is also approved:

Therese Kapakang	No. 081	John Fisher	No. 83
Annie Spence	0111	Gordon Eueky	92
Anita Matinet	0143	Robert Kijik	121
Robert Sands	57	Ktienne Ackmeopineckaus	No. 153

Applications have not been forwarded for No. 169, 170, 0191, 0192 and 0193. It is also noted that No. 100 David Talbastler and 0171 Rosetta Monias were shown on the June discharge. There is no correspondence on our files re- discharge. Kindly explain this omission.

Copy sent to Father Plourde

Ottawa,
November 11, 1943.

Reverend Sir:

I understand that pupils 046 and 048 have recently returned to the McIntosh Residential School. In view of the fact that these girls are orphans and the special circumstances in each case, it has been decided to allow grant for them until you find it possible for them to secure employment. I trust that you will be successful in doing so in the near future. In any case it should be distinctly understood that grant will not be allowed for them for a longer period than to June 30, 1944. If they have not been discharged in the meantime they will have to be discharged on that date.

Yours truly,

Philip Melan,
Chief, Training Division.

MoIntosh Indian Residential School
MoIntosh Ont. November 17th. 1943

Mr. Philip Phelan,
Chief, Training Division.

Dear Sir:-

Thanks for leaving pupils No 046 & 048 another year at School. But I think that my request was not well understood. Pupil 048 who is the oldest one, left the school sometimes in June and went to work on a good catholic family at Sioux Lookout. Although lonesome, she did not return to the school and according the last news I believe she will keep up with her work. I consider her case definitively settled and her name is not going to be shown in my returns.

Pupils no 046 came back in the beginning of September and I am glad you have approved her readmission in school for another year.

Yours very truly

E. Tremblay

Sioux Lookout, Ont., January 11, 1944.

Indian Affairs Branch, Dept. of Mines and Resources, Ottawa.

We are enclosing herewith Quarterly Returns from the McIntosh Indian Residential School for the period ended December 31st, 1943, as well as Application for Admission on behalf of Elsie Scott. Although Pupil No. 172 is under school age, his admission is requested since he has only recently returned from Sanatorium and both his parents are dead. The Principal also wishes to have Pupil 0197 admitted, stating that this girl's mother is sick and unable to look after her.

Father Perrault also asks the discharge of the following pupils who are fourteen years or over, and wish to remain at home to help their parents:

No. 110 Robert Spence
111 William Fisher
119 Samuel Kejick
146 Steve Wahasona
0169 Marcelline Gesick.

Requisition for Material required at the McIntosh School is also enclosed.

Ottawa,
May 9, 1911.

Mr. G. Swartman, Indian Agent, Sioux Lookout, Ont.

We have just received the application from the father of two children for the admission of his children to the nearest Indian residential school. The father states that the father of the child requested that one be placed in a residential school, but this request alone is not sufficient to justify his admission to a residential school. The application from above states that the child is only three years of age and that both parents are living. Are there any special reasons why they could not consent to the child being in a residential school? The only reply would be that the child is too young to be admitted.

Philip Phelan,
Chief, Training Division.

McIntosh Indian Residential School
McIntosh Ont. July 4th. 1944

Mr. G. S. Hartman
Indian Agent
Sioux Lookout, Ont

Dear Sir:-

I am enclosing the names of two new children
to be accepted to School.

Pupil 0193 Evelyn Assin is under school age, but being
neglected by her mother, her father asked me
to take her at school.

Pupil 174 Cecil Penewatang (Abraham) Mrs. Pierre Penewatang
is the grand mother of Cecil. She has adopted
him at birth and has always looked after him
since. Her husband died last year and being
old herself, she can no longer care for the boy

The following children are to be discharged; they are of
the age limit or not expected to come back.

046 Emerentienne Nenaogijik	Raymond Kwatibens	132
090 Marie Paule Kijik	John Ice	143
0104 Madeleine Micanipinens	Archie Molvor.. ..	156

As for pupil 086 Suzanne Fergusson she is 17 year old,
but is absolutely orphan and does not know where to go.
Just now she is at the Sanatorium, she is expected to
come out in a few months, but being of delicate health
it would be preferable for her to stay at School for
the rest of the academic year.

Hoping my requests be favoured
I remain, Sincerely yours

C. Penewatang

Principal

PLEASE QUOTE
FILE 144:7M:1

Sioux Lookout, Ontario,
October 10th, 1944.

Indian Affairs Branch, Dept. of Mines and Resources, Ottawa.

We are enclosing herewith Quarterly Returns from the McIntosh Indian Residential School for the Quarter ended September 30th, 1944, also forms for the admission of the following pupils:

0199 Mary Jane Misen	0206 Catharine Achneepineskam
0200 Lucy Mikanob	0207 Angelique Achneepineskam
0201 Cecile Tshisakwe	0208 Madeline Moonies
0202 Elsie Tshisakwe	0209 Dora Land
0203 Elizabeth Gosis	0210 Agnes Beaver
0204 Isabella Achneepineskam	175 Mathew Beaver
0205 Eliza Achneepineskam	176 Gabriel Sagutch
177 J. B. Sapay	

Applications for admission of the above pupils will be forwarded as soon as received from the Principal. Pupil 175 is under school age and an orphan. He was being kept by his grandparents, but they are too old to look after him properly, and his admission to the school is requested.

The Reverend Principal also requests the discharge of the following pupils:

0119 Rose Tenesco
0157 Margaret Spence
0158 Alice Bird
144 Cyril Ice

J. Swartman,
Indian Agent.

#12
McIntosh Indian Residential School
McIntosh Ont. October 30th. 1944

Mr. Philip Phelan
Chief, Training Division

Dear Sir:-

Regarding your letter of October 26.

No 172 Paul Emile Land was drowned in July but the holiday allowance has always been placed block form so this is the reason for the 62 days allowance. It is the same case for Beatrice Iacobs who died during the holidays at home, the allowance is made for the full 62 days.

No 086 Susanne Ferguson is an orphan, she is now at the Dynevor San. In a few months she will return to the school until we can place her in a suitable home. We are giving special attention to this child because of her poor health and also for the reason that she has no relatives whatsoever to care for her. We would appreciate greatly you leaving her on the list again this year.

Hoping to have your kind attention for this particular case

I am Sincerely Yours

E. Turcotte

Ottawa, January 31, 1945.

Mr. G. Swartman, Indian Agent,
Sioux Lookout, Ont.

With reference to your letter of the 16th instant, enclosing the December quarter return of the McIntosh Residential School, I am returning the state that they are members of the Roman Catholic Church, while you state that your records show them to discuss this difference with the Principal of the McIntosh School. It is possible that he has some information that would affect these applications.

The Department approves the discharge of pupils numbered as follows:- 88; 97; 112; 088; 0105; 0113; and 0177.

I have noted the information you supplied regarding Marie Abraham. This girl is 23 years of age and consequently is not eligible as a grant-earning pupil at an Indian residential school. However, I note the reason for having her placed in that institution and have submitted your letter to the Acting Medical Superintendent, Dr. Moore, with a view to having him arrange reimbursement to the school management from the Medical Appropriation. You should hear from Dr. Moore in the near future.

Please forward application forms for numbers 182 and 183.

Philip Phelan,
Chief, Training Division.

Re: Marie Abraham,
No. 104 Long Lac Band. 235 13

1/27/45
W. J. H.
This girl, from the McIntosh Indian Residential School, was admitted to the Fort William Sanatorium about February 1st, 1943. This was authorized by Department letter 451-1 February 1st, 1943. She was discharged from the Sanatorium in September 1944 and had to take pneumothorax treatments. It appears that she went to Winnipeg intending to secure light work and continue her pneumo treatments at the same time. Inspector Hamilton decided that the best plan would be for her to return to the McIntosh Indian Residential School from which she could come to Sioux Lookout for treatments as required.

I do not know why Application for Admission was not forwarded before this date, but it is recommended that her application for re-admission under these special circumstances be approved.

Indian Agent.

Re: Mario Abraham

As this girl is past school age, the parents are unable to authorize her as a pupil at the McIntosh Indian Residential School at Sioux Lookout where she has been receiving treatments and perhaps some other medical attention. If the parents be willing to contribute to the cost of her treatment, this is impossible the Resid. School at Sioux Lookout as required.

Either of these or any other practical solution may be worked out and will be forwarded to the Resid. School.

Ottawa, February 3, 1945.

Mr. O. Swartman, Indian Agent, Sioux Lookout, Ont.

With reference to your letter of the 30th ultimo, enclosing the December quarter return of the McIntosh Residential School, the Department approves the admission of the following children:

Hita Georges,
Suzanne Georges,
Tertus Bird,
Louis Georges,

Joseph Kwatibens,
Ignace Kwatibens,
Sebastian Quisess,
Thomas Quisess.

The return requested grant for 101 days for Marie Abraham, No. 038. Owing to the girl's age, it is not possible to approve her admission as a grant-earning pupil to an Indian Residential School and consequently no grant is being allowed for the number of days requested by the Principal. However, you have no doubt received Dr. Moore's letter of January 31, in which he advises you that the Medical Division is prepared to pay for the girl's maintenance. As soon as Dr. Moore hears from you, payment will be made to the Principal of the McIntosh School.

Philip Phelan,
Chief, Training Division.

PLEASE ADDRESS REPLY TO
CHAIRMAN AND CLERK
No. H-204618

Dependents' Allowance Board

Department of National Defence

Ottawa, Canada

March 6th, 1945.

Secretary,
Indian Affairs Branch,
Dept. of Mines & Resources,
O T T A W A.

H-204618 - A/Cpl. DANIELSON, Karl.

Dear Sir:

Dependents' Allowance and Assigned Pay on behalf of the above-named soldier's wife and three children are now going forward to the wife, Mrs. Doris Danielson, MacDiarmid, Ontario.

Before marriage the wife's name was Doris Bouchard, nee Michon, and it is understood that she was a treaty Indian, losing her status through her marriage to the above named.

We are attaching a copy of a letter received from the Children's Aid Society of Port Arthur, Ontario, dated February 2nd, 1945, and would appreciate your comments as to whether it is the intention of your branch to place these children in a Residential School, or if they will maintain their eligibility for Dependents' Allowance.

Please accept the Board's thanks for your assistance in this matter.

Yours very truly,

DEPENDENTS' ALLOWANCE BOARD

Room 7, Court House Building,
PORT ARTHUR, ONT.

February 2, 1945.

Mr. R. O. G. Bennett, Chairman,
Dependents' Allowance Board,
Department of National Defence,
OTTAWA, Canada.

Re: Danielson, Carl, Pte., H-204618.

Dear Sir:

On January 23rd, 1945, the application for wardship of the step-children of the above-named soldier was heard. When the evidence re residence was taken, the mother volunteered the information that the children were Treaty Indians, although she had lost her treaty status through her marriage to Danielson. The case was remanded until January 31st, 1945, to have the Indian Department represented.

At the second hearing the Indian Department was represented by Mr. Ward Leroy, who states that by a ruling of the Indian Department these children are to remain wards until they are twenty-one years of age. The Magistrate stated that he found the children neglected, and if it were not for the fact that they were already wards of the Indian Department, he would have made them wards of the Children's Aid Society.

Indiscussing this matter afterwards with Mr. Leroy, he told us that he was thinking of sending the children down to the MacIntosh School. The little girl is crippled and he thought it might be arranged for her to attend the Shriner's Hospital in Winnipeg from the school.

We will be interested to know your decision on this case and shall be glad to give you any further information you may require.

(Sgd.) (Mrs.) Agnes G. Brown.
Local Superintendent.

Re: H-804618 - A/Cpl. DANIELSON, Karl.

Dear Sir:

I have your letter of the 6th instant, in connection with the above. While the children are listed as Indians, the father of the children was an Indian and, consequently, they remain Indians. When they reach 21 years of age, they can decide if they wish to become enfranchised.

I note from the copy of the letter from the Children's Aid Society that our officer at Port Arthur is considering the placing of these children in one of our residential schools. I intend to write to our Indian Agent, Mr. J. G. Hall, in regard to this matter.

Yours truly,

Philip Phelan,
Chief, Training Division.

Ottawa, March 8, 1945.

Mr. J. G. Burk, Indian Agent,
Port Arthur, Ont.

The Department is in receipt of a letter from the Dependents' Allowance Board, enclosing copy of a communication dated February 2 from the Children's Aid Society, Port Arthur, with reference to three children. In this communication the Society refers you to departmental letter of May 29, 1943.

In the letter from the Children's Aid Society it appears that they consider the children are not receiving proper care and consequently they endeavoured to have them made wards of their Society. However, it is stated that your clerk, Mr. Leroy, was present at the hearing and he intimated that it was your intention to have two of the children sent to the McIntosh School and the little girl placed in a hospital in Winnipeg. We do not appear to have received any correspondence from you regarding the placing of two of the children in McIntosh. Provided they are physically fit and are eligible for admission to that school, we are quite prepared to approve their admission. Please let me hear from you as soon as possible in connection with this matter.

Philip Phelan,
Chief, Training Division.

Mr. O. Swartman, Indian Agent, Sioux Lookout, Ont.

Return of the McIntosh Indian Residential School,
wish to refer you to my letter of January 31st
regarding application forms for James and Alex.

These forms have not yet been received by
this office.

According to our records pupil No.
086 is almost eighteen years of age and pupil No.
0128 is seventeen years of age. It will not be
possible to allow pupil No. 086 remain in the
school as a grant-earning pupil. With regard to
No. 0128, if she wishes to remain in the school
for the academic year 1945-46 formal application
for permission to have her to stay should be
forwarded to this office before the end of June.
This application should state the reasons for
desiring her to stay in the school.

The admission of pupil No. 186 is
approved.

Pupils No. 0128 and No. 0150 have
been absent from the school for over a year.
Under the circumstances it is felt that application
should be made for their discharge in order to permit
the Principal to remove the names from the quarterly return.

April 30th, 1945.

Indian Affairs Branch, Dept. of Mines and Resources

I wish to acknowledge Mr. Phelan's letter
file 150-7-10, with respect to McIntosh Indian
pupils.

James Paishk and Alex King are still at school.
I have been informed by the school
guardians.

The boys were away on their trap
was impossible to get in touch with them. From your letter of
January 31st I understood that I was authorized to make the most
practical arrangements possible under the circumstances and after
reviewing all the information available, I decided that the logical
solution would be to keep the boys at school until June.

I discussed the matter fully with them at that time. It is nearly
five years now since I have seen the Paishk family. Consequently
I am not very familiar with their latest religious belief. In
meantime it is recommended that the boys be allowed to remain
at McIntosh as great-grandchildren of the Paishk family for the
present term.

to a school of different faith. This only causes a lot of unne-
cessary controversy, correspondence and ill will.
We are returning herewith the applications for admission
of the two boys in question.

The Secretary,
Indian Affairs Branch,
Ottawa.

Attention Mr. Philip Phelan

Dear Mr. Phelan,

Enclosed please find invoice for fifty-one Railway tickets supplied by Mr. M.E. Sabourin to Indian pupils of the McIntosh Indian School. Father Ferreault, the Principal, is of the opinion that the Department should pay these tickets, as there are no other means of travelling for these students to come to school. He has for at least two years paid this transportation out of the grant, but says that he cannot do so any more due to the increased cost of living.

Hoping that you will be able to meet with his wishes, I remain,

Yours very truly,

Indian Affairs. (RG 10, Volume 6221, file 472-10, part 4)

Bien cher Pere:-

Je vous envoie ci-inclus la facture de Mr. M. E. Sabourin pour billets des enfants indiens allant en vacances. Pensez-vous que le Departement voudra me rembourser la somme que j'ai deboursee pour les payer. Il va s'en dire que pour les faire venir l'automne dernier j'ai du payer a peu pres la meme montant. Jusqu'a maintenant je n'ai jamais demande au Departement de payer les passages, mais comme cette fois ci le montant est assez considerable, j'ai pense que peut-etre le Departement pourrait me venir en aide Du montant de \$248.35 il faudrait soustraire les deux passages des Freres, i.e. \$8.75.

Vous remerciant sincerement de tout l'aide que vous me donnez

Votre bien devoue en N.S. et M.I.

Ottawa, May 8th, 1946.

Mr. G. Swartman, Indian Agent,
Sioux Lookout, Ontario.

With reference to your letter of the 3rd instant, you may inform the Principal of the Sioux Lookout Indian Residential School, the Department approves the admission of the following pupils:

Jean Louis Loon	Catherine Swain
Mary Strong	Lawrence Swain
Alexander Neenanapenace	Marcel Messon

I might point out that the March quarter return for the above school, shows #0222 for Mary Strong, and for Alexander Neenanapenace, #198, and not numbers 0224 and 202 as shown in your letter.

We presume the school numbers used on the return are correct.

Philip Phelan,
Chief, Training Division.

No. Intosh Indian School,
Sept. 13th. 1946.

Mr. L. Swartman Indian Agent,
Sioux Lookout Ont.

We have received, by plane, twelve children from
Lake. Rev. Father Guimet O.M.I. their missionary has announced
coming of many others from the same district.

As I understand, the cost of their transportation
expected to be paid by the Department of Indian Affairs.

I have no adequate statement of the total
but I presume it to be much over \$200.00.

Would you kind enough to obtain for us a grant
to the amount of \$300.00. This will take care of Plane transpor-
tation of for prospective pupils coming out yearly to me. Int.

Yours truly: C.E. Comeau O.M.I.
Principal

130-7-10 (W.T. 1)

Ottawa, 20 September 1927.

Mr. G. Swartman, Indian Agent,
Sioux Lookout, Ontario.

We have received your letter of the 14th instant requesting \$300.00 to cover transportation of children to McIntosh Indian School by plane.

Before any expenditure was incurred for air travel for which the Department was expected to pay, we should have been consulted. Presumably it was known for some weeks previous to Sept. 1st, that these children would be going to the McIntosh School. Was it impossible to make arrangements for the transportation of these children in a less costly method? As you know, air transportation is expensive and

interested in placing children in residential schools should make every possible endeavour to have them brought in the least expensive manner. In many cases parents would be prepared to bring the children themselves without any expense to either the School or the Department.

The extra money involved in providing air transportation could be used to much better advantage at practically any Indian Residential School.

Philip Phelan,
Chief, Training Division.

Sioux Lookout, Ontario,
September 14, 1946.

Indian Affairs Branch, Dept. of Mines and Resources, OTTAWA.

The enclosed letter has recently been received from
reverend Father Comeau of McIntosh Indian Residential School
applying for a grant of \$300.00 to cover airplane fares for
children coming in to school from the Northern points. These
are for the most part orphans and neglected children and it is
recommended that a grant of \$300.00 be provided.

7-10
PLEASE QUOTE
FILE 144:16:1

Sioux Lookout, Ontario,
September 24th, 1946.

Indian Affairs Branch, Dept. of Mines and Resources, Ottawa.

I wish to acknowledge Mr. Phelan's letter of September 20th, 1946, File 130-7-10 (W. T. 1) with respect to our recommendation for a grant to cover air transportation charges for pupils coming in to McIntosh Indian Residential School from the remote northern points.

During the summer months in the north I endeavoured to recruit certain children for both our Residential Schools, as instructed. Parents and guardians would promise on the spot to send or bring the children out early in September, but in many cases would change their minds. Some children have arrived at the Schools concerning whom no previous arrangements had been made. In tracing back we find they decided among themselves to send others instead of the ones we had previously arranged for. This might partly explain why we are not in a very good position to be certain in advance, just how many children will come out to School.

We have had a few come out from Fort Hope and Lansdowne to the line by canoe. This is a very hard trip of nearly 100 miles with many portages. At this season of the year the parents feel that they are neglecting their own livelihood during the period required to bring the children out. It should be remembered too that in the first place many of the parents are not anxious to send their children to Residential Schools and refuse to spend any time or energy in getting them out. Children from Ogoki are obliged to come out by plane due to the fact that the water route south is not navigable by canoe at this season.

In most cases, however, the children are brought out to school without any cost to the Department, either by white people interested in their well-being, or the parents paying the air fares themselves. It is just for children who should be at school and for whom no other means except air transportation is available or practical that the grant was applied for by Father Comeau and recommended by the undersigned.

A glance at the geographical situation of the Sioux Lookout Agency will show that most of the pupils for the Residential Schools must come from the North. There are not sufficient children living off the Reserves along the main line of the C. N. R. to provide the necessary pupilage.

I realize that the extra money required for air transportation would go far and be used to good advantage at any Residential School, but there is no object in having these Schools unless they are kept reasonably well filled.

Indian Affairs. (RG 10, Volume 6221, file 472-10, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Indian Affairs Branch - Cont'd.

Therefore in view of the foregoing, it is recommended that the grant of \$300.00 for the McIntosh School be provided and we will do our utmost to see that it is spent only on those pupils who have no other means of transportation and who otherwise would be denied the opportunity of attending School, which has always been our endeavour.

G. Swartman,
Indian Agent.

130-7-10 (W.T. 1)

Ottawa, 28 September 1946.

Mr. G. Swartzman, Indian Agent,
Sioux Lookout, Ontario.

We are in receipt of your letter of the 24th instant with reference to the transportation of children to the McIntosh School.

In view of the contents of your letter, we will allow an amount of \$300.00 for transportation of children to the McIntosh School during the past summer.

It should be very distinctly understood by the Principal that the amount allowed this year is not to form a precedence. In future years we will not allow transportation expenses of this nature unless we are consulted before the expenditure is incurred and our approval is given.

CANADA
DEPARTMENT
OF
MINES AND RESOURCES
INDIAN AFFAIRS BRANCH

PLEASE QUOTE
FILE 144:7M:1

Sioux Lookout, Ontario,
November 20th, 1946.

Indian Affairs Branch, Dept. of Mines and Resources, Ottawa.

We are forwarding herewith application for admission forms from the McIntosh Indian Residential School, for the following pupils, referred to in our letter of October 9th, 1946:

199 - [illegible]	0227 - Jennie Kakitotewan
202 - Joseph Mikanak	0228 - Mary Kakitotewan
203 - George Fisher	0229 - Sarah Mikanak
204 - Paul Bird	0230 - Jane Wengenow
0224 - Cecilia Achneepineskum	0231 - Mandy Moose
0225 - Agnes Waminawash	
0232 - Agnes Tangwee	

Regarding Pupil No. 152, Roderick Wabasone, the Reverend Principal advises that this boy was at the School for only a short time, when he ran away. Consequently Doctor Bell did not have an opportunity to examine him or complete the Physical Examination form.

Indian Agent.

Indian School, Mo. Intosh Ont.
Jan. 31 st. 1947.

Mr. J.O. Swartson, Indian Agent,
Sioux Look-Out, Ont.

Dear Sir:

At last we have been able to complete the
Quarterly Returns for Quarter ending December.

The delay is due to the fact that we had
to wait until now for the doctor.

We are still waiting for information con-
cerning boys were transferred to our school from Fort-William,

; Foster contact: I am sending directly,
to day, the children apples.

Sincerely yours; *G.E. Coman O.M.I.*

G.E. Coman O.M.I. Principal.

JAMES REED

QUEST AND CANYON LAKE,

DISTRICT OF KEABRA,

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

In accordance with your letter of instructions, dated May 1st, Messrs B. B. Hogarth and J. P. McNay made a reconnaissance survey of this site on May 9th and 10th and obtained a metering of the stream on May 9th. Following this survey a plan of the site has been prepared, showing the immediate contours, together with a profile of the stretch of river considered and a cross-section on the line of the present dam. A brief description of the site and an estimate of the power available are given below. No other data concerning the watershed are available.

SUMMARY.

The natural fall in the river, at the site, is 18 feet in a distance of 200 feet, being caused by a flat, shallow rapid over a bed of granite. There is at present an old lumbering dam at the head of the fall which might be repaired and enlarged to provide additional head and storage capacity by raising the level of Forest lake to elevation 112.0. With Canyon lake at elevation 98.2 a maximum head of 16.8 feet would be available, which, with the estimated minimum flow of 14 c.f.s., would develop 20 h.p. It has been estimated that three feet of storage on Forest lake would be sufficient to provide a regulated outflow of 25 c.f.s. during the winter. An outflow of 25 c.f.s. and a minimum head of 14 feet would develop about 33 h.p. continuously throughout the winter.

Whether storage is utilised or not it appears advisable to raise the level of the lake five feet to elevation 112.0 to insure a sufficient depth of water over the intake.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

otherwise rock excavation may be necessary to insure a seal at the intake structure. Raising Forest lake to elevation 112.0 will cause very little flooding around the shores of the lake.

Canyon River

The Canyon river is a southerly tributary of the Wabigoon river and joins the latter a short distance below Glay lake, about seven miles west of the north-west corner of Redvers Township, District of Kenora, Ontario. The main river connects Canyon lake with the Wabigoon river, but the part under consideration is the short stretch connecting Forest lake with Canyon lake. This stretch is about two miles west of the western boundary of Sault Ste. Marie Township and about two miles by water on Canyon lake south-west of McIntosh Station on the C. N.

Basin

Drainage Area

The basin of the Canyon river above the site has an area of 108 square miles, and consists of rocky Laurentian country covered by a thick growth of spruce, poplar, banksian pine and birch. There are numerous lakes scattered through the basin and occupying about one-sixth of its total area.

Run-off Records.

Previous to the date of the survey, no measurements of the flow of the stream had been secured, but on May 24th a metering was taken at a section above the fall and gave a flow of 81 c.f.s. The minimum flow of the river and the mean annual flow have been based on estimated run-offs of 0.185 and 0.40 c.f.s. per square mile of drainage-area. The maximum flow has been estimated from the high-water marks considered in relation to the water levels at the time of the metering on

Indian Affairs. (2nd 10, Volume 6221, file 472-16, part

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

May 9th. These flows are tabulated below:

Estimated minimum flow 14 c.f.s.
Estimated maximum flow 300 c.f.s.
Estimated mean annual flow 43 c.f.s.
Flow on May 9th, 1924 51 c.f.s.

Storage.

Forest lake, immediately above the site, has an area of 1.1 square miles and it has been estimated that raising the lake level three feet will be sufficient for complete regulation of the inflow. This would provide a reservoir with a capacity of 2112 acre-feet, which it is estimated will regulate the minimum outflow to 25 c.f.s.

In addition to raising the lake level three feet for storage purposes it also appears advisable to raise it an additional two feet higher to provide a higher head and a sufficient depth of water at the intake to the penstock, particularly during the winter months. If this additional depth of water is not secured by raising the lake level, excavation would be necessary to insure a seal at the intake structure.

From the information obtained it appears that the shores of the lake are sufficiently high to prevent flooding at elevation 112.0, (present elevation 107.2), excepting possibly at a few points where small areas extending back about 200 feet from the present shore line might be submerged. Highwater marks were noted at elevation 109.5.

Ice Conditions.

An ice-sheet forms on all the lakes in this region during the winter, but gradually melts in place during the warm weather of spring. At the time of the survey Forest lake was practically clear of ice, but Canyon lake was nearly wholly covered, except along the immediate shores. The ice was, however, very much honeycombed and melting rapidly.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

RECONNAISSANCE SURVEY.

The work at the site consisted of a reconnaissance survey of the stretch of river between Forest and Canyon lakes, an examination of the banks of Forest lake with a view to determining the effect of raising its water-level, a cross-section of the river and banks on the line of the dam, and a profile of the river from lake to lake. From the notes of the survey, the accompanying plan has been prepared, showing the contours of the bed and banks at five-foot intervals, the nature of the surface materials, and the water-levels and highwater marks. The cross-section on the dam-line, the profile of the river, and a key-plan showing the location of the site are included. Photographs of the site are appended hereto.

The site is accessible from McIntosh station on the C. N. Railway by a water-route of two miles in the summer, or by travel over the ice by team in the winter. There are no summer roads, and the small amount of power available would not warrant any expenditure for their construction in a country of such a character.

As shown on the plan and profile, the natural fall of the river at the time of the inspection was 18 feet in a distance of about 350 feet. This fall takes place in a fairly uniform rapid over a bed of smooth granite. At the head of the fall is an old lumbering-dam, with a six-foot sluice in the centre, used to direct the main body of the stream into the log-chute, which extends down the right channel. The proposed scheme of development would include the lengthening and raising of the dam to a sufficient height to raise the water-level of Forest lake to elevation 112.0, (i.e., Three feet above highwater mark), provision for a sluice gate to control the flow, the installation of a pipe line from the dam along the right bank to the foot of the fall, and the construction of a power house

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

in Canyon Lake some 40 or 50 feet from the foot of the right bank. This would provide a maximum head of 17 feet, and a minimum head, as the storage is depleted, of 14 feet.

Possible Power.

Under the maximum regulated head of 17 feet and the estimated low-water flow of 14 c.f.s. the power available at the site is 22 h.p. By the use of the storage, however, it is estimated that the minimum flow may be increased to 25 c.f.s., although the head will be decreased as the storage is used until it is 14 feet. Under these conditions the estimated minimum power available is 33 h.p.

Use of Power.

The amount of power available is sufficient only for small local uses such as lighting, pumping for water supply, sawing wood, etc. There is at present no market at the site, but it is proposed to establish there a small Indian mission-school, for the purpose of which the power could be very advantageously employed.

G. H. ATWOOD,
District Chief Engineer.

ARCHIVES PUBLIQUES
CANADA

LOCATION AND ACCESSIBILITY.

The Canyon River Power Site is located on the short stretch of the river separating Forest and Canyon lakes. The main Canyon river forms the outflow channel of Canyon lake into the Wabigoon river. The power site is about one mile in a direct line from McIntosh, a station on the Canadian National Railway, 169 miles east of Winnipeg. Owing to fallen timber and muskeg the site is practically inaccessible by overland route during the open water period, but it is readily accessible by a two and one-half mile water route.

CHANNEL CHARACTERISTICS.

The stretch of river carrying the overflow of Forest lake into Canyon lake is about 330 feet in length and divides past an island at the lower end. The channel is from 70 to 100 feet in width, shallow and boulder strewn and there is a descent of about 12 feet between the two lakes.

During earlier years lumbering operations were carried on above Canyon lake and a timber and rock dam was built across the outlet of Forest lake to raise the lake level. From an opening in the dam a log chute extended to Canyon lake. However, no lumbering operations have been carried on for years on these lakes and the dam and log chute are now unserviceable.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

During the past summer the land on either side of the stream has been cleared and an Indian School is now in course of erection upon the left bank. The general topographical features of the site are shown on an accompanying plan.

Drainage Basin.

Drainage Basin of Canyon Lake.

As the greater part of the area draining into Canyon Lake lies in unsurveyed area it is impossible to accurately estimate the extent of the drainage basin above this power site. From existing maps the area has been calculated to be about 100 square miles and is of a rocky Laurentian formation, covered by a thick growth of spruce, poplar, birch and banksian pine. There are numerous lakes throughout the basin which ultimately drain into Canyon Lake.

Flow of Water.

Previous to 1904 no measurements of the flow of this stream have been obtained. On May 9th the flow was found to be 51 c.f.s., while on September 9th it was 26 c.f.s. The summer and fall of the present year has been a period of very low water conditions throughout the district. The run-off data so far obtained are too meagre to permit of accurate flow estimates being determined from them, but estimates have been prepared, based upon flow conditions in adjacent drainage areas for which data are available, and these are tabulated as follows:

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Estimated Minimum Flow	14 c.f.s.
Estimated Maximum Flow	300 c.f.s.
Estimated Mean Annual Flow	43 c.f.s.

It must be borne in mind that these figures are not dependable but are subject to revision as farther run-off data are obtained.

FOREST.

There are several lakes above the power site, to which several different names have been applied, but the larger ones comprise Forest, Boulder, Corner and Sandy lakes. These are all joined by narrows or short sluggish streams so that the group have practically the same water level as Forest lake, and appear to cover an area in excess of 10 square miles, although this area is indefinite, no surveys having been made. A reservoir of 10 square miles immediately above the power site affords unusual opportunity for storage regulation.

In the proposed development of this power site it is intended to raise the water level above the dam from a present assumed elevation of about 106.5 to an elevation of 112.0. One foot of storage on these lakes would be equivalent to a continuous flow of about 9 c.f.s. for one year, or 18 c.f.s. over a period of six months. Since the proposed scheme of development only necessitates a flow of 25 c.f.s. it is quite probable that one foot of storage will ensure a continuous flow of 25 c.f.s. at all times.

INTENT OF DEVELOPMENT.

The proposed scheme for the development of this power site is shown on accompanying plans. Briefly stated, it provides for a concrete dam at the outlet of Forest lake

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

with a penstock 325 feet long leading to the power house situated on the small island at the lower end of the channel. The forebay level will be elevation 112.0 and the normal tailwater elevation about 95.6, giving a maximum head of 17 feet. If storage is drawn upon heavily the forebay elevation may drop to 111.0, and taking into account loss of head in the pipe line of one foot, the minimum head expected will be 15 feet. Hence the power available with a flow of 25 c.f.s. under 15 foot head at 80% efficiency will be 25 h.p..

Dam.

The dam, as proposed, will rest on rock, be of concrete construction, and will contain, Spillway section, and Non-Overflow section, the latter containing an opening for a log chute and also a sluiceway for discharging flood waters. The dam will have a maximum height of seven and one half feet and a length of 250 feet, and is designed to withstand flood conditions. A 25-foot spillway section connects the right bank and has a crest elevation of 112.0. The non-overflow section will be constructed to elevation 113.0, the sluiceway will be eight feet wide with sill elevation of 108.0, and the log chute opening will be five feet wide, with sill elevation of 109.0. Stop logs will be provided for these two openings.

Intake Works.

The penstock will extend through to the upstream face of the dam, and the base will be at elevation 102.0. As the inside diameter of the penstock is to be

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

36 inch the intake works are designed accordingly. Two six inch steel channels set upright and four feet apart and extending three inches out from the face of the dam, serve as a guideway for the gate, which will be raised and lowered by means of a suitable hand worked hoist. Doors are provided to cover the intake and are supported by concrete piers extending out from the face of the dam. The details are shown on accompanying plans.

Penstock.

A penstock line, 225 feet in length extends from the upstream face of the dam to the power house and passes down the shallow river channel to the island upon which the power house will be located. The penstock will be supported on timbers and at the lower end on trestles, and will be 36 inches inside diameter and constructed of continuous wood stave pipe of standard construction.

Power House.

The site chosen for the power house is on the lower end of the island in the lower end of the channel. The building as planned will be 15 feet by 20 feet, provision being made for a workshop above the generator room. The turbine will be set in an open wheel pit, this pit having inside dimensions four feet by six feet and raised to elevation 112.0, being covered and a manhole provided for inspection purposes. The walls of the wheel pit are to be 12 inches thick, constructed of reinforced concrete and the wheel pit will be wholly within the power house. The floor will be of reinforced concrete, but the building will be of frame construction.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- 1 -

The tailrace will be discharged into Canyon Lake, the bottom of the tailrace being at elevation 90.0. Considerable rock excavation will be necessary to provide a satisfactory tailrace.

It is proposed to install one complete unit consisting of a 30 h.p. horizontal turbine of improved type and set in an open wheel pit, and one 17½ k.w. D.C. generator which will be belt driven from a pulley on the turbine shaft. For speed regulation a suitable sized compensating governor will be installed.

It is proposed to generate at 115 volts and a single panel direct current switch board will be installed.

The power available has been estimated at 33 h.p. under minimum head conditions and as the installation is for 17½ k.w. only, a power shortage is very improbable.

POWER FOR SCHOOL.

The Department of Indian Affairs of the Interior Department are erecting a school along the left bank of this stream and as the site is rather isolated it is planned to use hydro power from this power site to supply lighting for the school, also power for the operation of a water system and laundry and a work shop. The water system is not only for domestic purposes but also for fire protection. It is considered that 15 k.w. will meet the power demands of this school, and the power site will provide a dependable source of power.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The school building is being wired for electric lighting and power, and is about 200 feet from the power house site, so a short pole line only will be required. It is also desired to place a few lights around the grounds and the power house building will be heated by steam.

The estimates given herein are based on what is considered a fair contract price and include freight charges and contractors' profit. No engineering charges are included as it is presumed that the engineering and supervision will be in charge of Departmental engineers.

It will be noticed that the cost of this development is high in view of the power required. It might be pointed out that in the advent of the Catholic Mission making an agreement to provide free labor (rough) the construction costs could possibly be reduced to the Department of Indian Affairs by approximately 25%. This saving would occur principally in concrete construction and the cost of material and labor would be reduced to the site.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

If it is decided not to develop the Garry River
power plant as a source of electrical energy for the school
building, it will be necessary to install a 6 h.p. oil
fuel engine to provide for domestic water supply and fire
protection requirements. In this event it would be found
expedient to install a generator of about 500 watts and the
necessary wiring to connect the engine to the building.

Several manufacturing firms are now turning out
complete sets and it is considered that one of these will meet the
present requirements of the Indian School for lighting pur-
poses.

A typical outfit consists of the following:

One 3 h.p. Engine - Kerosene or Gasoline fuel

One Ball bearing Dynamo, 900 Watt - 50 to 42
volts, Multi-polar & Shunt wound.

Sealed glass jar storage battery (120 ampere
hours) - 16 cells with hydrometre syringe.

One type F. S. Switchboard.

This outfit will, with the battery fully charged
and engine running, keep 25 25-watt lights running for five
hours; the battery alone, if fully charged, will keep 25
25-watt lights going for five hours, and with the engine
running and battery floating 25 25-watt lights can be kept
going as long as you like.

The price of the outfit is approximately \$540.00
plus freight.

Winnipeg, Man.
October 21st 1924.

REPORT OF THE COMMISSIONER OF THE DOMINION WATER POWER BRANCH

REPORT

ON THE PROPOSED CANYON RIVER POWER SITE, DISTRICT OF KENORA, MANITOBA, CANADA.

1. - SITE.

The power site is located about two miles from McIntosh, a small station on the Canadian National Railway, 160 miles East of Winnipeg, and on the short stretch of river separating Forest and Canyon lakes in the District of Kenora, and is referred to as the Canyon River Power Site.

2 - WORKS.

The works consist of the construction of a concrete or masonry dam across the outlet of Forest lake, the construction of a penstock line, the erection of a power house building and certain rock excavation for a tailrace. The general layout and construction details are shown on the following plans.

Plan No. 1. General Plan of the Canyon River Power Site, prepared by the Department of the Interior, showing layout and elevations and proposed layout. Scale 40 ft. to 1 inch.

Plan No. 2. Sections and Details - Canyon River Power Site, prepared by the Department of the Interior and showing construction details.

3 - DATA.

The datum plane to which all elevations in these specifications and on the accompanying plans is based on a bench mark established at the site by the Dominion Water Power Branch. The elevation of this Bench Mark is 100.00 (assumed datum).

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

4 - Timber.

All timber entering into the work, included in these specifications must be of good quality and subject to the approval of the Engineer. It must be free from wind shakes, wanes, excess of sapwood and all descriptions of decay.

5 - Materials.

(a) Cement - All cement used in the concrete work shall be best quality approved brand Portland cement, delivered at the site in suitable packages with the name and brand of manufacture clearly indicated. All cement for use in the works shall be fully up to the specifications of the E. I. C.

(b) Broken Stone - The broken stone shall consist of hard and durable rock such as trap limestone or granite of miscellaneous sizes, from 3/4" to 1 1/2". Dust shall be removed by passing over a 1/4" screen.

(c) Gravel - Gravel, providing same is of satisfactory quality to the Engineer, may be used in place of broken stone and sand. The gravel shall not contain stones larger than those specified for broken stone. Gravel shall be clean, free from loam and alkalies.

(d) Sand - All sand for concrete shall be clean, sharp and well screened, be free from loam or all soluble elements and also free from alkalies.

(e) Storage of Cement - Cement shall be stored on the site in a building which is weather tight and with wooden floor at least six inches above the ground.

(f) All concrete must be placed within 15 minutes after mixing.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- (g) All mixing and placing of concrete shall be done in the presence of the Engineer or his duly appointed deputy and the Contractor or his representative shall give ample notice as to the time such work is to be done.
- (h) Freezing Weather - Concrete shall not be mixed or placed at a freezing temperature except upon the written authority of the Engineer.
- (i) Forms - All forms shall be sufficiently watertight to prevent leakage of cement and of a substantial character, well braced and sufficiently strong to hold the face of the concrete true to line. The design and character of forms shall be subject to approval by the Engineer and if not approved by him shall be remodelled. No wires, bolts, etc., shall be exposed on the faces of the finished work.
- (j) Steel Reinforcement - Steel reinforcement shall consist of round steel rods.
- All steel used for reinforcement shall be of a quality known as "Medium Steel", shall be free from paint, oil, rust and mill scale before being embedded in the concrete.

DETAIL PLANS OF CONSTRUCTION WORK.

6 - DAM.

The dam shall be constructed in accordance with the details shown on the accompanying plans. It shall be constructed of concrete.

- (a) Foundations - The dam shall rest on bed rock and before the placing of concrete the foundations shall be thoroughly cleaned of all loose material and dirt of all kinds. Any rock seams, fissures or cracks in the rock foundation must be cleaned out and filled with cement, grout, mortar or concrete as directed.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- 4 -

If in the opinion of the Engineer the nature of the foundations is such that a firm bond cannot be obtained between the rock and the concrete, excavation or cut-off trenches shall be constructed or 1 1/2" holes shall be drilled to a depth of 12" at six-foot intervals along the centre of the dam and into these holes there shall be grouted 1 1/2" steel rods two feet in length to serve as a bond between the concrete and the rock foundation.

- (5) Stop-log Checks - Stop-log checks eight inches square shall be provided in the log chute and sluiceway section of the dam.
- (6) Stop Logs - A complete set of stop logs six inches square and of suitable length shall be provided by the Contractor, of H.C. or Douglas Fir, sufficient to entirely close the log chute opening and sluiceway. They shall be straight grained, free from knots, sun cracks, shakes, rot or other imperfections which would impair the strength or durability of the logs. They shall be trimmed straight and true and shall be accurately scribed and fitted, to the approval of the Engineer, with fittings for the lifting apparatus.

INITIAL INSPECTION.

- (a) Opening to Penstock - The upstream end of the 36" diameter penstock shall be embedded in the concrete dam and shall be flush with the upstream face of the dam.
- (b) Guideway for Gate - Two six-inch steel channels each 12 feet long and weighing 8 lbs. to the lineal foot shall be placed as shown on the detailed plan and shall serve as a guideway for raising and lowering of the Head Gate.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

(c) Head Gate - This gate shall be three and one-half feet by four feet and shall be constructed of 2 inch T & C clear timber and fitted with metal bracing as shown on plans. It shall also be fitted with fittings to permit of hoisting.

(d) Hoisting Apparatus - A suitable platform shall be erected three feet above the top of the dam to permit of the mounting of a head-gate hoist. The hoisting apparatus shall consist of a geared hand wheel mechanism placed on the bulkhead platform and connected to the head gate by means of a rack and pinion. This hoisting apparatus shall be supplied and placed by the Contractor and the mechanism must meet with the approval of the Engineer.

(e) Trash Rack - Trash racks shall be placed as shown on the accompanying plan, i.e., Two concrete piers shall be built out from the upstream face of the dam to serve as a rest for the racks, the framework being embedded in the concrete. The trash rack shall be five feet by four feet and shall be built in one section and set at an angle to the vertical as shown on plan. The trash rack shall be made up of rolled steel bars 1/4" X 2" X 4' spaced one inch apart in the clear and placed with their flat side parallel with the flow of the water. These bars shall be held together by three round rods one-half inch in diameter which pass through the bars near to the downstream edge of the bars.

6 - PENSTOCK.

(a) Location - For nearly 200 feet from the intake the penstock will follow the river channel, the remaining distance it traverses the island to the power house, the total length of penstock being 345 feet.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- (b) Hydraulic Gradient - The penstock shall be laid so that no portion of it shall be above the hydraulic gradient. A small amount of rock excavation may be required just below where the penstock leaves the dam and the Contractor shall remove this if in the opinion of the Engineer the removal is necessary.
- (c) Supports - For the upper 150 feet it shall be sufficient for the penstock to rest upon planking properly laid at 10-foot intervals so as to keep the pipe clear of rock or soil. The penstock must be properly braced to prevent any side thrust. Throughout the lower 70 feet of its length the penstock shall be supported on saddles mounted on trestles spaced at 10-foot intervals and properly cross braced so as to prevent any end thrust in the pipe.
- (d) Dimensions - The inside dimension of the penstock throughout the entire length shall be 36 inches.
- (e) Material - The penstock shall be continuous wood stave pipe constructed of the best quality 2 inch B.C. Douglas Fir, finished 1 5/8". The wood staves shall be made from 2 inch by 6 inch size stock lumber, they shall be made of live timber, sound, straight grained, entirely free from all dead wood, rotten knots, dry rot, cracks, shakes, or any other imperfections or defects that might impair their strength or durability. Staves may be from 10 to 30 feet in length, but not more than 10 percent shall be less than 14 feet in length. Timber must be thoroughly seasoned either by kiln or air drying before being milled into staves. The staves shall be dressed on both sides to true circles and on the edges to conform to the radial lines of the pipe, all staves shall be of uniform thickness and each stave of uniform

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- 3 -

width throughout its entire length. The end of the stave shall be cut square and shall be fitted with a saw kerf for the insertion of a metal tongue; in depth the saw kerf shall be $1/16$ inch less than half the width of the tongue and its position shall be the same in all staves. Bands of mild steel shall not be spaced at greater than 10-inch intervals. Bands and coupling shoes shall be of approved pattern and sufficiently strong for all requirements and must meet with the approval of the Engineer.

9 - POWER HOUSE.

- (a) Site - The power house shall be situated as shown on the accompany plan, the final laying out of the foundation being decided by the Engineer.
- (2) Foundations - The power house shall rest on concrete walls, which rest on bed rock and before the pouring of concrete the rock foundations must be thoroughly cleaned of all loose material and dirt of all kinds. Any rock seams, fissures or cracks in the rock foundations must be cleaned out and filled with, cement, grout or concrete as directed.
- (c) Foundation Walls - The foundation walls shall be 15 feet by 10 feet outside dimensions and shall be 18 inches in thickness and constructed to the elevations shown on the plans. The walls shall be constructed of a grout, composed of one part Portland Cement, two parts of clean sharp sand and four parts of cleaned, washed screened gravel or broken stone, with sufficient quantities of clean water so as to make the mass the consistency of mortar. If gravel be used in place of sand and broken stone, proportions shall be one part of Portland Cement to four parts gravel. Foundation wall

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- 1 -

shall be arched over the tailrace which is five feet wide and shall be strongly reinforced with four one-half inch steel rods running lengthwise of the arch and as directed by the Engineer.

- (1) Stud Walls - All studs in outside walls shall be 2" X 4". Studs shall be built up solid at angles, doubled at openings and trussed over openings of 3 feet or over. Studs shall be set at 14 inch centres, placed straight, plumb and true. Studs shall be braced until secured by floor joists overhead. Sills shall be the same size as the studding and plates same size as studding, doubled, with joints well broken. Sills shall be set level and secured to foundation with 7/8 X 16" bolts with nuts and washers upon the ends, spaced five feet upon centres. Studding shall be securely spiked to sills and floor joists securely spiked to studs.
- (2) Floors - The ground floor shall be constructed of reinforced concrete. An 8-inch steel I beam, weighing 20 lbs. to the foot, and 20 feet in length, to be placed with its centre six and one-half feet downstream from the upstream outer wall of the power house and embedded in concrete with its upper edge two inches below the top of the foundation wall will serve as central support for the floor slabs and also a support for the downstream wall of the intake chamber where it comes over the tailrace. The concrete floor slabs shall be 4 inches thick with half inch diameter steel rods placed at intervals of 10 inches as reinforcement. Floor to be finished smooth.
- The joists for the first floor shall be 2" X 8", set at 16" centres and well spiked and nailed to plates and supports with 4" spike nails. All joists to be

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

bridged with 2" X 2" herring-boned bridging, strongly nailed with 2 1/2" nails at each end of brace. Where joints are to be trimmed for stairways or openings all trimmers and headers shall be doubled and strongly secured together.

(C) Walls - The exterior of all frame walls shall be boarded up, laid close joints with good quality 7/8" narrow ship-lap lumber. This wall to be covered with one thickness of 25 lb. asphalt felt paper, and on this the outside walls to be finished with best quality 7/8" drop siding. Corners shall be finished with 1 1/8" X 3" corner boards.

(D) Rafter - All rafters shall be 2" X 4" set at 16" centres and with 1" X 6" ridge piece, with all necessary ties and bracing.

(E) Roofing - Roofs to be covered with 7/8" ship-lap, well seasoned pine or spruce boards. Roof to be covered with B.C. shingles laid 4 1/2" to the weather and securely nailed with at least two nails to each shingle. All shingles to be XXX. Between roof boarding and shingles there shall be laid one thickness of 15 lb. asphalt paper.

(F) Flooring - Finished flooring of first floor to be number 1 fir flooring, properly laid.

(G) Door Frames - Outside door frames to be of pine having 2" jambs, rebated for 2 1/4" doors. 2" birch sills, all to be neatly and strongly framed.

(H) Door - Exterior door to be formed of fir of 2 1/2" thick of approved design and hinged with three best quality 4" X 4" hinges. Exterior door to be fitted with heavy bronze faced mortised lock set, also plate and bronze knob.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

(1) Windows & Sashes - Provide where shown, four Standard American Box Window Frames, filled with moulded sash 1 3/4" double hung with cast iron pulley sash weight and best quality of sash cord, with secure fastenings and shall have lifts and fasts put on complete. Sashes shall be divided.

(m) Stairs - Stairway of fairly simple design to be constructed between ground floor and first floor, details of which will be later provided.

(n) Painting - All exterior woodwork usually painted shall have three coats of lead and oil, or a ready prepared paint of approved quality to be tinted as follows.

(o) Glass - All windows to be glazed with diamond quality sheet glass, weighing not less than 16 oz. per square foot.

10 - INTAKE CHAMBER.

The intake chamber shall be constructed as shown on the accompanying plans. The outside dimensions are to be 8 feet by 6 feet 6 inches, to rest on solid concrete base, resting on bed rock, except where provision must be made for the tailrace. The top of the chamber to be filled with a heavy metal plate firmly anchored to the concrete and provided with iron doors to cover a 8-foot square opening. The walls of the intake chamber shall be constructed of reinforced concrete, to be 12 inches thick and made completely watertight. Reinforcement shall consist of 1/2" round steel bars placed at 6 inch centres horizontally and 8 inches vertically throughout the lower four feet of the chamber, 12 " throughout the next 4 feet and 16" throughout the upper 4 feet. Special care to be taken that no leakage shall occur around the penstock entrance to the

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Intake Chamber and the opening from the chamber for the one quarter turn and governor apparatus.

21 - TAILRACE.

Excavation of rock for a tailrace is required. The tailrace shall be 8 feet wide throughout and excavated to elevation 90.0. The maximum depth of rock to be excavated is approximately six feet at the draft tube and the excavation slopes evenly to 0; the length of tailrace being 68 feet, approximately. A certain portion of the excavation is under water as shown on the plans. The tailrace shall be excavated to grade, left clear of all loose rock, and the walls shall be all points not less than five feet apart.

22 - INSTALLATION OF MACHINERY.

The Contractor shall supply all unskilled labor necessary for the installation of all hydraulic and electrical equipment and this labor shall be paid for as provided for in extra work.

23 - GENERAL CONDITIONS.

(a) All work shall be executed in a thorough, substantial and workmanlike manner and to the entire satisfaction of the Engineer. Any person employed on the work shall be employed on any part of the work. Should the Engineer or his representative deem any man, whatever their position, incompetent or negligent, or for any cause unfit for their duties, the contractor shall dismiss them and they shall not again be employed on the work.

(b) The work shall be executed in the best and most satisfactory manner, according to the true intent and meaning of plans and specifications, which are intended to include everything necessary and requisite for the full and entire completion of the works without exception, notwithstanding

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

that every item necessarily involved in the works is not particularly mentioned and work shown and not specified, or vice versa, shall be done as if both shown and specified.

(c) All work during construction and until completed and taken over by the Department of Indian Affairs is entirely within the charge of the Contractor, and he must make good any damage from fire or other cause and must also be responsible for any injury to persons or damage to property during construction.

(d) The Contractor shall allow any officer of the Department of the Interior free access to the works at any and all times and shall provide every facility for inspection that such officer may require.

14 - ~~PROVIDED~~.

No extras will be allowed except upon the written authority of the Department, and any such extras shall be paid for on the basis of Cost plus ten percent.

15 - ~~DEFINITION~~.

"Engineer" shall mean any official appointed by the Minister of the Interior and acting under his instructions.

"Contractor" shall mean the individual or corporation, entering into contract with the Minister of the Interior for the performance of the aforesaid works.

16 - ~~GENERAL~~ UP.

The Contractor shall leave the site in a clean and sanitary condition, and shall remove all temporary construction as the Engineer may direct.

SPECIFICATIONS,
HYDRAULIC APPARATUS
FOR
MCINTOSH INDIAN MISSION SCHOOL,
MCINTOSH, ONTARIO,
DEPARTMENT OF INDIAN AFFAIRS,
OTTAWA.

1. These specifications cover the design, construction, delivery F.O.B. cars McIntosh, Ontario, and superintending of erection of

ONE (1) 30 H.P. HORIZONTAL
SINGLE RUNNER TURBINE.

arranged for mounting in an open wheel pit: to operate under an effective head of 15 feet: to be installed in the power house of the Indian Mission School near McIntosh, Province of Ontario.

GENERAL:

2. The contractor will furnish and provide all the finished parts, members, attachments, fittings, materials, etc., required to fully complete ready for satisfactory operation the aforesaid hydraulic power unit in every respect according to the terms of these specifications, although not especially mentioned herein, supplying all material and performing all labor necessary therefor. He shall deliver the same free of all costs for transportation, duty, and all other charges at the Canadian National Railway station at McIntosh, Ontario.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

3. DELIVERY.

Delivery shall be made by the Contractor F.O.E. McIntosh, in the Province of Ontario, within sixty days of the date upon which the contract is awarded.

4. One single horizontal turbine, to be set in an open wheel pit, capable of developing 30 H.P. under 15 feet net effective head. No proposition will be considered for this turbine unless the efficiency guarantee when operating at gate openings from 3/4 to full gate, is at least 80%.

5. DETAILS OF TURBINE.

- (a) Runner. The runner shall be of the latest improved type, with heavy steel plate buckets cast into heavy hub and outer band of tough grey iron, truly balanced and sound and free from blow holes and surface defects, securely keyed to the wheel shaft.
- (b) Guide Casing and Gate Operating Mechanism. The regulating gates shall be of cast iron or semi-steel and shall be accurately made to pattern so as to permit of a tight fit upon one another in the closed position. The gates shall be connected by links to a cast iron regulating ring concentric with the main shaft and suited to control by compensating governor.
- (c) Wall frame of suitable dimension and of cast iron for connection to the wheel pit wall.
- (d) Quarter Turn. The quarter turn shall be of cast iron, split and provided with hand holes.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- (e) Turbine Shaft. The shaft shall be of the best open hearth forged steel and shall have a forged thrust collar to take the unbalanced thrust of the runner.
- (f) Bearings. The wheel shaft will be supported by at least two bearings, viz: Lignum Vitae Guide and Thrust Bearing mounted on the top of the guide apparatus and adjustable by bronze screws; one ring oiling thrust bearing behind the pulley, carried on a heavy cast iron pedestal, bolted to the foundation beams and guaranteed to run without heating.
- (g) Pulley. Pulley of cast iron, 9" face, and of sufficient diameter to connect with a 12" pulley on the shaft concentric with the generator, which operates at 1150 r. p. m.
- (h) Draft Tube. The Draft Tube shall be a conical tube of 1/4" plate, 7' long. It will be rivetted to a cast iron single ring bolted to the Quarter Turn.
- (i) Governor Connections. There shall be provided such connections as are required for operating the gates by means of Size D Woodward Compensating Governor.
- (j) Governor. For speed control a Size D Woodward Compensating Governor with all connections, belt, etc., for efficient operation is to be provided and installed.
- (k) Foundation Beams. The unit shall be constructed for installation on steel foundation beams, which must be provided by the Contractor.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

6. General Conditions.

- (a) It is understood that the Contractor will supply the services of one competent erection superintendent to superintend the erection and adjustments of the hydraulic equipment and all materials necessary therefor.
- (b) The entire work or any of its parts and members and all workmanship and materials entering into its construction shall be satisfactory to the Engineer. His decision as to the acceptance or rejection of the whole or any part shall be final and binding.
- (c) Bidders must submit drawings with their tenders showing dimensions and arrangement of the various parts and the kind of materials to be employed, together with complete data and details explanatory of their design.

7. TERMS USED.

"Engineer" shall mean any engineer or deputy appointed by the Minister of the Interior and acting under his instructions.

"Contractor" shall mean the individual or corporation who has entered into formal contract with the Minister of the Interior for the work herein specified.

REPORT
ON
WATER SUPPLY INSTALLATION
FOR
HEINTOSH INDIAN SCHOOL.

I - INTRODUCTION.

At the present time the Department of Indian Affairs is constructing a school building about 1½ miles from Heintosh, a station on the Canadian National Railway 169 miles east of Winnipeg. The contract for the construction work includes all plumbing fixtures and a complete cold water supply to all plumbing fixtures, to heating boilers and stand pipes, and the installation of a complete system of stand pipes and hose for fire protection. But the contract does not include the pumping equipment or intake pipe and fixtures necessary to ensure a satisfactory water supply. This report is intended to outline in considerable detail a water supply system with estimate of the cost of same, for domestic use and for adequate fire protection for the school.

II - GENERAL.

The present structure is designed to accommodate about sixty individuals, but a survey of the needs of the district in which the school is located shows that in the near future extensions may be necessary to accommodate a total of about 100 pupils. Accordingly, a water supply system to accommodate 100 pupils is now proposed. It is desired that the water supply system should serve the two purposes, domestic water supply and fire protection. To provide sufficient water for a fairly satisfactory domestic

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

water service will be comparatively simple and inexpensive, but to provide sufficient water for adequate fire protection for the building will require a high pressure system and the expense will be considerable.

To provide for domestic water supply it is considered that a supply of 30 gallons per minute should meet requirements. The pneumatic pressure tank will provide storage capacity of 850 gallons.

The specifications for the construction of the school call for ten hose connections to standpipes, two on each floor. In the case of any ordinary outbreak of fire not more than four of these would be in use, accordingly for fire protection it is considered necessary to provide sufficient water to feed four lines of hose under pressure of 60 pounds per square inch. It is considered that a water supply of 250 Imperial gallons per minute under pressure of 60 pounds per square inch pressure will give adequate fire protection for ordinary fire outbreaks. In case of forest fire the building would in all probability be doomed.

For convenient operation it has been decided to place the pumping apparatus either within the school building or in an addition immediately adjoining that portion of the basement containing the laundry. It has also been decided to pump the water from Forest lake, a pipe line approximately 450 feet long being necessary. To provide for fire protection and to overcome pipe resistance, a 5" wrought iron pipe is necessary and the pipe must be laid sufficiently deep to be sufficiently protected to prevent frost penetration.

The source of power for the operation of the pumping system has, as yet, been undecided. If the Canyon

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

river power site, located some 400 feet from the school, is developed to provide electrical energy for the school requirements, the installation of the water system and especially the operation of the system is a simple and comparatively inexpensive proposition. If this power site is not developed it will be necessary to install fuel engines for a source of power for operating the pumps and the installation becomes more elaborate, more expensive, and operation costs will be much greater. Accordingly, in this report it has been necessary to consider the question of the water supply for the school on the basis of

- (a) - Hydro power available.
- (b) - Hydro power not available.

Plans for the development and estimates of the cost of the development of the power site have been dealt with in a separate report. It was pointed out in the report that it was considered quite possible to develop sufficient power to meet all present requirements of the school, but that the cost of the development was expensive considering the amount of power required.

A - HYDRO POWER AVAILABLE.

1 - INTAKE.

An accompanying plan shows the proposed location of the intake, also the location of the pipe line and the location of the school. The intake would be immediately above the dam at the outlet of Forest lake. The 5" pipe should pass through the dam at about elevation 107 and extend upstream only sufficiently far to permit of the attachment of a strainer and gate valve.

2 - PIPE LINE.

Approximately 375 feet of 5" wrought iron pipe would be required for the pipe line to connect with the pump.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The pipe should be embedded at least three feet underground and be further protected above ground to prevent frost penetration.

3 - PUMP HOUSE.

Provision can be made to accommodate all equipment necessary in the laundry room and boiler room of the school building, thus doing away with any expense for any addition to the present structures.

4 - DOMESTIC WATER SUPPLY AND FIRE PROTECTION.

It is proposed to install a 15 H.P. motor which will drive a single stage double acting centrifugal pump, mounted on the same cast iron base with the D. C. motor. The pump will have an air compressor attachment and will be direct connected to the standpipe piping and fitted with the necessary check valves. Pipe reducing down to 2" will lead from the main pipe to a 4' x 16' pneumatic pressure tank from which the water supply of the building for domestic purposes is forced under pressure of a minimum of 25 pounds per square inch. This pressure tank will be fitted with the necessary gauges, etc., and will have a working capacity of 333 Imperial gallons with a ^{max.} working pressure of 80 pounds per square inch. The domestic water supply system will be equipped with a suitable Cuttler Hammer diaphragm pressure regulator for automatic control. In case of fire the pump feeds the hose direct at pressure required.

5 - Hydro Power Not Available

2 - INTAKE.

The accompanying plan shows the location of the intake, the pipe line and the addition to the school building.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

required as a pump house, in case no hydro-electric energy is available. The intake is at the outlet of Forest lake, but must extend out to ensure a seal over the intake. The outlet of the lake does not freeze over under existing conditions and little trouble need be anticipated with the intake.

2 - PIPE LINE.

Approximately 465 feet of 5" wrought iron pipe will be required. The pipe must be laid at least three feet underground, where possible, and protected otherwise to prevent frost penetration, particular care being taken in the vicinity of the lake shore, where rock prevents excavation.

3 - PUMP HOUSE.

The equipment necessary for the water supply pump driven by fuel oil engine can ^{not} be housed in the school building, owing to lack of space and the excessive noise of the exhausts. It is proposed to house this equipment in an addition 16' x 31', as shown on the accompanying plan.

4 - DOMESTIC WATER SUPPLY.

To pump 30 gallons per minute it is proposed to install a 3 H.P. gasoline, distillate or kerosene burning engine, which would be belt connected to a double acting power pump with a capacity of 30 gallons per minute and with an air compressor attachment. The pump will be connected by piping with a 4' x 16' pneumatic pressure tank, fitted with gauge, etc., and with a working capacity of 833 gallons with ^{a max.} working pressure of 80 pounds per square inch. The domestic water service will be fed from the pressure tank.

5 - FIRE PROTECTION.

For fire protection it is proposed to install a 25 H.P. oil engine, which will be belted to a single stage,

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

double acting centrifugal pump having a capacity of 250 imperial gallons per minute against a total head of 120 feet. The pump will be connected to the feed pipe and also to the piping leading to the standpipes. This pump could be connected up with feed pipe from the standpipe piping to the pressure tank and thus utilized for domestic service in the event of a breakdown of the domestic service pumping equipment.

6 - LAUNDRY ROOM SERVICE.

Power will be required for the operation of the machinery of the laundry room. A central shaft connecting the different laundry mechanisms could be operated by a belt connected to the 3 H.P. engine running the domestic water supply pump. However, if a small 3 H.P. engine is installed to operate a generator to supply electric lighting it should be located so as to also operate the laundry machinery.

The McIntosh Residential Indian School now under construction by the Department of Indian Affairs is located on Canyon Lake some two miles south-west of McIntosh, Ontario. As there are at present some summer resorts along the shores of the lake, and with the likelihood of these increasing in the near future, the discharging into the lake of untreated sewage from an institution the size of the school was not considered advisable, and the following is a report of the method of treatment which is considered most suitable. Plans and profiles of the proposed works, together with estimates of the cost, accompany this report. The elevations given on the plans and profiles are an assumed datum. The top of a large boulder behind the cook-house marked in white paint being taken as 100.00.

The general method of treatment, septic tank and sub-irrigation disposal bed, was decided on after a consultation with Mr. Orr, Architect of the Department of Indian Affairs, and with the officials of the Oblate Order who will have charge of the school. As the most suitable place for a disposal system lies between the front of the school and the lake and as it is the intention to construct play grounds and gardens at this point it was considered essential that no part of the works should appear above ground and that they should be free from objectionable odors. It was also desired that the system should give continuous service with a minimum of attention. Though

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

the type of soil is not naturally favorable for the sub-irrigation method of treatment, being mainly a non-porous clay, this method is practically the only one that will give the desired conditions.

Though the school is designed for only sixty pupils it was considered advisable, in view of possible further extensions, to provide a system capable of taking care of 100 inmates.

As shown on the general layout Plan No. 1 it is proposed to discharge the laundry waste directly into the lake through a six-inch tile drain. In addition to reducing the amount of sewage to be treated it ensures that no chemicals, etc., used in washing enters the treatment works.

The sewage from the toilets, baths, etc., is carried by a six-inch tile (designated Sanitary on the plan) to the septic tank with the dosing or syphon chamber attached. From the syphon chamber the liquid is automatically discharged by two three-inch "Aathes" syphons to the disposal bed.

LAUNDRY WASTE.

As already stated the waste from the laundry is not treated but is discharged directly into the lake. A six-inch cast-iron soil pipe carries the waste from the building to the double manhole "A", See details of manholes Plan No. 3. and from this manhole a six-inch tile is laid for about fifty feet in the same trench as

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

the sanitary drain and then carried direct to the double manhole "B" which, as shown on Plan No. 3, has two separate chambers at different elevations, the lower receiving the laundry waste, and the upper the affluent from the septic tank. From this manhole the laundry waste is carried through a six-inch tile pipe laid through the centre of the disposal bed to manhole "C" and thence through a six-inch tile to Canyon lake.

SEPTIC TANK AND SYPHON CHAMBER.

The sewage, other than the laundry waste, leaves the building through a six-inch cast-iron soil-pipe to the double manhole "A", thence through a six-inch tile to the septic tank. As shown on Plan No. 2 the septic tank and syphon chamber are combined and are to be constructed of a 1, 2 and 3 concrete mix. To secure protection from frost a double plank roof with a six-inch air space is provided.

The septic tank itself is seven feet wide, seventeen feet long and six feet deep at the centre. To facilitate the removal of sludge the bottom of the tank slopes towards the inlet end, and a manhole is placed in the roof at this point. The affluent enters the tank through a six-inch cast-iron soil-pipe and by means of a tee and a short length of pipe is carried one foot below the sewage line, thus avoiding any disturbance to the surface scum.

From the septic tank the sewage flows over the dividing wall to the syphon chamber; two baffle boards carried one foot below the standing level of the liquid preventing any undue disturbance.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

From the syphon chamber the sewage is discharged through two three-inch "Anthes" automatic syphons designed to discharge under an eighteen-inch head. As the syphon chamber is seven feet square it will carry about 450 imperial gallons before discharging to the disposal beds. With one hundred inmates this will be from one-third to one half the daily amount of sewage to be taken care of and will therefore allow ample resting periods for the disposal beds.

DISPOSAL BED.

As already stated this method was decided upon as it would give (1), Continuous service with minimum attention, and (2), Absence of any works above ground and freedom from objectionable odors.

Though the nature of the soil, which is mainly a non-porous clay, is not favorable for this method of treatment, this can be overcome by excavating to the desired depth and laying the four-inch field tile on a fifteen-inch bed of gravel.

As shown on Plans Nos. 1, 4 and 5 the bed is 120 feet wide by 100 feet long. The affluent from the syphon chamber is discharged through a six-inch tile to the double manhole "B" and from there flows through the two six-inch tile headers. From the headers it is distributed over the bed through thirty branches, each 100 feet long, of four-inch field tile, laid with open joints on the fifteen-inch bed of gravel.

It is necessary for the proper working of the disposal bed that the oxygen of the air be brought in contact with the sewage and any covering over the bed should be

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

sufficiently porous to allow the entrance of air. The design therefore calls for a covering of sand and clay twelve inches in depth with a six-inch top dressing of loam.

MANHOLES.

The three manholes called for provide sufficient access to the system so that in case of any blocking of the drains the trouble can be removed, or at least located, by means of rods.

As shown on Plan No. 3 the manholes are constructed of concrete, with the exception of the roof, which is made of two thicknesses of two inch plank. Each manhole is provided with a two-foot square cast-iron cover to allow of easy entrance.

Manholes "A" and "B" are double manholes having two chambers separated by a concrete dividing wall, the one chamber taking the laundry waste and the other the sanitary sewage.

An iron screen is provided for the sanitary sewage chamber at Manhole "A" to prevent any articles such as rags, boots, etc., reaching the septic tank.

The sanitary sewage chamber of Manhole "B" receives the effluent from the septic tank and from there it passes to the six-inch tile headers of the disposal bed. The laundry waste chamber is at a lower elevation, the six-inch tile drain entering it, passing under the sanitary chamber.

The sewage from the septic tank may, if desired, be allowed to flow into the lower chamber and thence into the six-inch laundry drain direct to the lake. By this

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

arrangement any repairs to the disposal bed may be made without interrupting the disposal of the sanitary sewage.

The following gives the estimated cost of labor and materials necessary for the construction of the system without the disposal bed, the estimate for the bed being given separately.

SEWER TAKE AND SYPHON CHAMBER.

22 cu. yds. concrete @ 14.00.....	308.00
71 " " earth excavation @ 1.00....	71.00
1400 F.B.M. Lumber @ 65.00.....	91.00
Two Antee Siphons, fittings and manhole covers.....	100.00

MANHOLES "A", "B" and "C".

4 cu. yds. concrete @ 14.00.....	56.00
3 " " earth excavation @ 1.00.....	3.00
3 cast iron manhole covers and fittings	15.00
300 F.B.M. Lumber @ 65.00.....	19.50

LAYING AND SUPPLYING DRAINS.

Sanitary Drain.	
53 lineal feet of 6" tile @ 1.15.....	60.85

Laundry Drain @ 0.60.....	30.00
175 lineal feet in separate trench.....	105.00

Two separate estimates have been prepared in estimating the cost of the disposal bed. The first estimate includes all labor and material required, while the second estimate assumes, as suggested by Mr. Orr, the supplying of the gravel and all necessary labor by the Oblate Order, and covers only the cost of the six-inch tile headers and underdrain and the four-inch field tile.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

3000 lineal feet 4" field tile @ 0.15....
120 " 6" tile headers
including 30 Tees @ 1.
120 lineal feet 6" tile under
@ 0.70..

\$3104.00

Estimate II - Excluding all Labor and
the supply of Gravel.

3000 lineal feet 4" field tile.....
120 " 6" tile headers
including 30 Tees....
120 " 6" tile underdrain.....

OPERATION

Though the proposed sewage disposal plant requires less attention than any other standard method of treatment there are certain duties that are necessary to ensure successful and continuous operation. These duties are increased when the system has to operate under extreme winter conditions such as prevail in the vicinity of McIntosh, Ontario. To ensure satisfactory service the following suggestions are made:-

(1) - If the system is started up during cold weather it is advisable to have as much hot water as possible enter the septic tank, thus aiding the bacterial action.

(2) - An eighteen inches of earth over the disposal bed is about the maximum depth allowable in order that sufficient air will reach the sewage, it is advisable, especially during the first winter's operation, to cover the entire bed with manure or straw. No doubt more

Indian Affairs. (RG 10, Volume 622f, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

successful operation would be secured if this were done every winter.

(3) - As shown on Plan No. 2, an overflow pipe is provided from the syphon chamber. The purpose of this pipe is twofold, as in addition to taking care of the sewage in case the syphon stopped working, it provides an outlet for the air from the disposal bed, as it is receiving its charge of sewage from the syphon chamber. To ensure a free outlet for this air it is essential that no trap be placed in the sanitary drain between the ventilating stack in the building and the septic tank.

ASST. DIRECTOR J. T. JOHNSTON C.E. M.B.E.

Ottawa, November 12, 1924.

Your file number: 130-7-5.

I enclose herewith a report received from the District Engineer of this District at Winnipeg, on the proposed water supply installation for the Holsten Indian School, District of Canada, Ontario. This report proposes to provide for domestic water supply for ordinary requirements with special provision for fire protection, and gives two alternative schemes on the basis of whether or not hydro power is available.

As, however, I understand that it has been decided to provide for fire protection by means of a large storage tank placed at a sufficient elevation above the school building to give an adequate pressure by gravity, the scheme proposed in the enclosed report will have to be modified accordingly.

I shall be glad to have your instructions regarding the preparation of an alternative scheme based on the use of a large capacity gravity storage tank.

Your obedient servant,

J. T. Johnston,
Acting Director,
Water Power and Reclamation.

Ottawa, Nov. 14, 1924.

re current to the proposed MacIntosh School.

It is the intention of the Department to have only the dam proceeded with this year, in accordance with the plans already submitted. In view of the fact that there is a large quantity of stone available on the site of the dam it is intended that the dam should be built of concrete as specified. It is also intended that the dam should be built in the penstock opening.

The dam is to be supervised by the District Engineer or one of your engineers in the district.

part of the work.

Your file 40103-W.

DOMINION WATER POWER BRANCH

WINNIPEG,
MANITOBA

November 26th 1924.

Sir:-

In your letters of November 11th and 12th you state that the Indian Department now propose to install a large water tank on high ground above the school to provide a gravity system of water supply.

The proposal to install a large water tank on the hill is, I think, Mr. Orr's suggestion. Based upon observations made by him during his inspection of the site. During my visit to the site last week I obtained the elevation of the top of this hill in relation to the school building and find that the top of the hill is at elevation 135.00 and the ground at the foot of the school about 112.00. A level shot from the top of the hill to the school building shows that the elevation of the top of the hill would correspond to a point on the building about 5.7 feet below the eaves.

I quite appreciate that the decision to install a large tank on the hill rests entirely with the Department of Indian Affairs, but it seems to me that there are two factors which will have to be considered in the future. 1. The cost of the tank and the stand pipe. 2. The cost of the water supply. The cost of the tank and the stand pipe can be obtained from the water power development.

From rough level notes on hand and scaling the plans of the building, from the plans and following are the approximate elevations of,-

1 - Basement floor of school -	elevation 109.00
2 - Ground elevation outside of building	112.00
3 - Top of Roof -	elevation 161.00
4 - Top of Hill -	" 135.00

A tank for domestic water supply alone, with a four-inch stand pipe feeding into the water system in the basement, would, in order to give 20 pounds pressure on the tank on the ground level, have to be 45 feet high above the top of the hill. A tank, with a six-inch stand pipe and high enough to give a pressure of say 65 pounds, for fire protection, at the ground hydrants, would have to be 124 feet high above the top of the hill, or 98 feet above the roof.

The Director,
Water Power & Reclamation Service,
Department of the Interior,
Ottawa, Ontario.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- 2 -

When it is considered that temperatures ranging down to 40 below zero will be experienced at McIntosh you will appreciate that the cost of constructing these tanks will be a large sum of money. In fact, Mr. Simmons has stated that to construct a tank as outlined above for domestic water supply would consist of a steel supporting structure and would likely cost between \$10,000.00 and \$15,000.00.

In view of the above and in view of the fact that 30 h.p. will be available from the power development at McIntosh it seems to me that this power should be utilised, and that a centrifugal pump, direct connected in case of fire, or through a pressure storage tank for domestic water supply, will provide by far the most economical system of water supply and fire protection, even though a small auxiliary pump of sufficient capacity to meet the requirements of the domestic water supply were installed in addition to the larger pump suggested for both purposes. The pump suggested for this purpose would throw 250 gallons in either three or four streams clear over the building. Both systems, that is, the large storage tank suggested by Mr. Orr, and the pressure system suggested by me, have their advantages and disadvantages. I quite realize that the pressure system is more mechanical than the other, but at the same time these systems are simple and I know from experience that they do give practically automatic operation with very little trouble.

It would appear that the Department of Indian Affairs desire to have a larger quantity of storage water on hand than the 850 gallons suggested in Mr. Cow's report. If such is the case I would suggest that as an alternative storage tank, with a capacity of 1500 imperial gallons, be supplied. If this size of tank is required, and if it is thought advisable to have an auxiliary pump, I would advise that a separate pump house be built to contain the pumps, motors, electric control switches and pressure tank. If there is no objection to pumping the water from the draft tube chamber of the power house, the power house floor could be enlarged or an addition to the power house built to contain the pumping apparatus and pressure tank, but in any case, this system, especially if fire protection is insisted upon, would I think cost about one-half that of the large storage tank.

The above is submitted for your consideration because 30 h.p. is available, and if you think it would be acceptable to the Indian Department I will have prepared an alternative layout for the water system, together with estimates providing for a separate pump house and a 1500 gallon pressure tank, either with or without a small auxiliary pump for domestic water supply.

DOMINION WATER POWER BRANCH

Winnipeg.

Manitoba, December 16th, 1924.

Sir:-

Re McIntosh Indian Mission School.

In order to confirm our verbal instructions of November 9th to Mr. J.H. Simmons, contractor for the McIntosh Indian School, a letter was sent to Mr. Simmons stating that the Department of Indian Affairs authorized the construction of the McIntosh dam by him on the same terms as he was constructing the septic tank, that is, on a basis of proven cost plus 10%.

The contractor was at that time rushing the work on the school in order to get his contract completed as quickly as possible. In this work, however, the contractor was handicapped by lack of transportation of building materials from the station to the site and from the source of gravel supply. The gravel pit was located on Canyon lake about half a mile east of McIntosh station and two and a half miles from the school. The gravel was hauled from the pit to the school in a barge towed by a small motor boat. Even working day and night it was impossible for this mode of transportation to haul all the materials to the school before freeze-up, with the result that when freeze-up did occur there was not a supply of sand or gravel available to start construction on the dam or septic tank. Under the circumstances, therefore, the contractor was not in a position to start concrete work on the dam and septic tank when authorized to do so.

Subsequently, a new supply of sand and gravel was secured adjacent to the site of the school and last Wednesday I received notice that the contractor was ready to proceed with the construction of the dam. On Thursday Mr. Day left for McIntosh to supervise the construction of the dam, but found upon examination of a portion of the river bed which had been uncovered that there were sand and gravel bars of rock through and under which water was flowing. The contractor removed the gravel rock on one side of the channel by blasting through the solid rock and succeeded in the hole to remove all material from the stream bed along the line. On Saturday last weather conditions were so severe that work on the dam was stopped, and because of the severe weather and high water level it was not possible to resume work until January 2nd or 3rd.

The Director,
Dominion Water Power & Reclamation Service,
Department of the Interior,
Ottawa, Ont.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The construction problem is quite simple and under summer conditions would be quickly and easily handled. Under winter conditions, particularly with small masses of concrete, extra precautions have to be taken to prevent freezing of the concrete, to secure a proper set and bond. Likewise extra work is involved in the unwatering, removing of ice and sealing the foundations prior to placing concrete or masonry. I am quite confident, however, that the dam when constructed will be entirely satisfactory, and in order to ensure a proper set and to safeguard against freezing I have shipped to McIntosh two old Red River tents which can be kept over the work and the concrete kept warm by a couple of old camp stoves.

The seams and layers of rock revealed in the river bed were not anticipated, as the shore rock is all solid. An additional expense is therefore necessarily involved to secure a water tight seal for the dam. On the other hand, sand and gravel have been obtained closer to the site, which should to some extent reduce the cost of construction, but the saving here will hardly offset the additional expense necessary to secure proper foundations and the slower progress due to winter conditions. Under the circumstances, it is quite possible that the estimate for the dam and unwatering may be exceeded.

In reply to my wire of November 19th stating that inspection had not been provided for, you wired that Brother Gauthier had been asked to act as inspector on the construction of the septic tank and dam. Brother Gauthier received a wire from the Department of Indian Affairs asking him to give us whatever assistance he could in supervising the work and checking the time. In reply Brother Gauthier wrote Mr. Orr stating that he would assist us providing he was paid full time and asked under whose authority he was to act. This matter was generally settled on Nov. 21st, as you will note from the copy of letter attached, and so far as I know, is still unsettled. From the above you will realize that no check has been kept on either labor or materials in the excavation and construction of the septic tank and dam.

In order to keep a close check on all time and materials entering the dam and septic tank from this date I have instructed the contractor to cease work on the dam, with the exception of hauling the necessary sand, gravel and rock, until after the New Year, when an engineer from this office will reside on the job until it is finished.

Your obedient servant,

Sgd. C.H. ATTWOOD,
District Chief Engineer.

DEPARTMENT OF INDIAN AFFAIRS

CANADA

Ottawa, Jan. 10, 1925.

Mr. Scott.

A detailed report with plans and estimates has been submitted by the Dominion Water Power Branch of Winnipeg, on the proposed hydro electric and water work system for the McIntosh Indian Residential School. This report contains a number of schemes all of which I have carefully examined, and discussed with Reverend Father Boyer, who visited this office.

First proposal provides for a water supply system and electric lighting plant operated with gas engine, without hydro electric power, and the second proposal provides for the operation of both systems with hydro electric power available on the school site.

As you are aware the Department has already decided to adopt the second proposal and the construction of the dam for the hydro electric power is now being carried out by the contractors for the building, under the supervision of an officer of the Dominion Water Power Branch, but only this part of the scheme is authorized at present and will be attended to this fiscal year. This part of the work was considered necessary in order to enable the rest to be proceeded with next spring. The project as submitted should be accepted but with modifications which will not reduce the cost of erection materially but will keep down the maintenance cost. The scheme in summary which I would recommend would consist of the following items:-

A power house 30' x 18' located 325' below the dam, a distance of 200' feet south of the school building, where the hydro electric machinery is to be installed in the basement together with pressure tank, motors and pumping outfit.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

W. Scott.

A turbine of horizontal type, having a capacity of 1 H.P. to operate a 17 K.W. direct current generator. This generator will supply ample power to provide for an adequate fire pump, operating of the pumping units, lighting, etc.

The water supply system will consist of 48" x 16' pneumatic pressure tank, which will be supplied by a centrifugal pump with a capacity of 250 gallons per minute, operated by a 1 H.P. motor. The water intake is to be located in the turbine house, to be equipped with a device fed directly from the pump at

To save the cost of maintenance in the above mentioned scheme the small pump is authorized as a temporary water supply. I would suggest the installation of several hydrants outside the building on account of the high cost of such work, and the great care required to keep them in good working order. As a practical means of protecting the building from bush fires, I would recommend the purchasing of a portable engine and pump of the type used by fire rangers. This apparatus would require the installation of a hydrant only, on the north west side of the school building, which is the only place where a reliable source of water is not available for the feeding of the pump. The cost of the hydro electric power and the pumping plant with the exception of the amount to approximately including correction

and that all the materials required be obtained by obtaining competitive quotations from various firms ample time to submit quotations. carried out advantageously by Brother Eugene experienced in this kind of work, and willing to take time to time if necessary of the Dominion.

, Memo, re Construction of Dam on
Canyon River, Ont.

On January 6th I left for McIntosh to take charge of the construction of the dam on the Canyon river in connection with the hydro-electric development for the Indian Residential School at McIntosh, Ontario. Previous to January a certain amount of work was done during November and December, 1924, comprising the following:-

- (1) All earth excavation.
- (2) Cofferdam for unwatering the south side of the river from Station 2 + 90 to Station 3 + 25.
- (3) Some rock excavation from Station 2 + 90 to 3 + 25.
- (4) About 50 cu. yds. gravel hauled to the site.
- (5) About five cords of wood hauled to the site.

The cost of labor for this work was \$735.00

On January 7th the section from Station 2 + 84 to Station 3 + 24 was housed in by tents over a frame work of poles and four stoves and a small steam boiler set up for heating. Owing to the extreme cold, the work was carried on under difficulties and it was not until January 16th that the section from Station 2 + 88 to 3 + 22 was completed. As the greatest care was taken to protect the concrete from freezing no trouble is anticipated from this source. It is the intention to keep this section covered and heated until the 19th to ensure the proper setting of the concrete. Though the work from the standpoint of quality will no doubt ^{be} satisfactory the cost is considered excessive. The labor cost alone, which runs about \$40.00 a day, will for this section of the dam 34 feet long,

Indian Affairs. (RG 10, Volume C-21, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

amount to about \$450.00.

The construction of small works of this nature during extreme winter conditions adds a high percentage to the cost. In this case the increased cost will probably be between 33 and 50 percent. Though some conditions might justify this additional cost, the necessity of completing the dam during this winter does not, in my opinion, warrant this increase. In addition to the increased labor costs, the construction of the non-overflow section will be further increased, if carried on during the winter, owing to the difficulty of securing boulders. A large number are available at the site, but with over a foot of snow on the ground it is almost impossible to locate them. Building the non-overflow section of ordinary concrete instead of masonry construction will mean a large increase in the amount of cement and gravel required.

The suggestion therefore is made that that section of the dam, from Station 2 + 40 to Station 3 + 66 be completed now and the balance of the non-overflow be finished in the coming spring. By finishing the section stated above, all work requiring cofferdams will be completed and by constructing the non-overflow section to Station 2 + 40 no difficulty should be encountered in the spring from the increased run-off. This work might be either included in the power house contract or could be done by day labor. The moving of the bunk-house off the line of the dam will be an awkward and rather expensive piece of work and if it is the intention to construct the balance of the non-overflow section by day labor it would be advisable to have it moved this winter by Mr. Simmons while he has his men and equipment at the site.

SELLING PRICE ON PORTABLE TWO-WHEEL FIRE PUMP.

PORTABLE FIRE PUMP CONSISTING OF:-

Heavy Duty Motor Direct Connected to Special Vertical High Pressure Pump, having 2" suction and two discharge outlets 1-1/2" each through a "Y" or siamese fitted with valves. (For details of motor and pump, see Bulletin 100-A.)

Hose Box fitted with slatted floor, hinged cover and tail board to carry 1000 feet 1-1/2" linen or 500 feet cotton rubber lined hose.

Tool Box of ample size to carry tools and nozzles.

The above mounted on a specially designed two-wheel chassis with suitable springs mounted on two Ford wheels with special axle fitted with demountable rims and pneumatic tires, 30 x 3-1/2". Fitted with towing pole, to be either drawn by man power or can be attached to an automobile. Complete outfit painted Fire Department Red and suitable striped. Extra for runners for Winter use - as shown in cut. Nett weight of outfit 550lbs.

Complete set of tools for pump and engine:-

- 1 - 15 ft. length 2" armoured Suction Hose, with suitable strainer.
- 1 - Pickback Fire Department Fire Axe.
- 2 - Spare Gas Cans, two gallons each.
- 1 - Brass Siamese with 1-1/2" outlets with lever valves.
- 2 - 1-1/2" Taber Hose Coupling Spanners
- 2 - 2" Taber Hose Coupling Spanners
- 2 - Special 17" x 1-1/2" Polished Brass Nozzles, 1/2" outlet, with extra tips, 1/4" and 3/8".

Price complete as above \$ 785.00

Extra for runners for Winter use, as shown in cut \$ 25.00

Requisition for Pumps.

The Purchasing Agent,
Department of Indian Affairs,
Ottawa, Ontario.

Dear Sir:-

We are in receipt of your request for prices on a Centrifugal Pump for the McIntosh Residential School, McIntosh, Ont. for which we thank you.

So we will quote on the right size Pump, will you be kind enough to advise us by return mail, the total head against which this pump will have to work. By this we mean the distance you will have to lift the water to the pump and the distance the pump will have to force the water from the discharge opening to the point of discharge, as it will all depend on this, as to what size pump we will have to figure on, to give you the required capacity at 250 gallons per minute.

We note you state in the last sentence that the pump is to have an air compressor adjustment. Are we to understand from this that you mean a hand primer, or if this is not the proper interpretation, will you kindly advise us.

If you will let us have this information by return mail, so we can get our figures prepared and have them in your hands by the 19th, the time required, we will appreciate it.

Yours very truly,

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

Gentlemen: Re. Centrifugal Pump and Electric Motor,
for McIntosh, Ontario.

We take pleasure in acknowledging your inquiry for one
(1) Centrifugal Motor Driven Pump for McIntosh Indian Residential
School, for which quotations will be received until February 19th.
As the quantity of water to be pumped, there is no information
stated with reference to the total head or pressure against which
the pump is to operate. It will be necessary for us to have
this information before we are able to submit a quotation, and we
would ask you to kindly advise us in regard to this point at
your earliest convenience.

Thanking you for referring this inquiry to us, and for
your attention to this matter, we remain

Yours very truly,

Ottawa, Feb. 12, 1925.

Sirs,-

With further reference to the quotation form sent to you a few days ago for the furnishing of a centrifugal pump for the McIntosh Indian Residential School, which quotations must be returned on or before noon of 19th day of February, I beg to advise you that the air compressor adjustment referred to is for the supplying of compressed air in the two pneumatic pressure tanks, having as dimensions 4' x 16', where an average pressure of 65 pounds will be maintained.

The maximum distance from the pump to the point of discharge when the pressure tanks are not in use will be about 500 feet. There will be no suction lift in this case.

Trusting that this information will be satisfactory, I remain,

Your obedient servant,

J. D. McLean.
Asst. Deputy and Secretary.

Dear Sir,-

We acknowledge, with thanks, receipt of your request for tenders for two
4' x 16' Pneumatic Pressure Tanks for the McIntosh Indian Residential School at McIntosh,
Ontario, and sincerely regret to advise that we cannot quote to advantage on such tanks.

We have purchased for our own use a number of tanks similar to those
covered by your inquiry from the E. Leonard & Sons Company, Ltd., London, Ontario, and
if you have not already forwarded an inquiry to them, we would respectfully suggest that
it might be to your advantage to do so.

Yours very truly,

"SCHRAMM" Double-Cylinder Engine-Driven Triplex Pump

"SCHRAMM" Double-Cylinder Engine-Driven Triplex Pump Mounted
on Rubber-Tired Wheels with Draw-Bar.

ROAD Contractors have for some time past demanded a high pressure, heavy duty pump that would deliver water through long pipe lines with an even flow. With this thought in mind we have developed the "SCHRAMM" Double-Cylinder Engine-Driven Triplex Pump. The Engine was designed to specially meet the requirements of this particular unit. It is a horizontal, two-cylinder, four-cycle, throttle-governed gasoline motor.

The two cylinder feature makes the unit a steady running power plant with a minimum of vibration due to the alternately exploding cylinders. It also helps insure a steady flow of water. Connection to the pump is made by means of broad-faced, machine-cut gears, well guarded, to prevent accident to the operator. The direct connected feature makes a most compact and neat equipment.

The engine base, cylinders and water hopper are cast integral, and are made of close-grained gray iron of the highest quality. The cylinders are machined and ground accurately to size.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

SCHRAMM, INC.

"SCHRAMM" Double-Cylinder Triplex Pump with Fire Fighting Equipment.

The pistons are of close-grained gray iron accurately machined and ground to a perfect fit with the cylinder.

The connecting rods are of steel. They are nicely proportioned and well balanced. The piston end of the rods are fitted with a solid bronze bushing, which is securely forced into the rod and fitted to the piston pin. This bearing is lubricated from the top of the piston by means of an oil tube running down through the bearing.

Another big feature of the engine on this unit is the bearings. They are made of a high grade babbitt metal, accurately turned and scraped, and fitted into the base. On the "SCHRAMM" Engine, we do not follow the old method of pouring the babbitt metal into the rough casting of the frame. All of the babbitt bearing shells are interchangeable and in case of excessive wear can be replaced by an inexperienced man.

All bearings have proper grooves distributing the lubricant to all points. The bearings are exceptionally broad and the shaft is large in diameter. These parts are practically indestructible.

The enclosed crank-case is also an important feature of "SCHRAMM" units. It prevents dust and dirt from getting into the cylinder and bearings, and therefore, prevents excessive wear to these very important parts of the unit.

The pump is of the same type as used in our line of single-cylinder engine-driven triplex pumps, with the exception that the cylinders are brass lined. The pistons are also of brass. This prevents both cylinders and pistons from becoming corroded, due to water laying in the cylinders when the pump is not in use. This is a feature very seldom practiced by other manufacturers of road pumps. It is specially designed with extra large valves and water passages so as to obtain low water velocity.

The valves are easily accessible. The pistons are guided by separate cross heads and are outside-packed. All bearings on the connecting rod and crank are adjustable.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

Fire-Fighting Equipment attached to rear of automobile.

This equipment is shown on the front page of this bulletin.

This particular unit is also especially well adapted for fire fighting service in rural communities. It is impossible for the smaller towns to equip themselves with a fire-fighting apparatus costing several thousand dollars, but with the "SCHRAMM" double-cylinder, engine-driven triplex pumping unit, an equipment can be had that will furnish adequate protection for only a few hundred dollars. This will make all smaller communities totally independent of the larger towns adjacent to them. For this purpose we recommend that the outfit be mounted on the rubber-tired wheels. In this case the draw-bar and handle is always furnished.

We also recommend that the outfit be equipped with the wire basket and supports as shown in the cut on page 2 for holding the suction hose and discharge hose. The outfit can then be attached to the back of any automobile, wagon or even to a motorcycle, should such a machine be available, and hauled to the fire.

Any one of these equipments will have sufficient power to haul the "SCHRAMM" outfit at high speed over even the roughest country roads. If none of these are available then the outfit can be hauled by two men. The light weight, compact construction and even balance, coupled with the fact that the wheels are equipped with roller bearings, make it easy for two men to handle the outfit.

This outfit will give sufficient water for handling a one-half inch fire nozzle when the fire is a considerable distance from the water supply. Should the water supply be close to the fire it will be found that the outfit will give sufficient water to play two streams on the fire under high pressure and quickly extinguish same. There is always a lake, creek or even a well into which the suction hose for the pump can be thrown without any trouble.

Fire-Fighting Equipment attached to Motorcycle.

Dear Sir:-

In connection with your letter of January 29th, requesting catalogue and price list on fire pumps, we regret to advise that the portable fire pumps that we manufacture would not be suitable for the purpose which you require this outfit to be used for.

We are attaching herewith catalogue on Schramm double-cylinder, engine-driven Triplex pump mounted on rubber tire trailer with draw bar and wish to advise that this complete outfit including all fittings, etc., would cost you \$1600.00 F.O.B. Montreal or Ottawa.

We trust this will be of interest to you,
and remain,

Yours very truly,

DO NOT WRITE ABOUT MORE THAN ONE SUBJECT IN THE SAME LETTER—WRITE LEGIBLY YOUR FULL NAME AND ADDRESS

DEPARTMENT OF
RAILWAYS AND CANALS

J. W. PUGSLEY.

McLean

Ottawa, February 18th 1925.

Sir,-

In reply to your letter of the 3rd of February, instant, respecting the blocking of navigation on Canyon Lake, near McIntosh, by the construction of a culvert on the line of the Transcontinental Railway, I have to advise that the Commissioners of that Railway were authorized to carry on the work of construction notwithstanding the provisions of the Navigable Waters Protection Act; further, that it is considered that your Department should have taken some action in the matter at the time the work was carried on, namely, in 1908.

To make any changes now would incur considerable expense and possibly weaken the railway structure, and it does not appear, therefore, that any action can be taken to change the present conditions.

I have the honour to be,

Sir,

Your obedient servant,

J. W. Pugsley
Secretary.

Toronto, February 17th, 1925.

Sec'y of Department of Indian Affairs,
Ottawa, Ontario, Canada.

Gentlemen: Attention Mr. J.D. McLean,
 Re. Centrifugal Pump for McIntosh, Ont.

With further reference to your inquiry for a Centrifugal pump and Electric Motor for McIntosh Indian Residential School, we are afraid that we shall be unable to submit a tender as the data contained in your inquiry and your letters of February 10th and 12th, is not quite clear to us. We have the impression that you require a pumping unit capable of delivering 250 Imperial GPM, against a pressure in the two pneumatic pressure tanks of 65 pounds per square inch, plus the friction in 500 feet of piping. No mention is made, however, of the size of the pipe. The inquiry also calls for an air pressure adjustment, from which, we take it that the pump is to be started by means of a pressure governor, that is to say when the pressure in the tanks has dropped to a certain predetermined point, the pump will be put into operation automatically, and will continue in operation until the level of the water in the tanks has reached a point which causes the pressure to rise to 65 pounds per square inch. Your inquiry specifies a 15 H.P., direct current motor, but if our interpretation of the data is correct, we would have to offer a pump which would require motor of at least 25 H.P.

~~and for the pump and motor and for the discharge pipe and for the discharge pipe~~

(NINE HUNDRED AND FORTY FOUR DOLLARS).

NOTE — THE SUCTION LIFT specified above is a good average figure for COLD water at sea level. For HOT WATER and HIGH ALTITUDES, see special curves supplied on application. Our pumps will deal with as high a lift as that of any other maker, but our extensive experience justifies us in strongly recommending the suction lift to be reduced to the least permitted by local conditions. Large quantities of water for Medium or High Lifts usually require a pressure head on the suction.

In the case of pumps dealing with water or other liquids containing impurities, matter in suspension, acids, etc., full particulars must be sent prior to placing an order, also instructions with regard to any special materials to be used describing the peculiarities observed by the use of the water in existing pumps or machinery. Our guarantee does not cover chemical electrolytic, galvanic or other destructive action.

Further, we do not make any guarantee to cover i.e. wear and tear, the effects due to carelessness or incompetence of the part of those handling the plant, defective foundations or buildings, faulty erection, unsatisfactory arrangement of piping, freezing or rusting, or any other matter of importance.

McINTOSH, ONTARIO.

THIS TENDER is made upon the following terms:-

1. We undertake that the machinery manufactured by us shall be of first-class materials and of sound workmanship, and that we will make good or replace any defects or defective machinery which may appear within six months of delivery from us and which are proved to be due solely to the materials or bad workmanship, any defective parts replaced by us. Any machinery not of our own manufacture included in this tender is sold under such warranty only as the makers give us and we are able without legal expense to enforce, but is not guaranteed by us in any way.
2. The machinery comprised in this tender is not subject to any condition, warranty or representation except such as may be specifically stated in this tender. Should any part of the machinery manufactured by us be proved within ninety days of delivery from our works not to satisfy any specific condition, warranty or representation given by us, the Purchaser may within fourteen days return such part to us at his own expense, undamaged and in sound condition, and on the acceptance of such part by us, our liability shall be discharged by our refunding to the Purchaser such part of the purchase money as may have been received by us for the part so returned.
3. As regards plant working in combination each order will be deemed a separate contract to which the terms hereon apply, and no liability can be accepted by us for the working in combination of machinery, whether wholly or not of our manufacture, ordered in separate parts and at different times.
4. Under no circumstances do we undertake liability for indirect or consequential damage of any nature or due to any cause.
5. Shipping specification and weights, outline drawings and dimensions given with tenders are approximate only.
6. Foundations for machinery, clearing, and all structural alterations to buildings, also the cutting and drilling of floors and walls, and all other builders' or joiners' work in preparing or making good, are not included in this tender.
7. All plans submitted by us for foundations or structural alterations are based upon our experience but must be revised and adapted to local conditions, and the building materials available by the Purchaser, who is solely responsible for such foundations and structural alterations.
8. Unless otherwise specifically stated herein, all skilled and unskilled labour for erection, and engineer's time in starting the machinery or attending thereto after starting, shall be charged extra. The Purchaser shall provide suitable lifting tackle for erection, and all fuel, stores, materials, or instruments required for any preliminary working or tests of the machinery. Should any of these be provided by us the same will be charged extra.
9. Tenders which include fixing or erection are based on the being executed during ordinary working hours, and overtime will be charged extra.
10. When delivery to site is included the Purchaser shall provide a reasonably firm roadway and proper means of access to site.
11. The time given for despatch is to date from receipt by us of a written order to proceed, and of all the necessary information to enable us to put the work in hand. We will use our best endeavours to despatch within the time stated in this tender, but we are not to be responsible for any direct or indirect losses which may arise from failure to despatch within the time stated.
12. Should despatch be delayed by labour disputes, fire, accidents, defective or delayed materials, or any cause whatever beyond our control, a sufficient extension of time shall be granted.
13. All machinery after delivery by us is at the Purchaser's risk and must be paid for, notwithstanding the destruction thereof or any damage thereto however caused, other than damage occasioned by the act or default of our employees, in which case our liability shall be limited to reinstating the damage so occasioned.
14. The Purchaser should insure all machinery included in this tender on delivery, as the same notwithstanding our property therein is at the Purchaser's risk.
15. The Purchaser shall bear and pay the compensation due to any injured workmen other than workmen provided by us, and keep us fully indemnified.
16. Notwithstanding any agreed terms of payment no contract shall be deemed complete so as to vest the same in the Purchaser until fully paid for, and all materials, plant, and machinery, whether erected or not, are to remain our property until the whole purchase price has been paid, and we are to be at liberty to cancel the contract and remove them if the price be not paid at the times and in manner stipulated for, and any instalments of purchase money which may have been paid shall be retained by us for or towards the purchase price. Payment of interest shall not prejudice our rights in this condition.
17. Interest at the rate of one per cent. per annum over bank rate to be paid by the Purchaser on overdue accounts.
18. This tender is subject to credit being approved and is not binding on us until our acceptance of your order has been made in writing.

Mr. Orr to the writer, we have pleasure in enclosing our
quotation herewith for D.C. Generator, also for Centrif-
ugal Pump and Motor, with Starter for hand operation.

We have figured on the Pump working against
a pressure of 65 lbs. per square inch, plus the friction
due to 500 feet of 5" piping. If 3" piping is install-
ed, as originally suggested, this would increase the head
by 200 feet, and we do not consider that this would be at
all an economical proposition, owing to the much greater
cost of operation.

We have not quoted for the air compressor ad-
justment, mentioned in your specification, as we are not
sure of what is required, but would be glad to submit a
supplementary quotation on receipt of further information.

Trusting to receive the favour of your order,

Yours very truly,
MATTHEW & PLATT, LIMITED.

CONDITIONS GOVERNING QUOTATIONS

All quotations must necessarily be subject to certain trade conditions, and misunderstandings occasionally arise because these conditions are not always brought to the buyer's attention at the time his order is placed. As a frank understanding with our customers is in our mutual interest, we desire to remind them of the following conditions governing all quotations made by this Company:

PRICES	Prices quoted have been determined in accordance with present market values and consequently cannot be guaranteed for any length of time. We shall strive, however, to protect these prices, provided that the order is placed within a reasonable period.
TERMS	Net 30 days.
GOODS OF FOREIGN MANUFACTURE	It is the policy of this Company to handle, in so far as possible, goods of Canadian manufacture, and many of the articles sold by us are produced in Canada either in our own factories or elsewhere. It is necessary however, to import certain lines from Great Britain and the United States. Quotations on such articles of foreign manufacture are based on current rates of exchange and customs duty and are subject to revision, up or down, in accordance with any fluctuations in these rates which may have taken place by the time the goods are shipped by the Company.
WARRANTY	The goods herein quoted are warranted to be made of good material and in a workmanlike manner, and if any article or part of such article should show defective material or workmanship within one year from date of shipment, the Company agrees to replace such defective part free of charge f.o.b. original shipping point, upon receipt of direct evidence of the defect claimed. No liability, however, is assumed, nor is the Company responsible for damages or delays caused by such defective material or workmanship, nor will any allowance for repairs or alterations be made unless effected with the written consent of the Company. Goods or materials not manufactured by this Company are not warranted except in so far as and to the extent that the same are warranted to this Company by the manufacturers.
SHIPMENT	The shipping date named hereon is approximate only and the Company assumes no liability for non-shipment, delay in shipment or transportation.

QUOTATIONS CONTINUED

MATERIALS TO BE SUPPLIED.

(a) Runner. The runner shall be of the latest improved type, with heavy steel plate buckets cast into heavy hub and outer band of tough grey iron, truly balanced and sound and free from blow holes and surface defects, securely keyed to the wheel shaft.

(b) Guide Casing and Gate Operating Mechanism. The regulating gates shall be of cast iron or semi-steel and shall be accurately made to pattern so as to permit of a tight fit upon one another in the closed position. The gates shall be connected by links to a cast iron regulating ring concentric with the main shaft and suited to control by compensating governor.

(c) Wall Frame of suitable dimensions and of cast iron for connection to the wheel pit wall.

(d) Quarter Turn. The quarter turn shall be of cast iron, split and provided with hand holes.

(e) Turbine Shaft. The shaft shall be of steel and shall have a forged thrust collar to take the unbalanced thrust of the runner.

(f) Bearings. The wheel shaft will be supported by at least two bearings, viz: Lignum Vitae Guide and Thrust Bearing mounted on the top of the guide apparatus and adjustable by bronze screws; one ring oiling thrust bearing behind the pulley, carried on a heavy cast iron pedestal, bolted to the foundation beams and guaranteed to run without heating.

(g) Pulley. Pulley of cast iron, 9" face, and sufficient diameter to connect with a 12" pulley on the shaft concentric with the generator, which operates at 1150 r.p.m.

(h) Draft Tube. The draft tube shall be conical tube of 4" plate, 7' long. It will be rivetted to a cast iron single ring bolted to the Quarter Turn.

(i) Governor Connections. There shall be provided such connections as are required for connecting the governor to a governor of Size D Woodward Compensating Governor.

Referred to in the Report of the Commission, Vol. I, Part D, File 17, 10, part D

QUOTATIONS CONTINUED

Item	Quantity	DESCRIPTION	Unit Price
------	----------	-------------	------------

(j) Governor. For speed control a size D Woodward Compensating Governor with all connections, belt, etc., for efficient operation is to be provided.

(k) Foundation Beams. The unit shall be constructed for installation on steel foundation beams, which must be provided by the contractor.

General Conditions:

(a) It is understood that the Contractor will supply the services of one competent erection superintendent to superintend the erection and adjustments of the hydraulic equipment and all materials necessary therefor.

SENT TO:

Boving Hydraulic & Eng Co
Canadian Ingersoll Rand,
Canadian Vickers,
De Laval Steam Turbine Co.,

(b) The entire work or any of its parts and members and all workmanship and materials entering into its construction shall be satisfactory to the Engineer. His decision as to the acceptance or rejection of the whole or any part shall be final and binding.

(c) Bidders must submit drawings with their tenders showing dimensions and arrangement of the various parts and the kind of materials to be employed, together with a detailed explanatory of their design.

"Engineer" shall mean any engineer or deputy appointed by the Minister of the Interior and acting under his instructions.

NOTE: Tenders will not be considered unless this form is filled in and returned to the Department.

Government sales tax should be added.

For your information it is stated that McIntosh is situated on the main line of the C. T. Rwy., 165 miles east of Winnipeg.

Ottawa, Feb. 27, 1926.

I beg to inform you that the design of the tank, 4' x 16' has been accepted.

It is understood that the material to be used is as follows:

As stated in your quotation the tank is to be of the rivetted type and should be constructed of mild steel plate 1/2" thick. The rivets to be used are also

3 with saddle rivets. The rivets to be used are 1/2" diameter and the fitting where the pressure is applied shall be 1" and

probable date of completion of the work is about the 1st of March.

Yours truly,

John Bridge & John Torrey,
Winipeg, Man.

Dear Sir,-

We are attaching our tender covering the Centrifugal Pump and motor required for the McIntosh Indian Residential School, McIntosh, Ontario. Kindly note that we have not included any air compressor adjustment as we are unable to find out just exactly what is required. We have discussed this matter with your Mr. Chene, and in accordance with his suggestions are submitting a separate price covering the pump, base, and coupling, and a separate price covering the 15 H.P. motor without base or pulley, but with a starter.

Our prices are f.o.b. Galt, freight allowed to McIntosh, and the Government sales tax is included. We shall be glad to quote you further on the air compressor attachment on receipt of the details as to what you require.

Trusting you will give our tender your kind consideration, we are

QUOTED FOR MCINTOSH PUMP CO. LTD.
MCINTOSH, Ont.

on cast iron base with 15 H.P. direct current motor.
This pump should have a minimum capacity of 250 gals.
(Imperial) per minute. The motor to be provided with
a starter. The pump to have an air compressor ad-
justment.

Centrifugal Pump, 5" suction, 4" discharge, capacity 250 I.G.
under 65# pressure at the pump, including suction and fric-

by flexible spouting. \$905.00
As per Bulletin #23 enclosed.

Terms net thirty days from date of shipment, payment to be made
Montreal funds. Government Sales Tax is included in above prices.

Shipment could be made shortly.

For further particulars see our letter
of February 18th, 1925.

Orders will not be considered unless this
card is filled in and returned to the Department.
Government sales tax should be added.
For your information it is stated that McIntosh
is situated on the main line of the C.T.P. railway
163 miles east of Winnipeg.

to McIntosh, Ont. Both the above prices are Freight allowed
Terms nett thirty days from date of
shipment, payment to be made in Montreal funds and we would
advise that the Government Sales Tax is included in these
figures.

We would state there is one other feature
in regard to the pump, that is, you have 500' pipe line and
pressure to the pump, or else would reduce the pressure
obtainable at the tank. In this case, if the quantity of water
the pump, we would want information on these lines.

The motor we offer is of Westinghouse
make and could be obtained on short notice.

We sincerely trust a decision will be
return herewith.

SUBJECT Requisition for Pumps.

The Purchasing Agent,
Department of Indian Affairs,
Ottawa, Ontario.

Dear Sir:-

We return herewith your inquiry sheet
to be in by Noon, February 19th, and on this Pump, arranged as
outlined in your letter of February 10th, we quote as follows:-

"Smart-Turner" #4 GA-3 Horizontal Split
Shell, Double Suction, Centrifugal Pump,
with 5" suction, 4" discharge, capacity
250 Imperial Gallons per Minute, under
65# pressure at the pump. This including
suction and friction. This would require
a 20 H.P. motor and would be equipped with
20 H.P. Direct Current motor, 230 volts,
operating at 1700 R.P.M.; the pump being
mounted on one base and direct connected
by flexible coupling.
at. \$905.00

Bulletin #33 enclosed, illustrates
and describes this pump. For the Air Compressor, we offer:-

"Smart-Turner" Air Compressor, 4½x4½
Single Cylinder, water cooled, as per
Fig. 225 in Bulletin #32 attached.
at. \$126.00

THE SMART-TURNER MACHINE CO., Limited

Fig. W 242

Double Suction, Horizontally Split Shell Centrifugal Pump, direct connected by flexible coupling to electric motor.

We briefly enumerate below a few of the leading features of these pumps:

GENERAL DESCRIPTION: The pump shell is horizontally split, the lower half containing the suction and discharge connections (flanged) and the lower half of the journals, all cast in one piece. The upper half is merely a cover, and provided with water pipes to stuffing boxes and air cock.

IMPELLER: The impeller is of the double action, enclosed type, made of cast bronze, finished all over, inside and out, and each one is designed for the conditions under which it is to operate. The impeller is keyed to the shaft, and further held in place by brass sleeves, screwed on to the shaft with right and left hand threads, and completely covering the shaft to the outside of the stuffing boxes.

THE SMART-TURNER MACHINE CO., Limited

LABYRINTH RINGS: So as to facilitate repairs, the impellers are provided with wearing rings of the labyrinth type.

BEARINGS: Bearings are ring oiling, with oil wells and glass oil gauge. They are lined with babbitt metal, and are carefully fitted.

BALANCING: To eliminate the slight end thrust which is developed in double suction pumps, a balancing port is provided in the lower half of the pump shell.

THRUST BEARING: To take up any slight tendency to end thrust which may develop, and to hold the impeller in the desired position as regards the labyrinth rings, the outboard bearing is provided with a double thrust collar, made in the shape of a spool, the pump shaft being turned down so that it passes through the centre of the spool, which is held firmly in place by a nut and lock nut on the end of the shaft.

STUFFING BOXES: The stuffing boxes are provided with lantern glands, and water sealed, so that they need not be screwed up tight. Gland nuts are of the hinged pattern, and glands are not split. The casting below the stuffing boxes is of the U shape, and acts as a catch basin for any water which may leak through the glands. It is drilled and tapped for a pipe connection in the bottom, to carry the drip to the drain.

FLEXIBLE COUPLING: The flexible coupling is made with pins engaging with rubber rings so that it has flexibility and allows for end play of the motor.

DESIGN: The pump is of a substantial design, and is made up specially to suit the particular motor required.

PEDESTAL DRIVEN PUMP: This pump can be made with two pedestal bearings and pulley, in place of the motor.

Gentlemen:-

Att'n. Mr. J. D. McLean,
Ass't Deputy & Secretary.

With reference to your request for tender of Feb. 5th, covering a centrifugal pump for McIntosh Indian Residential School, we would ask that we be excused from submitting tender.

Our reason for this is, that we have not as yet manufactured any pumps of such a small capacity, and if we were to quote, our development charges, which we would be obliged to include, would throw our price out of line.

We remain,

Yours truly,

Dear Sir:-

With reference to your esteemed enquiry for motor driven pump for McIntosh Residential School we regret our inability to quote on this as we do not manufacture pumps.

We sell motors to a number of pump manufacturers, and the usual procedure in such cases is for the pump manufacturer to purchase the motor, mount same in his factory and test the complete unit consisting of motor and pump, before shipment.

Thanking you, however, for your esteemed enquiry, we are,

Yours very truly,

Dear Sir:-

In reply to your esteemed enquiry of the 8th, inst. we have much pleasure in quoting you on motor driven centrifugal pump, as follows:-

One 3" single-stage, double suction, horizontally split casing, centrifugal pump having a capacity of 250 Imperial gallons per minute against a pressure of 65 pounds per square inch. pump to be direct connected to 15 HP. motor through flexible coupling, the whole unit to be mounted on one massive C. I. base plate.

SEVEN HUNDRED & EIGHTY-FIVE DOLLARS.....

F. O. B. McIntosh, Ont. Sales Tax included

Price includes pump, motor, starter complete.

Delivery:- 10 days from date of receipt of order.

Assuring you of our best attention.

We are,

Yours very truly,

THE RENNIE ENGINEERING COMPANY.

W. Rennie

Ottawa, Ont.

Dear Sir:-

When returning your tender form on the 17th, inst. and quoting on motor driven pump for McIntosh School, we quoted on 4" pump and 25 HP. motor, in error, as this was intended for another customer and was inadvertently sent you.

We are now enclosing amended tender on a suitable unit for the requirements at McIntosh School and hope same will receive favorable consideration.

Yours very truly,

The RENNIE ENGINEERING COMPANY.

Ottawa, Feb. 23, 1925.

Dear Sir,-

I am in reply to your letter of 19th inst. for the furnishing of one double motion three inch single stage horizontal split case centrifugal pump, mounted on cast iron base, with flexible coupling for direct connection to motor has been accepted. The price which will be paid you for this motor shall not exceed \$190.00 f.o.b. McIntosh.

It is desired that an early delivery of this machine be made, and that you advise me of the probable date of shipment.

Kindly acknowledge receipt of this order by return mail, and oblige,

P. H. Paget.

Attention Purchasing Agent.

Dear Sirs:-

We are in receipt of your specifications covering one 30 H.P., horizontal, single runner turbine.

After due consideration we have decided that, as we have no existing design or development which would suit this unit, we could not offer you a price that would compete with the prices of manufacturers who make a specialty of these small machines and have standard wheels.

In view of this fact we have decided not to quote.

If, however, you experience any difficulty in obtaining prices on this equipment from other manufacturers, we will be pleased to submit a tender.

Thanking you for your inquiry, we

Yours very

Parts of 30-Hp. SK Motor

Frame and Field Coils

The yoke is a ring made of open-hearth steel, hot rolled and butt welded. Rolled steel is an ideal material for motor frames because of its high magnetic permeability, uniform structure and great strength.

Front Bracket

The brushholders are clamped to insulated rods mounted on the front bracket. The proper position of the brushes is determined at the factory and should not be changed.

Armature

The armature is wound so as to permit excellent ventilation. The coils are form wound and are thoroughly insulated. The shaft can be removed from the armature in all except the smallest motors without disturbing the windings.

Bearing

The bearings are bronze bushings in the small motors and babbitt-lined iron sleeves in the larger sizes. They are fully protected from dust by end caps and felt washers. The two bearings of each motor are interchangeable. Automatic oil-ring lubrication is used.

Westinghouse Electric & Manufacturing Company
East Pittsburgh, Pa.

WESTINGHOUSE direct-current commutating-pole motors represent the most advanced design in direct-current machines for general, constant and adjustable-speed power purposes; they are especially suitable for driving machine tools and for other service where the load is frequently started, stopped and reversed. Among their special features are the following:

Great Mechanical Strength—The frames and feet are made of forged open-hearth steel, which provides great strength and reduces the weight and dimensions. The bearings have large area, and the shafts, which are of axle steel, are unusually heavy.

Excellent Commutation—The commutation is practically sparkless on all loads, overloads, and speeds, and in either direction of rotation without change in the brush position. The life of the commutator is very long and brush renewals are rarely required.

Dustproof Bearings—The bearings are protected from the entrance of dust and are automatically lubricated so that their life is very long. They are designed to permit the motor to be used in the severest gear service.

High Efficiency—The efficiency is high at all loads. The overload capacity is ample for all services in which these motors are used, and extremely high momentary peak loads can be handled without injury to the motor.

Reliability—Beyond an occasional inspection and oiling and infrequent renewals of the brushes, these motors require practically no attention and will insure continuity of service.

Motor with Idler Pulley

The idler pulley attachment is supplied for use with short belts in order to avoid excessive belt tension.

Semi-Enclosed Motor

Front covers are held by latches and are easily removed, but cannot become loose or fall off under vibration

Large Type SK Motor

Type SK motors of approximately 125 horsepower and larger have cast-steel frames. The frame, brackets, and bearings are split horizontally

Westinghouse Type SK Motors

Back-Geared Motor

Back-geared parts can be supplied for motors of small and moderate capacities. The construction of the gear, countershaft, and bracket is especially strong and rigid. Gear cases can be supplied on order.

Enclosed Motor

Enclosed motors are supplied in capacities from 1 to 25 horsepower. They are dust-proof, and can be made weatherproof when so ordered. Ribs on the brackets and covers aid in dissipating the heat.

Vertical Motor

Vertical SK motors can be supplied in all standard ratings. The weight of the armature is carried by a large ball bearing which operates immersed in oil. The lubrication is automatic.

Number

MATERIALS TO BE SUPPLIED

- (a) Runner. The runner shall be of the latest improved type, with heavy steel plate buckets cast into heavy hub and outer band of tough grey iron, truly balanced and sound and free from blow holes and surface defects, securely keyed to the wheel shaft.
- (b) Guide Casing and Gate Operating Mechanism. The regulating gates shall be of cast iron or semi-steel and shall be accurately made to pattern so as to fit snugly in the closed position. The gates shall be connected by links to a cast iron regulating ring concentric with the wheel and suited to control by compound governor.
- (c) Wall Frame of suitable dimensions of cast iron for connection to wheel pit wall.
- (d) Quarter Turn. The quarter turn shall be of cast iron, split and provided with hand holes.
- (e) Turbine Shaft. The shaft shall be of steel and shall have a forged thrust collar to take the unbalanced thrust of the runner.
- (f) Bearings. The wheel shaft will be supported by at least two bearings: Lignum Vitae Guide and Bearing mounted on the top of the guide apparatus and adjustable bronze screws; one ring oil bearing behind the pulley, a heavy cast iron pedestal, the foundation beams and girders run without heating.
- (g) Pulley. Pulley of cast iron face, and sufficient diameter to connect with a 12" pulley shaft concentric with the shaft which operates at 1150 r.p.m.
- (h) Draft Tube. The draft tube shall be of conical tube of 1/2" plate. It will be rivetted to a single ring bolted to the foundation.
- (i) Governor Connection. A connection shall be provided such as may be required for operation of Size D Woodward Governor.

Dear Sirs:- Attention of Mr. F. H. Paget.

We have your letter of March 20th. with reference to capacity of the generator which you have on order with us for your School at McIntosh, Ont. We have no doubt that this generator would be capable of giving 20 KW output, but before writing you definitely we prefer to go into the matter thoroughly with our Engineering Department. We will write you further in this connection very shortly.

Yours very truly,

THE LINCOLN ELECTRIC CO. OF CANADA, LTD.

Dear Sir:-

Under date of February 18th we had
and Air Compressor, but up to the time of writing we
have received no word from you as to whether our
prices proved interesting or not.

As we would like very much to enter
your order for the above equipment, we trust you will
be able to let us know at an early date how this
matter stands.

Hoping to hear from you favorably, we are

Yours very truly,

March 26, 1925.

Department of India
Ottawa, Ontario.

Dear Sirs:- Attention of Mr. F. H. Paget.

We have your letter of March 20th. and note your comment to the effect that the correct voltage for the 15 HP motor for your order should be 115 instead of 125 as stated in our acknowledgement.

On looking up your order for this motor 125 volts is stipulated in same, so that our acknowledgement corresponds with your order. However, it does make a real difference because 10 volts is neither here and would not make any appreciable difference to or to the performance of the motor.

We are sending you herewith duplicate dimensions showing standard shaft extension on both ends of the motor and we will be obliged if you will have one O.K.'d by your Engineer and returned to us. We are in the meantime putting the order in hand now that we are cleared up as to just what is required.

Yours very truly,

Letter No.

Office of the

Indian Agency,

112

Sir,

I enclose herewith Vouchers Nos. 3221.....

amounting to \$13.41..... in favour

of J. H. Ashdown Hardware Co.

for Sundry fittings selected by Rev. J. B. Boyar
at request of Brother Gauthier, for temporary water
supply pipe line at McIntosh School.

This expenditure was authorized by Departmental

Letter No. 66-2-8..... dated 5 Jan, 1925.

A small order and wanted by return express, time
too short to ask for prices, the articles are standard
and variation on prices very narrow.

Your obedient servant,

Inspector of Indian Agencies

The Secretary,

Department of Indian Affairs,

Ottawa.

Sir,-

I regret to inform you that it is necessary to cancel the order given you by this Department for the McIntosh Indian Residential School.

Owing to some change in this hydro-electric plant, it is found advisable that the capacity of the plant be changed. You will be further advised when different arrangements are made for the purchasing of this machinery.

Please acknowledge the receipt of this letter.

Your obedient servant,

Ottawa, March 31, 1925.

Dear Sirs,-

Confirming telegram of the 28th requesting that the construction of the 17 K. W. D. C. electric generator for the McIntosh Indian Residential School be not proceeded with, I beg to add that owing to some important changes in the plans for this proposed hydro electric power plant, the capacity of this generator will be changed.

I shall again communicate with you as soon as the plans, which are now under preparation, have been submitted here.

Yours truly,

F. H. Paget.
Chief Accountant and Purchasing Agent.

DOMINION WATER POWER AND RECLAMATION SERVICE

WINNIPEG, MAN.

Plans for the McIntosh March 30th 1925.
electric power plant have been placed with general
for the building.
Sir:-

Enclosed is a revised report on the water
supply and power installation, McIntosh Indian school.
You will note that this report provides for a change from
electric driven machinery to belt driven machinery.

This change in design was made at the
request of Father Bovey of the McIntosh Indian school
who requested that the plant be designed to provide for
the simplest form of operation and also to provide them
with accommodation for a carpenter shop and a blacksmith
shop.

In addition to the changes of the power
installation a considerable improvement has been made
in the general layout of the water system, and even though
the automatic features are not provided for in the present
report the layout does, I think, provide for a simple and
efficient water system, and also insure a continuous
water service in the school building by providing the electric
water gauges and keeping a continuous water service. The
other main feature is that all the water equipment is
housed in the power house and protected from freezing con-
ditions, and the intake being under a head from the turbine
chamber will always insure water service in the school
building, even though the pump be temporarily out of order.

If the Department of Indian Affairs are not
committed to the first layout submitted by Mr. Cow I would,
in view of the simplicity of operation by inexperienced
attendants, recommend that either alternative "A" or "B"
of the present layout be accepted. I would like to be
advised which installation the Department of Indian
Affairs decides to accept.

Very respectfully,
R. H. [Signature]
District Chief Engineer.

The Director,
Dominion Water Power & Reclamation Service,
Department of the Interior,
Ottawa, Ontario.

REVISED REPORT ON THE
WATER SUPPLY AND POWER INSTALLATION,
MCINTOSH INDIAN SCHOOL.

With the completion of the McIntosh Indian school and the installation of the heating plant and various machinery it was seen that it would not be feasible to install the pumping plant and pressure tank in the school building as stated in Mr. Gow's report, and that a separate building to house this equipment would be required. In further discussions with Father Bovey relating to the general layout and operation of the plant he asked to have the installation as simple as possible and to eliminate the use of electric motors by substituting belt driven machinery. His reason for this latter request was that the motors would require skilled attention and in case of trouble would necessitate sending an electrician from Winnipeg to make the necessary repairs, whereas with the belt driven plant he felt that the school officials could handle most of the troubles themselves. Furthermore Father Bovey stated that the original layout did not provide sufficient accommodation for machine and carpenter shops.

Accordingly I have had prepared plans showing a revised layout of the power plant and water system. From the attached blue prints of the above plans you will note that the entire installation is located in the power house and that all have the water supply taken direct from the wheel pit, thus

VERY
POOR
COPIES

overcoming the difficulties of freezing at the intake. Another advantage of this change is that in case the pump was out of order water supply would still be available because the intake to the water system is under a pressure head. The increased size of the power house building provides the accommodation for carpenter and machine shops desired by the school officials.

Two alternatives of revised layouts are shown on the accompanying plans. In one case a blacksmith and machine shop with an enlarged carpenter shop is provided. The other alternative provides for carpenter shop only. Estimates with estimates of cost are submitted for the consideration of the Department of Indian Affairs as to which one should be adopted.

The original layout by Mr. Cow provided for a 17½ h.p. motor, belt-driven from the turbine. This motor would supply all the lighting and the power required for the motor-driven pumps and motor-driven line shafts for the carpenter shops. This design is for the operation of the water system. In the layout now submitted it is proposed to

No change has been made in the turbine installation, this consisting of a 24-inch horizontal runner with Woodward Compensating Governor. Electric.

The size of the generator has been reduced from a 17½ k.w. to a 10 k.w., D.C. As the pumping plant will be belt driven from the turbine the generator only supplies power for lighting and the motor for the laundry and kitchen.

WATER SUPPLY.

The pumping plant comprises a centrifugal high duty pump with 250 gallons per minute capacity against 60 lbs. pressure, a 4' 0" diameter air compressor, and a 4' 0" x 26' 0" steel pressure tank. As both the pump and air compressor are belt driven it will not be possible to have automatic control. Even the large capacity of the pump, however, it will only take a few minutes to pump the day's supply into the pressure tank.

The water supply will be taken directly from the main line, the pump being located on the main line a short distance from the pressure tank. The main line will be a 4 inch W. I. pipe protected from frost.

The main general changes are:

- 1 - A general improvement in the layout of the water system in that it eliminates a long suction intake and will provide a continuous water service even though the pump is not in service.
- 2 - The reduction in size of the electric motor and the elimination of all motors; all machinery being belt driven from the turbine.
- 3 - In the revised scheme "Alternative A" is a two storey building 40' x 20'. This provides a blacksmith shop and power house on the first floor and carpenter shop on the second floor. "Alternative B" provides for a carpenter shop only on the second floor. In both these alternatives the hoisting and pulleys in carpenter and blacksmith shops have been included in the estimates.

will be noted that the total cost of the combined hydro-electric development and water supply system exceeds Mr. Gow's estimate by \$3,500.00. A large part of this increase is due to the increased cost of the dam, which when completed will cost about \$5,100.00. The increased cost of the dam is due chiefly to.

- A - The large extra cost of winter construction on small work of this nature.
- B - When unwatered numerous seams were discovered in the bed of the river channel. This involved considerable rock excavation to obtain proper foundations and was an unexpected contingency not provided for in the original estimate.
- C - The extra height of dam and increased width of end sluice deck.
- D - Increased cost of enlarging power house to for installation of pumping plant, b. carpenter shop.

The estimates for the two alternatives

Ottawa, April 3, 1925.

Dear Sir,-

I beg to inform you that you may now arrange for the delivery of the pump for the McIntosh Indian Reservation, in accordance with the Government's orders given you recently.

In view of the fact that no electric motor is required in the revised project for this hydro-electric plant, it will not, therefore, be necessary that the construction of this pump be built to receive this machinery.

Yours faithfully,

(F. H. Paget)
Chief Accountant & Purchasing Agent.

Ottawa, April 4, 1925.

Dear Sir,-

With reference to my letter of the 31st ultimo regarding delivery of electrical machinery for the Indian Residential School, I have to inform you that owing to some changes having been made in this hydro-electric power plant, the electric motor ordered will not be required, but you may proceed with the building of the electric generator, which should be as follows,-

10 K.W. D.C. 125 Volts, ball bearing 1400 R.P.M.

Kindly advise me by return mail of the deductions from your tender price which will be allowed on account of this change in the capacity of this generator.

Yours truly,

F. H. Paget,

Dear Sirs:- Attention of Mr. F. H. Paget.

In reply to your letter of April 4th. we are sorry that we were unable to give you the information asked for by return mail. We shall have to look into this matter thoroughly before we can make you a definite proposition covering the changes that you require to make in your order for the generator for McIntosh School. We will write you further in a day or two, as soon as we can get the matter figured out.

Yours very truly,

THE LINCOLN ELECTRIC CO. OF CANADA, LTD.

OUR REF.

TENDER NO. 1514 A.
DATE March 12, 1925

To the Purchasing Agent,
Department of Indian Affairs,
Ottawa.

Dear Sir:-

We thank you for sending us your Specifications covering one
77 BHP Single Horizontal Turbine and we take pleasure in returning same
duly filled in.

Referring to the enclosed blueprint WT 481 we offer as follows:

- 2(1) Single Horizontal Turbine capable of developing 30 BHP under 15 ft
net effective head when running at 450 RPM. Guaranteed efficiencies:
80%, 82%, 83% and 77% at full, 7/8, 3/4 and 1/2 gate respectively.
The equipment will consist of the following parts:-
- 1-Runner with Buckets of Steel Plate cast into the Rim and Hub by
our special process which ensures guaranteed adhesion.
 - 1-Complete Guide Apparatus with balanced pivoted Vanes of Semi Steel
bronze bushed in the Pivot bearings and connected to the Regula-
ting Ring by short bronze bushed Links. Very heavy design suitable
for continuous operation.
 - 1-Wall Frame of Cast Iron for connection to the Wheel Pit wall.
 - 1-Quarter Turn of Cast Iron, split and provided with hand holer.
 - 1-Turbine Shaft of best O.H. Steel, 2-15/16" diameter, extended as
shown on our blueprint WT 481.
 - 1-Packing Box for the Turbine Shaft, bronze bushed, grease lubricated.
 - 1-Lignum Vitae Guide and Thrust Bearing mounted on the top of the
Guide Apparatus. Adjustable by bronze screws.
 - 1-Ring Lubricated Babbitt lined outboard Bearing with removable
Bushing. Heavy type, guaranteed to run without heating.
 - 1-Base Plate for ditto.
 - 1-Pulley of Cast Iron 30" diameter x 9" face, crowned, carefully mach-
ined and balanced.
 - 1-Gate Shaft of best O.H. Steel 2" diameter.
 - 1-Lever of Cast Steel for the Gate Shaft, bronze bushed.
 - 1-Connecting Link of Steel.
 - 1-Wall Frame and Packing Box for the Gate Shaft.
 - 1-Draft Tube of 1/4" steel plate, tapered section, 7'-0" long. With
Cast Iron flange for connection to the Quarter Turn.
 - 1-Woodward Mechanical Compensating type Governor Size D. complete
with the necessary connection to the Turbine.
 - 1-6" Drain Valve for emptying the Wheel Pit.

Price.....\$2,178.00

Reg. No.

MATERIALS TO BE PROVIDED.

- (a) Runner. The runner shall be of the latest improved type, with heavy steel plate buckets cast into heavy hub outer band of tough grey iron, truly balanced and sound and free from blow holes and surface defects, securely keyed to the wheel shaft.
- (b) Guide Casing and Gate Operating Mechanism. The regulating gates shall be of cast-iron or semi-steel and shall be accurately made to pattern so as to permit of a tight fit upon one another in the closed position. Gates shall be connected by links to a cast-iron regulating ring concentric with the main shaft and suited to control by _____.
- (c) Wall Frame/ of suitable dimensions and of cast-iron for connection to the wheel pit wall.
- (d) Quarter Turn. The quarter turn shall be of cast-iron, split and provided with hand-holes.
- (e) Turbine Shaft. The shaft shall be of the best open hearth forged steel and shall have a forged thrust collar to take the unbalanced thrust of the runner.
- (f) Bearings. The wheel shaft will be supported by at least two bearings, viz.: Lignum Vitae Guide and Thrust Bearing mounted on the top of the guide apparatus and adjustable by _____ cone screws; one ring oiling _____ bearing behind the pulley, _____ a heavy cast-iron pedestal, _____ the foundation beams and guaranteed to run without heating.
- (g) Pulley. Pulley of cast-iron, 9" face, and of sufficient diameter to connect with a 12" pulley on the shaft concentric with the generator, which operates at 1150 r.p.m.
- (h) Draft Tube. The Draft tube shall be conical tube of $\frac{1}{2}$ " plate, 7' long. It will be riveted to a cast-iron single ring bolted to the Quarter Turn.
- (i) Governor Connections. There shall be provided such connections as are required for operating the gates by means of Sisco Ward Compensating Governor.

DESCRIPTION

Last Price

Extension

(j) Governor. For speed control a Size D Woodward Compensating Governor with all accessories, belt, etc., for efficient operation is to be provided and installed.

(k) Foundation Beams. The unit shall be constructed for installation on steel foundation beams, which must be provided by the contractor.

General Requirements.

(a) It is understood that the Contractor will supply the services of one competent erection superintendent to superintend the erection and adjustments of the hydraulic equipment and all materials necessary therefor.

(b) The entire work or any of the parts and materials entering into its construction shall be satisfactory to the Engineer. His decision as to the acceptance or rejection of the whole or any part shall be final and binding.

(c) Bidders must submit drawings with their tenders showing dimensions and arrangement of the various parts and the kind of materials to be employed, together with complete data and details explanatory of their design.

"Engineer" shall mean any engineer or deputy appointed by the Minister of the Interior and acting under his instructions.

\$2,178 00

Price increased one hundred and twenty dollars (\$120.00)

Tenders will not be considered unless this form is filled in and returned to the Department.

Government sales tax should be added.

For your information it is stated that Intosh is situated on the main line of the T. Rwy., 165 miles east of Winnipeg.

J. D. Chene,
Departmental Engineer

of
17" A TYPE "F" HORIZONTAL TURBINE

DOMINION WATER POWER BRANCH

These specifications are to cover the furnishing of materials for, and the manufacture and delivery f.o.b. cars McIntosh, Ont. of one (1) horizontal turbine unit, consisting of one (1) 17" A Type "F" runner mounted on a horizontal shaft, with guide casing and gate operating mechanism, discharging through a quarter turn cast iron elbow with steel plate draft tube, complete with lignumvitae bearing in flume and ring oiling thrust bearing, wheel shaft extended through quarter turn, with one cast iron pulley, 38"x9" face, for belt drive to the generator, complete with gate operating mechanism as shown on accompanying drawing P.D. 10448. The unit will be constructed for installation on steel foundation beams, which are included in this proposal.

This unit will develop 30 H.P. at a speed of 356-360 R.P.M. when operating under a net effective head of 15 ft.

The runner will be of the Improved Kaplan Type, 17 in diameter, with heavy steel plate buckets cast

Dept. of Interior

The wheel shaft will be supported by three bearings - one adjustable lignumvite thrust bearing in the flume bolted to the crown plate and supported on cast iron pedestal, and by one ring oiling thrust bearing on a quarter turn carried on a heavy cast iron pedestal bolted to the foundation beams, and one ring oiling outboard bearing on cast iron pedestal, all to be bolted to the foundation beams.

steel plate conical draft tube of 1/4" plate 7 ft. be provided. It will be rivetted to a cast iron flange bolted to the quarter turn.

There will be provided such connections as required for operating the gates by means of Woodward Size D mechanical governor, as shown on accompanying cut. This governor will operate the gates over full range in 5 to 10 seconds.

The runaway speed of this unit when and no load on the generator

The performance of this unit when properly installed in accordance with our drawings will be in accordance with

and shall be fully equal to that of any similar equipment.

VILLIAM HAMILTON CORP.

Mr. F. H. Boyd,
Purchasing Agent,
Department of Indian
Affairs,
Ottawa, Ont.

Dear Sir:-

With our tender attached
H. P., single runner horizontal turbine
Indian School, you will please
verify the turbine and a size "D" Woodward compensating
governor along with the foundation bolts for the turbine,
draft tube and other parts as shown on your specification.
The price quoted covers the whole of this equipment delivered
and includes the services of a competent foreman mechanic to supervise the installation of
this equipment for \$12,000.00 net for the turbine, governor,
actual travelling and hotel expenses while away from Owen Sound.

We are enclosing a print of our drawing
H-6872 showing the installation of this turbine and governor.
If you find our price satisfactory we will be glad to submit
once a full detailed drawing with any revisions you may find
necessary to suit the installation in your build.

These specifications cover the design, construction, delivery F.O.B. cars McIntosh, Ontario, and superintending of erection of,-

ONE (1) 30 H. P. HORIZONTAL SINGLE RUBBER TURBINE.

ARRANGED FOR MOUNTING IN AN OPEN WHEEL pit: to operate under an effective head of 15 feet: to be installed in the powerhouse of the Indian Mission near McIntosh, Province of Ontario.

The contractor will furnish and provide all the finished parts, members, attachments, fittings, materials, etc., re- factory operation the aforesaid hydraulic power unit in every respect according to the terms of these specifications, although not especially mentioned herein, supplying all material and performing all labour necessary therefor. He shall deliver the same free of all costs for transportation, duty, and all other charges at the Canadian National Railway station at McIntosh, Ont.

Delivery shall be made by the contractor F. O. B. McIntosh, in the Province of Ontario, within sixty days of the date upon which the contract is awarded.

One single horizontal turbine, to be set in an open wheel pit, capable of developing 30 H. P. under 15 feet net effective head. No proposition will be considered for this turbine unless the openings from $\frac{1}{2}$ " to full gate, is at least 60%.

QUOTATIONS CONTINUED

DESCRIPTION

MATERIALS TO BE SUPPLIED.

- (a) Runner. The runner shall be of the latest improved type, with heavy steel plate buckets cast into heavy hub and outer band of tough gray iron, truly balanced and sound and free from blow holes and surface defects, securely keyed to the wheel shaft.
- (b) Guide Casing and Gate Operating Mechanism. The regulating gates shall be of cast iron or semi-steel and shall be accurately made to pattern so as to permit of a tight fit upon one another in the closed position. The gates shall be connected by links to a cast iron regulating ring concentric with the main shaft and suited to control by compensating governor.
- (c) Wall Frame of suitable dimensions and of cast iron for connection to the wheel pit wall.
- (d) Quarter Turn. The quarter turn shall be of cast iron, split and provided with hand holes.
- (e) Turbine Shaft. The shaft shall be of the best open shaft hearth forged steel and shall have a forged thrust collar to take the unbalanced thrust of the runner.
- (f) Bearings. The wheel shaft will be supported by at least two bearings, viz: Lignum Vitae Guide and Thrust Bearing mounted on the top of the guide apparatus and adjustable by cone screws; one ring oiling thrust bearing behind the pulley, carried on a heavy cast iron pedestal, bolted to the foundation beams and guaranteed to run without heating.
- (g) Pulley. Pulley of cast iron, 9" face, and sufficient diameter to connect with a 12" pulley on the shaft concentric with the generator, which operates at 1150 r.p.m.
- (h) Draft Tube. The draft tube shall be conical tube of 1" plate, 7' long. It will be rivetted to a cast iron single ring bolted to the Quarter Turn.
- (i) Governor Connections. There shall be provided such connections as are required for operating the gates by means of Size D Woodward Compensating Governor.

Indian Affairs. (P. 10, Volume 221, file 47-10, part 2)

QUOTATIONS CONTINUED

DESCRIPTION

(j) Governor. For speed control a size D Woodward Compensating Governor with all connections, belt, etc., for efficient operation is to be provided and installed.

(k) Foundation Beams. The unit shall be constructed for installation on steel foundation beams, which must be provided by the contractor.

General Requirements.

(a) It is understood that the Contractor will supply the services of a competent erection superintendent to superintend the erection and adjustments of the hydraulic equipment and all materials necessary therefor.

(b) The entire work or any of its parts and members and all workmanship and materials entering into its construction shall be satisfactory to the Engineer. His decision as to the acceptance or rejection of the whole or any part shall be final and binding.

(c) Bidders must submit drawings with their tenders showing dimensions and arrangement of the various parts and the kind of materials to be employed, together with complete data and details explanatory of their design.

"Engineer" shall mean any engineer or deputy appointed by the Minister of the Interior and acting under his instructions.

Turbine & Governor complete as per specifications, f.o.b. McIntosh, Ont., including governor.

NOTE: Tenders will not be considered unless this form is filled in and returned to the Department.

Government sales tax should be added.

For your information it is stated that McIntosh is situated on the main line of the G. T. Ry., 165 miles east of Winnipeg.

Mr. F. H. Boyd,
Purchasing Agent,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

Our General Office at Hamilton has referred
complete with your enquiry sheet to the
Ontario, advising that there is not sufficient information
on your enquiry sheet to enable them to quote on the proper
size of compressor, and requesting that we obtain the follow-
ing information quickly, so that they can have their quota-
tion in Ottawa before Monday, April 20th. --

Advise whether the compressor is to be
single-acting, or of the double-acting type ?

Advise whether the compressor is to be
single-cylinder, or double-cylinder ?

What is the amount of air pressure required ?

On receipt of the above information, we will
forward quotation promptly.

Yours very truly,

Ottawa, April 4, 1925.

MEMORANDUM:

Mr. Scott.

A revised report has been submitted by the Dominion Water Power Branch on the Hydro electric power plant now in course of erection at the McIntosh Residential School.

There is only one item in this report which will increase the cost of the work. It is suggested that the power house, which it was intended to have built be enlarged from 20 x 25 to 40 x 20, in order to provide accommodation for a blacksmith's and carpenter's shop on the first floor. This change will increase the cost of the work \$600.00.

As it is intended to proceed with this work very soon, the District engineer at Winnipeg would like to be advised whether this change will be allowed.

Dominion Water Power and Reclamation Service

Winnipeg, Man.

April 2nd, 1925.

Sir,

Enclosed please find three copies, together with vouchers, of Mr. J. M. Johnston's statement of cost, plus ten per cent, as per agreement, for work on the concrete dam and sewage disposal plant at the Indian Residential School, Moineuse, Ontario. These accounts have been checked as closely as possible and are recommended for payment.

The cost for constructing that portion of the dam from Sta. 3+66 to Sta. 2+10, namely \$4,061.22, appears high, but the work was carried on under severe winter conditions and the utmost care had to be exercised to ensure a good job. The increase in cost over that estimated may be summarized as follows:

- A - The large extra cost of winter construction on small works of this nature.
- B - When unwatered numerous seams were discovered in the bed of the river channel. This involved considerable rock excavation to obtain proper foundations and was an unexpected contingency not provided for in the original estimate.
- C - The extra height of dam and increased width of piers and sluice gates.

With reference to the cost of the septic tank and drains the actual cost will also exceed the estimate for this work. The cost to date, it will be noted, is \$1,271.93 and as it will cost \$1,000.00 to complete the work in the spring the estimate will be exceeded by about \$271.93. This increase is mainly due to part of the work being carried on under winter conditions and to the excavation in the construction of large buildings. A small amount of work still remains to be done on the septic tank, namely filling about one foot to the concrete walls and placing the wooden flooring on top. It was contemplated to complete this at the time the dam was to the ground with water, but this would have been impossible. All the necessary drains and water lines have been laid and the sections constructed so that sewage facilities are provided for the school and no inconvenience will be caused owing to the septic tank not being entirely completed.

Your obedient servant,

Sgd., C. H. Attwood,
District Chief Engineer.

McIntosh Indian School, Ontario.

Simmons' statement of cost, plus ten per cent, for the work done by him on the concrete dam and sewage disposal plant at the Indian residential school near McIntosh, Ontario, together with vouchers for same. These accounts have been checked by Mr. Attwood, the District Chief Engineer of this Branch at Winnipeg, and are now recommended for payment.

A copy of Mr. Attwood's letter which accompanied these accounts is also enclosed herewith. This letter explains the reason for the cost of the dam and septic tank being greater than was originally estimated. Mr. Attwood does not consider it advisable to resume work on the dam until the middle of May, when it is hoped that good progress will be made on this and the other work being done at the same time.

Dear Sirs:- Attention of Mr. F. H. Paget.

With further reference to the matter of the 17½ K.W. Generator ordered for McIntosh School, we find that this machine is completed and was on the point of being shipped when we received your wire instructing us to hold the order up.

We are sorry that you have changed your plans because we cannot see any way to change this for a 10 K.W. machine without incurring a heavy cancellation charge.

This machine was specially made for your order and it is not of a type which we keep in stock now on account of the almost universal use of alternating current in Canada.

If we were left with this machine on our hands it is very doubtful indeed if we would have an opportunity to sell it for a number of years. Ordinarily, and in the case of standard alternating current machines, we are able to sell every month, we would be quite pleased to arrange for a customer to change an order like this without asking him to accept a cancellation charge, but in view of the special nature of this machine we feel that we cannot do so in this case.

As a matter of fact we would suggest that by far the best solution of the matter is for you to take this machine as it is and instal it. The fact that it is larger than you need will not have any practical disadvantages from the engineering point of view. It will not take any more power to run it than is required to handle the load which is actually on it.

With reference to the bearings, it is not practicable to change this machine for ball bearings. There may be some condition with which we are not familiar which renders the use of

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Dept. Indian Affairs. 2.

ball bearings advisable in this case, but we cannot think of what this might be.

We do use ball bearings in certain cases, more particularly for direct connected motor generator sets and similar machines, but for any motor or generator arranged for belt drive with an overhung pulley it has been our experience that ball bearings have certain disadvantages and we cannot think of any condition under which the sleeve bearing would not be satisfactory.

We would again urge upon you the advisability of using this machine, but if for any reason you positively cannot do so we will make you a proposition involving the substitution of a 10 K.W. generator with ball bearings.

Yours very truly,

THE LINCOLN ELECTRIC CO. OF CANADA, LTD.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES

DEPARTMENT OF THE INTERIOR
CANADA

DOMINION WATER POWER BRANCH

Winnipeg, Manitoba.

April 1st, 1925.

Sir,

I have your letter of March 24th stating that tenders have been accepted for the generator, motor, pump and pressure tank. In reply to my wire of Saturday you replied that the order for pump and motors had been cancelled but that it may not be possible to cancel the order for the generator.

In the revised report on the McIntosh power development and water system forwarded on Monday, you will have noted that the plans provide for belt driven machinery instead of motor driven. This revised layout by eliminating the motors for water and air pumps reduces the size of the generator required. If this revised scheme is approved, the Lincoln Electric Company might be asked to supply a 10 k.w. D.C. generator in place of the 17½ k.w. now ordered. The Canadian Fairbanks Morse Company have quoted a price of \$451.00 plus freight for a ball bearing 10 k.w. 1400 r.p.m. D.C. generator. Other prices for same generator without ball bearing and at higher speeds are considerably lower. I would, however, recommend that the speed of the generator be not higher than 1400 r.p.m.

With respect to the pump, I have, in the revised report, provided for a high-duty ball-bearing centrifugal pump with a capacity of 250 imperial gallons per minute against a pressure of 60 lbs. If fire protection is not required a centrifugal pump of 250 gallons capacity can be purchased at prices ranging from \$118.00 upwards.

The accepted tender for the pressure tank appears quite reasonable and there is no necessity of changing this order provided the tank has the necessary connections for pipes, and water gauge glasses arranged to suit the vertical setting shown on the plan. It is our intention to place three one-foot water glasses as shown on accompanying plan.

Of the tenders received for the turbine and governor I would recommend the acceptance of the tender of the Boving Hydraulic and Engineering Company, Lindsay, Ontario, for \$2178.00 F.O.B. McIntosh, including supervision of the erection; the Department of Indian Affairs to pay for board and lodging of the erection superintendent while at McIntosh. I would, however, like to have received

J. T. Johnston, Esq.,
Director, Dominion Water Power & Reclamation Service,
Department of the Interior,
Ottawa, Ontario.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

a tender from Chas. Barber & Sons, Meaford, Ontario. This firm have specialized in small size hydraulic installations for many years and I think it advisable to ask them to tender for this job, particularly as I have had some correspondence with them in reference to this work.

I do not consider it advisable to resume work on the dam or start work on the power house before the middle of May. The completion of the dam should be included as part of the contract for the power house building, construction of penstock and tailrace excavation. This work should be done by contract if possible as we have no equipment to handle the job by day labour. Turbines and other machinery should be delivered between June 1st and 10th. I would also point out the necessity of securing tenders for the wood stave penstock immediately so that this material will be delivered at an early date. As there are many details in connection with this work I would suggest that if the Department of Indian Affairs approve of the layout shown on the plans accompanying the revised report that the work could be expedited and carried on much more satisfactorily if authority is given me to proceed with the work and order the balance of the material not already ordered by the Department of Indian Affairs.

Your obedient servant,

Sgd... C. H. Attwood,
District Chief Engineer.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 2)

PLEASE ADDRESS YOUR REPLY
TO THE DIRECTOR OF
WATER POWER AND RECLAMATION
DEPARTMENT OF THE INTERIOR
OTTAWA, CANADA

DEPARTMENT OF THE INTERIOR
CANADA

WATER POWER AND RECLAMATION SERVICE

OTTAWA, ONT. April 9, 1925.

Sir,

Re: Indian Residential School at
McIntosh, Ontario.

With reference to the tenders for the turbine in connection with the power development at the Indian residential school at McIntosh, Ontario, submitted by the Boving Hydraulic and Engineering Company, Kennis Engineering Company, and William Kennedy and Sons, these have been examined by Mr. Attwood, returned and handed to Mr. Chene.

Mr. Attwood, as will be seen from his letter returning these tenders, copy of which is attached, recommends the acceptance of the tender of the Boving Hydraulic and Engineering Company of Lindsay, P.C.R. McIntosh. He suggests however that an opportunity to tender on this work should be given to Charles Barber and Sons of Meaford, Ontario, who have specialised in small hydraulic installations of this nature. There may be some objection to asking this firm to submit a price in view of the fact that the other tenders have already been examined; but if not, I would recommend that Charles Barber and Sons be asked to tender on this work, failing which, the tender of the Boving Hydraulic and Engineering Company should be accepted.

Your obedient servant,

J. T. Johnston,
Director,
Water Power and Reclamation.

J. D. McLean, Esq.,

Gentlemen,— Attention Purchasing Agent.

We were pleased to receive your enquiry covering prices on Air compressor 2½' x 3' with 6" tight and loose pulley.

We are returning the tender herewith and have quoted a price of \$51.00 on this machine, f.o.b. McIntosh, Ont, sales tax included in the price.

We notice you ask for a 6" tight and loose pulley on this machine but the standard pulley on the Curtis which we sell is 11" x 2½" and we have figured on supplying you with this size as we presume it will make no difference.

We could make shipment in about five days and trust to have your order.

Very truly yours,

WILFRED STEEL TROUGH & MACHINE COMPANY, LIMITED.

I am in receipt of your letter of the 9th instant
toget er with a copy of a letter se t to y u by Mr. Edward
District Chief Engineer, of Winnipeg, advising you of the
[REDACTED] [REDACTED]
Indian Residential School at McIntosh, Ont.

With reference to the power house I regret that owing to the limited amount available for this work that a smaller building should be erected. The outside wall at one end of the building should be built of wood instead of reinforced concrete, so that an extension might be added to it when funds are available. As already mentioned to Mr. Cochran of your Department it is not the intention to have the remaining work performed by contract, as arrangements have already been made with the school authorities to undertake this work by day labour, in order that it might be carried out as economically as possible.

The Acting Director.

Wm. J. McLean,
Asst. Deputy and Secretary.

CHAS. BARBER & SONS
MEAFORD, ONT., CANADA

S P E C I F I C A T I O N.

Department of Indian Affairs, - McIntosh, Ont.

8. GUARANTEE:-

Chas. Barber & Sons guarantee that the above machinery will be of the best material, workmanship and design for the purpose, and provided it is protected with a suitable guard rack, should any breakages occur within a period of one year from commencement of operation, repair parts will be furnished free of charge.

We further guarantee that the turbine will develop a full 28 H.P. on the turbine shaft under 15 feet working head at the following efficiencies:-

81% at full gate; - 82% at 7/8 gate; - 83% at 3/4 gate;-

9. QUOTATION AND TERMS:-

For the machinery as per above specification our price is Three Thousand, Five Hundred and Eighty-seven Dollars, \$3587.00. Shipping weight 8600 lbs.

Terms would be net cash within thirty days after commencement of operation of plant, but not later than three months after date of shipment. Should the plant not be shipped within this time limit, the amount is to bear interest at 7% per annum until paid.

10. PLANS:-

The attached general plan and photo show approximate dimensions and lay-out, but a specific plan will be furnished to work to 17 feet. The plan will show the position of generator and power house lay-out.

The above is respectfully submitted and we trust will have your favorable consideration.

24" Turbine Equipment - Design C - 15' Head.

- for -

Department of Indian Affairs, - McIntosh, Ont.

1. TURBINE:-

One 24" Horizontal Shaft Canadian Turbine, bronze reinforced in all wearing parts, with single piece cast iron runner, link gate mechanism, screw adjusting Lignum Vitae and split cast iron Thrust Bearing.

2. DISCHARGE CONNECTIONS:-

One 26" split Cast Iron Quarter Turn with bronze gland, hand-holes etc.

One 26" to 38" x 8'-0" x $\frac{1}{4}$ " Flared Steel Draft Tube with cast iron flange for attachment to quarter turn and steady bolts.

3. SHAFT EQUIPMENT:-

- 2 15/16" x 14'-0" Turned Forged Steel Shaft, fitted complete.
- 9" x 24" Cast Iron Wall Thimble.
- 2 15/16" Bronze Gland Stuffing Box.
- 2 15/16" Self Aligning Ring Oiling Pillow Blocks.
- 24" Cast Iron Bridgetrees with Adjusting Wedges.
- 2 15/16" Safety Set Collars.
- 66" x 9" Cast Iron Drive Pulley.

4. FOUNDATION BEAMS:-

Two 12" x 40 lb. x 15'-0" I Beams with strut bolts carrying above equipment.

5. GOVERNOR AND GATE CONNECTIONS:-

One Size D Woodward Compensating Type Governor.

All necessary shafting, pulleys, belting, gears and sprockets for connection of governor to turbine gates, and for hand operation.

6. FREIGHT AND SALES TAX:-

The above machinery delivered freight paid, f.o.b. cars McIntosh, Ontario.

Government Sales Tax paid by C. Barber & Sons, and absorbed in price quoted.

7. ERECTION SUPERINTENDENCE:-

Chas. Barber and Sons to supply one competent erection superintendent to superintend erection and adjustment of Hydraulic machinery. All help and concreting materials to be furnished by the Dept. of Indian Affairs.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 2)

ATIONS CONTINUED

(j) Governor. For speed control a Blue D Woodward Compensating Governor with all connections, belt, etc., for efficient operation is to be provided and installed.

(k) Foundation Beams. The unit shall be constructed for installation on steel foundation beams, which must be provided by the Contractor.

General Requirements.

(a) It is understood that the Contractor will supply the services of a competent erection superintendent to attend the erection and adjustments of the hydraulic equipment and all materials necessary therefor.

\$3587 00

(b) The entire work or any of its parts and members and all workmanship and materials entering into its construction shall be satisfactory to the Engineer. His decision as to the acceptance or rejection of the whole or any part shall be final and binding.

(c) Bidders must submit drawings with their tenders showing dimensions and arrangement of the various parts and the kind of materials to be employed, together with complete data and details explanatory of their design.

ENGINEER shall mean any engineer or deputy appointed by the Minister of the Interior and acting under his instructions.

CHAS. BARBER & SONS

H. Hall

NOTE. Tenders will not be considered unless this form is filled in and returned to the Department.

Government sales tax should be added.

For your information it is stated that McIntosh is situated on the line of the C. T. Railway, 165 miles from Winnipeg.

ENGINEERS - DESIGNERS - MANUFACTURERS
TURBINE WATER WHEELS
WATER POWER EQUIPMENT

April 20, 1925.

Department of Indian Affairs,

Ottawa, Canada.

Gentlemen:-

Attention Purchasing Agent.

We beg to thank you for your request for quotation for turbine for installation in the power house of the Indian Mission School near McIntosh, Ont.

We have filled in the total amount on your quotation form and have attached our specification, also approximate plan and photo showing the general lay-out. You will note that the form of specification is slightly changed to suit our standard design.

Please note that we are using a one piece cast iron runner which we have found superior to the cast-in buckets for this class of work, also that our gate operating mechanism is not of the blipping type. We use alternate stationary and moving gates which has the same effect as the speed ring which has lately been adopted by other makers. This gives us an absolute face to adjust against, making a practically leak-proof gate, and one which is very easy to adjust.

Our standard 24" turbine is rated at 28 H.P. under 15 feet of head and this is all we have guaranteed. We shall, however, overgate it to give the full 30 H.P. Our next size of turbine is considerably large for the power required.

We carry our thrust on the turbine dome with an adjusting nut. It is of lignum vitae and iron and we have found that it is just as trouble proof and more durable than an outer bearing would be. The bearings in the turbine itself are of bronze of ample area and we have found that they give the very best of satisfaction.

We trust our proposal will meet with your approval and that we may be favored with your valued order.

Yours respectfully,

CHAS. BARBER AND SONS.

OTTAWA, ONT. April 23, 1925.

R

Sir,

I have received your letter of the 20th instant enclosing copy of a letter from the Lincoln Electric Company of Toronto, with reference to the proposed change in the machinery for the hydro-electric plant for the McIntosh Indian residential school. The question of using the 17½ K.W. generator in place of the 10 K.W. generator, which was proposed to be used in place of the larger one, has been referred by telegram to our District Chief Engineer at Winnipeg and we are advised that the use of the larger generator involves no change in the plans now being prepared, and as there is comparatively little difference in the cost, it would appear to be better to accept the 17½ K.W. generator already completed by the Lincoln Company, and have it shipped to McIntosh as suggested in the Company's letter.

Your obedient servant,

J. T. Johnston,
Director,
Water Power and Reclamation.

Dear Sir,-

I beg to advise you that your tender, of the 1924 vintage, for the purchase of a 30 H.P. single horizontal turbine for the hydro-electric plant now in course of erection at McIntosh Indian Residential School, amounting to \$2175.00 has been accepted.

This machinery should be shipped as early as possible, freight prepaid, to Rev. Father Boyer, at McIntosh, Ont.

Please furnish me when convenient with blue print copies of the drawings of this turbine. It is understood that your employees will be furnished with board and lodging free of charge while at McIntosh.

I would like to be advised of the date when shipment is made, and the invoice with signature should be sent to the Principal of the school, in duplicate, for certification.

DEPARTMENT OF THE INTERIOR
Canada

DOMINION WATER POWER AND RECLAMATION SERVICE

Winnipeg, Manitoba,
April 21st, 1925.

Sir,

Re: McIntosh Indian Residential School.

This will acknowledge your letter of April 15th stating that the Department of Indian Affairs have approved Alternative B as submitted with my report of March 30th making provision for an extension to the power house at some future date.

Referring to paragraph three, the shafting was so designed to operate the pump, motors, etc., at the speeds given in the estimates on page five of the revised report of March 30th. This is a matter however that cannot be definitely decided until the speed of the pump, generator and air compressor as ordered is known. When the speed of these machines is furnished to me I can then determine the size of the pulleys required. The speed of the above machines will be governed largely by the speed of the above machines and the speed of the turbine. I had also made provision for operating the generator, pump, air compressor and carpenter shop separately by operating each pulley individually by a friction clutch.

Paragraph eight of your letter states that definite arrangements have been made with the school authorities for the work done by day labour by the lay brothers under the supervision of Brother Gauthier.

- (1) The lay brothers will supply all tools and labour necessary to carry out the work.
- (2) The supervising engineer will not be called upon to certify to vouchers and cost of the work.

The estimate submitted with Alternative A and B were based on competitive bids and I feel sure that tenders could be received from reliable contractors within these figures. In deciding to do this work by day labour I quite appreciate that the work may be done within, or for less than the estimates cost. On the other hand however, I wish to point out that work done by day labour has in many cases exceeded that done by contract, and under the circumstances I can give no guarantee that the estimate will not be exceeded.

I presume from your letter that in addition to the power house the completion of the dam and septic tank will also be done by day labour by the lay brothers.

Before we can complete the details of the power house and order the necessary shafting, piping, etc. it will be necessary for the Department of Indian Affairs to supply this office with a copy of the specifications and blue prints of the machines ordered.

Very respectfully,
C.H. Attwood,
District Chief Engineer.

J. T. Johnston, Esq.,
Director, Dom. Water Power & Reclamation Service,

OTTAWA, ONT April 10, 1916.

Sir,

File number: 130-7-16.

I have received your letter of the 22nd instant with reference to the hydro electric development at the McIntosh Indian residential school, a copy of which has been sent to Mr. Attwood for his information.

I am enclosing herewith copy of a letter received from Mr. Attwood yesterday, regarding some details of this work. Several of the points raised by Mr. Attwood are answered in your letter which has just been received, but I beg to draw your attention to the third paragraph in which Mr. Attwood asks whether -

- (1) The lay brothers will decide upon and purchase or rent all tools and equipment and hire all labour necessary to carry out the work,
- (2) The supervising engineer will not be called upon to certify to vouchers and cost of the work;

and also to the last paragraph in which a request is made for a copy of the specifications and blue prints of the machinery ordered by your Department.

Your obedient servant,

J. T. Johnston,
Director,
Water Power and Reclamation.

DOMINION WATER POWER AND RECLAMATION SERVICE

OTTAWA, ONT. April 28, 1925.

Sir,

Your file number: 130-7-16A.
Attention: Departmental Engineer.

With reference to your letter of the 21st instant enclosing a cut illustrating a Curtis Air Compressor, and asking to be advised what type of compressor would meet the requirements of the specifications for the machinery to be used in connection with the proposed water works system at the McIntosh Indian residential school, the following letter has been received from our District Chief Engineer at Winnipeg:-

"This will acknowledge your letter of April 22nd with reference to the air compressor for the McIntosh Indian Residential School. A Curtis, Model B, Single Stage, Air Compressor, Size No. 3, is the size required.

"For the information of the Indian Department I might add that we have received a price from the Pacific Coast Pipe Company, Vancouver, B.C., of \$2.70 per foot, F.O.B. McIntosh, for 36-inch continuous wood stave pipe, one and one-half inch Douglas Fir, with bands, shoes, etc., to stand a working head of 18 feet. They also quote a price of 66 cents a foot extra for pressure creosoting."

The cut enclosed with your letter is returned herewith and I shall be glad to have your instructions regarding the purchase of the stave pipe in accordance with the price quoted by Mr. Attwood in the above letter.

Your obedient servant,

J. T. Johnston,
Director,
Water Power and Reclamation.

J. D. McLean, Esq.,
Assistant Deputy and Secretary,
Department of Indian Affairs,
Ottawa.

Galvanized Tanks for Various Purposes

DEALERS AND AGENTS PLEASE NOTE THE FOLLOWING

Our tanks are made of heavy galvanized steel of the best quality, imported direct from the mills. They are thoroughly riveted and supporting. Braces are placed inside tanks to prevent any possibility of bulging with the heavy weight of water. We make a specialty of the tank business. We like it. They are made under the careful supervision of expert workmen. If they are not as represented when they reach your station, return them to us at our expense. We guarantee them. We are right behind them. We can furnish you with any size tank, round, square, oblong or three cornered. We have tanks for all purposes. There is just this in our system, we get a job, and a tank to suit it, and we make it so that it will be a credit to the farmer's pocket and a help to him. We recommend 18-gauge tanks; 20-gauge are good, but 18 is so much heavier and therefore more economical in the long run.

STABLE TROUGH (In Use at the Guelph Experimental Farm)

Stockmen wanting a trough to water their stock in the stable will find this first-class—always ready, nothing to get out of order. Many people prefer it to the bowls on this account. Long lengths made in sections so it can be bolted end to end, so water can have free passage full length. Very simple, nothing to get out of order.

No. 1. Edge of body folded one inch. No. 2 furnished with one inch angle.

	No. 1	No. 2
Stable Trough, over 50 feet, per foot	55c	65c
Stable Trough, 30 to 50 feet, per foot	60c	70c
Stable Trough, 20 to 30 feet, per foot	65c	75c
Under 20 feet, Special price.	No. 1 is best seller	

We cannot ship it in longer lengths than 20 feet. If you want 57 feet for one row of cattle we would send you 3 16-foot and 1 9-foot lengths fitted so you could put it together to make one length 57 feet long. We do not use any cross bars, as it prevents sweeping it out. Always say how many rows of cattle you want troughs for.

WELDED COPPER STEEL WHEY TANKS

For many years Dairymen have had a problem ever before them in the difficulty of securing a satisfactory receptacle that would hold whey in a satisfactory manner. These tanks are welded throughout, so there is no chance of leakage. Tanks are finished around top with heavy angle steel and strongly braced to hold capacity. In these days of close government inspection this is very important. Publow says: "We have no hesitation in saying the Steel Whey Tank is the best and most sanitary tank in use at the present time."

SANITARY CLOSETS

SATISFACTORY, CLEAN, ODORLESS

Even though you do live out of reach of city sewage connections, there is no need for you to put up with the old filthy outhouse.

Tweed Sanitary Closets are especially designed to give to the country home the convenience enjoyed by those living in the city.

Look at the picture of our No. 1, as shown here. This is a sanitary liquid chemical closet with veneered mahogany finished seat and lid with nickel-plated hinges. It can be installed in any dwelling without waterworks or plumbing of any sort. The chemical used kills all vegetable matter, making it odorless and sanitary. Requires only the connection of a stove-pipe for ventilation. No. O Closet built same as No. 1, only it is round and same capacity.

The prices herewith will show you how little it costs to install a Tweed Modern Closet

Tweed Chemical, Price per Gallon ... \$1.50

The use of an efficient chemical in connection with the Tweed Sanitary Closet is of the utmost importance. The Chemical which we sell has been tested by us and is guaranteed to give entire satisfaction and to be most economical to use.

Tweed Chemical is made by expert Chemists, and is packed ready to ship. This cut shows how the Tweed Odorless Closet and Tweed Chemical are compactly packed all ready for shipment.

OPEN OPEN

STEEL BATHS

These baths are made of galvanized steel, enamelled pure white inside and robin egg blue outside; legs gilded with gold bronze. The steel rim is finished in white enamel, same as inside of bath, making a very attractive, durable bath at a low price.

The bath is sanitary, no wood being used in manufacturing it. Wood rims are out of date and unsanitary.

The "All-Steel" is fitted with waste and overflow for the plumber.

Supplied punched with two holes for double bath cock unless otherwise specified. See prices below.

The "Enameline" is exactly the same bath in every way as the "All-Steel" excepting the fittings. It is fitted with hose connection instead of overflow, and is intended for use where there is no waterworks. Sold extensively to the farming community. The standard length and the one mostly sold is the 5 foot bath.

Distance from centre of waste hole to wall or outside of rim, 4½ in.

Conclusive Evidence

In 1910, the American Society for Testing Materials began comprehensive corrosion tests of uncoated sheets in order to determine their actual measure of rust resistance. These tests were conducted in different localities, under widely differing atmospheric conditions, and included the following types of materials:

Copper Bearing	O. H. Steel.	Non-copper Bearing	O. H. Steel
"	Rene Steel.	"	Rene Steel
"	Puddled Iron.	"	Puddled Iron
"	Pure Iron	"	Pure Iron.

The results and conclusions are most convincing, and are recorded in full in the report of Committee A-5, American Society for Testing Materials, at the meeting of the Society at Asbury Park, N. J., June 21-24, 1921. These findings are of particular value and interest to all users of sheet metal.

The Society states that its results and observations "have now reached a point where we may definitely conclude that copper-bearing metal shows marked superiority in rust-resisting properties as compared to non-copper-bearing metal of substantially the same general composition, from which superiority we may truly anticipate a marked increase in the service life for copper-bearing metals under atmospheric exposure of uncoated sheets."

To analyze and summarize the Report of Test of uncoated sheets made by American Society for Testing Materials, at the end of four years and four months, the losses by corrosion are as follows:

UNCOATED SHEETS	Total Failures at Each Inspection during 4 yr.
	2 Yrs. 3 Mos.
	4 Yrs. 4 Mos.
	6
	274
	264

KEYSTONE Copper Steel

Reasonable in Cost

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

What is Keystone Copper Steel?

KEYSTONE COPPER STEEL is a quality steel for the addition of a certain percentage of Copper to well made Steel, thereby greatly increasing its strength and durability under actual service conditions. It has been scientifically developed and tested and its use is highly economical.

The Mineral of Quality — the Steel of the Future — the Steel of the Present

Copper added to Steel is *not* an impurity, any more than Copper is an impurity in brass or bronze. It loses its identity as a metal by becoming thoroughly diffused with the steel—thus forming a *new metal or alloy*.

Copper in Steel *increases its resistance to rust*. Actual time and weather have proved this fact.

For example, it is used for culverts, flumes, tanks, roofing, siding, and other applications where corrosion is a factor. It further explains why the demand for Keystone products from satisfied

buyers and users has increased from 5,311 tons in 1911, to upwards of 300,000 tons annually. This remarkable production record speaks for itself.

Keystone Copper Steel products were awarded the *Grand Prize* (highest award) for general excellence and greatest merit, by the

San Francisco. This high recognition follows the results of the investigations by able juries, and testifies to the high standard achieved in Keystone quality.

Dear Sir:-

With reference to your Order for One 30 H.P. Turbine with Governor we presume that you would like us to make a lay-out of the Intake showing how we would propose to arrange the Racks and Head Gate.

We understand that the head water level will be raised to about elevation 111.00 but we will require information as to how much storage your Engineers have figured on, in other words, the lowest head water level during low water Seasons.

We will be able to send you Drawing of the Intake within a day or two after receipt of the above information.

Please state also the variations of the tail water.

Yours very truly,

" C O P Y "

PACIFIC COAST PIPE CO. LIMITED

Vancouver, B.C., 2nd May, 1925.

G. H. Attwood, Esq.,
District Chief Engineer,
Dominion Water Power Service,
Winnipeg, Man.

Dear Sir,

Attention Mr. Craig - File B.4995-M.

We have your favour of the 29th ult. with reference to Wood Pipe for McIntosh, Ont., and note that the quantity has now been reduced from 450' to 330'.

We take pleasure in quoting as follows:-

330', 36" Continuous Wood Stave Pipe, with staves made from 2" dry Fir, finished $1\frac{1}{2}$ ", together with $\frac{1}{2}$ " round mild steel bands and shoes,

@ \$3.10 per ft., f.o.b. McIntosh, Ont., or
@ \$2.15 per ft., f.o.b. Vancouver, B.C.

(Sales Tax not included; we understand this would not apply in your case)

Price for Creosoting would be ... 70¢ pr.ft.extra.

You will note this price is higher than the previous estimate, but this is entirely due to adjusting the smaller quantity to the minimum freight. The actual weight of this stave material is 17200#, and in figuring a delivered price the cheapest freight rate we can take is the 10th Class, 30,000# minimum, @ \$1.04, - or \$312.00 - which accounts for the higher delivered price.

We do not know whether there is any possibility of other lumber being ordered for the same point; if so, this price would be materially reduced; possibly you can advise us further on this point.

With reference to Creosoting. We most strongly recommend it for a pipe of this nature working under a low pressure. With creosoted staves you will get many years of service from this pipe. Our price for creosoting is based on being able to include this small quantity in another lot or charge, and should you decide to favour us with your order, we would like to be advised as soon as possible, so that the material could be manufactured and set aside to await a favourable opportunity for creosoting, and in this way there would be no delay when shipment was required.

In our previous letter we gave an estimated cost of 79¢ pr.ft. for erecting, and at the same time pointed out we could supply one of our superintendents at a rate of \$10. per day and expenses. We frequently have one or more of our men at different points in Eastern Canada, or might have one on his way East, and could arrange a stop-over for a few days to assemble this Pipe: in this way you would be put to a minimum of expense.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 2)

PUBLIC ARCHIVES

We hope you will find this quotation attractive
and that we may be favoured with your order.

Yours very truly,

PACIFIC COAST PIPE CO. Ltd.,

Per... H. C. James.
Mgr.

1. This Pipe if laid on the surface should be supported
on sills about 6' apart. These can be more cheaply
obtained near the work, and should be about 4" x 4"
or 6" x 6" with a chock or block spiked at each
side against the Pipe.

CANADIAN PIPE COMPANY LIMITED

550 Pacific Street,

Vancouver, B.C.

May 4th, 1925.

Department of the Interior,

Water Power & Reclamation Service,

Winnipeg, Man.

Dear Sirs:

Attention C.H. Attwood, Chief Engineer.

We have yours of the 29th ult., re our quotation of Oct. 8th and now have pleasure in revising our figures as follows:

Complete material with exception of saddles for 330' of 36" Continuous Wood Stave Pipe for 18' head, (\$2.88 @ \$950.00, f.o.b. McIntosh, Ont. (near Sioux Lookout) (per foot

Erection after distribution of material along site, \$200.00

If subject to sales tax this will be extra.

Return transportation for Building Inspector would be added and would be approximately \$175.00, or if material was ordered immediately we could arrange for our builder who is going East shortly to stop over and make this installation at minimum cost to you.

To give the staves a 20 minute bath in hot creosote will add \$75.00 to above figures.

To have staves pressure creosoted, 8¢ per cubic foot, will add \$310.00 to above figures.

This material will weigh approximately 20000# and as the cheapest way to ship is by minimum car of 40000# some six thousand feet of lumber could be enclosed at no extra cost for freight.

Trusting our price will prove attractive, and hoping to be of service, we are,

Yours very truly,

CANADIAN PIPE COMPANY, LTD.

By ... W. K. Hancock.

File: B-4995-M.

DOMINION WATER POWER AND RECLAMATION SERVICE

Winnipeg, Manitoba,

May 9th, 1925.

Sir,

As requested in your letter of April 25th prices have been obtained for 330 feet of 36-inch continuous wood stave penstock for the McIntosh Indian School hydro-electric plant. These are as follows:

Canadian Pipe Company, Limited, Vancouver.

\$2.88 per foot F.O.B. McIntosh.
\$75.00 extra for a 20-minute bath of creosote, and
\$310.00 extra for pressure creosoting.

Pacific Coast Pipe Company, Limited, Vancouver.

\$3.10 per foot F.O.B. McIntosh.
.70 per foot extra for creosoting.

Ontario Wind Engine & Pump Co., Winnipeg.

\$3.45 per foot F.O.B. McIntosh.

The tenders from the Canadian Pipe Company and the Pacific Coast Pipe Company are enclosed. The price from the Ontario Wind Engine & Pump Company were obtained verbally from their Winnipeg representative.

The Canadian Pipe Company's quotation is the lowest and as they are a responsible and reliable firm I would suggest that their tender be accepted. With respect to creosoting the pipe no allowance was made for this in the estimate and if the Indian Department decides on one of the two methods the estimate will be increased by this additional cost. In their letter the Canadian Pipe Company state that as the pipe will only weigh 20,000 pounds and the minimum car rate is 40,000 pounds, some 6,000 feet of lumber could be shipped at the same time with no extra cost for freight. If the Indian Department consider it advisable to take advantage of this, 6000 feet of 1 x 6

J. T. Johnston, Esq.,
Director, Dom. Water Power & Reclamation,
Department of the Interior,
Ottawa, Ontario.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

shiplap could be ordered as it will be required for the powerhouse and forms. This might be made up as follows. If the Indian Department desires B.C. fir sheeting both inside and out 4,000 feet of B.C. fir, 1 x 6 shiplap, could be ordered, the balance of 2,000 feet of spruce shiplap which will be required for the roof and for form work. The complete quantities of lumber required for the powerhouse and forms will be forwarded within the next week.

Will you please have this order placed for immediate delivery and also advise the Canadian Pipe Company that we desire to have one of their men superintend the erection of the penstock if, as they state in their letter, a man is in the vicinity of McIntosh, and that the cost for these services will not exceed \$200.00. This erection can be proceeded with any time within the next 30 days, but it is necessary that we be advised by the Indian Department and also by the Canadian Pipe Company as to the approximate date of the arrival of the inspector on the job. We only desire to take advantage of the Pipe Company's offer to have one of their men erect the pipe if that man is in the vicinity of McIntosh, otherwise we can secure a man in Winnipeg to do this work.

I suggest that the Department of Indian Affairs when awarding the contract to the Canadian Pipe Company also notify the Pacific Coast Pipe Company that the contract for the pipe has been let.

Your obedient servant,

Sgd.... C. H. Attwood,
District Chief Engineer.

MINION WATER POWER AND RECLAMATION SERVICE

OTTAWA, ONT. May 13, 1925.

Your file number: 130-7-16A.
Attention: Departmental Engineer.

With reference to the power development now under way at the McIntosh Indian School, a letter has been received from Mr. Attwood in which prices are quoted for the wood stave penstock which have been obtained from the Canadian Pipe Company Limited, Pacific Coast Pipe Company, and the Ontario Wind Engine and Pump Company. Copy of Mr. Attwood's letter is enclosed herewith, together with copies of the offers submitted by the two former companies, that from the third company having been obtained verbally.

Mr. Attwood recommends the acceptance of the lowest tender, that of the Canadian Pipe Company, and I beg to draw your attention to the various recommendations contained in Mr. Attwood's letter, and shall be obliged if you will advise me as soon as possible regarding the decision of your Department.

Consideration should be given to the suggestion to ship six thousand feet of lumber along with the pipe in order to economize on freight charges.

Although it would involve a slight increase in the estimated cost, I would recommend that the penstock should be creosoted.

Your obedient servant,

J. T. Johnston,
Director,

J. D. McLean, Esq.,
Ottawa.

Copy for: J. D. McLean, Esq.,
Dept. of Indian Affairs,
Ottawa.

R

40103-L.

May 12, 1925.

Attention, Departmental Engineer.

Your file number: B-4995-L.

In further reference to your letter of April 21
concerning the proposed installation of a turbine, as stated in
the letter of April 21, the following questions were sent to
the Lincoln Electric Company for their consideration and answer
to the questions of the Department, a copy of which is
attached.

These two questions have also been discussed with
the Lincoln Electric Company, and it was suggested that as far
as possible, the Department should be kept advised of the progress
of the work. The Department is also advised that the
expenses of carrying out the work, as mentioned in the
attached letter states, you will be required to pro-
vide building materials and all necessary tools and equipment.

The three blue prints mentioned in that letter of
the machinery which has been ordered by the Indian Depart-
ment are enclosed.

We have also been furnished with three letters ad-
dressed to the Indian Department from the Lincoln Electric
Company, dated May 1, 1925, and dated May 2, 1925,
and dated May 3, 1925, which contain the answers to the
questions of the Department, and a copy of which is
attached.

The Indian Department wishes you to take up the
matters involved direct with the Boving Company and make the
necessary decisions yourself.

For your guidance, I would suggest that the matter
of providing an extension of the shaft through the
wall, to allow for connecting the turbine with a saw, as
suggested in the letter of May 2, might be discussed
with the Lincoln Electric Company, and a copy of which is
attached. It might be well to provide the shaft extension.

The question of a larger pulley for the turbine
suggested in the other letter of May 2, should be taken up
with the Lincoln Electric Company.

J. H. Atwood, Esq.,
231 Chambers of Commerce,
Winnipeg, Manitoba.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

Ottawa, May 16, 1925.

Mr. Jean.

Competitive prices have been obtained by the District Engineer of the Dominion Water Power Branch at Winnipeg for the furnishing of a wood stave penstock for the Hydro electric plant now in course of construction at McIntosh. The prices submitted are as follows.

	f.o.b. McIntosh
Canadian Pipe Co. Ltd., Vancouver,	\$2.88 per foot.
Pacific Coats Pipe Co. Vancouver	\$3.10 per foot.
Ontario Wind Engine & Pump Co. Winnipeg.	\$3.45 per foot.

I beg to recommend that the order for this material be placed with the Canadian Pipe Co. of Vancouver, who have submitted the lowest quotations.

I would also recommend that an order be placed with this company for the furnishing of 6000 feet of lumber which can be delivered at McIntosh at a price of \$1.00 per foot.

small tools and equipment such as shovels, picks, sledges, drills, pails, rope, block and tackle, etc., etc. It is hardly feasible to rent the small tools mentioned above as certain portions of them would be used up in the work. Further, to employ labour would necessitate having the money available for prompt payment of wages when demanded. I am quite willing to undertake the work on either of the above methods, but prefer the contract method, but in the final adjustment of this with the Indian Department I would like to have a clear-cut understanding as to my responsibility in the matter. This I have asked Mr. Orr to take up with you personally.

Your obedient servant,

(Sgd) C.H. Attwood,
District Chief Engineer.

Ottawa, Canada.

Dear Sir:-

With reference to your Order for One Turbine with Governor the work on this material is now well in hand and we could make shipment within about two weeks from receipt of the information asked for in our letter of the 7th inst.

The information we are most urgently in need of is the size of the Pulley, whether we can make it 36" instead of 30", so as to get more fly wheel effect.

The shaft extension with bearing for same could be left to a later date and we will make the Turbine shaft with a 4" extension outside the bearing so as to enable you to couple on an extension at some later date.

We will supply this 4" extension without extra charge.

Yours very truly,

Ottawa, May 27, 192E.

Arrangements were made with the Dominion Water Power Branch at the beginning of this month to proceed with the installation of a hydro electric power plant for the McIntosh Indian School, whereby the employment of labour was to be left to the charge of the Reverend Father Boyer, as it was his desire to employ some Lay Brothers on this work. I am advised today that the Lay Brothers on whom the Principal was depending have been transferred to another institution. It is, therefore, suggested by the District Chief Engineer at Winnipeg that the balance of the work be carried out by contract. The remaining work consists in the completion of the dam, the erection of a small power house, and the installation of the machinery already purchased.

If you approve of this suggestion I would recommend that competitive prices be obtained from contractors in Winnipeg.

Dear Sir:-

With reference to the 30" x 9" Cast Iron Pulley included
 in our Tender No. 1514-A we propose making this with a heavy rim
 in order to improve the regulation.

With the same object in view we would propose making the
 pulley 36" in diameter and we presume that this would meet with
 no objections as the only difference would be a slightly larger
 pulley required on the Generator.

Kindly take this matter up with the Generator Manufacturers
 and also ask them to let us know about the fly wheel effect in the
 generator.

The regulation will be better with more combined fly wheel
 effect in the driving pulley and the generator and there will be less
 tendency of the lights flickering.

Department of Indian Affairs,
Ottawa, Canada.

Dear Sir:-

We wrote you on the 30th ult. with reference to the length of the penstock but we find that upon looking through our Drawings that the Chief Engineer's Department of Winnipeg sent us a Map of the Power Site last year.

We have retraced this Map and indicated how we propose to locate the Power House, Penstock and the Intake and we enclose print as we presume that you are anxious to proceed with the excavations for the tail race as soon as possible.

You will find that we suggest locating the Power House so that the centre line of the tail race is 28' South and parallel with the South side of the dock. The inner end of the tail race would be 9' West of the West end of the dock.

As shown on our Blue Print W.T. 481 we propose to make the tail race 4' wide in the part that is excavated on land, beyond the shore line it could be broadened out so that you do not need to excavate deeper than to elevation 93.00 as indicated on the enclosed Blue Print.

You will find from this Blue Print that you will require about 370' of 36" wood stave penstock and there will also be required 2 steel

DEPARTMENT

SUBJECT

Turbine

F. H. Paret, Esq., Chief Accountant & Purchasing Agent,
Department of Indian Affairs,
Ottawa, Canada.

Dear Sir:-

With further reference to your order for Turbine and Governor as per our Tender No. 1514-A we presume that part of this power will be used for cutting up wood and it occurs to us that it might be advantageous to extend the Turbine Shaft through the wall so as to avoid the cost of a Motor for this purpose.

We have indicated this suggestion in yellow lines on the enclosed Blue Print W.T. 481.

An alternative arrangement would, of course, be to have the pulley for the wood cutting saw in the Power House close to the Bearing and to carry the belt through slots in the wall but this arrangement would have the disadvantage that sawdust would be drawn into the Power House and would make it difficult to keep the Generator clean.

The cost of a 2" shaft extension with ring lubricated bearing and base plate would be \$39.00 f.o.b. Macintosh.

We are not offering a pulley for same as the size of this will depend on the pulley on the saw.

If this suggestion meets with your approval kindly let us

File: B-4995-M.

DOMINION WATER POWER BRANCH

Winnipeg, Manitoba,
May 20, 1925.

Boving Hydraulic & Engineering Co.,
Hydraulic Department,
Lindsay, Ont.

Dear Sirs,

I am instructed under date of May 12th that you have received the order for the turbine and governor as per your Tender No. 15149 for installation at the McIntosh Indian School at McIntosh, Ontario. Copies of your letters of May 2nd and May 5th have been forwarded to me with instructions to take up with your Company direct the suggestions made in these letters.

With reference to your suggestion of extending the turbine shaft through the wall of the power house to operate a saw, as shown on the blue print WT 481, you will note from our blue print enclosed that a carpenter's shop is being provided above the power house and at present the extension for the saw is not considered necessary.

With reference to your letter of May 2nd suggesting that the drive pulley on the turbine shaft be changed from a 30" to a pulley 36" in diameter, this is quite agreeable, if in your opinion, after examining the new layout proposed, the larger pulley is still necessary to provide proper regulation. In our design of the power house layout the line shaft is designed to operate at turbine speed (450 r.p.m.)

With respect to your suggestion of May 5th regarding the position of the power house and the length of the penstock, I may say that this location had been considered but the present location on the island provided for a little cheaper construction and we were quite limited for funds.

I am enclosing a plan showing the general layout of the McIntosh development, and also a plan of the power house showing the installation of turbine, governor, generator, water pump, line shaft, etc. This plan supersedes the one you formerly received and provides for belt driven machinery.

Before proceeding with the construction of the power house building I would like to receive from you a complete installation drawing showing the details and position of the openings to be left in the floor and the wheel pit together with any bolt holes for the turbine and draft tube or the supporting pedestal for the turbine shaft. I would also like to be advised whether you would prefer to set the wall frame and draft tube foundation rings, if not, these will be set prior to the arrival of your man to install the turbine.

In the specifications it is stated that the unit shall be constructed for installation on steel foundation beams which must be provided by the Contractor. Are these foundation beams necessary with the open wheel pin type of installation? If so, please show the position of these beams together with size and dimension.

Yours truly,
(Sgd)... C. H. Attwood,

District Chief Engineer.

Dear Sir,

Reference is made to your letter of the 29th inst. regarding the purchase of 5000 feet of 12 inch diameter pipe for the construction of a water main. I am pleased to hear that the Department approves of this order being placed with the Canadian Piping Co. Ltd., of Vancouver, B.C., who have submitted the lowest quotation.

The Department also approves of the purchase of 5000 feet of lumber from the above mentioned company. It should be noted that the lumber is to be delivered to the site of the work. You may therefore advise your Winnipeg office accordingly.

Yours very truly,

J. H. H. H.

Director, Indian Affairs.

DEPT. OF INDIAN AFFAIRS
JUN 23 1925

DIRECTOR, S. S. SCOVIL, M.E.I.C.
REPLY TO ONE OF THE
LETTER, AND IN YOUR REPLY QUOTE
FILE NO. 130-7-16

OTTAWA, ONT. June 18, 1925.

R

Sir,

Your file number: 130-7-16.

I beg to acknowledge the receipt of your letter of June 8 in regard to securing tenders for the completion of the works in connection with the hydro-electric power plant now in course of construction at the McIntosh Indian residential school. We are advising our Winnipeg office as to your requirements in the matter.

On June 19th Mr. C.H. Attwood, our District Chief Engineer in Winnipeg who is now in Ottawa, accompanied by Mr. Beale of this office, called upon your engineer, Mr. J.D. Chene, to discuss certain of the details arising out of the work to be completed at McIntosh.

During this discussion Mr. Attwood pointed out that there were certain small items in his estimate which would be more satisfactorily handled on a cash basis, and Mr. Chene agreed that it would probably be more satisfactory that these items be provided for by a cash advance. I would suggest, therefore, that an advance of five hundred dollars (\$500.) be made available, its expenditure to be fully accounted for and vouchers in duplicate supplied for all expenditures in excess of one dollar.

If this suggestion meets with your approval, I shall be glad if you would forward a cheque for five hundred dollars drawn in favour of C.H. Attwood, to this office for transmittal.

Your obedient servant,

J. T. Johnston.

Mr. G. R. Orr,
Departmental Architect,
Department of Indian Affairs,
Ottawa, Ont.

Dear Mr. Orr:-

My first visit to an Indian school was to that
of McIntosh.

x

x

x

I take the liberty of bringing to your attention
the following which would help to complete the equipment
already installed: FIRE ESCAPES; 2 FOLDING BEDS FOR VISITORS
but above and before all the COMPLETION OF THE DAM AND OF THE
SEESPOOL and the CONSTRUCTION OF THE POWER HOUSE. I have
written about those last details to Mr. Chene under whose
jurisdiction those matters come I suppose. In my estimation
the price paid to the engineers for the part of the dam
already constructed is unreasonable and I would favor the
completion of this work by Contractor Simmons who tendered the
low figure of \$4,500. for not only a part of the work but
for the whole work.

I hope that you will see your way together
with Mr. Chene for the rapid completion of the work intended
for McIntosh school.

Yours very truly,

(Sd.) Joseph Guy, O.M.I.

OF THE WORK TO BE DONE AND THE MATERIALS FURNISHED FOR THE
CONSTRUCTION OF A WATER-POWER DEVELOPMENT AND THE INSTALL-
ATION OF A WATER-SUPPLY SYSTEM FOR THE MONTGOMERY INDIAN
RESIDENTIAL SCHOOL, AT MONTGOMERY, IN NORTHERN ONTARIO,
ACCORDING TO THE PLANS AND TERMS PARTICULARS PREPARED FOR
USE BY THE DOMINION WATER POWER AND RECREATION SERVICE
AT WINNIPEG, MANITOBA.

INSTRUCTIONS TO TENDERS.

Proposals to be entitled to consideration must be
made in accordance with the following instructions:

Proposals shall be made upon the forms provided
therefor, and all blank spaces in the form shall be duly
filled, and the completed form shall be without alteration
or erasure. The tender form shall be enclosed in an en-
velope endorsed with the name of the work to which it
refers, sealed and addressed to the District Chief Engineer,
Dominion Water Power and Recreation Service, Winnipeg.
The proposal shall not contain any recapitulation of the work
to be done.

The contractors tendering will be required to provide

Security in the form of a bank or other approved institution to the satisfaction of the District Chief Engineer, in the sum of \$10,000, to be deposited in the name of the District Chief Engineer, and to be retained until the satisfactory completion of the work.

The successful tenderer's cheque will be retained in
lieu of bond until the satisfactory completion of the work.

Tenders will not be considered unless they are re-
ceived on or before the time and date stipulated in the ad-

Indian Affairs. (R.C. 10, Volume C21, file 472-16, part 1)

GENERAL CONDITIONS.

1 - PRINCIPAL AND VENDOR.

In the following specifications the term Engineer shall mean the District Chief Engineer, Dominion Water Power & Reclamation Service, Winnipeg, or his duly authorized representative; and the term Contractor shall mean the individual or corporation entering into an agreement to perform the whole or any part of the specified work.

2 - PAYMENT.

Payment will be made monthly at the rate of 50% of the value of the work done, balance to be paid 30 days after the full and satisfactory completion of the work.

All payments on work during its progress, on account of the contract or extra work, will be made on the certificate of the Engineer. Final certificate shall not be issued until all accounts for extra work and materials authorized, and allowances for omissions, have been rendered, agreed to and made part of work certificate.

3 - COMMENCEMENT OF WORK.

Work is to be commenced immediately after the person or persons whose tender has been accepted shall have received the notification of acceptance and the award to them of the contract; and shall proceed in such a manner as shall satisfy the Engineer that the whole of the work embraced in the contract can be fully and satisfactorily completed within ten months from the date of such notification.

4 - MATERIALS OF WORK AND CONSTRUCTION.

All of the various works shall be executed in a substantial and workmanlike manner, and of materials of good quality satisfactory to the Engineer, in accordance with the

Indian Affairs. (R2 10, Volume C221, file 472-10, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY
POOR
COPIES

drawings, specifications and instructions given from time to time; and all of the said work shall be carried out and completed to the full and entire satisfaction of the Engineer.

Only competent workmen shall be employed on any part of the work. Should the Engineer deem any men incompetent or negligent or for any cause unfit for their duties, the Contractor shall dismiss them and they shall not again be employed on the work.

5 - GENERAL.

The Contractor shall give his personal supervision to the work, set out the work to the correct dimensions, level and position on the site, and furnish the necessary materials, labour, apparatus, scaffolding and utensils required in or need for performing the work in the best and most satisfactory manner.

There shall be also a competent foreman on the work continuously during working hours, who shall be fully empowered to act for the Contractor during his absence.

6 - EXECUTION AND METHOD.

The work shall be executed in the best and most satisfactory manner according to the true intent and meaning of plans and specifications, which are intended to include all labour and materials necessary and requisite for the full and entire completion of the works without exception, unless otherwise stated, notwithstanding that every item necessarily involved in the work is not particularly mentioned, and work shown and not specified, or vice versa, shall be done as if both shown and specified.

7 - DEVIATION FROM PLANS AND SPECIFICATIONS.

No deviation from the plans and specifications will be permitted without the direct consent of the Engineer in writing and no extras will be considered unless authorized by

Indian Affairs. (B. 16, Volume 621, File 42-16, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

the Engineer in writing.

Should the Engineer at any time during the progress of the work desire any alterations, additions or omissions from the work as provided in the plans and specifications, he shall have the right to issue orders and directions in the matter, and the same shall in no way affect or make void the contract. No such alterations, additions, or omissions shall be instituted, however, without authority in writing.

Extra work, if any, shall be paid for on the basis of proven cost plus 10 percent. Each tender must be accompanied by a schedule of unit prices to provide for additions or deductions for the following classes of work:-

- (1) - Earth Excavation, per cu. yd.
- (2) - Rock Excavation,
 - (a) - Surface.
 - (b) - Subaqueous.
- (3) - Concrete.

3 - RESPONSIBILITY.

The entire work during construction, and until completed and taken over, is entirely within the charge of the Contractor, and he must make good any damage from fire or other causes, and must also hold himself solely responsible for any injury to persons or damage to property during construction.

The Contractor shall also be held liable for all violation of laws caused by obstruction of roads, etc., and shall be responsible for all accidents to workmen engaged about the work during construction. The work during its performance shall be properly protected by the Contractor, who will be held responsible for all accidents which may happen to individuals or animals in consequence of the non-fulfilment of this condition.

Indian Affairs. (R. 10, Volume C-21, File 47-16, Part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY
POOR
COPIES

The Contractor, at completion of the work, shall remove all waste material and debris from the premises and shall leave all clear and in a proper condition and given up in a complete and undamaged state without exception.

7 - TEMPORARY BUILDINGS.

The Contractor shall erect temporary buildings required for accommodation of men and storage of materials, also privies for the use of workmen, and have them cleaned out from time to time.

10 - ACCESS TO WORK.

The Contractor shall allow the Engineer, or any officer that he may appoint, free access to all parts of the work at any and all times, and shall provide every facility for inspection that such officer may require.

11 - LOADING.

No part of the structures included in the work shall be loaded during the construction with a load greater than it is calculated to bear safely when completed. Should any accident occur through the violation of this requirement, the Contractor in default shall hold himself solely answerable and liable.

12 - COMPLIANCE WITH LAWS.

The Contractor shall at all times comply with the regulations of the Federal Department of Labour.

13 - SITE.

The site of the work is about two miles from McIntosh, Ontario, a station on the Canadian National Railway, 169 miles east of Winnipeg, and is on the short stretch of river

Indian Affairs. (R 40, Volume 621, file 472-16, part 2)

separating Forest and Canyon lakes, in the District of Renora. It is accessible from McIntosh by water-route of two miles on Canyon lake.

14 - ~~PLAN~~.

The work consists of the completion of a concrete dam across the outlet of Forest lake; the erection of a wood-stave penstock; the construction of a power-house; the excavation of rock for a tail-race, and the laying of water and steam pipes from the power house to the school building.

The general lay-out and construction details are shown on the following plans:-

Plan No. 1 - General Plan of the Canyon River Power Site, prepared by the Dominion Water Power & Reclamation Service, showing contours and elevations and proposed layout.

Plan No. 2 - Details of Power House.

Plan No. 3 - Machinery and Equipment Layout in Power House.

Plan No. 4 - Foundation Plan of Machinery.

Plan No. 5 - Concrete Dam.

Plan No. 6 - Profile and Details of penstock line.

Plan No. 7 - Profile and detail of steam and water supply line.

15 - ~~PLAN~~.

The datum plane, to which all elevations in these specifications and on the accompanying plans refer, is based on a bench mark established at the site by the Dominion Water Power and Reclamation Service. The elevation of this bench mark is 270.00 (assumed datum).

16 - ~~PLAN~~.

All timber entering into the work included in these specifications shall be sound, merchantable stock of good quality, and subject to the approval of the Engineer.

Indian Affairs. (P. 10, Volume 221, file 472-10, part 3)

17 - CONCRETE WORK SPECIFICATIONS.

(a) Cement - All cement used in the work shall be Portland cement and shall conform to the Standard Specifications for Portland Cement of the Canadian Engineering Standards Association, issued February, 1934.

(b) Gravel - Gravel, providing it is of quality satisfactory to the Engineer, may be used for the concrete aggregate. It shall be clean, free from clay, loam, organic matter or other impurities, and contain no stones larger than 1 1/2".

(c) Sand - All sand for concrete shall be clean and silicious, and shall be a well graded mixture of coarse and fine grains, with the coarse grains predominating. It shall be free from loam, clay or other impurities.

(d) Storage of Materials - Cement shall be stored in a weather-tight building, with a raised floor to ensure dryness. Aggregates shall be so stored, on platforms or otherwise, as to avoid the inclusion of foreign material.

(e) Measurement of Materials - For the proportioning of concrete, 100 pounds by weight shall be taken as the equivalent of one cubic foot. Aggregates shall be measured by volume, in suitable containers approved by the Engineer.

(f) Proportioning of Materials - All concrete, unless otherwise specified, shall be in the proportion of one cubic foot of cement to four cubic feet of gravel. The amount of water to be used shall be a minimum consistent with the workability of the mixture and the class of work being done. Concrete for reinforced work shall contain only sufficient water to allow the mixture to flow freely around the reinforcement and fill the forms at every point.

Indian Affairs. (RG 10, Volume 621, file 472-10, part 2)

(g) Mixing and Placing - All concrete shall be mixed in a batch mixer of revolved type, and for a period of time not less than 1½ minutes. It shall be transported from the mixer to the work in water-tight conveyances, and shall be deposited in place within a period of 15 minutes after mixing. During placing, concrete shall be spaded on the sides adjacent to the forms to ensure a smooth, even surface. When work is resumed after a period during which the previously placed concrete has partially set, the surface of the concrete in place shall be roughened, thoroughly cleaned of foreign material and laitance, thoroughly wetted, and then painted with a neat cement mortar before the placing of fresh concrete.

All mixing and placing of concrete shall be done in the presence of the Engineer.

(h) Forms - All forms for concrete shall be sufficiently water-tight to prevent leakage of cement, and shall be of a substantial character, well-braced and sufficiently strong to hold the face of the concrete true to line. Forms for the exposed work shall be smooth-placed to ensure an even surface. Forms may be used more than once, provided they are thoroughly cleaned of all adhering concrete before being used again. The design and character of the forms shall be subject to the approval of the Engineer.

(i) Removal of Forms - Forms shall not be removed from any concrete surface except with the approval of the Engineer.

(j) Curing of Concrete - After the removal of forms, the surfaces of the concrete shall be kept moist for as long as, and in such manner as, the Engineer may direct.

(k) Steel Reinforcement - Steel reinforcement shall consist of "steelcrete" expanded metal as specified. The minimum lap of the sheets in either direction shall be 12 inches. The steel shall be so placed and supported in position as the Engineer may direct.

(l) Finishing - At the discretion of the Engineer, the surface of the concrete shall be finished with a grout containing one part of cement and not more than two parts of sand, trowelled to a smooth and even surface.

DETAILS OF CONSTRUCTION

13 - Dam.

The dam shall be completed in accordance with the details shown on Plan No. 4. The length of the uncompleted portion is approximately 184 ^{ft 6} feet.

(a) Foundation - The dam shall rest on bed rock, and, before the placing of concrete, the site shall be excavated to the required depth and the bed-rock thoroughly cleaned to the satisfaction of the Engineer. Any seams or fissures in the rock shall be grouted with a mixture containing one part of cement and three parts of fine aggregate to ensure water-tightness at the base.

(b) Construction - The dam shall be constructed of concrete; but may contain boulders or rocks of suitable size imbedded in it in such a manner that each boulder or rock is entirely surrounded by the concrete, but none is within four inches of any face of the dam.

(c) Finishing - Where required by the Engineer, the surface of both the already completed portion of the dam and the portion covered by these specifications shall be finished with a grout containing one part of cement to two parts of sand, trowelled to a smooth, even surface.

Indian Affairs. (RG 10, Volume 6221, File 472-10, part 2)

(d) Backfilling - After the removal of the forms, the material excavated from the site of the dam shall be back-filled on both the upstream and downstream faces.

(e) Removal of Bunk-house - The log bunk-house, at present on the line of the dam, shall be removed or demolished to make way for the construction of the dam.

19 - Penstock.

(a) Location - The penstock will run from the dam to the intake-chamber in the power-house, as shown on Plans Nos. 1 and 5, and will be approximately 325 feet long.

(b) The 36" continuous wood-stave pipe and steel thimbles will be furnished the Contractor and are not included in this contract. The Contractor, however, must erect the penstock and supply all materials for saddles and supports.

(c) Rock Excavation - The penstock shall be so laid that no part of it shall be above the hydraulic gradient. Where necessary to accomplish this, rock shall be excavated to the required depth.

(d) Supports - Supports for the penstock shall be provided at intervals of six feet, as shown on Plan No. 5. These supports shall be constructed of logs cut at the site. The supports shall rest on sills set on bed rock.

(e) Wood Pipe Connections - The connection of the wood-stave pipe to the steel thimbles at the dam and wheel-pit shall be so made that a satisfactory water-tight joint is obtained.

20 - Power House.

(a) Site - The power house shall be situated as shown on Plan No. 1, the final laying out of the foundations to be determined by the Engineer.

(b) Foundations - The power-house shall rest on concrete foundation-walls, constructed to bed rock, and before pouring of concrete the rock foundations shall be cleaned of all loose material and dirt. Any seams or fissures,

COPIES

in the rock foundation shall be cleaned out and filled with grout, if considered necessary by the Engineer.

(c) Foundation Walls - The foundation-walls shall be constructed of concrete, 12 inches thick, as shown on Plan No. 2, and shall be built from bed-rock up to the level of the base of the concrete-floor. The walls shall be continuous around the whole base of the powerhouse except at the tail-race, where the wall shall be carried across the opening by a steel I-beam as shown. There shall also be a cross-wall, 12 inches thick and constructed to bed rock as shown.

(d) Stud Walls - All studs in outside walls shall be 2 x 6". Studs shall be built up solid at angles, doubled at openings, and trussed over openings 3 feet or more in width. Studs shall be set at 16 inch centres and all placed straight, plumb and true. Studs shall be braced until secured by floor joists overhead. Sills shall be the same size as the studding and plates same size as studding, doubled, with joints well broken. Sills shall be set level and secured to foundations with 7/8" x 10" bolts with nuts and washers upon the ends and spaced five feet upon centres.

(e) Floors - The ground floor shall be constructed of concrete, six inches thick and reinforced with # 3-4-40 "Steelcrete" expanded metal. The floor shall be made five inches thick of concrete as specified, immediately covered with a grout containing one part of cement to three parts of sand to a depth of one inch, and struck off and trowelled to a smooth, level surface. Reinforcement shall be placed and supported in position in a manner approved by the Engineer.

The joists for the second floor shall be 3" x 10", spaced at 16" centres. They shall be supported at their outer ends on a 1" x 6" strip cut into the studding, and shall be securely nailed to the studding. Their inner ends shall be supported, where shown, on a 10" x 10" beam, or set into the concrete wall of the intake-chamber. The joists shall be bridged with herring-bone bridging at their centres and shall be solid-bridged over the beam. Where joists are trimmed for openings, headers and trimmers shall be doubled and firmly secured together. The flooring shall consist of 2" matched flooring.

(7) Walls - The exterior and interior of all frame walls shall be boarded up, laid close joints, with good quality 7/8" narrow ship-lap lumber. The exterior wall shall then be covered with two thicknesses of asphalt paper and finished with 7/8" drop siding, with corner boards and water-table complete.

(8) Rafters - All rafters shall be 2" x 6" set at 16" centres, with 1" x 3" ridge piece and ties and braces complete as shown on the plan.

(9) Roofing - Rafters shall be boarded with good quality 7/8" ship-lap, this to be covered with one layer of asphalt paper, and the whole shingled with B. C. Cedar shingles laid 4" to the weather.

(10) Doors and Door Frames - Doors and frames shall be provided where shown. The doors shall be constructed of material to match the finished building, and shall be hinged each with three strong steel hinges, and provided with suitable locks and knobs.

(11) Window Frames and Sashes - There shall be provided, where shown, twelve standard window-frames, of the dimensions shown, with divided sash windows and with standard storm windows.

(2) Ladder and Trap-door - There shall be constructed, where shown, a ladder inside the building from the main floor to the second floor, and a trap-door in the floor to give access to the second storey.

(1) Stairway - The stairway to the second floor shall be built on the outside of the building as shown on the plans. The hand-rail about the platform shall be so constructed that it may be temporarily lifted out or swung about to permit the bringing in or taking out of machinery or material to the second floor without hindrance.

(a) Painting - All exterior woodwork usually painted shall have three coats of paint of approved quality and tint.

21 - INTAKE CHAMBER.

The intake chamber shall be constructed of reinforced concrete to elevation 114.0 and of lumber above that elevation, as shown on the plans. It shall be constructed of the size and dimensions shown on the plans. It shall be supported on a concrete base, constructed to solid rock, except the downstream wall, which is supported on a steel I-beam as shown. The reinforcing of the intake-chamber shall consist of sheets of "Steelcrete" expanded metal; the lower portion requiring # 3-9-25 "Steelcrete"; the next requiring # 3-9-20 "Steelcrete"; and the top requiring # 3-13-125 "Steelcrete". The chamber shall be covered with 3" lumber. The placing and supporting of the reinforcement during pouring of concrete shall be subject to the approval of the Engineer. During pouring the concrete shall be screeded along the faces of the forms to ensure a smooth, even surface. The concrete shall be of a mix of sufficient density to ensure water-tightness.

As shown on Plan No. 2, a ladder shall be provided consisting of 4" iron rungs set in the concrete.

Indian Affairs. (1914), Volume 1121, File 17-16, p. 11-21

22 - TAILRACE.

The tail-race shall be excavated to a width of four feet and to elevation 90.0 beneath the power-house and for a distance of 10 feet downstream from the downstream wall of the power-house. Beyond this point the bottom may be gradually sloped upward to elevation 92.0, the width at the same time being increased gradually to 7 feet, in such a manner that the total cross-sectional area at any point, from a surface-elevation of 95.0, shall be not less than 20 square feet.

23 - SUPPORTS FOR EQUIPMENT, MACHINERY, ETC., IN POWER-HOUSE.

(a) A solid concrete pier, to bed rock, shall be built to support the water-tank, as shown, the top of the pier being shaped to fit the base of the tank.

(b) Suitable supports for the shaft-hangers shall be provided, of such dimensions and so placed as to permit the hangers to be secured in place at the proper positions and elevations as shown. These supports shall be strongly secured to the joists or the wall, as the case may be, in a manner subject to the approval of the Engineer.

(c) Concrete bases for machinery and equipment shall be built as required, according to the detail. Openings for setting machinery or for footings shall be provided, the same to be grouted to the required dimensions after the setting of machinery or bolts.

(d) Before the pouring of concrete for the foundation chamber, the turbine shall be in place, ready for the penstock and the intake valves shall be set in position.

(e) Where the penstock enters the power-house the wall shall be so constructed as to provide a proper support. A concrete support shall also be built in the power-house floor between the wall and the intake-chamber as shown.

(f) Any required openings, supports, etc., required for the setting up of the electrical apparatus, the hanging of fixtures, or the carrying of the line outside the building shall be made or supplied by the Contractor.

(g) In general the Contractor shall perform the work in such a manner as to fit in with the work of those engaged in setting up machinery, equipment, etc.

24 - LAYING OF WATER AND STEAM PIPES.

The Contractor shall lay water and steam-lines, for which the pipe will be supplied, between the power-house and the school, and shall build, where required, a wooden box to carry them, the same to be constructed and supported as shown on Plan No. 6. Where there is sufficient earth cover, the pipes shall be laid in an excavated trench, the trench to be back-filled and all left satisfactory to the Engineer.

25 - POWER LINE.

The Contractor shall supply and erect three suitable poles between the power-house and the school, and shall provide and secure in place the necessary cross-arms and insulator supports. The poles shall be constructed of material cut at the site.

26 - INSTALLING TURBINE, MACHINERY, ETC.

The Contractor shall supply any unskilled labor that may be required for the setting up of the turbine and other machinery, and for the transportation of materials not covered by the contract from McIntosh station to the site. These costs shall be paid for as extra work.

DEPARTMENT OF THE INTERIOR

Dominion Water Power and Reclamation Service

Winnipeg, Man. July 22, 1925.

Sir,-

As per the instructions of the Department of Indian Affairs, plans and specifications were prepared for the completion of the Hydro Plant at McIntosh and tenders were called for by advertising three insertions in the Manitoba Free Press and Winnipeg Tribune and one insertion in the Winnipeg Mirror. The advertisement called for tenders on the following work: The completion of a concrete dam and the erection of a wood stave penstock; the construction of a power-house; the excavation of rock in the tailrace, and the laying of water and steam pipes from the power-house to the school buildings, and the erection of a pole line connecting the buildings, the tenders to be returned to this office by 12 o'clock, noon, July 21st.

Tenders were received from the following firms, and opened as per instructions from Mr. Chene:

John Gunn & Sons, Ltd., Winnipeg,	- \$8,370.00
Macaw & MacDonald, Winnipeg,	- 6,969.00
J.H. Simmons, Winnipeg,	5,789.00

The tenders, with cheque for ten per cent of the amount, the form of Schedule of Tender, and specifications are enclosed herewith. Two copies of the plans are being forwarded under separate cover.

Even the lowest of the tenders received is somewhat higher than had been anticipated, particularly in view of the fact that our estimate, as submitted on March 30th, 1925, was based on prices received from both local manufacturers and contractors.

The tender of J. H. Simmons being the lowest, and as he was the contractor for the school at McIntosh, I would recommend that his tender for the sum of \$5,789.00 be accepted, and if approved by the Department of Indian Affairs, that I be notified immediately and supplied with the necessary forms of contract so that the contract can be closed and work started at the earliest possible date. I would also suggest that the cheques be returned in the usual manner to the unsuccessful tenders.

Assuming that the tender of J.H. Simmons will be accepted I have prepared a revised estimate showing the cost of work to date, together with the amount spent for the purchase of equipment and expenditure required to complete the work.

J.T. Johnston, Esq.,
Director, Water Power & Reclamation,
Dept. of the Interior,
Ottawa, Ont.

Your obedient servant,
(sgd. C.H. Attwood,
Per. J.C.

LETTER AND IN YOUR REPLY QUOTE

FILE NO. 40103-71

OTTAWA, ONT. July 27, 1925.

Referring to your letter of July 21st last in regard to the McIntosh Residential School I now enclose copy of a letter just received from Mr. C.H. Attwood, our District Chief Engineer at Winnipeg, together with the following documents:-

1. Tender of John Gunn & Sons, Ltd., with cheque.
2. " " Macaw & Macdonald " "
3. " " J.H. Simmons " "
4. Schedule of tenders.
5. Revised estimate of cost of completing plant.
6. Copy of specifications upon which tenders were invited.
7. Blue prints of plans 1, 2, 4, 5, & 6 (under separate cover)

Mr. Attwood's letter appears to deal fully with the matter and you will note his recommendation that the lowest tender be accepted. I shall be glad to receive early intimation of your decision in order that I may advise Mr. Attwood and forward to him the necessary forms of contract, as he requests, in order that he may close the contract in accordance with your award and get the work started as soon as possible.

Your obedient servant,

J. T. Johnston

Chambers of Commerce,
Princess St.,
Winnipeg, Man.

Dear Sir:-

Re. Hydro plant and Water supply
System, McIntosh, Ont.

In reference to the above work for which we submitted you a tender on the 21st instant, we have subsequently had an opportunity to place this proposal before our foreman, who built the part of the said work which has already been erected, and is therefore familiar with the local conditions. This man has returned to the City today, and he advises us that he can considerably improve on the estimated cost of several features of the

I've you a sum
Three hundred
willing to proceed with the
as to do so, and to carry it out as per
specifications on a basis of cost plus 10%, with the
guarantee that this will not exceed Five Thousand Three
Hundred Dollars \$5300.00.

As we explained to you we are
willing to take this chance on cutting the price in
order to provide employment for this foreman and his
gang, as we have no other work to offer them at the
present moment, and are anxious to keep this part of
our organization together.

We will, therefore, appreciate
decision by your department on this proposal.

Yours truly,

Indian Affairs. (RG 10, Volume 6221, file 472-10, part 2)

DEPARTMENT OF THE INTERIOR
CANADA
DOMINION WATER POWER AND RECLAMATION SERVICE

Winnipeg, Manitoba,
Canada July 27th, 1925.

I am in receipt of a letter this morning, from Macaw and Macdonald, General Contractors, Winalpes, who tendered on the completion of the hydro plant at McIntosh, stating that on the advice of their foreman they are prepared to do the work on a cost plus ten per cent basis and give a guarantee that the total cost will not exceed \$5,300. His letter is enclosed.

Mr. Macaw called at this office and brought with him his estimates for the work at McIntosh explaining that his foreman, who worked on the construction of the dam last winter, had shown them through his knowledge of conditions that their estimate was quite high. The estimate of Macaw and Macdonald as revised by their foreman and shown to me amounted to a total of \$5,100. and Mr. Macaw's explanation for submitting his alternative figure was that he feared his tender as submitted would probably be considered high. He further stated that his foreman and construction gang had just returned to the city having completed a contract for the C.I.R., and as his firm had no other work to offer them they would be glad to do the work at McIntosh on cost plus basis, giving the Department the advantage of any saving which might accrue and at the same time that the total cost of the work would not exceed \$5. Mr. Macaw explained that this offer was made in order to provide employment and keep his organization intact.

I informed Mr. Macaw that the tenders had been forwarded to Ottawa, but gave him no information as to the number of firms who had tendered nor the amount of the tenders, and agreed to submit this letter to the Department of Indian Affairs for their consideration. I felt, however, that in submitting the letter of Macaw and MacDonald to the Department it was only fair to inform Mr. Simmons that a letter had been received offering to do the work at McIntosh on a cost plus basis with an up set price at a figure considerably lower than those received in any of the tenders, and asked him if he would accept such a basis. Mr. Simmons accepted the cost plus basis, naming an up set price for the contract. In reply to this Mr. Simmons has submitted a letter stating that he would agree to do this work on a percentage basis, namely, cost plus ten per cent, with his previous tender price as an up set price.

J. T. Johnston, Esq.,
Director, Water Power & Reclamation Service,
Department of the Interior,
Ottawa, Ontario.

Indian Affairs. (RG 10, Volume 6221, file 4-2-10, part 2)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

Although the receiving of the revised offers from the contractors after tenders have been received may be considered irregular, the saving to the Department is, I think, of sufficient amount to warrant consideration of these revised tenders.

Although the up set price stated by Mr. Simmons is higher than that of Macaw and Macdonald I personally feel that all the tenders submitted were high and feel confident that the work can be done for less than \$5,200., and in view of the fact that Mr. Simmons was the lowest tenderer I am of the opinion that he can execute the work on a cost plus basis as cheaply as any of the other contractors who tendered and if these new offers are considered by the Department of Indian Affairs I would recommend that Mr. Simmons' offer of this date be given favorable consideration, or that he at least be given an opportunity to reduce his up set price to that of Macaw and Macdonald.

Upon receipt of a decision regarding these tenders from the Department of Indian Affairs I would be glad to receive a telegram advising me of that decision so that the contract may be let and work started immediately.

Your obedient

Indian Affairs. (RG 10, Volume 6221, file 472-10, part 2)

Certified copy of a Minute of a Meeting of the Committee
The Deputy of
of the Privy Council, approved by His Excellency the
Governor General on the 20TH AUGUST 1925

The Committee of the Privy Council have had before them a report, dated 20th July, 1925, from the Superintendent General of Indian Affairs, stating that, the same being necessary, tenders were called for the completion of a hydro electric power plant and water supply system for the McIntosh Indian Residential School, in the province of Ontario, and that the following were received:

John Gunn & Sons, Ltd., Winnipeg.	
Macaw & MacDonald, Winnipeg,	6969.00
J. H. Simmons, Winnipeg,	5789.00 X

The Minister recommends, pursuant to sub-section 2 of Section 26 of the Public Works Act, that the lowest tender, namely, - that of J. H. Simmons, Winnipeg, for \$5,789, be accepted and the contract awarded accordingly. Funds for this purpose are available from Parliamentary appropriation.

The Committee concur in the foregoing recommendation and submit the same for approval.

Clerk of the Privy Council.

DEPARTMENT

HEAD OFFICE & WORKS

Lindsay, Ont. Sept. 25th, 1914.

SUBJECT Tender No. 1514-A
Turbines McIntosh Indian School

The Department of Indian Affairs,
Ottawa, Canada.

Dear Sirs:-

With reference to the balance of \$871.20 on the above Contract which was due within sixty days after June 30th we shall be pleased to learn when we may expect your remittance.

The machinery under this Contract has now been at McIntosh since the first week of July. However, we understand from correspondence with the Dominion Water Lower Branch of Winnipeg that the construction of the Power House has been delayed somewhat. In his last letter Mr. Craig mentioned that probably they would be ready to start the erection the first week of this month but we now understand that the erection cannot be started for another five weeks.

Our Erection Superintendent, Mr. Olson, communicated with Mr. Craig from Pointe du Bois, Man. last week and he was advised to this effect.

The funds which we required for constructing this machinery were advanced by our bankers under a special agreement and they are now claiming repayment because the Contract with you should have been completed some time ago and payment received.

Dear Mr. MacKinnon,

1. The first part of the paper is devoted to a general discussion of the problem of the existence of a solution of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has a solution for arbitrary values of the parameters α and β if and only if the condition $\alpha + \beta = 1$ is satisfied.

DOMINION WATER POWER AND RECLAMATION SERVICE

Winnipeg, Manitoba,

October 15th 1925.

Sir,

With reference to the heating of the hydro-electric power house of the McIntosh Indian Residential School, the original intention was to heat it by steam, supplied from the boiler of the school. This decision was arrived at owing to the fact that a two-inch steam pipe was being laid alongside the four-inch water pipe from the school to the powerhouse to prevent the water pipe from freezing, and further that Father Doyer stated that there were enough radiators left from the school to heat the power house. On taking this matter up with the school authorities on the ground, however, it has been found that only a small part of one radiator is left and that practically all the necessary radiators and pipe would have to be purchased.

From inquiries made of the different heating firms in the city I estimate that the cost of supplying steam radiators and fittings for the building would run something over \$200.00. This seems rather high for the heating equipment and as the cost for two suitable box stoves with the necessary pipes will not exceed \$50.00, I suggest that the necessary authority be obtained from the Indian Department for their purchase. I have taken this matter up with the school authorities and they are agreeable to have stoves in place of steam heating.

With the near approach of winter an early reply would be appreciated.

Your obedient servant,

C.M. Attwood,

District Chief Engineer.

OTTAWA, ONT. October 23rd, 1925.

Mr. C.H. Attwood, the engineer of this branch
in charge of the work being performed for your department,
in connection with the power development at McIntosh Indian
school, has submitted the following accounts in triplicate
for payment:-

Canadian Fairbanks Morse Company Limited	\$407.76
Sumford Midland Limited	103.85
Dodge Manufacturing Company of Canada, Limited	276.51

As will be noted from an examination of these
accounts, they cover the supply of pipes, fittings, belting,
shafting and pulleys necessary in connection with the instal-
lation.

These accounts have been certified as to the
receipt of the goods and the fairness of the prices. Mr.
Attwood also advises me that the charges represent the
lowest competitive prices quoted for this material.

Provided that the accounts meet with your
approval, will you kindly arrange for the issue of the
necessary cheques in payment therefor.

Dominion Water Power and Reclamation Service

File No. B-4995-M.

Ref. 73752 W.

Winnipeg, Man., December 12th, 1925.

Sir:-

Enclosed you will please find invoices in quadruplicate from the Canadian Fairbanks Morse Company Limited for \$142.93 for certain pipes and fittings for the McIntosh Indian School water supply system. A credit slip for \$10.63, for one three-inch angle valve, purchased from the Canadian Fairbanks Morse Company on August 26th, which has since been returned, is attached. With this credit slip deducted, the amount due the company is, as shown on the invoice, \$132.30.

These pipes and fittings have been purchased to avoid the necessity of changing the connections on the water pressure tank to make it suitable to place in a vertical position. The matter has been taken up with the Lay Brothers and they suggested that the pressure tank be placed in a root house which they are building adjacent to the school. By doing this, the connections on the tank can be left as they are as it is intended to place the tank in a horizontal position. As the cost of changing the connections would run somewhat over \$100.00 and as the Lay Brothers prefer to have the tank in the root house, it was decided to follow their suggestion as the additional expense incurred only amounts to a little over \$30.00.

Your obedient servant,

J. H. Attwood,

District Chief Engineer.

DOMINION WATER POWER AND RECLAMATION SERVICE

Winnipeg, Man.
January 16, 1926.

Re McIntosh Indian School
Power Development.

In connection with the contract awarded to Mr. J.H. Simmons for the construction of the hydro-electric plant at McIntosh, and which is now nearing completion, the school officials are very anxious that the balance of the work be left until next spring. The work still remaining to be done by the contractor comprises a small amount of back-filling at the dam, power house and water mains, painting of the power house, connecting up the penstock to the steel thimbles in the dam and wheel pit and removing the tail-race cofferdam.

They state the following reasons for the remaining work being left until next spring:

- (1) That the plant, if completed, would result from ice during the winter months if the plant were completed.
- (2) That the power house cannot properly be painted during cold weather.
- (3) That the remaining back-filling cannot be done as well in the winter as in the spring.

With reference to the school officials decision not to complete the plant until spring there would, I think, be considerable damage to the plant being damaged by ice, if completed at the present time. With reference to the painting of the power house, back-filling, there is no question that this work cannot be properly done during the cold weather.

Mr. Simmons was authorized to start this work on August 24th, 1925, and, according to the contract, was to have it completed on or before October 31st. Owing to one thing and another, but principally to the lack of proper supervision by the contractor, the work has been dragging along in a very disappointing manner, in spite of repeated instructions, both verbal and written, by Mr. Craig and myself urging the contractor to speed up the work, both for his own sake as well as the sake of the school officials. There being no penalty clause in the contract, however, little notice was taken of these requests, as practically no improvement took place in the methods of handling the work.

The Director,
Dominion Water Power and Reclamation Service,
Department of the Interior,
Ottawa.

Indian Affairs. (RG 10, Volume 6221, file 172-16, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

As stated above, the school officials are very anxious that all of the remaining work should be left over until spring, and to this end a meeting was arranged in this office with Brother Eugene, representing Rev. Father Beys, and the contractor, Mr. J.L. Simmons. It was pointed out that the Department of Indian Affairs might prefer to have the work finished up before the end of the fiscal year, that the money was now voted and that otherwise it would be necessary to place an amount in the estimates and ask for a revote next year. At this meeting Brother Eugene and Mr. Simmons estimated that the cost of completing the contract would be approximately \$300.00, and Brother Eugene agreed, if the work was left over until spring, to complete it for that amount.

To overcome the necessity of asking for a portion of any portion of this contract, and in order to meet the wishes of the school authorities that the work be left over until spring, it is suggested that the sum of \$500.00 be deducted from the contract price of \$5500.00 and be paid to the school authorities before the end of the fiscal year, they on their part agreeing to complete the unfinished work for this sum. As the work already completed, such as the penstock, wheel-pit, etc., would not be tested until spring, Mr. Simmons is willing to have this deposit cheque of \$500.00 held as a bond until such time as the work is tested and accepted by me. A written agreement would, of course, be secured from both the school officials and the contractor. It might also be stated that Mr. Simmons is quite agreeable to the proposal and would like to see it adopted, if possible.

The work yet to be done is of such a nature that it can be done by the Lay Brothers equally as well as by the contractor and entirely to the satisfaction of the school authorities. If the Department of Indian Affairs is willing for the payment of \$300.00 to the school officials at the completion of the contract, it is actually finished and the final payments to the contractor as per the suggestion outlined above, I feel certain that the work will be completed to the entire satisfaction of the school authorities and the Department. Holding the contractor's cheque for \$500.00 will, I think, be ample security for the Department, as a bond, that the work already performed by the contractor has been satisfactory.

It might be pointed out that the school officials have been put to extra work and expense due to the delay on the part of the contractor and are very anxious to see him off the job and finish what work there is to do themselves.

Yours very truly,
servant,

J. M. Attwood,
Chief Engineer.

In further reference to your letter of the 13th instant I enclose herewith copy of a letter received from Mr. Attwood, our District Chief Engineer at Winnipeg, with reference to the completion of the hydro-electric plant at the McIntosh Indian school. He recommends that no more work should be done at the present time owing to winter conditions and that the small amount of work which still remains to be done should be done out by the Lay Brothers, instead of by the tractor, for which purpose the sum of \$300. estimated as sufficient to complete the work deducted from the contractor's price of \$550.00 and paid to the school authorities before the close of the present fiscal year, they on their part agreeing to complete the unfinished work at this sum.

Mr. Simmons, the contractor, is willing to have his deposit cheque of \$500. held as a bond until such time as the work is tested and accepted by our District Chief Engineer, a written agreement to be secured from both the school officials and the contractor to cover this arrangement.

I beg to recommend that this arrangement be adopted and will be glad to receive your approval and instructions with regard thereto.

THE CANADIAN FAIRBANKS-MORSE CO., LIMITED

40 TO 50 PRINCE STREET

WINNIPEG, January 26, 1926

The Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

We are returning herewith the invoices and credit notes which you recently forwarded to us as same have now served our purpose.

We are also enclosing our cheque for \$4.74 covering the item of freight which you added to the invoice dated November 4th - \$244.05. This freight was included in the invoice dated November 4th for \$116.41 and was paid in a cheque for \$123.65 which we received either from Ottawa or from the McIntosh Indian School on December 9th, 1925. The reason for this is that both these shipments were made at the same time and the freight was billed to us in one amount and was therefore included in one of the invoices.

We trust this will straighten the matter out satisfactorily.

Yours truly,

THE CANADIAN FAIRBANKS-MORSE CO., LIMITED.

Ottawa, Feb. 6, 1945.

Sir,

1801
In reply to communication received of your letter of the 17th instant, enclosing with a copy of a report sent you by Mr. J. H. Brown, Director of the Department of Indian Affairs, enclosing part of the program of the work on the Indian Education project which has been carried out during the last Indian Educational year.

With reference to the suggestion made by Mr. Brown, that possibly the balance of the work to the Department, to assist the balance of the work to the Department, I beg to say that the Department has no objection to an amendment of this kind being made on the condition that the amendment will serve to reduce the total responsibility of the Department for this work, and that the amendment is made and the work accepted by an officer of your level.

It should be understood that the existing financial charges, according to the usual, will be reduced as far as possible when the work is taken over and accepted by this Department.

Very cordially yours,

J. H. Brown.

Director of Indian Affairs.

DOMINION WATER POWER AND RECLAMATION SERVICE

WINNIPEG, MAN. February 10th, 1926.

Re - McIntosh Indian School Hydro-
Electric and Water Supply
Installations.

On August 24th, 1925, a contract for completing the hydro-electric and water supply plant at the McIntosh Indian School was awarded to Mr. Simons. Previous to this, part of the dam had been built and all the equipment purchased, with the exception of the shafting and pulleys, electric switch-board and wiring, pipes and fittings, etc. The contract awarded to Mr. Simons comprised the

Completion of the dam.
building the power house.
Laying the penstock.
Laying the water supply system from
the power house to the school.
Poles for power line to school building.

Though the contractor started the work during the last week of August progress was exceedingly slow, with the result that after five months the following items still remain to be done:-

Connecting up of the penstock to the
dam and power house.
Removal of the tailrace cofferdam.
A certain amount of back-filling.
Painting of the building.

The main cause of this delay was the lack of proper supervision by the contractor, together with the fact that the contract contained no penalty clause for non-completion on the specified date, October 31st. Though the contractor was instructed a number of times, both verbally and by letter, to make better progress, very little improvement in the handling of the work took place.

With reference to the completion of the remaining work to be done under Mr. Simons' contract, a suggestion put forth by the Lay Brothers, to leave this work until spring has been taken up by me in my letter of January 16th.

The installing of the machinery, shafting, etc., is not included in the general contract, as by an arrangement with the Lay Brothers this work is to be done by under their supervision. The contractor, however, was to

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

supply as an extra any unskilled labor required for the installation of the machinery. To date all the heavy machinery has been installed. There only remains the setting of the shafting, switch board, electric wiring, etc., and in view of the fact that the school officials have decided not to operate the plant until spring, the work of installing this equipment will naturally be carried on at their convenience.

The cost to date and the estimated amount necessary to finish the work are shown on the attached sheets. The items shown under the heading "Paid by Department of Indian Affairs" are those of which we have record in this office. Possibly other payments have been made of which we have no record, but in that case those amounts are shown under the heading "Amount Needed to Complete Work".

In addition to the statement of cost there is also enclosed a copy of "Estimate of Cost" submitted with my letter of July 22nd.

97.1
I am in receipt of your statement of account, amounting to \$271.20 still due as payment for the furnishing of a water turbine at the McIntosh Indian Residential School. I am conferring to-day with the engineer who was in charge of the construction of this Hydro Electric Power Plant in order to find out whether the machinery has been satisfactorily tested. As soon as this information is received, payment of the balance above mentioned shall be given immediate consideration.

J. H. SIMMONS
GENERAL CONTRACTOR

ESTIMATES FURNISHED

506 CONFEDERATION LIFE BUILDING

WINNIPEG, MAN. March 1st. 1926.

C. H. Attwood, Esq.,
District Chief Engineer,
Dominion Water Power & Reclamation Service,
303 Chambers of Commerce,
Winnipeg, Man.

Dear Sir:-

On Friday last you informed me that the Department of Indian Affairs, in a letter dated February 6th, had no objection to me subletting to the Oblate Fathers the balance of the work yet to be done on the Hydro-Electric and Water supply installation at McIntosh upon the understanding that the subletting of the balance of the work does not release me from full responsibility for the satisfactory completion of the work, and further that my security deposit cheque of \$500.00 shall be retained as a guarantee until the work is tested and accepted. I agree to the above conditions.

On February 26th an agreement was entered into between the Oblate Fathers and myself whereby they agreed to complete the remaining portion of my contract to your satisfaction. It was mutually agreed that the sum of \$500.00 was sufficient to complete the work and I understand that this amount is to be deducted from the contract price and a certificate prepared covering the balance due under the contract.

As only one payment has been made on this contract I would appreciate having the certificate prepared and submitted to the Department of Indian Affairs at the earliest possible date.

Yours very truly,

J. H. Simmons

DOMINION WATER POWER AND RECLAMATION SERVICE

WINNIPEG, MAN.

February 26th 1926

It is hereby agreed between J. H. Simmons, Contractor for the construction of the hydro-electric development at McIntosh, Ontario, and the Oblate Fathers, that the contractor submits to the Oblate Fathers the balance of the work to be done under his contract with the Department of Indian Affairs dated August, 1925, to complete the said development, and the Oblate Fathers agree to complete the work to the satisfaction of the District Chief Engineer of the Dominion Water Power and Reclamation Service, resident at Winnipeg, Manitoba, on a actual cost plus a commission of \$30.00.

It is further agreed by the said parties that the cost for the completion of the said project from the time of Brother Eugene shall be 75 cents per hour; That of Brother [unclear] per hour. That the use of team shall be at a rate of 65 cents per hour

Ion Service.

will acknowledge your letter of Feb. 10, 1907, enclosing a copy of a letter dated Feb. 6th from the Department of Indian Affairs, in which they authorize Mr. Simmons to sublet the remaining portion of his contract, for the hydro-electric development and water supply installation for the McIntosh Indian School, to the Oblate Fathers.

Following this authorization, a contract was made between Mr. Simmons, the contractor, and the Oblate Fathers, representing the Oblate Fathers, when made for the subletting of this work. An agreement, signed by Father Beys, Superior for the Order for this district, is enclosed, together with a letter from Mr. Simmons to me, whereby he agrees to the prescribed conditions.

Mr. Simmons has completed an estimate of the work, which are enclosed.

I will note Mr. Simmons request that he be released from the contract at an early date, and that Mr. Simmons's security be retained by the Department. In view of the work, it is recommended that Mr. Simmons be released at an early date.

Your obedient servant,
J. H. [Name]
District Engineer.

Sir,

Your file number: 130-7-16.
Attention: Departmental Engineer.

I enclose herewith copy of a letter received from Mr. Attwood with reference to the subletting of the remaining portion of the contract for the hydro-electric development and water supply system for the McIntosh Indian school. Attached to that letter is a signed copy of the agreement between Mr. Simmons and Father Beys, for the completion of the remaining work by the Oblate Fathers; also a signed copy of a letter from Mr. Simmons to Mr. Attwood, whereby the former agrees to sublet the work under the prescribed conditions. In addition to these documents I also enclose certificate from Mr. Attwood covering the sum now due to Mr. Simmons on account of his contract, amounting to \$2787.33, with a detailed account of the work completed to date, and also Mr. Simmons' account for the completion of the septic tank, amounting to \$339.44, certified by Mr. Attwood. The septic tank was completed as a force account plus 10% of the cost as authorized in your letter of July 21 last.

I beg to recommend that Mr. Simmons should now be paid these two items, namely, \$2787.33 on account of his contract for the hydro-electric development and water supply, and \$339.44 for the completion of the septic tank.

Your obedient servant,

Mr. J.D. McLean,
Assistant Deputy and Secretary,

Dear Sir,-

I beg to refer you to your letter of the 22nd June last, No. 48103-W, and to request that you refer the same to Mr. Attwood. I may say that on the 16th we received from you a statement in connection in which it is shown that the sum of \$274.65 was expended out of the advance referred to. We should therefore have vouchers covering this expenditure and a refund of the unexpended balance.

Your file 130-7-16.

OTTAWA, ONT. May 28th, 1926.

I enclose herewith account, in triplicate,
for leather belting required in connection with the
power plant at the McIntosh Indian Residential School.
As stated verbally on the 10th instant, the belt
originally supplied was destroyed while the plant was
being tested, and it was accordingly necessary to buy
a new belt. We are advised by our District Chief
Engineer at Winnipeg that payment for this belting
should be made direct to The Beardsmore Belting Co. of
Toronto and not to their agents, Mumford Medland Limited
of Winnipeg.

Your obedient servant,

J. T. Johnston,
Director.

For I have received to the one hundredth
year of the birth of the late Sir John A. Macdonald,
the first Prime Minister of Canada, and in commemoration
of his services to the country, the Government of Canada
has decided to issue a postage stamp of one cent
value, bearing his portrait, and to place it in circulation
on the first day of the month of July, 1931.

In view of the importance of this stamp, it is
recommended that it be placed in circulation as early as possible.

Very respectfully,
J. A. Macdonald
Prime Minister of Canada

Dear Sir:-

RE: Your No. 120-7-16.

I am in receipt of yours of the 6th. inst. and in reply may say that I called on the District Chief Engineer of the Dominion Water Power and Reclamation Service, at Winnipeg and find that on March 4th. 1926 he forwarded to the Department at Ottawa the final estimate for the completion of the Septic Tank at McIntosh. This amounted to \$ 339.44.

I also find that Estimate No. 3 FINAL was forwarded to the Department on June 5th. 1926 for the sum of \$ 300.00 with the request that my Tender deposit be returned to me.

I understand that the District Chief Engineer is writing the Department today regarding this matter.

Dear Sir:-

RE: Your No 130-7-16

I am in receipt of yours of the 17th. and in reply may say that the office of the Dominion Water Power and Reclamation Service wrote their Department on the 9th. inst. and they phoned me that they had a reply stating that they had not received the Certificates from the Winnipeg office. The Winnipeg office said that they were forwarding duplicate Certificates to their Department.

No doubt you will hear from them in the near future.

Yours very truly.

J. H. SIMMONS.

Sir:-

Following the authorisation by the Department of Indian Affairs for the completion by Mr. Simmons' contract for the water power and water supply installation at the McIntosh Indian Residential School by the Oblate Fathers, an agreement between Mr. Simmons and the Oblate Fathers, dated February 26th, was forwarded to you with my letter of March 4th. Mr. Simmons' contract has now been completed according to the agreement, the work finally inspected and found satisfactory, and I therefore recommend payment to Mr. Simmons of the \$300.00 still due him on the contract, together with the return of his \$500.00 marked cheque which was left with the Department of Indian Affairs in lieu of a bond.

A letter from Father Beys certifying to the payment of monies due the Oblate Order from Mr. Simmons, as per the agreement, is enclosed, together with two copies of final estimate No. 3.

Your obedient servant,

C. H. Attwood,

District Chief Engineer.

Winnipeg, Man.,
August 16th, 1926.

Sir:-

This will acknowledge your letter of the 12th in which you state that my letter of June 5th, enclosing the final estimate for the hydro-electric and water supply systems of the McIntosh Indian School, has not been received. As requested I am enclosing copy of the letter, two final estimates and a letter and copy dated June 2nd from Father Beys certifying that the contract has been completed by the Oblate Fathers according to the agreement and that Mr. Simmons has paid the Oblate Fathers the actual cost of the work plus a commission of \$30.00.

As stated in the letter dated June 5th Mr. Simmons' contract for the hydro-electric and water supply installation has been satisfactorily completed and the final estimate which is enclosed is a certificate to that effect. You will also note that it is recommended that Mr. Simmons be paid the \$300.00 still due him on the contract, together with the return of his deposit cheque amounting to 10% of his original tender.

With reference to the last paragraph of your letter regarding the agreement between Mr. Simmons and the Oblate Fathers, the enclosed letter from Father Beys, Superior of the Order, furnishes the necessary certificate to which you refer.

In addition to the \$300.00 due Mr. Simmons and his deposit cheque, the \$339.44 for the completion of the Septic Tank also remains unpaid. As stated in my letter of August 9th a certificate for this last account was forwarded with my letter of March 4th and Mr. Laidlaw stated that he could not understand why this account at least had not been paid.

Your obedient servant,

C. H. Attwood,

District Chief Engineer,

Per (Sgd.) JOHN CRAIG.

FISHERIES.

Toronto 2, June 27th, 1927.

Dear Sir: -

The following letter has been received from
Mr. A. E. Fraser, District Warden at Port William.

"I beg to report that in connection with the
new Indian school that was built at McIntosh, a dam was
built on the south bay of Ojibway Lake, to dam up the
water for power purposes for this school.

In building this dam no fish-way was built to
enable the fish to go up, and it has been reported to me
that this Spring there were thousands of Pickerel unable to
get up to their proper spawning grounds on this account.

It is my opinion that this matter should be taken
up with the Indian Department at Ottawa, and arrangements made
for immediate construction of the fish-way, as otherwise, the
natural spawn of these fish will be wasted every Spring."

I would be glad to have your views concerning the
suggestion made.

Yours truly,

Deputy Minister of Game and Fisheries.

On hearing from Mr. J. E. Dunn, Inspector of Indian Agencies, a short time ago that there had been a fire in the McIntosh Indian School, Mr. Mooney, who was at Sioux Lookout at the time, was instructed to visit McIntosh and make a personal inspection of the power plant with special reference as to how satisfactory the water supply had been during the fire.

The fire, it appears, had occurred in the laundry of the school and before any extensive damage was done was got under control. The chemical fire extinguishers were used until the centrifugal pump could be started when more than a satisfactory supply of water was obtained which quickly put out the fire. Rev. Father Perrault, Principal of the school, stated that he was more than satisfied and that with the equipment a stream of water was easily thrown over the school buildings.

After appearing

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

From information obtained it appears that if this high water channel could be stopped by the construction of a small dam on the rock ledge at the narrow section of the channel. Mr. Mooney states that at this section the ground on the south side is quite high and that though on the north side there occurs muskeg the ground gradually rises. There would be a small area only that might be flooded by the construction of a dam at this point. With the channel 50' wide a timber crib earth filled dam about 60' high and 3' high would be sufficient to meet the requirements. It might be advisable to have the upstream side sheeted with rough lumber in order to stop any possible washing away of the earth fill.

As already stated, this channel had been previously filled with silt and completely overgrown with bush and even in the spring of last year when water was wasting over the dam 4" deep no leakage occurred through the dam.

Accompanying photographs show the channel, the narrow section at the dam, and the dam itself. It is suggested that the dam might be erected and used for hydro-electric development at the school.

Sir,

Your file number: 1307-16.
Re: McIntosh Indian School.

mol.

Enclosed herewith is a memorandum received from Mr. Attwood, our District Chief Engineer at Winnipeg, with reference to the hydro-electric development at the McIntosh Indian school. From this you will see that the power plant, together with the water and sewage systems, appears to be giving entire satisfaction and the only trouble that seems to have arisen is the opening up of an old high-water channel due to the exceptional high water this year. Mr. Attwood reports that the cost of putting in a small timber, earth-filled, crib dam at the narrow section of this channel should not be high and it would probably be advisable to have this work done so as to make the flow of water from the upper and lower lake available for the power development.

Mr. Attwood also recommends the painting of the wood stave penstock from the dam to the power house, with a suitable tar paint, and states that this painting should be done this year as soon as the high water has passed.

Sir,

I have the pleasure to acknowledge the receipt of your letter of the 14th of July, regarding the proposed construction of a road to the north of the Indian Reservation at the mouth of the River, and in reply to inform you that the same has been referred to the proper authorities for their consideration. I would appreciate it if you would furnish the Commission with an estimate of the cost of the proposed road to the north of the Indian Reservation, also an estimate of the cost of constructing a trail way in the same direction, and the fish to be up to their carrying capacity, which has been reported by the Commission and the Fisheries Department to be absolutely necessary.

Yours faithfully,

John D. McArthur,
Commissioner of the Fisheries and Forestry.

Very truly yours,
J. D. McArthur.

JC/S.

Your file 40103-W.R.

Dominion Water Power and Reclamation Service

Ref. 88935 W.

Winnipeg, Man., September 17th, 1927.

Sir:-

Replying to your letter of July 29th in which you request estimates of certain work at the McIntosh Indian school power development, enclosed you will please find two copies of Mr. Craig's memorandum in which is given estimates of cost of the different items.

With reference to the painting of the wood stove penstock, as Mr. Craig states, the applying of one coat of hot creosote oil followed by a coat of tar creosote paint follows the best practice for the preservation of wood pipe. As this pipe had no preserving material applied at the time of installation it would be advisable to have this work done at a fairly early date.

The damming of the high water channel does not appear to be, with the present power needs of the school, a very urgent affair. Even with a head of less than 13½ feet the power available would be in my opinion sufficient to supply the present school needs, and unless an exceptionally dry season occurs there should not be any serious shortage of power. If the Department of Indian Affairs, however, decide to have this work done at an early date the estimate given in Mr. Craig's memorandum for the building of this dam should cover the cost of construction.

Natural conditions at the McIntosh Indian school are such that a fish ladder to be satisfactory, will have to extend from the dam at the outlet of Forest lake down to Canyon lake, this being some 400 feet long. It might therefore be advisable for the Department of Indian Affairs to again take up with the Ontario Department of Fisheries the matter of installing a fish ladder between the two lakes. As Mr. Craig points out no provision had previously been made in the old lumber dam which had been in place before the present installation and it is doubtful whether many fish were ever able, for a great number of years, to pass from Canyon to Forest lake. In view of the above the Ontario Department of Fisheries might reconsider their decision as to the necessity of installing a fish ladder at this point.

Your obedient servant,

C. H. Attwood,

District Chief Engineer.

- Mr. Attwood -

Re: McIntosh Indian
Residential School.

A memorandum dated July 5th was forwarded to Ottawa re McIntosh Indian School power and water installation in which was recommended the painting of the 36-inch woodstave penstock and the damming of an old high water channel between Forest and Canyon lakes. This channel was overgrown with trees and bush and filled with silt. The exceptionally high stage this summer of Forest lake was sufficiently high to start water flowing over the top of this natural dam of silt and eventually swept it away with the result that a considerable amount of water is flowing through this channel into Canyon lake. As the control of the channel is about one and a half feet below the spillway level of the dam the storage on Forest lake will be lowered by this amount.

In reply to this memorandum the Department of Indian Affairs requested that estimates of cost be furnished covering the work recommended and also an estimate of the cost of constructing a fish-way in the dam to allow the fish to go up to their spawning grounds. This fish-ladder the Department stated has been reported by the Provincial Game and Fisheries Department to be absolutely necessary.

Below is given an estimate of cost of the above items:-

Painting 36-inch Wood-Stave Penstock.

This work comprises the painting for preservative purposes of the 36-inch wood-stave penstock running from the dam to the power house. It is proposed to apply one coat of hot creosote oil and after sufficient time has elapsed to allow the more volatile oils to evaporate to apply one coat of a tar creosote paint prepared by the Sherwin-Williams Paint Company and sold under the trade name of "Ebonal". This treatment of hot oil and then painting with a tar-creosote paint follows the best practice for this class of work and it should be good for the next five to eight years, when the penstock should again be similarly treated.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The estimated cost is as follows:

16 gals. creosote oil @ 80¢ ...	\$12.80
18 gals. Ebonal Point @ \$1.60 .	28.80
Labor & Brushes	50.00
	<u>\$ 91.60</u>

It is recommended that this work be done at an early date.

Damming High Water Channel.

In the former memorandum it is suggested that the high water channel could be stopped by the building of a small dam some sixty feet long on the rock ledge at the narrow section of the channel. This was based on the short inspection made by Mr. Mooney at the time of his first visit. Following the request for an estimate of this work a survey was made which shows that in order to avoid excessive flooding the most suitable location for the dam is a short distance below the entrance from Forest lake, as shown on the accompanying plan.

The dam proposed is a clay filled timber dam, two and a half feet maximum height and some 200 feet long. As there is an abundance of timber at the site and suitable clay available the type of dam proposed is, under the circumstances, the cheapest in cost.

As shown on the accompanying plan the dam consists of two rows of upright timbers driven firmly in the ground, against which are fastened horizontal timbers. The space between these is then filled with clay. In the following estimate of cost it is assumed that the work is carried on under the supervision of Brother Adolph, now resident at the school. It is also considered that the work should be completed in two weeks.

Foreman - Bro. Adolph - 12 days @ \$7.00	-	\$ 84.00
1 lumber man - 12 days @ 5.00	-	60.00
5 Indians - 12 days @ 20.00	-	240.00
Tools, spikes, etc.	-	100.00

In view of the present power requirements of the school the need of stopping the flow through this high water channel is not considered immediately pressing. As stated above, the control of the high water channel is 110.5 which, with the spillway elevation at 112.0 will reduce the head from fifteen to thirteen and a half feet and the storage capacity one and one half feet. Even with this reduction in head and storage the power available is in excess of the present power demands and unless there is an exceptionally dry season it is not probable that the school will suffer from any shortage of power.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

- 3 -

Fish Ladder.

To install a fish ladder at the McIntosh dam that will enable the fish to pass from Canyon to Forest lake will be quite expensive. The distance between the two lakes is some 400 feet; the channel connecting them being a flat rock from 70 to 100 feet in width. In a channel of this nature practically no pools occur throughout its length and it will be necessary therefore to connect the lakes by means of a fish ladder some 400 feet long. This ladder would run from the spillway of the dam at the outlet of Forest lake down the right side of the penstock to Canyon lake. It is estimated that such a ladder, three feet wide and some 400 feet long, with the necessary chambers and baffle boards, will cost between \$1,500. and \$2,000.

In view of the high cost of installation at this development it might be advisable for the Department of Indian Affairs to again take up with the Ontario Department of Fisheries the necessity of a fish ladder between these lakes. It might be pointed out that before the present dam was built there was an old rock filled timber dam at the outlet of Forest lake with a log chute running from the dam to Canyon lake. This chute was some 300 feet long with a high gradient, the water flowing through the chute at a high velocity. No channel other than the chute was provided and with the high velocity of the water and with a smooth stretch of 300 feet it is doubtful if many fish were able to pass from Canyon to Forest lake by means of it.

Possibly the Ontario Department of Fisheries could suggest a cheaper installation than the one outlined above. In any case it will be advisable that plans of the type of fish ladder approved by the Ontario officials be obtained.

John Craig.
District Chief Engineer.

OBLATES OF MARY IMMACULATE NOV 21 1927

Bureau: University of Ottawa

Ottawa, Canada, November 19th, 1927

Attention of the Engineer

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

Dear Sir:-

I wish to call your attention to the necessity of erecting a small dam at some point of the lake supplying water for power purposes to McIntosh Residential School.

At this special point water is forcing its way so that the level of the lake will certainly be lowered.

Kindly give this matter your prompt attention as it is an urgent case.

Yours truly,

Joseph F. J. O'M.

Referring to Father Guy's communication of the 19th instant, concerning the advisability of erecting a small dam to protect the Hydro Electric power plant at the McIntosh Indian Residential School, at McIntosh, Ont., I beg to say that this matter was discussed with me here, and I would suggest that this dam be constructed as early as possible. Before making any recommendation to the Deputy Minister I should like to be advised whether there are funds available to the extent of approximately \$1,000. If so, I shall communicate with the Principal of the School to find out whether they would be prepared to undertake the work themselves without outside engineer supervision.

Department of Indian Affairs

Ottawa, 21st August 1924

Sir, -

Your ref. No. 9763

As previously understood it is of course expected that permission will be granted to the Department to use the small water power on the stream connecting Forest and Canyon Lakes. The Department of course does not propose any particular development at this point as power is required merely for local use in connection with the school, such as lighting, water supply, pump etc. A report on this power has been made by C.H. Attwood, Chief Engineer of the Dominion Water Power Branch, Department of the Interior. For your information I submit the following extract from his report, -

Possible Power

Under the maximum regulated head of 17 feet and the estimated low-water flow of 14 c.f.s. the power available at the site is 22 h.p. By the use of the storage, however, it is estimated that the minimum flow may be increased to 25 c.f.s., although the head will be decreased as the storage is used until it is 14 feet. Under these conditions the estimated minimum power available is 32 h.p.

Use of Power.

The amount of power available is sufficient only for small local uses such as lighting, pumping for water supply, sawing wood, etc. There is at present no market at the site, but it is proposed to establish there a small Indian mission-school, for the purpose of which the power could be very advantageously employed.

Your obedient servant

(J.D. McLean)

SURVEYS BRANCH

Toronto (5) July 4th, 1928.

Dear Sir,-

A complaint has been received in this Department that owing to the construction of the dam on the lands vested in your Department for Indian School purposes, near McIntosh, the shores of Forest, Whitney, Indian, Alexander and Boulder Lakes have been flooded, and in consequence has destroyed the beauty of the Lakes and possibly, the fishing therein.

I would be glad if you would look into this matter and advise me what there is in this complaint. You will recall that permission was given your Department for the construction of the dam to use natural water power at the outlet of Forest Lake, for domestic purposes in connection with the Indian School, but it was not anticipated that this dam would have any effect on the levels of the Lakes above.

Yours truly,

J. D. McLean, Esq.,

Re Alleged Flooding on Forest,
Itney, Indian, Alexander
and Boulder Lakes.

[illegible]

Prior to the construction of the dam at the outlet of Forest lake the water level of these several lakes was about elevation 107.0 (assumed elevation) with a maximum flood elevation of 108.5. With the construction of the dam the water level has been raised to 109.0. The flood line of 1927 was above the present flood line. In 1927 the water level rose to 110.0. The water level of this year the water level was 111.0. The water level of 1928 was 112.0. The water level of 1929 was 113.0. The water level of 1930 was 114.0. The water level of 1931 was 115.0. The water level of 1932 was 116.0. The water level of 1933 was 117.0. The water level of 1934 was 118.0. The water level of 1935 was 119.0. The water level of 1936 was 120.0. The water level of 1937 was 121.0. The water level of 1938 was 122.0. The water level of 1939 was 123.0. The water level of 1940 was 124.0. The water level of 1941 was 125.0. The water level of 1942 was 126.0. The water level of 1943 was 127.0. The water level of 1944 was 128.0. The water level of 1945 was 129.0. The water level of 1946 was 130.0. The water level of 1947 was 131.0. The water level of 1948 was 132.0. The water level of 1949 was 133.0. The water level of 1950 was 134.0. The water level of 1951 was 135.0. The water level of 1952 was 136.0. The water level of 1953 was 137.0. The water level of 1954 was 138.0. The water level of 1955 was 139.0. The water level of 1956 was 140.0. The water level of 1957 was 141.0. The water level of 1958 was 142.0. The water level of 1959 was 143.0. The water level of 1960 was 144.0. The water level of 1961 was 145.0. The water level of 1962 was 146.0. The water level of 1963 was 147.0. The water level of 1964 was 148.0. The water level of 1965 was 149.0. The water level of 1966 was 150.0. The water level of 1967 was 151.0. The water level of 1968 was 152.0. The water level of 1969 was 153.0. The water level of 1970 was 154.0. The water level of 1971 was 155.0. The water level of 1972 was 156.0. The water level of 1973 was 157.0. The water level of 1974 was 158.0. The water level of 1975 was 159.0. The water level of 1976 was 160.0. The water level of 1977 was 161.0. The water level of 1978 was 162.0. The water level of 1979 was 163.0. The water level of 1980 was 164.0. The water level of 1981 was 165.0. The water level of 1982 was 166.0. The water level of 1983 was 167.0. The water level of 1984 was 168.0. The water level of 1985 was 169.0. The water level of 1986 was 170.0. The water level of 1987 was 171.0. The water level of 1988 was 172.0. The water level of 1989 was 173.0. The water level of 1990 was 174.0. The water level of 1991 was 175.0. The water level of 1992 was 176.0. The water level of 1993 was 177.0. The water level of 1994 was 178.0. The water level of 1995 was 179.0. The water level of 1996 was 180.0. The water level of 1997 was 181.0. The water level of 1998 was 182.0. The water level of 1999 was 183.0. The water level of 2000 was 184.0. The water level of 2001 was 185.0. The water level of 2002 was 186.0. The water level of 2003 was 187.0. The water level of 2004 was 188.0. The water level of 2005 was 189.0. The water level of 2006 was 190.0. The water level of 2007 was 191.0. The water level of 2008 was 192.0. The water level of 2009 was 193.0. The water level of 2010 was 194.0. The water level of 2011 was 195.0. The water level of 2012 was 196.0. The water level of 2013 was 197.0. The water level of 2014 was 198.0. The water level of 2015 was 199.0. The water level of 2016 was 200.0. The water level of 2017 was 201.0. The water level of 2018 was 202.0. The water level of 2019 was 203.0. The water level of 2020 was 204.0.

There is no land bordering these lakes in private ownership and there is only one camp on the lakes, this being the property of Mr. Charles Byrnes of Winnipeg, but Mr. Byrnes has no title to the land where his camp was. Mr. Byrnes was questioned by the writer and was quite emphatic on the following points relating to the increased lake level.

- 1 - No individual, other than himself, had any interest from the campers' viewpoint in these lakes, he was not complaining and had made no complaints, although he had been forced to move his camp to higher ground, clear the killed timber from the shore and was put to considerable expense with docks.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

- 2 - Fishing was not adversely affected by the increased level of the lakes, the fishing has been getting poorer and poorer for the past ten years due to the permitting of commercial fishing at times in these lakes.
- 3 - These lakes have very little scenic value and are not favorable for campers so that flooding of the old shore line adversely affects no one.

The writer believes that any complaints made to the Ontario Government come from a few campers on Canyon Lake, which lake lies a mile below the dam at the outlet of Forest Lake. These campers did not take kindly to the establishment of an Indian School in the vicinity. For years these campers have seen the fishing getting poorer and poorer until today fishing on Canyon Lake is practically finished. These campers, principally from Winnipeg, have blamed all their ills on the establishment of the Indian School and also to the construction of the dam. This department is not concerned whether the school attracts the parents of the Indian children to the district, whether the Indians are fishing with nets and killing all the game in the district. The school was established with the permission of the Ontario Government and that Government has its own laws governing the protection of game and fish.

" The dam at the outlet of Forest Lake was built without a fish ladder. However, during the open water seasons of 1927 and 1928 there has been a natural outflow channel from Forest Lake which gives fish free access from Canyon Lake to the lakes above. This channel will probably be closed in the next year or so, but even so, it would not appear necessary to go to the great expense involved in placing a fish ladder in the dam in order to permit suckers to reach the lakes above since there are practically no other fish left in Canyon Lake. //

Dominion Water Power and Reclamation Service

Winnipeg, Man.

August 8th, 1928.

Sir:-

With reference to your letter of July 12th, requesting that an investigation be made of the alleged flooding on the shores of Forest, Whitney, Indian, Alexander and Boulder lakes due to the construction of the dam by the Department of Indian Affairs at the outlet of Forest Lake, Mr. Gow made the necessary inspection on August 3rd and 4th and I am enclosing a memorandum prepared by Mr. Gow dealing with the matter.

In Mr. Rorke's letter to the Department of Indian Affairs it is noted that he says that permission was granted to use the natural water power at the outlet of Forest lake but it was not anticipated that this dam would have any effect on the levels of the lakes above.

That was not our understanding of the situation at the time surveys were being made as all reports and plans prepared here called for several feet of storage on all these upper lakes. Would it not be possible to obtain a copy of the correspondence covering the granting of these power privileges to the Department of Indian Affairs by the Ontario Government.

Your obedient servant,

C. H. Attwood.

District Chief Engineer.

Ottawa, 6th September 1928

Memorandum

Vr. *[Signature]*

Our permission for development of this power is, as far as I can see, as stated in Mr. Rorke's letter of the 4th July 1928, only for domestic purposes. The power coming within the limit of the ~~limit of the~~ *[illegible]*. Even this permission is I think only by inference as we stated we wished to develop it for domestic purposes only in our application for the land.

Our letter of 21st Aug. 1924, file 130-7-9, and Department of Lands and Forests reply dated Sept. 5th 1924, states no reason why sale should not be carried out and can be held as completing sale with permission to develop for domestic purposes. We informed him in letter of 21 Aug. 1924 of the estimated minimum head of 32 H.P.

I think it would have been the proper procedure when it was decided to make the construction recommended in the Water Powers Branch report, that this development should, before its construction was undertaken, have the official approval of the Provincial Department of Lands and Forests.

Dear Father Perreault:

I have your telegram of the 21st instant, with reference to clearing rocks out of the culvert at the railway track near the McIntosh Indian Residential School. I am enclosing, for your information, a copy of my letter of today's date to the Vice-President of the Canadian National Railways.

Yours very truly,

Duncan C. Scott

Dear Mr. Hungerford:

I wish to refer to your letter of April 9, 1920, addressed to the Minister of the Department of Indian Affairs and Northern Development. I am sorry in regard to a telegram from the Principal of the Indian Residential School at McIntosh, saying that immediate steps be taken to make it possible to get through the railway culvert with building material and other supplies that are much needed. Would you please let me know, by telegram, if you could advise with your division whether or not it is to have this material shipped at once. The question of expediting this work at this Department's expense is receiving consideration.

Yours very truly,

Duncan C. Scott

J. M. Ferrier
Superintendent Indian Education

Dear Sir:-

The interest you take to all that tends to the
program of our School leads me to present you a new request.

We are in need of a pasture ground for our cattles;
for this purpose, I beg of you to authorize me to do the work
this fall, to do the clearing of a few acres. I reckon I could
have the clearing done for \$35.00 per acre by the Indians,
who are at present in great necessity.

I hope you will grant us the new favour.

Thanking you in anticipation,

I remain,

Yours truly

C. P. Macdonald

Principal

Reverend Sir:

I have your letter of the 18th instant, with reference to the ~~letter of the 18th instant~~ at the ~~Indian Residential School~~. I am glad to hear of your success and that the work will be done by Indians.

In reply, the Department is pleased to authorize an expenditure of \$100 for this purpose. Under separate cover, there is being mailed to you a cheque for this amount and a copy of letter referred to. The original should be kept in duplicate and forwarded to the Department for approval. They should be signed, in duplicate, by the Indians you engage, in the presence of a witness. If all the funds are not used, you should return the balance to the Department immediately the work you undertake is completed.

Your obedient servant,

J. D.

J. D. McLean,
Asst. Deputy & Secretary.

Ottawa, October 5, 1928.

Reverend Sir:

With reference to your telegram of the 21st instant and the letter from the C.N.R. of the following date, I have now to inform you that the C.N.R. has advised the Department a certain amount of blasting will be necessary. This might result in interference to movement of trains, and the railway company is desirous of postponing the work until the present heavy grain movement is over. I understand that it will cost less to do the work when the ice has gone, and, in view of the report from the C.N.R., I believe the work should not be undertaken until the spring. This will give the Department an opportunity to secure an appropriation of Parliament for the purpose. I am advised that it will cost at least \$3,000 to provide a channel 4 ft. deep and 10 ft. wide.

I regret that it will be difficult for you to get in your materials, but I am quite hopeful that, next spring, the work can be undertaken and you will not be inconvenienced in this way in future.

Your obedient servant.

October 6, 1923.

Sir,

You will remember that on July 4 last you wrote to the Department of Indian Affairs regarding complaints received in your department as to injury alleged to have been caused along the shores of Forest, Whitney, Indian, Alexander and Boulder lakes, due to the construction of a dam by the Department of Indian Affairs at the outlet of Forest lake. This letter was referred to this department for attention and on July 12 I wrote you stating that Mr. Attwood, our District Chief Engineer, at Winnipeg, had been asked to make an investigation of the matter and submit a report. This report, prepared by Mr. Attwood's chief assistant, has been received and a copy is enclosed herewith. This report states that there is no land bordering the lakes in question which is in private ownership and hence is only and only on the lakes affected by the raising of the water level, the owner of which makes no complaint of material injury.

Since receiving this report I have also seen the correspondence between the Department of Indian Affairs and the Department of Lands and Forests at Toronto regarding the purchase of land for the school site and the references made to the development of water-power in connection therewith. Amongst this correspondence there is a letter from Mr. McLean, Assistant Deputy and Secretary of the Department of Indian Affairs dated August 21, 1924, which quotes some extracts from the report prepared by Mr. Attwood at the request of the Indian Department on the proposed scheme for the development of water-power at the outlet of Forest lake. The extracts show that it was intended to raise the level to some extent and so obtain a certain amount of storage to provide dependable power. Mr. Kain replied to this letter on September 5 of the same year in which it is stated that there seems now to be no reason why a sale of the land referred to should not be carried out to the Indian Department for the purposes of the Indian school, which seems to imply that the scheme proposed in Mr. McLean's letter of August 21 had been sanctioned by your department.

Mr. Attwood in further correspondence which we have had with him states that it was his understanding at the time surveys were made that a certain amount of storage on all these upper lakes, these being the plans referred to in Mr. McLean's letter of August 21, 1924.

Mr. L.V. Rorke,

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Mr. Attwood further writes in regard to this matter -

"Many years before the school and power plant was built at McIntosh there had existed a dam and log chute at the outlet of Forest lake. This dam raised the level of Forest lake and the adjoining lakes some two or three feet or more above its natural level for the purpose of creating storage and having water available for the log drive and passing the logs from Forest to Canyon lake. In other words this old log dam raised the water level of Forest and adjoining lakes above natural conditions. In building the dam we raised the water very little above the previous levels.

The power site would be of little or no use without some measure of storage. The storage and lake levels now maintained does not damage private property on any of the lakes above and only damages a small fringe of timber at places around the lakes. The school authorities could not afford to clear timber off the flooded area.

The Indian Department have invested a considerable sum of money at this point for the education and betterment of conditions among the Indians in the region. The Oblate Fathers are running the school and last winter there were in attendance between 100 and 125 pupils which were being trained and instructed with the ideals of a better livelihood by the Oblate Fathers. This is a cause that is worthy of support, but I happen to know that there are some persons in the district who are trying to raise as many difficulties as they possibly can for the school authorities."

From the foregoing explanation I think you will agree that the Indian Department in carrying out the power development has acted in good faith and has not gone beyond a reasonable interpretation of the permission given by your department. The power development is necessary for purposes of the school and is not being used in such a way as to materially affect any private interests.

Your obedient servant,

J. T. Johnston,
Director.

I have to acknowledge receipt of your letter of the 6th inst. giving me a review of the development of water power on a stream at the outlet of Forest Lake, and have noted the contents.

There was apparently an understanding on the part of the Indians that they would not develop this power for the purpose of raising water, that they would not build any dam which would hold the waters above high water and encroach on the shores of Forest Lake, and that they would not build any dam which would hold the waters above high water and encroach on the shores of Forest Lake.

No permission was ever granted or even implied to this effect, by this Department. No plans of said construction were ever submitted, and it was not until the construction of the dam at the outlet of Forest Lake was completed in that vicinity, that damage to the shore was resulting due to the raising of the waters in Forest Lake and other lakes, this became known.

There was an understanding at the time that the Department of Indian Affairs received a grant of the lands for school purposes, and that they might develop

MEMORANDUM

With reference to the contents of Indian Agent Edward's letter of the 22nd ultimo concerning the dynamo installed for the hydro electric power plant at the McIntosh Indian Residential School, I beg to say that this generator is a 17½ K. W. machine. The Principal may not be aware of this or else he is not in a position to ascertain whether it should be changed or not. The generator was purchased from an American manufacturer in 1925 at a cost of \$480.00. I would suggest that the Principal be asked to advise the Department the reason why he says the machine is overloaded, as it was first intended to provide a generator of only 10 K. W. hours.

I regret under the circumstances I am not in a position to recommend any changes in the present installation and I would advise you to obtain a report from a competent electrician if this is found necessary.

L. P. L. ENGINEER.

WATER POWER AND RECLAMATION SERVICE

April 30, 1929.

Sir:

Mr. Attwood, our District Chief Engineer at Winnipeg, has received a letter dated April 23 from the Principal of the Indian Residential School at McIntosh, Ontario, regarding the condition of the power dam operating in connection with the school in the following words,

"I beg to inform you that there is some clefts formed in the length of about 30 feet between the rock and base of our dam of the water power. I fear that if the water is left to penetrate any longer it will cause damages.

I hope you will see to this repair at earliest convenience."

It is not clear from this letter just where or how serious the trouble is at the dam, and Mr. Attwood suggests that an investigation should be made for that purpose. If you so approve, I shall be glad if you will give instructions to have this investigation made and a report prepared on the subject.

Your obedient servant,

J. T. Johnston,
Director.

Sir,

Your file number: 130-7-16.

I have received your letter of the 7th instant regarding the repairs to be made to the power dam in connection with the Indian residential school at McIntosh, Ontario, and note that this work is to be carried out under the supervision of the local Indian Agent. A copy of this letter has been sent to our District Engineer at Winnipeg for his information.

Your obedient servant,

J. T. Johnston,
Director.

Kenora, Ont.
May 23rd./29.

Sir:-

Referring to your letter 130-7-16 of the 2nd. inst. re. the McIntosh school with regard to the dynamo, the Principal informs me that the 17½ K.W. dynamo is in perfect condition. It is the small 3 K.W. one which is overloaded, and he wishes to have a 10 horse power one instead. This was explained to Mr. Ferrier by the Father Provincial in Winnipeg, and he approved.

Referring to your letter 130-7-5 of April 30th. the cost of burlap would be around \$45.00.

The Principal would like to receive an accountable cheque for clearing the land and painting the main building and would have the work proceeded with at once as he expects the Archbishop to visit the school June 11th. and would like to have the work done by then. He suggests that he purchase the paint and have the work done by day labour the bigger boys helping.

I would like you to send instructions direct to the Principal, and a copy to me, as I will be away paying Treaty.

Your obedient servant,

[Signature]

Indian Agent.

Toronto, May 28th, 1929.

Dear Sir:

I have received the application of your Department on behalf of the Indian Boarding school for a further area of land West of the township of Smellie, in the district of Kenora.

x

x

In my connection I would also refer you to a letter of the 4th July, 1928, regarding flooding of lands along the shores of Forest, Whitney, Indian, Alexander and Boulder Lakes, caused by the operation of the dam constructed to supply electrical energy at the school.

My information is that the Dominion Water Power Branch were authorized to construct this dam for power purposes without having the necessary permission and authority from this Department to raise the water levels as has been done, and a copy of my letter of the 13th October last to J. T. Johnston, Director of Dominion Water Power and Reclamation Service, Ottawa, was forwarded to you for information.

and the Inspector will be authorized to look into the condition when the dam is completed.

V. Horke.

LETTER, AND IN YOUR REPLY QUOTE
FILE NO. 40103-W.

DEPARTMENT OF THE INTERIOR
WATER POWER AND RECLAMATION SERVICE

OTTAWA, ONT.. June 5th, 1929.

Sir,

Your file number: 130-7-16.

Encl. With reference to your letter of May 7th regarding the condition of the power dam at the Indian residential school near McIntosh, I enclose herewith a memorandum received from Mr. Attwood, our District Chief Engineer at Winnipeg, relating to the condition of this dam, together with some photographs and a plan referred to in the memorandum.

The repair work necessary and the proposed method of carrying out these repairs are outlined in the memorandum. No estimates of the cost were included because the probable cost of the work depends so largely upon the success met with in lowering the forebay sufficiently to render unwatering a simple and inexpensive feature of the work. When unwatered a thorough examination will definitely reveal the extent of the works necessary. Mr. Attwood was asked to give some estimate as to the probable cost of the work and his reply is as follows:

"The unwatering of that section of the dam between station 1 + 20 and station 1 + 75 is comparatively simple even at present water elevations and will be inexpensive with forebay elevation at 109. The cost of repairs to this section of the dam should not exceed \$250.00.

With forebay elevation of 109 the unwatering of the log chute is accomplished and the unwatering of the sluiceway is greatly simplified. There is leakage through construction joints along the spillway and sluiceway sections and this seepage should be stopped. Repairs to this section of the dam should not exceed \$350.00, making a total of \$600.00 for the job.

The above mentioned sum of \$600.00 estimated to make the repairs outlined may be too low or excessive, depending upon circumstances as can only be ascertained upon unwatering. It is assumed that the school authorities will fully co-operate in the work by furnishing transport, some Indian labor, etc., for which they will be recompensed."

It is noted from your letter of May 7th that the local Indian Agent has been given the necessary authority to carry out the repairs required to this dam on a day labour basis, under the supervision of the Reverend Principal of the school. If, however, it is found desirable to have some engineering assistance in connection with this work, Mr. Attwood and his staff will be very glad to give any assistance which the Indian Department wish to secure.

Your obedient servant,

Mr. J.D. McLean,
Assistant Deputy and Secretary,
Department of Indian Affairs,
Ottawa.

Re: Repairs to Dam - McIntosh Indian School.

Referring to your letter of June 12th, respecting repairs to the dam at McIntosh, I note that the reply from the Department of Indian Affairs is to the effect that this work will be carried out by the Principal of the school and that the Department have written to him authorizing him to write to me when he considers engineering assistance is required.

This manner of having the work done is not at all satisfactory. The work is an engineering problem and should be carried out by and under the direct supervision of an engineer. Unless I can have the necessary authority to state how the work shall be done I cannot assume any responsibility for satisfactory repairs to the dam, nor any measure of control as to the cost of the work.

From experience, it would be better if the procedure suggested by the Department of Indian Affairs was reversed, that is, that responsibility for the repairs be placed with this office and the co-operation of the Principal of the school requested in having the work carried out.

Obedient servant,

(Sgd.) C. H. Attwood,
District Chief Engineer.

Sir:

I have your letter of the 21st instant, regarding the signal to the water tank at the Indian Industrial School. Your further explanation, I am convinced that the same should be placed under the direct supervision of your agent and that your Harriet Road Engineer's construction is quite correct. I am today writing the Hon. Principal of the School and the Indian Agent, informing them that your Harriet Road Engineer is being requested to give direct supervision and to control the work. The Hon. Principal is being instructed to cooperate freely and to carry out the orders of your representative. I should be grateful if you would immediately inform Mr. Adams and have him attend to the repairs of his excellent construction.

No person has any right to occupy Crown lands or construct a dam without obtaining (according to Statutes) the necessary permission from the Crown, as represented by this Department. I am assuming that the school authorities acted without the permission of your Department, but as the lands were vested for school purposes only, it is necessary that you be advised that action be taken to clean up the damage which has been done by flooding the shores of the lakes, and also that if it is necessary to maintain and operate a water power to this extent, a lease must be obtained from this Department for such purposes, under the usual terms.

Our Inspector also reports that the method of clearing land in the vicinity of the school has not been carried out very satisfactorily, that instead of culling the timber and making a park near the school, they have cut down all tree-growth, making an unsightly waste, probably in excess of fire protection requirements.

The land which is now being applied for contains one of the best stands of timber in that vicinity, about 50% Jackpine, and 10% Spruce, and the Inspector was informed that

RECEIVED
SURVEYS

Dear Sir:—
An Inspector from this Department has just returned from a trip of inspection, including the lands and the new application of your Department for further lands at McIntosh, in addition to those already acquired by Vesting Order, dated Jan., October 1924, and I regret to have to advise that conditions there are anything but satisfactory in respect to their development of water power.

It is found that they have raised the natural level of four or five lakes, at times 6 feet, 4 inches, above the natural normal level, - this without any authority or permission, and without any knowledge at this Department of what was taking place. The result is that some sixty miles of shore line is being damaged, by reason of the killing of the tree-growth all around the shores, and the drowning of the beaches, rendering the adjacent lands unsuitable for tourist purposes, and destroying the beauty of the lakes.

I may further add that the authorities of the school have constructed a dam at the outlet of Canon Lake, without ever requesting permission or authority from this Department so to do.

Re Repairs McIntosh Dam.

I made a personal inspection of the dam at McIntosh about a week ago and as a result have made the necessary arrangements for the repairs to the structure.

Before repairs can be undertaken it is necessary to draw down the water from the lake above a couple of feet and at the present time Mr. E. E. Wallace, the contractor, is taking out thousands of railway ties from the lakes above the dam and is sluicing them through the dam into Canyon Lake and thence to the railway. Mr. Wallace has requested that we not start to lower the lake before the 5th of August in order that he may have ample water to float his ties and sluice them through the dam. Rev. Father Perrault, Principal of the McIntosh School, also informs me that he will not be able to secure Indian laborers until about the middle of August, and under the circumstances a start cannot be made on the repairs much before September 1st.

While making an inspection of the dam I also made an inspection of the overflow channel to the west. The matter of blocking this channel was referred to you and to the Indian Department a year or so ago when Mr. Craig furnished a plan with suggested means for blocking the overflow on this channel.

With the water lowered next week the Department will never have a better opportunity to block this channel as cheaply as it can be done when the repairs to the dam are underway. In making an examination of this channel I have devised a much modified scheme to that suggested by Mr. Craig which in my opinion will be quite effective and cost considerably less. One of the objections to Mr. Craig's scheme was the securing of clay fill for the timber crib at reasonable cost. In my opinion clay fill is not necessary and a cut off can be made by a double row of wood sheeting supported on the ground by a log frame cut from the spruce lying right at the site. I estimate that the cost of the work will be \$200.00 for lumber and \$100.00 for labor, or approximately \$300.00 altogether, and I would like to have the authority of the Department of Indian Affairs to proceed with this work when repairs to the dam are underway.

Your obedient servant,

C. H. Attwood.

Sir:

Re Repairs McIntosh Dam.

In reply to your night letter of August 9th, the last sentence, Mr. Wallace is willing to open the log chute only and objects to opening the main sluices in the dam.

As it is quite necessary to lower the lake level in order to effect the repairs to the McIntosh dam at a minimum cost the delay occasioned in getting authority to lower the lake is going to prevent the lowering until towards the end of September and as I have no desire to carry on this concrete work under frost conditions it seems advisable that the repairs to the dam be deferred until next spring. This delay will also give the Department of Indian Affairs an opportunity to arrive at some agreement with the Ontario government regarding the lake levels and the regulation thereof.

Delaying the repairs to the dam until next spring will not in my opinion cause much inconvenience to the school authorities at McIntosh. The lake level could for protection purposes be very readily lowered to elevation 110 or 110.5 and still provide plenty of head and water for the operation of the power plant throughout the winter and under the circumstances I would suggest that the approval of the Department of Indian Affairs be obtained to postpone this work until next spring.

Your obedient servant,

Sgd. C.H. Attwood.
District Chief Engineer.

ALL CHEQUES AND MONEY
ORDERS ARE TO BE MADE PAY-
ABLE TO THE ORDER OF THE
"PROVINCIAL TREASURER OF
ONTARIO" AND MAILED TO THE
DEPUTY MINISTER OF GAME AND
FISHERIES.

Toronto 2, August 17th, 1929.

Dear Sirs. -

This Department has received a complaint which would appear to be well-founded to the effect that the dam constructed at McIntosh on the stream connecting Forest Lake and Canyon Lake is very detrimental to fish life in those waters.

We understand that this dam was constructed by the Water Powers Branch of the Department of the Interior for your Department and that it is maintained for supplying power for the Indian Mission located at that place. We are further advised that no fish ladder has been installed in accordance with the provisions of the Fisheries Act and that the absence of such fish ladder is the cause of conditions which are responsible for the present complaint.

Will you please advise as to the correctness of our information, in so far as it concerns those who were responsible for the construction of the dam and those who are responsible for its present maintenance. We would also like to know whether or not this dam is maintained for the purpose above set forth and if it is absolutely necessary that the same should be maintained. Can some provision for the construction of a fish ladder in connection thereof not be made in order that the provisions of the Fisheries Act in this respect will be complied with?

Yours truly,

Deputy Minister.

Re- filing correspondence pertaining to flooding damage caused by the dam at McIntosh School, I ascertained in the Records Branch that the correspondence which was changed from file-16 to File-9 had not been noted as changed in the Records. I thought, therefore, that for the meantime at least they might be returned to -16, which transfer I have made.

I have also placed on 150-7-16 extracts from several of our letters to the Province in 1924 which pertained to the water power. With reference to Mr. MacKenzie's memo of the 3rd instant on 150-7-16 regarding the Water Power Branch interviewing the Provincial Surveyor General, I may say that Mr. Barr of that Branch, who had the interview, is out of town but is expected back September 3rd. I will get in touch with him on the points mentioned in the interview.

Ottawa, September 5, 1929.

Dear Sir:

I have just had of the 17th instant, with reference to the dam that was constructed at McIntosh, to supply power for the Indian Residential School there. I may say that this institution was erected by the Department and is maintained by us for Indian educational purposes and that the dam is required for the supplying of light and power. With particular reference to a fish ladder, I wish to quote from the report of the Assistant District Chief Engineer of the Dominion Water Power and Reclamation Service:-

"The dam at the outlet of Forest Lake was built without a fish ladder. However, during the open water seasons of 1927 and 1928, there has been a natural outflow channel from Forest Lake which gives fish free access from Canyon Lake to the lakes above. This channel will probably be closed in the next year or so, but even so, it would not appear necessary to go to the great expense involved in providing a fish ladder at the dam in order to permit suckers to reach the lakes above since there are practically no other fish left in Canyon Lake."

Your obedient servant,

J. D. McLEAN

October 6, 1929.

Sir,

You will remember that on July 4 last you wrote to the Department of Indian Affairs regarding complaints received in your department as to injury alleged to have been caused along the shores of Forest, Whitney, Indian, Alexander and Boulder lakes, due to the construction of a dam by the Department of Indian Affairs at the outlet of Forest lake. This letter was referred to this department for attention and on July 12 I wrote you stating that Mr. Attwood, our District Chief Engineer, at Winnipeg, had been asked to make an investigation of the matter and submit a report. This report, prepared by Mr. Gow his chief assistant, has been received and a copy is enclosed herewith. This report states that there is no land bordering the lakes in question which is in private ownership and there is only one camp on the lakes affected by the raising of the water level, the owner of which makes no complaint of material injury.

Since receiving the letter from Mr. McLean, Assistant Deputy and Secretary of the Department of Indian Affairs dated August 21, 1924, which quotes some extracts from the report prepared by Mr. Attwood at the request of the Indian Department on the proposed scheme for the development of water-power at the outlet of Forest lake. The extracts show that it was intended to raise the level to some extent and so obtain a certain amount of storage to provide dependable power. Mr. Cain replied to this letter on September 5 of the same year in which it is stated that there seems now to be no reason for a sale of the land referred to should not be referred to the Department for the purposes of

Mr. Attwood in his report states that at the time surveys were made that flooding would necessarily be caused by the dam and his plans were prepared for storage on all these upper lakes, referred to in Mr. McLean's letter.

Mr. L.V. Burke,
Surveyor-General,
Department of Lands
Toronto, Ontario.

Indian Affairs. (R) 10, Volume 671, File 472-10, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Mr. Attwood further writes in regard to this matter -

"Many years before the school and power plant was built at McIntosh there had existed a dam and log chute at the outlet of Forest lake. This dam raised the level of Forest lake and the adjoining lakes some two or three feet or more above its natural level for the purpose of creating storage and having water available for the log drive and passing the logs from Forest to Canyon lake. In other words this old log dam raised the water level of Forest and adjoining lakes above natural conditions. In building the dam we raised the water very little above the previous levels.

The power site would be of little or no use without some measure of storage. The storage and lake levels now maintained does not damage private property on any of the lakes above and only damages - small fringe of timber at places around the lakes. The school authorities could not afford to clear timber off the flooded area.

The Indian Department have invested a considerable sum of money at this point for the education and betterment of conditions among the Indians in the region. The Oblate Fathers are running the school and last winter there were in attendance between 100 and 125 pupils which were being trained and instructed with the ideals of a better livelihood by the Oblate Fathers. This is a cause that is worthy of support, but I happen to know that there are some few individuals in the district who are trying to raise as many difficulties as they possibly can for the school authorities."

From the foregoing explanation I think you will agree that the Indian Department in carrying out the power development has acted in good faith and has not gone beyond a reasonable interpretation of the permission given by your department. The power development is necessary for purposes of the school and is not being used in such a way as to materially affect any private interest.

Your obedient servant,

J. T. Johnston,
Director.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

Summary of the Negotiations between the
Department of Indian Affairs and the
Ontario Department of Lands and Forests
for purchase of McIntosh School Site,
from material supplied by the Department
of Indian Affairs.

The first communication from the Ontario Government in the correspondence relative to the application by the Indian Department to purchase lands for the McIntosh Indian residential school which mentions the water-power appears to be that of May 10th, 1924 from Mr. W.C. Cain, Deputy Minister of Lands and Forests, in which he states,-

"If there is a water power located on these lands the question of the development and disposal of this power will require to be considered and such conditions would be made to apply to the same as would seem reasonable."

In a letter of May 19th from Mr. Rorke, Director of Surveys, to Major Robertson, Mr. Rorke says,-

"Water Powers on Crown lands which will develop 150 horse-power and over are subject to the regulations respecting the disposal of water powers but those under 150 horse-power are dealt with on such terms and conditions as the Minister of Lands and Forests may deem advisable and in any case full information regarding the power is required before an application is considered."

Following this notification that full information would be required, the Department of Indian Affairs wrote under date August 21st of the same year as follows:-

"As previously understood it is of course expected that permission will be granted to the Department to use the small water power on the stream connecting Forest and Canyon lakes. The Department of course does not propose any particular development at this point as power is required merely for local use in connection with the school, such as lighting, water supply, pump etc. A report on this power has been made by C.H. Attwood, Chief Engineer of the Dominion Water Power Branch, Department of the Interior. For your information I submit the following extract from his report,-

Possible Power

Under the maximum regulated head of 17 feet and the estimated low-water flow of 14 c.f.s. the power available at the site is 22 h.p. By the use of the storage, however, it is estimated that the

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

minimum flow may be increased to 25 c.f.s. although the head will be decreased as the storage is used until it is 14 feet. Under these conditions the estimated minimum power available is 32 h.p.

Use of Power

The amount of power available is sufficient only for small local uses such as lighting, pumping for water supply, sawing wood, etc. There is at present no market at the site, but it is proposed to establish there a small Indian mission-school, for the purpose of which the power could be very advantageously employed."

This letter was acknowledged by Mr. Cain in the following terms on September 5th,-

"Your letter of the 21st ult. in reference to the application of your Department for a parcel of land in Smellie township, and west thereof, district of Kenora, only reached this Department on the 2nd inst. and the plans referred to in your letter were duly received and the necessary declarations as requested made by Duncan Scott, Deputy Superintendent General of Indian Affairs, have been placed on file.

There seems now to be no reason why a sale of this land should not be carried out to your Department for the purposes of the Indian School. The total area involved is 325.35 acres and the purchase price at \$3. per acre, \$976.05."

That is to say, the Deputy Minister apparently was satisfied with the information received in regard to the water-powers, which information clearly showed that it was the intention to raise the natural level in Forest lake.

The Order in Council authorizing the sale of the land in question was passed on the 2nd October, 1924, receipt of which was acknowledged by the Department of Indian Affairs on November 7th, and in order that there might be no misunderstanding with regard to the rights of the Indian Department as to the water-power proposed to be used for school purposes, the matter was directly drawn to the attention of the Deputy Minister of Lands and Forests in the letter of that date, as follows:-

"It is also noted that in your description you have left out the portion excepting the connecting waters between Canyon Lake and Forest Lake. Is it to be presumed that this was done with the intention of conveying to this Department the water power which it is necessary to use for our school purposes?"

It appears that no reply was made to this letter. In the absence of such reply the Indian Department naturally concluded that the development of the water-power might proceed in accordance with the proposal submitted to the Ontario Government on August 21st, 1924.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 31)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The Director of Surveys had expressly stated that the disposal of water-powers of the capacity of that of the McIntosh school was not subject to the general regulations but was dealt with on such terms and conditions as the Minister of Lands and Forests might deem advisable, and a proposal to use the water-power augmented by storage in the upper lakes having been formally made by the Indian Department on August 21st, 1924, and accepted by the Deputy Minister of Lands and Forests without comment on September 5th of the same year, it does not appear reasonable that Mr. Rorke should now say that the Indian Department has been raising the lake levels without any authority or permission from the Ontario Department of Lands and Forests.

Is it to be presumed that this was done with the intention of conveying to this Department the water power which it is necessary to use for our school purposes?"

It appears that no reply was made to this letter. In the absence of such reply the Indian Department naturally concluded that the development of the water-power might proceed in accordance with the proposal submitted to the Ontario Government on August 21st, 1924.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

PUBLIC ARCHIVES

The Director of Surveys had expressly stated that the disposal of water-powers of the capacity of that of the McIntosh school was not subject to the general regulations but was dealt with on such terms and conditions as the Minister of Lands and Forests might deem advisable, and a proposal to use the water-power augmented by storage in the McIntosh school was made to the Ontario Department on August 21st, 1924, and accepted by the Deputy Minister of Lands and Forests without comment on the part of the Ontario Department. It is not possible that Mr. Horke should now say that the Indian Department has been raising the lake levels without any authority or permission from the Ontario Department of Lands and Forests.

Water Power Development at the
McIntosh Indian Residential School,
McIntosh, Ontario

History of Development.

In 1924 the Department of Indian Affairs decided to erect a residential school for Indian boys near McIntosh, Ontario, the school when completed to be conducted by the Roman Catholic Mission for Eastern Manitoba and Northwestern Ontario. The site selected bordered on Forest and Canyon lakes on provincial Crown lands. Application was made to the Ontario Department of Lands and Forests for the lands selected, and after some exchange of correspondence, an area of about 330 acres was sold to the Department of Indian Affairs under authority of an order of the Executive Council dated October 2nd, 1924.

One of the chief reasons for the selection of the site chosen was the existence of a natural water-power due to the difference in level between Forest and Canyon lakes. The Mission authorities were most anxious to have this water-power used to supply the electric energy needed at the school for lighting, pumping water and general purposes and the Indian Department agreed to pay for the cost of developing the power so as to provide a dependable supply which could be readily maintained and operated by the school authorities.

In order to carry out the development, the Indian Department requested the Director of Water Power and Reclamation of the Department of the Interior to have surveys made and plans and specifications prepared to determine the extent of the power and the best method of development. This was accordingly done, the plans submitted were approved and work was begun in November 1924, but owing to the difficulty of constructing the concrete dam in winter and to other unavoidable delays, the development was not completed until June 1926.

The intention of the Indian Department to develop this power site was communicated to the Department of Lands and Forests and the method of development by which it was proposed to raise the natural level of Forest lake about three feet in order to maintain a dependable flow of 25 c.f.s. was described by Mr. J.D. McLean, Assistant Deputy and Secretary of the Indian Department, in his letter of August 21st, 1924 to the Deputy Minister of Lands and Forests.

No objection was taken by the Department of Lands and Forests to this proposal and the development was carried out in good faith by the Indian Department solely for the benefit of the Indian school. As was pointed out by the District Chief Engineer of the

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Dominion Water Power and Reclamation Service in submitting his report on the proposed development, a fuel generating plant giving an equal amount of power could have been installed at much less cost, and the water-power development was decided upon only on account of the urgent requests of the Mission authorities.

Description of Development.

The water-power development at the McIntosh Indian school is situated on the short stretch of river separating Forest and Canyon lakes, the natural head available being about 11 or 12 feet. During earlier years a timber and rock dam was built across the outlet of Forest lake to assist in lumbering operations by raising the lake level, and the water in Forest lake and the connecting lakes above it has thus been raised above the natural level at intervals for a number of years past.

In the plan of development as carried out, the assumed natural high water level of Forest lake was raised a maximum of 2.5 feet, partly to obtain storage to give a continuous minimum flow of 25 c.f.s. but also to obtain a sufficient depth of water at the intake to the penstock and so avoid expensive rock excavation which would otherwise be necessary to ensure a seal at the intake structure. The maximum head available is about 17 feet, the minimum 14 and the power available is 33 horse-power.

The works as constructed consist of a concrete dam about 10 feet high at the highest part and 330 feet long on rock foundation with spillway and non-overflow section, the latter containing an opening for a log chute and a sluiceway for discharging flood waters, intake works, wood stave penstock 3 feet diameter, and 312 feet long, power house 20 X 25 feet with workshop above, and tailrace, details as shown on the accompanying plans.

The machinery in the power house consists of a single horizontal turbine, 30 B.H.P. under 15 feet head at 450 R.P.M. with Woodward governor supplied by Boving Hydraulic and Engineering Company of Lindsay, Ontario; D.C. generator, 17½ K.W. belt driven from turbine supplied by Lincoln Electric Company of Toronto, Ontario; switchboard and accessories.

Dominion Water Power and Reclamation Service in submitting his report on the proposed development, a fuel generating plant giving an equal amount of power could have been installed at much less cost, and the water-power development was decided upon only on account of the urgent requests of the Mission authorities.

Description of Development.

The water-power development at the McIntosh Indian school is situated on the short stretch of river connecting Forest and Gargua lakes, the natural head available being about 11 or 12 feet. During earlier years a timber and raft dam was built across the outlet of Forest lake to assist in lumbering operations by raising the lake level, and the water in Forest lake and the connecting lakes above it has thus been raised above the natural level at intervals for a number of years past.

In the plan of development as carried out, the assumed natural high water level of Forest lake was raised a maximum of 2.5 feet, partly to obtain storage to give a continuous minimum flow of 25 c.f.s. but also to obtain a sufficient depth of water at the intake to the penstock and so avoid extensive rock excavation which would otherwise be necessary to secure a head at the intake structure. The maximum head available is about 17 feet, the minimum 14 and the power available is 33 horse-power.

The works as constructed consist of a concrete dam about 10 feet high at the highest part and 6 feet high on each side with spillway and overflow section, the latter containing an opening for a log chute and a sluiceway for discharging flood waters, intake works, and stone penstock 3 feet diameter, and 112 feet long, power house 20 x 25 feet with workshop above, and tailrace, details as shown on the accompanying plans.

The machinery in the power house consists of a single horizontal turbine, 30 H.P. under 15 feet head at 400 R.P.M. with motor and generator supplied by Westinghouse Electric and Manufacturing Company of London, Ontario; generator, 17½ H.P. with driven from turbine supplied by Lincoln Electric Company of Toronto, Ontario; switchboard and accessories.

Sir. *Archibute*

Your file number: 130-7-16.

In further reference to my letter of August 19th, I enclose herewith material for the use of your Department in making application to the Ontario Department of Lands and Forests for an authorisation covering the water-power development at the McIntosh Indian residential school, as it appears desirable, in order to settle the outstanding difficulties with the Ontario Government, that a form of authorisation should be issued defining the rights of the Indian Department in regard to this development. The material, which is in duplicate, consists of -

- (1) Plans showing the development as constructed (under separate cover);
- (2) Statement outlining the history of the development and giving a description of the works and machinery (marked A hereunder);
- (3) Summary of the negotiations between the Department of Indian Affairs and the Ontario Department of Lands and Forests from material supplied by the Indian Department (marked B hereunder).

In forwarding this application it might be well for the Department of Indian Affairs to explain its side of the question in view of the complaints made by Mr. Rorke, Surveyor General, in his letters of July 4th, 1928 and July 24th, 1929 and for that purpose the summary marked B will be enclosed. In the letter of July 4, 1929 a reply was made to the Surveyor General's letter of July 4, 1928, and the summary marked B deals more particularly with the correspondence, and the questions raised at that time, and the summary marked B deals more particularly with the correspondence.

It is assumed, however, that the Indian Department, having made its position clear, will be quite ready now to supply any available information which may be requested by the Department of Lands and Forests and to

Mr. J.D. McLean,
Assistant Deputy and Secretary,

DEPARTMENT OF INDIAN AFFAIRS

CANADA

September 1929

Memorandum

With reference to letter dated 24th July last from the Surveyor General and Deputy Minister, provincial Department of Surveys, please see letter of Sept. 9th from the Director of Dominion Water Power & Reclamation Service.

I would suggest that the next step to be taken is for this Department to make application to the Province for official authorization covering the water power development of the McIntosh school. It would be well, in making this application, to endeavour to placate the provincial officials somewhat by pointing out that the Department acted in good faith in proceeding with this development, as it considered that the correspondence between the provincial Department of Lands and Forests and this Department was tantamount to permission for the development of the power, inasmuch as the power which could be developed at this point was very much below 150 horse power.

The Province no doubt on receipt of this official application will at once reply stating upon what conditions the authorization will be granted. These conditions will, in all probability, involve flooding damage claims. On receipt of these conditions the Department will then be in a position to enter into final negotiations with the Province as to the fulfilment and the payment for any damages which may be proved to have been caused, as it will undoubtedly be necessary for the two Departments to come to an agreement on this subject.

Sir,-

Your ref. No. 56021

With reference to your letter of the 24th July last, I have to advise you that the water power development at Canyon Lake was developed by this Department for the purposes of the McIntosh Indian Residential School. Due to a misunderstanding of the correspondence with your Department, this development was proceeded with in good faith by the Department, as it was thought from the letter dated 5th September 1924 from Mr. Cain, Deputy Minister of Lands and Forests, in reply to letter of this Department of the 21st August of this year, that there were no objections to the Department proceeding with the development as outlined in the last mentioned letter, in view of the fact that the power development was under the minimum mentioned in Mr. Horke's letter of 19th May 1924.

The misunderstanding is very much regretted. I have now to make application for the formal authorization for this development. I am forwarding under separate cover white prints showing the development as constructed.

Your obedient servant,

Copy of an Order-in-Council

APPROVED BY HIS HONOUR THE LIEUTENANT-GOVERNOR
THE 16TH DAY OF JANUARY, A.D. 1907

Upon the recommendation of the Honourable the Minister of Lands, Forests and Mines, the Committee of Council advise that Regulations adopted by Order-in-Council of 21st June, 1898, under 61 Victoria, chapter 8, entitled "An Act respecting Water Powers," be rescinded, and that the annexed Regulations be adopted in their stead.

The Committee further advise that the accompanying form of lease be approved for leases of water powers issued under the said Act and Regulations, subject to such changes as may be necessary and authorized in individual cases.

Certified,

J. LONSDALE CAPREOL

Clerk, Executive Council

REGULATIONS RE. WATER POWERS

1. These rules and regulations shall not apply to water privileges which in their natural condition at the average low stage of water have not greater capacity than 150 horse power.

2. In granting or leasing, otherwise than under these regulations, any Crown Lands upon which a water privilege is situated or which may be flooded or overflowed in consequence of the development and utilization thereof, the said privilege shall be reserved to the Crown, together with such an area of land in

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

connection therewith as shall in the opinion of the Minister be required for the proper development of the same, and the construction of all necessary dams, weirs, tunnels, races, flumes, sluices, pits and other structures or works, and the erection of buildings and plant for the employment and utilization of such privilege and storing grounds and yards in connection therewith: and there shall also be reserved in any such grant or lease, the right to flood any portion of the lands so granted or leased upon compensation to be made to the owner or lessee thereof by the person or persons to whom such privilege shall afterwards be leased; and the said water privilege, land and right so reserved shall form a separate property and may be dealt with as hereinafter provided

3. The right to lay out and use such roads as may be necessary for the passage to and from such water privilege or land shall be reserved in all grants or leases of contiguous or adjoining lands

4. The applicant for a water privilege situated on Crown Lands shall file in the Department of Lands, Forests and Mines, a plan and field notes by an Ontario Land Surveyor of survey thereof; and also a report by a competent engineer satisfactory to the Minister showing

(a) The location of the water privilege applied for, and a description of the land required in connection therewith

(b) The height of the fall or rapid, the volume of water at the average high and low stages of same, the estimated capacity in horse power of the fall or rapid in its natural condition at the average low stage of water, the height of the dams or weirs (if any) which it is proposed to construct, and the increase in the level of the water which such dams or weirs will bring about

(c) The plan by which the applicant proposes to develop the water privilege, showing the dams, weirs, tunnels, races, flumes, sluices, pits and other structures or works which it is proposed to build or make in connection therewith, the estimated cost thereof and the form in which the power is to be used or transmitted, that is, whether by direct energy, electricity, compressed air, etc

(d) The land or lands which would be overflowed or otherwise affected by the raising of the water or the construction of the dams, weirs, sluices, races or other works in connection with the development or use of such water privilege, and the owner or owners thereof

The applicant shall also show the nature and location of the business, plant or manufactory in connection with which it is proposed by the applicant to utilize the water privilege, and the number of horse power which the applicant proposes to develop and utilize, and shall furnish proof satisfactory to the Minister that the said water privilege is required for the applicant's own mechanical or industrial purposes or to supply an actual or anticipated demand for power in the neighbourhood of the privilege.

Provided that the Minister may dispense with the requirements of any of the preceding clauses of this regulation in case the information, plans, etc., required to be furnished are already in the possession of the Department of Lands, Forests and Mines

5. If so required by the Minister, the applicant shall furnish at his own expense all such measurements, plans, specifications, descriptions, levels, profiles, elevations and other information as he may deem necessary for the proper consideration of the application; and the applicant shall also, if required, submit to the Hydro-Electric Power Commission of Ontario the plans and specifications showing the proposed works for the development of the said privilege, and such works shall not be proceeded with until the said Power Commission has approved the same

6. The applicant shall submit such proof of his financial standing and ability and intention to develop the said water privilege as shall be satisfactory to the Minister

7. Before the lease of a water power is granted the Minister may require the applicant to deposit with the Treasurer of the Province a sum of money to be named by the Minister, conditional upon the carrying out of the works of construction and development specified in the lease within the period therein named; such sum to be returned to the lessee upon the due fulfilment of such condition, otherwise to be forfeited to His Majesty the King for the use of the Province of Ontario

8. Upon compliance with the foregoing regulations and upon approval of the application by the Minister in writing he may order a lease of the water privilege to be issued to the applicant upon such terms and conditions and at such rental as may be fixed by the Minister. The rental reserved by any such lease or any renewal thereof shall be payable yearly in advance

9. No such lease shall be granted for a longer term than twenty years, but the lessee shall have the right of renewal of such lease for two further and successive terms of ten years each upon such terms and conditions as may be agreed upon or may be fixed by the Minister

10. The right of timber owners and others to drive their logs or timber down any river, stream or other body of water, as now by law established, shall not be interfered with, lessened or restricted by the granting of any such lease; and if any dam, weir or other structure be erected or built in connection with the development of any such privilege, with the object, intention or effect of damming the water or impeding the flow thereof, full and proper provision, as now by law required, shall be made by the lessee for the safe and convenient passage of logs and timber over and through the same

11. The lessee under any such lease shall not destroy or obstruct the navigation of any river, stream or body of water

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

and other means as may be necessary for the proper and safe surmounting or passing of any dam, weir or other work made or erected by the lessee, and as may be required for purposes of

(b) If the quantity of power required by the lease to be de-

require the lessee to develop the same to such extent as he may deem proper or requisite within or to such other extent as he may deem proper or requisite within

person, company or corporation, either party may submit the matter to the said Power Commission, and any Order made by the

(c) In case of submission to the Hydro-Electric Power Commission as in Paragraph "(d)" herein mentioned, the said lessee on being so required by the said Commission shall produce all books, accounts, records and statements verified by affidavit, showing the cost of constructing, equipping and maintaining the works for the development of the said privilege and delivering the power therefrom

thereto.

(d) For the purpose of determining the quantity of power actually developed or capable of development from any water privilege, the lessee shall, at the request of the said Commission, submit to the said Commission, for its inspection, all books, plans or records bearing on the quantity of power, and shall be binding upon the lessee.

(e) During the construction of the works, the said Power Commission or any engineer of any water power, the said Power Commission or any engineer

(f) During the continuance of the lease, the lessee shall keep and maintain all dams, weirs, tunnels, races, flumes, sluices, pits and other works necessary for the development of the said privilege, and at the expiry of the lease, the lessee shall leave all such structures and works in good repair and condition, reasonable use and wear thereof and damage by fire and tempest only excepted, and so that their subsequent usefulness shall not be lessened by any act of the said lessee.

(g) At the expiry or sooner determination of the lease, the water privilege shall revert to and become the property of the Crown as fully as if no such lease had been granted, together with all dams, weirs, tunnels, races, flumes, sluices, pits and other

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 3)

character and necessary or useful for the proper development or utilization of the water privilege, the Lieutenant-Governor-in-Council may upon report in that behalf by the said Hydro-Electric Power Commission, pay the lessee by way of compensation therefor and purchase thereof such sum or sums as he may deem proper upon the same being appropriated for the purpose by the Legislative Assembly of the Province

(m) The lease shall at all times be subject to any general regulations thereafter made by the Lieutenant-Governor-in-Council affecting the construction and operation of works for the development of water privileges or the supply of water therefrom.

13. The Lieutenant-Governor-in-Council may cancel any water power lease issued under these regulations for non-payment of rental within 90 days after the same is due and payable, whether the same shall have been demanded or not, or upon report by the said Power Commission that the conditions as to construction of the works or the development or supply of power have not been complied with, or that at any time after the water privilege has been developed, either in whole or to the extent to which the lessee is bound or required to develop the same the said lessee has continuously failed or neglected for the space of one year effectually to produce power from the said privilege, either for his own use or that of other persons, unless hindered by unavoidable accident, or that the lessee has failed or neglected to comply with any of the conditions of the lease or any Order-in-Council respecting any matter or thing arising under the lease concerning which such Order is made; and publication of any Order-in-Council cancelling such lease shall be sufficient proof that the same has been duly and lawfully cancelled. Provided due notice shall be given a lessee before such cancellation in order that he may have an opportunity of being heard, should he so desire.

14. Where a water privilege is applied for by a municipal corporation for the purpose of supplying water, power, light or heat for the use of the inhabitants of the said municipality, the Minister may issue a lease of said privilege to such corporation if other wise entitled to receive and hold the same, on such special terms and conditions as may be recommended by the said Power Commission, and at such rental as he may deem proper.

15. The word "Minister" in these regulations shall mean the Minister of Lands, Forests and Mines, or any Minister of the Crown performing the duties of the Minister of Lands, Forests and Mines in his absence or during a vacancy in that office; and the Minister may refer to the Hydro-Electric Power Commission of Ontario any application for the leasing of any water privilege or any matter arising out of such application or any lease made in pursuance thereof, whether hereafter or heretofore issued, for consideration, investigation and report.

16. No water power lease shall be valid or effective unless the same is issued under the Great Seal of the Province, and is signed by the said Minister

ONTARIO
DEPARTMENT OF SURVEYS
OFFICE OF SURVEYOR GENERAL

Onto, October 4th, 1929.

✓ Dear Sir,-

Re: Water Power McIntosh Indian School.

I have your letter of the 2nd. inst., in further reference to the water power which has been developed at McIntosh, at the Indian School.

I am enclosing you the Regulations regarding the leasing of water power, which gives you the information required to fully consider the matter.

In addition to the lease which will issue covering the power plant, it will be necessary to file plans of survey, shewing the extent to which the shores of the lakes have been flooded, and an annual rental will require to be paid on this flooded area, as well as paying for all commercial timber which has been damaged, and the clearing of the same, so that the shores of the lake will not be destroyed, from a tourist point of view.

Yours truly,

Surveyor-General
Deputy Minister.

LVR:CS.

J. D. McLean, Esq.,

DEPARTMENT OF SURVEYS
OFFICE OF SURVEYOR GENERAL

Toronto, October 11th, 1929.

Sir,- Re: Water Power, McIntosh Indian School.

The prints showing the construction of
have been checked over insofar as the design is con-
cerned, and are satisfactory and may be approved, but
this in no way is an approval of the right to hold the
water and to develop power, which should be obtained in
the usual way - by Water Power License.

The lands included in the Lease would cover
and part of the one (1) chain reserve on each side of
the same as is necessary for the maintenance, control and
operation of the development.

The annual rental will be based on the value of
the land and the power developed thereon.

When the necessary surveys have been made
and plans have been filed, showing the lands along the
shores of the lakes, (which will be flooded) an estimate
will then be made of the commercial timber thereon and

DEPARTMENT OF INDIAN AFFAIRS

9/1/30

Memorandum,-

In conference with Mr. L.V. Horke, Surveyor General and Deputy Minister, Department of Surveys, regarding the McIntosh Indian school between Canyon and Forest, it was tentatively agreed, subject to confirmation by the heads of the Departments interested

(1) This Department would be willing to pay the annual rental demanded of \$1.00 per horse power for the power development, which as the present development of power available of 23 horse power is equivalent to \$23.00 per year.

(2) This Department will be willing to pay for the flooded lands, the provincial rate for which is an annual rental of 10¢ per acre.

(3) This Department is also liable for timber dues on timber damaged by the flooding

(4) A survey of the extent of the lands flooded to be made of the extent of the lands flooded

(5) The Province to permit the removal of the timber and undue stress is not to be made on the removal of the very small stumps and this will permit the removal of the upper ends of the lakes affected and the Province will not demand that the timber be cut to a ground stump but will be satisfied for it to be removed during the winter by cutting it as closely as practicable to the ice level. Underbrush and stuff which is not suitable for putting into use is to be disposed of in such a manner as will not permit it to be turned into floatage in the lakes and streams, but such of it as is in proper condition for so disposing is

ARCHIVES PUBLIQUES
CANADA

to be piled on the ice and burned before break up; the remainder to be piled on the land and as soon as it is sufficiently dry to be burned in such a manner and under such supervision as will not endanger forest growth.

In discussion as to the nature of the survey which would be required to supply the information in article numbered 4 above, I first succeeded in getting Mr. Rorke to agree that his Department would not insist on an actual survey of the present water line but that a traverse of the exterior line of flooded vegetation, with occasional offsets to the line of the present water level would be considered sufficiently accurate to estimate the acreage of flooded lands. After further discussion, Mr. Rorke agreed that as his Department would not require a very strict accuracy in the calculation of the area flooded but that a reasonable approximation would be satisfactory, he conceded that if sufficient information could be obtained from aerial photographs, no other survey would be required. Finally it was agreed that should sufficient information not be obtained from the aerial photographs, it would be considered satisfactory for a surveyor appointed by the Province to be accompanied by a representative appointed by this Department, to cruise the shore line of the flooded area and by means of hand level information obtained on this cruise to prepare sketches which would enable an estimate to be made of the flooded area, the expense of this to be borne by the Department of Indian Affairs.

It will be seen that Mr. Rorke was very reasonable in making these concessions. ~~What~~ It is considered that his Department could have insisted on a traverse along the line of the present water level which I am quite sure would cost the Department over \$2000.00. His concession in agreeing to a winter traverse on the ice, with offsets, would reduce this cost to approximately \$1000.00. The cost of the cruise finally agreed upon will probably not be in excess of \$1000.00 and should the aerial photographs, copies of which I am now obtaining from the Civil Government Air Operations Branch, contain sufficient information to convince Mr. Rorke that further survey is unnecessary, we will of course escape any expenditure in this connection, other than the cost of the prints which will be about \$2.00.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

of the district which were taken in June 1928 support the contention of this Department that the banks of the lakes and streams in the area affected are for the most part of a steep or rocky nature and as a result, except in a few localities, the construction of this dam has affected only a few feet in width of the shore line, that a sufficiently accurate estimate could be obtained by having the district carefully cruised by an Ontario Land Surveyor. It was considered that this surveyor could make a sufficiently accurate estimate by means of sketches, estimating the average width, amplified in any places where the areas flooded are of considerable extent by measured offsets and such hand level information as might be considered necessary, it being considered that a continuous chained or transit survey was unnecessary under the circumstances.

It is further understood that you suggest that this cruise will be performed by an Ontario Land Surveyor appointed by you, accompanied by a surveyor or engineer appointed by this Department and that this Department will defray the expense in connection with this cruise. On further consideration, this Department is not only willing to accept these conditions but is willing to accept the results of such cruise made by the Ontario Land Surveyor appointed by you and acting under your instructions without appointing a departmental representative to accompany him.

In connection with the discussion of the subject matter of Condition 5, it is understood that this Department expects to have a number of years in which to remove the timber from the flooded area and that your Department will start its removal during the winter season and will impose convenient conditions as possible in connection with the logging of the stumps and brush removal.

As it is understood that a considerable portion of the area is in a district which your Department has not surveyed, I am forwarding for your information and use in connection with the proposed cruise six blueprints of the line of the lakes affected, on a scale of 40 chains to an inch, as obtained by an aerial survey in June 1928. Should it be necessary, I could also arrange to supply you with copies of the aerial photographs of that district which your Department has already shown you.

Your obedient servant,

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

VERY
POOR
COPIES

The obvious items of expense in connection with the settlement of this matter are the clearing of timber from the flooded lands and the cost of survey. The survey cost has been reduced as above mentioned and the amount in Article No. 5 could be utilized to reduce the cost of clearing to a minimum as a result of obtaining the consent that the Province will not insist on immediate clearing but will allow a considerable number of years for its completion. As the survey will require firmness, I thought that a policy could be adopted to insure the survey authorities and others to obtain their floodplain requirements from the flooded area until it had been cleared to the satisfaction of the Province, and I am sure that instructions to immediately give to the survey authorities to follow this programme, and to give a point nearest the dam and working of the dam.

Ottawa, 31st January 1930

Sir,-

Your ref. No. 56021

With regard to the settlement with your Department in connection with the construction of the water power development between Canyon and Forest lakes for the McIntosh Indian school, I have to advise you that this Department approves of the following conditions which were tentatively agreed upon, subject to their acceptance by the heads of the interested Departments, in the recent conference you had with

1. Payment is to be made by this Department of an annual rental of \$1.00 per horse power, based on maximum horse power available under present development.
2. This Department admits its liability to compensate the Province for the lands flooded as a result of the raising of the water level above the high water mark.
3. This Department is also liable to the Province for timber dues on such timber as lies within the flooded area.
4. It is the responsibility of this Department to provide by survey or other means data which will enable the Province to estimate the area of the lands flooded.
5. This Department is to remove timber and tree growth from the flooded area to the satisfaction of the Minister of Lands.

It is understood that, in discussion of the method by which the flooded area would be ascertained, it was considered

PLEASE ADDRESS YOUR REPLY TO
THE DISTRICT CHIEF ENGINEER
DOMINION
WATER POWER AND RECLAMATION SERVICE

DEPARTMENT OF THE INTERIOR
CANADA

PLEASE REFER TO ONE SUBJECT IN A
LETTER, AND IN YOUR REPLY QUOTE
FILE NO. B-4955-11

DOMINION WATER POWER AND RECLAMATION SERVICE

WINNIPEG, MAN.

January 30th,

Re McIntosh Indian Residential School.

As I discussed with you personally, both here and in Ottawa last year, repairs are required to the edge of the sluiceway section of the dam at McIntosh. It was our intention to have this repaired last year but owing to the difficulties which might have been encountered with one Mr. Wallace, a lumberman operating on the lakes above, and having in mind that your Department had the matter of obtaining a license or authorization for this development up with the Ontario government, the matter of repairs was left over until next spring.

Mr. Wallace is cutting about ties along the lakes above the dam and will doubtless cut the dam at the time of the spring break-up in order to raise the level of the lakes to facilitate the running of his into Forest Lake. It is almost a certainty that there has been increased deterioration of the concrete in the vicinity of the sluiceway and log chute during the present winter.

In order to carry out the repair work to the dam it is probably essential to obtain the license for this development between now and spring. If this is not obtainable between now and spring it is necessary to secure authority for such repairs as are necessary to ensure stability of the structure and such authority should include such measures necessary to prevent any interference from Mr. Wallace in carrying out of the work.

I would point out that if authorized I would have the work commenced and completed soon after the spring break-up so that a considerable portion of the early season could be conserved. This policy would ensure to Mr. Wallace ample water for his operations as I understand he would not wish to pass ties through the dam before July 1st. He has however shown no inclination to co-operate with the authorities at the school, but on the contrary he has at times sent a gang of employees to the dam and closed the sluiceway over the protest of the Principal of the school, and doubtless will do so again unless prevented.

R. J. Orr, Esq.,
Architect,
Department of Indian Affairs,
Ottawa, Ontario.

Indian Affairs. (RG 10, Volume (221, file 472-10, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

While in Ottawa in December I discussed this matter of the development at McIntosh with Major Robertson, of your department, and Mr. L. V. Rorke. Major Robertson I believe has the matter well in hand, but in the event that a license for this development is not obtained before the spring break-up, it would be well if Major Robertson could reach some understanding with Mr. Rorke, or the Ontario officer in charge of logging operations, that would ensure this work being carried out without any undue annoyance from Mr. Wallace.

Yours truly,

Indian Affairs. (RG 10, Volume 6221, file 472-10, part 1)

Memorandum

Mr. Orr, -

With reference to the last paragraph of Mr. Attwood's letter under, please see departmental letter to Mr. Horke dated 31st Jan. F.130-7-165.

In addition to the information contained in that letter, I may state that Mr. Horke and myself have agreed that the necessary examination be made at an early date and I have personally requested him to arrange for it, if possible, early this month in order that the Department may be assured of having its proper license from the Province by the time of the Spring break up. I did not think it necessary to write him officially on this subject until the receipt of his reply to ours of the 31st ultimo.

Chief Surveyor.

DEPARTMENT OF SURVEYS
OFFICE OF SURVEYOR GENERAL

Toronto, February 3, 1909.

Dear Sir:-

This will acknowledge receipt of your letter of the 31st. ulto. setting out the result of the conference between Mr. Donald Robertson, Chief Surveyor of your Department, and myself, in respect to the water power situation at the Indian School at McIntosh.

The several conditions mentioned in your letter are satisfactory and as agreed to, with the exception however that this Department is not prepared to estimate the flooded area by means of aerial photographs, but will send an Ontario Land Surveyor to make a cruise around the lake, to determine approximately the area affected. It is likely at the same time, a timber estimator will go along and report on the commercial timber of the flooded area. This inspection will be made at an early date.

It seems to me that next month will probably be a good time to do the work on the ice, and I will advise you when the surveyor is instructed to make this inspection and report.

(A. F. MacKenzie, Esq.,)

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

Instructions to Ontario Land Surveyor, C. R. Lenny,
Sault Ste. Marie, to make an inspection and report in reference to
the shores of the Lakes affected by water power development at
the Indian School at McIntosh, and other matters concerned.

Toronto, February 10th 1970.

The Department of Indian Affairs who are vested
as the owners of certain lands in the township of Smellie and the
unsurveyed territory to the west, near McIntosh, on the Canadian
National Railway, district of Kenora, for the purpose of establishi
an Indian School, and a blue print of the lands in the unsurveyed
portion and known as P.P. 115 is sent you herewith.

You will note that there is located at the outlet
of Forest Lake, a dam and timber chute.

The Department of Indian Affairs have constructed
a dam at this outlet for water power purposes, to be used in
connection with the School, and by reason of such dam have flooded
and damaged the shores of some of the adjoining Lakes, and our
information is that the water has been raised 4 ft. to 4 1/2 feet
above the normal water level on Forest, Edward, Alexander and
Moulder Lakes, and the tree growth has been destroyed throughout
an extensive shore line.

By arrangement with the Department of Indian Affairs
it has been agreed that an inspection should be made along the
shores of these lakes to determine just where, and the approximate
amount of the lands and tree growth affected, and I have to instruct
you to proceed to the shore line, and make a survey of the same.

VERY
POOR
COPIES

It is not intended that a survey is to be run defining these lands, but from observation and other methods, combined with your experience, you will be able to mark on the plan the approximate location and areas as required.

For this purpose I am forwarding you a map of the township of Smellie on a scale of 20 chains to the inch for use in your work. I am also forwarding you a map of the Kenora District.

You will also relate the top of the spill-way at the dam with the flooded shore line, as observed by you so that the comparative elevation may be known.

It is quite possible that a timber cruiser will also accompany you to estimate the merchantable timber which has been damaged, but as regards this you will be advised at a later date.

You will advise the Superintendent of the Indian School at McIntosh when you expect to do this work, so that arrangements can be made for taking care of you at their quarters, and where you will no doubt be able to obtain any assistance necessary for the performance of your work.

You will report on any matter connected with this dam and flooding as may be observed by you of any nature whatsoever.

For this work you will be allowed at the rate of \$15.00 (fifteen dollars) per day, together with all necessary and reasonable expenses in connection with the work, including travelling expenses. You will return vouchers in triplicate for all expenses. An advance of \$250.00 (two hundred and fifty dollars) is being made to you on account of this work.

508 Grain Exchange,
Winnipeg, Feb. 12th, 1930

Frank Edwards, Esq.,
Chairman, Tourist Fish & Game Committee,
Kenora Ont.

Dear Sir,

A short petition has just been drafted and will be mailed to you in due course, in connection with the blocking of the interway between Little Forest Lake and the South Bay of Canyon Lake near McIntosh, Ontario, at a point where the Indian School is erected. When this dam was constructed a few years ago, provision was made to take care of the game fish in these lakes during spawning seasons, with the result that many of them travel to this dam in the spawning season and being unable to get through from one body of water to the other, are either caught by Indians or natives or die in the attempt to get through. At the present time, it is understood that an application is before the Department, presumably from the Indian Department at Ottawa, requesting that repairs be made to the present dam. Would it not be an opportune time to have a fish-ladder erected over or through this dam or a satisfactory runway made through, so that fish could navigate the stream at all times, but more especially during the spawning season.

Then there is the question of a right of-way across this Portage. I would like to point out that this is the only portage connecting Canyon Lake with Forest, Whitney, Edwards Bladder, Boulder and Little Boulder lakes to the south and as matters are at present, we are looked on as trespassers by the Indian School authorities, when we travel over this Portage, therefore, I would suggest that you take the matter up with the proper authorities and arrange if possible, for the Government to reserve a strip of land along the creek on the South side, to be used by Lumbermen, Tourists, etc. in travelling between the lakes herein referred to.

Several Inspectors have been shown this situation when at McIntosh but to date nothing has been done that would help to serve the fish in these lakes. If there is any further information required by you do not hesitate to communicate with the Department. Trusting this matter will have your earnest attention and will hear favorably from you in the near future, I am,

Yours sincerely,

(signed) A. W. Lewis.

McIntosh, Ont.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa, 18th February 1930

Sir,

Your ref. No. 56021

I have received a copy of the instructions to Mr. C. R. Kenny, which accompanied your letter of the 11th instant and I may say it is not considered that Mr. Kenny will require to have anything added to these in order for him to properly carry out the work.

I am enclosing for your information a copy of a letter sent this day to the Rev. C. Perreault, Principal of the Indian Residential School at McIntosh.

It is noted in your letter of the 3rd instant that it is your intention that the lease to the Department for the water power development at this point will issue dated from the 1st May 1929 and I have to advise you that this is satisfactory to the Department.

I may state that it has been found that certain repairs are required to the edge of the sluiceway section of the dam and in the vicinity of the sluiceway and log chute. Repairs be made this Spring. To do this it should be commenced and completed as soon as possible after the Spring break up so that a considerable portion of the summer run-off would be conserved. As it is possible that Mr. Kenny's report may not be received soon enough to ensure licence having been issued prior to the time when it is necessary to make arrangements for these repairs, inasmuch as licence is to date from the 1st May 1929, and in order that the Department may not be taking any further unauthorized steps in connection with this development, may I request you to be good enough to give the Department authority to make such repairs as are necessary to ensure stability of the structure. This authority of course granting the Department permission to keep the water level lowered during the period of repair.

L. V. Burke Esq.,
Surveyor General &
Deputy Minister,
Department of Surveys,

Sault Ste. Marie, Ontario.

March 12th 1930.

L. V. Burke Esq., O.L.S.,
Surveyor General,
Deputy Minister,
PARLIAMENT BUILDINGS,
TORONTO. Ont.

Sir,

Following your instructions dated February 10th 1930 to make an inspection and report in reference to the lake shores affected by water power development at the Indian School near McIntosh, Ontario, I beg to state that I left Sault Ste. Marie on March 1st, and arrived at McIntosh the following day.

To save time and long walks I had with me a light camp equipment for 3 men to travel the lakes, and acquired the services of an Indian at McIntosh to assist me in packing this outfit on a toboggan. On the evening of March 3rd the Crown Timber cruiser overtook me on Boulder Lake.

Near the Indian School I found a dam of concrete construction, having a length of about 300 feet, which included a spillway at the South end, 45 feet long. The crest of the dam above present water level is 4.5 feet, and the top of the spillway measures 2.5 feet above present water level. Almost adjacent to the North end of the spillway is a gate 8 feet in width, and a few feet North of gate is a log sluice 5 feet in width. Following Northerly along dam from log sluice is a penstock opening, 3 feet in diameter. The end of penstock at head of dam is bedded one foot below surface rock, leaving the top of penstock one foot below the present water level. The depth of water about the gate, sluiceway and penstock is 3 feet.

Indian Affairs. (RG 10, Volume 6221, file 472-10, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

To arrive at a height of mean flood level that this dam has made from the date of operation, I believe that it was necessary to observe the present water level conditions of lakes in this vicinity, other than those affected by daming. While travelling on the railway to McIntosh I saw many lakes, and it appeared to me that the present water level was from 3 to 4 feet below high water mark. This condition is similar of Cañon Lake which takes its waters at the dam from Forest Lake. The high water mark on Cañon Lake, which could be seen distinctly in many places, measures 3.5 feet above present water level.

The lakes affected by the dam are, Forest, Whitney, Edward, Alexandra, Bladder and Boulder; also a creek which drains Moose Lake and flows in an Easterly direction for a distance of about 2 miles to Bladder Lake.

At a point on Forest Lake, about half a mile Westerly from the dam, is a rapid, and I am told on good authority that this rapid had a fall of one foot before dam construction. The dam at present is holding back water to barely flood this rapid out, although there still remains a noticeable current here.

Along the Northerly shore of Forest Lake, a distance of about half a mile, from the dam, a by-pass was noted, having a width of about 8 chains. If water was raised another foot above its present level it would make its way to Canon Lake.

Taking into consideration the length and height of the spillway, and the slow gradual rise of cleared land at the end of the spillway, together with the by-pass to Canon Lake, I doubt very much if the dam could hold back water to its total height of 4.5 feet above the present water level.

Indian Affairs. (RG 10. Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

While travelling the lakes in question, I worked on a 5 foot contour, but was unable to find any traces of tree destruction caused from floods at this elevation. Any tree destruction was found at an elevation of 3.5 feet above present water level, which elevation corresponds with the high water mark of these lakes.

Noted on my plan which accompanies this report are flooded areas due to the effect of high water periods. These areas are swamps and of no agricultural value.

The blue line indicated on plan is a contour 3.5 feet above present water level, and along this contour very little destroyed timber from flooding was found. In a distance of about 60 miles of shore line there would not be more than 500 cords of pulpwood, and some red pine, and cord-wood.

My opinion is, that without the dam the timber along the beaches and around the inner edges of the swamps, would be effected by spring floods, and that this natural condition would not as a rule, kill tree growth, but if water is held by damming, and becomes warmed, it has a tendency to affect the bark by scalding and therefore kills the tree. Flooding of timber in the late fall of the year and water freezing about the tree will also prove disastrous to tree growth.

The present water level conditions of the lakes and at the dam appear to be of sufficient volume to operate the power system for the Indian School, but for logging purposes more water may be required.

About 50 per cent of the shore line of these waters is high bare rock the balance consists of clay and sand shores, and along this in many places, there would be an area equal to about 24 acres affected, together with an area of 399 acres of low lying

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

land, making a total area of approximately 423 (four hundred and twentythree) acres of land affected by the holding of water at the dam above a height of natural water conditions.

Yours truly,

ONTARIO
DEPARTMENT OF SURVEYS
OFFICE OF SURVEYOR GENERAL

Toronto, March 26, 1911.

SURVEYS

Dear Sir:-

Re: McIntosh Power Development.

I beg to enclose a copy of Ontario Land Surveyor Kenny's report on his examination of ground areas around the lakes at McIntosh. I also forward you a copy of his account amounting to - \$273.79, which is being paid by this Department, pending reimbursement from the Department of Indian Affairs.

I also enclose a statement of dues on the timber damaged around the shores of the Lakes, from the Woods and Forests Branch of this Department.

You will note that lands flooded by reason of the dam at McIntosh School, above the natural high water mark, is some - 423 acres. From this however, should be deducted the 5 acres which lie within the limits of Location PP-115, leaving a balance of - 418 acres, and we are willing to admit in the absence of a definite survey, that 400 acres will be a fair basis for rental.

In order to forward this matter, according to the arrangement, it will be necessary to issue a Water Power Lease, covering the dam-site, at an annual rental of

(A. F. Mackenzie, Esq.,)

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

25/3/1930.

\$1.00 per horse -power, or a minimum rental of - \$25.00, that is, an accounting should be made from year to year of the amount of horse-power developed, and if over an average of 25, the rate of \$1.00 per horse-power should apply, but in any case, the minimum rental will be - \$25.00.

A License of Occupation may also issue, giving your Department the right to hold the water and flood the 400 acres of land, set out in Mr. Kenny's report, at an annual rental of 10 cents per acre, total - \$40.00.

The timber dues, amounting to - \$247.50 will require to be paid and the surveyor's account of - \$273.79, is also a charge as per arrangement. The removal of the timber on the flooded area is to be undertaken by your Department and will be suitable for fire-wood. This can be arranged by the cleaning off of about 20 acres annually.

Yours very truly,

Dr. R. R. R. R.
Surveyor-General
Deputy Minister.

Ottawa, 2nd April 1930

Memorandum

Mr. Fetter, -

Please note Article 5 in my memorandum of that memo. It is suggested by the Province that we clear off about 20 acres of the flooded land annually and I think if possible a start should be made on this work before the break up this year and I would recommend that the school authorities be given instructions to commence the work utilizing the trees cut for fire wood for the school.

As this clearing requires to be done in a manner which will meet the approval of the Province, I would suggest that Mr. Bury be requested to frame the regulations by which the work is to be carried out in clearing this land.

Chief Surveyor.

Lands and Timber Branch

Ottawa, April 2nd, 1930. 192

Memo. Mr. Fox

Re CUTTING and DISPOSAL of timber on land
adjacent to McIntosh School.

As it is presumed that the school authorities will cut and salvage the above timber, the cutting should be governed by the following regulations:-

1. All timber other than sapling growth to be cut.
2. Cutting to be undertaken during the winter months only.
3. Stumps to be cut close to ice level, and all debris, such as tree tops, branches etc. to be piled and burned under the supervision of the provincial forest ranger.
4. 20 acres to be cut off each year.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

Ottawa, April 3, 1930.

Reverend Sir:

I have to inform you that the Department has had considerable correspondence with the Provincial Authorities, concerning the development of power and the raising of the water level at the McIntosh Indian Residential School. We have had to make various requests and certain conditions have been accepted, so that we can have a water power lease and a license of occupation for the right to hold and flood approximately 400 acres, located around the shores of the upper lakes.

One of the conditions is that the timber must be removed from the flooded area, and I have to instruct you to cut and salvage this timber, cleaning up approximately 20 acres of the flooded land each winter. The Department would be very grateful if a start could be made on this work before the coming break-up, and I have to urge you to commence the work, choosing the flooded land nearest the school, without delay. Please note the following regulations:

1. All timber, other than ^{small} sapling growth, must be cut.
2. Cutting should be undertaken during the winter months only.
3. Stumps should be cut close to ice level and all debris, such as tree tops, branches, etc., to be piled and burned, under the supervision of the Provincial Forest Ranger.

All work suitable for firewood, will of course be

Rev. C. Perreault, O. M. I.,

Ottawa, 24th April 1930

Memorandum

Mr. [unclear]

and Mr. [unclear], -

With reference to Agent Edwards letter under, I may say that I realized that Mr. Kenny's report on lands damaged by the McIntosh dam construction was one which might enable the Department to advance a further claim to the Province for a reduction in the amounts being charged, but it must also be realized that the Provincial Surveyor General after perusing this report made his demands in his letter of March 25th and in view of Mr. Attwood's letter of Jan. 30th last, in connection with the repair of the dam, I consider it more advantageous for the Department to obtain at once from the Provincial Government the necessary water power lease and license of occupation, and I had in mind the intention, after these are secured, of taking up the matter further with the Surveyor General with a view to obtaining, if possible, better terms. Until we have completed our repairs at the dam under protection of our lease and license of occupation, I think it would be most inadvisable to further go against the wishes of the provincial authorities, inasmuch as our irregular action in establishing this dam without official permit has caused the provincial authorities considerable annoyance resulting from complaints of summer residents in the district.

Chief Surveyor.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

Kenora, April 24, 1926.

Sir:

I have your letter of the 20th instant, with reference to the instructions issued by the Department regarding the flooded area at the site of the proposed power station. The Department is glad to have your communication and it will be timely to use the same in the future. At the present time, it is desired that the instructions of April third to the Rev. Principal be complied with faithfully. I might state that we have not yet secured the lease and the license of occupation of the flooded land, and it will not be advisable to now ask the Provincial authorities for reconsideration.

You might inform the Principal that the Department is not holding the school authorities alone responsible for the work that is to be done in the flooded area. We believe that the school is benefiting largely by the development of power and can use the wood for domestic fuel. However, I believe that the school authorities should be kept advised that the flooded area is being used for the school is being cleared, the Department will be glad to consider a bill to be introduced in the work.

I am enclosing an extra copy of this letter, for you to forward to the Rev. Principal.

Your obedient servant,

A. F. MacKenzie

"ALL these certain parcels of land and land covered by water, lying adjacent to the above mentioned Lakes, in the township of Snellie, and in the unsurveyed township West of Snellie, in the District of Kenora, which have been flooded by reason of the construction of said dam, said lands being further designated and described, as shown coloured green on plan prepared in the Department of Surveys and Lands attached, dated 27th March, 1900, containing by measurement three hundred and ninety-nine (399) acres more or less."

SUBJECT to the payment to the Treasurer of the Province of Ontario of the sum in each and every year, of Sixty Dollars (\$60.00) the first payment to be made on or before the making and delivery hereof, and each subsequent payment on the first day of January, in each and every year, so long as this license shall remain in force.

PROVIDED that on default for two months in payment of said rent as aforesaid, this license shall be void, and provided also that this license shall cease and determine immediately upon the determination of the term created by said Crown lands or any renewal thereof, whether by effluxion of time, forfeiture, prescription or otherwise, and may be annulled and revoked at any time by me or my successor in office, if it should be made to appear to the Minister for the time being that any covenant, provision, term or condition of the said Crown lands or of this license, is not being complied with or fulfilled,

PROVIDED that this license shall not be transferred or assigned without the written consent of the said Minister.

PROVIDED FURTHER that the licensee shall cut and remove all timber on the flooded area within a period of ten (10) years from the date of this license, such removal of timber to be in accordance with the regulations of the Minister of Lands and Forests and shall be performed with due care to time to time to be ordered from time to time, and further, that the licensee shall not be entitled to cut or remove any timber growing on the flooded area by reason of the fact that the same is not owned by the Crown.

PROVIDED FURTHER that all debris and flood-wood which may be carried down to the dam shall be at least once a year taken out of the river and used or destroyed. The licensee shall not permit any portion of the said debris or flood-wood to go over or through the dam to the river below.

PROVIDED ALSO, that the control and operation of the dam which causes flooding of the land herein described, is to be at all times subject to the approval of the Minister of Lands and Forests, and he may at any and all times order such operation and control as he may deem advisable, and the said licensee shall operate and control accordingly.

PROVIDED FURTHER that the licensee shall not unduly interfere with the natural facilities for hauling, piling or driving of logs on the said waters, or the lands adjoining, or the navigation of any of the said waters, and this license is not to be interpreted as granting any rights which would interfere with said hauling, piling or driving of logs or the navigation of said waters, or the hauling on the landward portion of such roads as may be necessary for the purpose of hauling, piling or driving of logs or timber.

PROVIDED that the licensee shall pay for all merchantable timber destroyed by reason of the flooding of the lands herein described and shall cut and remove the same as ordered so to do by the said Minister.

PROVIDED FURTHER that this license shall not in any way prejudice the rights of any private individuals or companies whose lands may be flooded by the said dams or works, and the licensee shall make due compensation for any lands or property of private individuals taken or affected without recourse against the Crown in any way whatsoever.

per cent on value of
land and $\frac{1}{4}$ per cent on
buildings, minimum
amount \$1.00 which
must be paid before
any dealing thereon.

GEORGE V. by the Grace of God, of Great
Britain, Ireland and the British
Dominions beyond the Seas, King,
Defender of the Faith, Emperor of India--
TO ALL to WHOM These Presents shall Come:

~~SECRET~~

WHEREAS by Letters Patent under the Great Seal of Our Pro-
vince of Ontario, We did demise and lease unto the Department of
Indian Affairs, as represented by the Superintendent-General,
Location PP-115, lying West of the Township of Smellie, in the
district of Kenora, which Location adjoins Forest Lake, and its
outlet to Canon Lake, on which the said Department has constructed
an Indian School.

AND WHEREAS there is a small water power at the outlet of
Forest Lake which the said Department has developed for the
operations and maintenance of the said School.

AND WHEREAS the said Department has applied for a lease of
said Water Power.

NOW KNOW YE that by virtue and authority of Chap. 35,
R.S.O., 1927 and in consideration of the provisos, conditions
and restrictions herein contained, We have demised and do hereby
demise and lease unto the Crown, as represented by the Superin-
tendent-General of the Department of Indian Affairs, hereinafter
called the "lessee".

ALL AND SINGULAR that certain parcel or tract of land and
land covered by water, being composed of part of the bed of the
outlet from Forest Lake, and in front of Location PP-115, in the

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES

district of Kenora, containing Two (2) acres, more or less, being more particularly described as follows:-

"BEING all that part of said outlet extending from a line drawn North and South across said outlet, at a distance of Two (2) chains and fifty (50) links, East astronomically, from the production northerly of the West boundary of that part of Location PP-1115, lying South of Forest and Canon Lakes, down stream a distance of eight (8) chains, said lands being shown tinted red on a plan of same, attached hereto, dated 11th. April 1930, together with the right to use any portion of the road allowance one (1) chain wide along the shore of the said outlet, for the purpose of the maintenance and construction of any power works and timber chutes required."

SAVING, EXCEPTING AND RESERVING NEVERTHELESS, unto Us, Our Heirs and Successors, all gold, silver, copper, lead, iron and other mines or minerals which are, or shall be hereafter found on or under the said lands, and all trees growing or being thereon, together with all advantages and appurtenances which may, during the term hereby granted, be held, occupied or enjoyed therewith.

TO HAVE AND TO HOLD, the same with appurtenances unto the said lessee for the full end^{ed} term of twenty (20) years, to be computed from the first (1st.) day of January, one thousand nine hundred and thirty, Yielding and Paying unto Us, Our Heirs and Successors in advance, at the Treasury Department, Toronto, during the said term hereby created, in lawful money of Canada, the sum of money computed at the rate of One Dollar (\$1.00) per annum for each and every horse-power, from or by means of the water flowing on or over the said lands, but so that the rental for any year shall not be less than Twenty-five Dollars (\$25) the first of such payments to be made on or before the execution and delivery of these presents, and all subsequent payments on the first (1st) day of January, in each and every year hereafter with the right of renewal of said lease, for a further and successive term of Ten (10) years, upon such terms and conditions, and at such rental as may be agreed upon or fixed or determined by the Minister of Lands and Forests at the time of such renewal.

SUBJECT NEVERTHELESS TO, and this lease is made upon the provisions, conditions and stipulations following:-

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES

THAT IS TO SAY:

1. The said lessee shall maintain the development already made and utilize the water power privilege situated on the lands hereby demised by the construction and maintenance of all necessary works and all necessary plant and machinery on the said lands for the generation of electricity, the compression of air or the production of some other form of power or force by means of the water flowing in or over that portion of the lands herein described, to the full extent and capacity and to the satisfaction of the minister of Lands and forests, at all times.

2. The said lessee shall use the power so developed in the operation of machinery or some other commercial, mechanical or industrial purpose, or if the said power so developed or any part thereof, shall not be required for such purpose or purposes by the said lessee, he shall furnish to any person, company, or corporation requiring the same power up to the amount of power hereby required to be developed, or such lesser quantity as shall be actually required or in demand, or if a greater quantity of power shall be developed by the said lessee, than the quantity it is provided herein shall be developed, then up to the amount of power so developed. Upon report being made by the Hydro-Electric Power Commission of Ontario, to the Lieutenant Governor-in-Council that the water power privilege aforesaid has not been developed and utilized to the ^{full} extent of its capacity by the works constructed or the water wheels, plant and machinery installed by the said lessee and that there is a bona fide demand for power in excess of the quantity of power developed and utilized by the said lessee which might in whole or in part be supplied from the water power privilege aforesaid, then the Lieutenant Governor-in-Council may by Order-in-Council require the said lessee to develop and render available for use the additional quantity of power so shown to be undeveloped and capable of development, or any part thereof, by the construction of the necessary works, the location of water ^{works} ~~works~~ and the installation of suitable and necessary plant and machinery on the the said lands within a period of time to be named in the said Order, and in default of compliance with the said requirement the Lieutenant Governor-in-Council may order and direct that

Indian Affairs. (RG 10, Volume 6221, file 47-10, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

this lease shall be forfeited and cancelled accordingly.

3. Should the lessee or any person, company or corporation receiving power from the said lessee for distribution, and any other person, company or corporation desirous of obtaining power as aforesaid, fail to agree upon the rate or price to be paid for the same, or the terms and conditions for supplying the same, either party may submit the matter to the said Hydro-Electric Power Commission and any Order made by the Lieutenant Governor-in-Council upon report thereon by the said Hydro-Electric Power Commission fixing and determining the said rates and conditions, shall be final and conclusive and binding upon all parties concerned.

4. In case of submission to the said Hydro-Electric Power Commission, as in paragraph three hereof mentioned, the said lessee, if so required by the said Hydro-Electric Power Commission, shall produce all books, accounts, records and statements, verified by affidavit, of the cost of constructing, equipping and maintaining the works for the development of the said water power privilege hereby demised, and delivering the power therefrom.

5. For the purpose of ascertaining the quantity of power actually developed or capable of development from the water power privilege aforesaid, or the amount of rental payable hereunder, by the said lessee, the Minister of Lands and Forest, or any engineer appointed by him for that purpose, shall at all times have authority to enter upon the said lands hereby demised or any buildings or works erected thereon or any part thereof, or any other lands, buildings or works, on or in or by means of which power from the said privilege is developed, and examine and inspect the same, and take measurements and make observations and shall have free access to all books, plans or records bearing on the said quantity of power, and any calculation of the quantity of power developed or capable of development from the said water power privilege made by such engineer and approved by said Minister, shall be binding upon the said lessee, and rent shall thereafter be paid and is hereby reserved at the rate of One Dollar (\$1.00) per horsepower per annum for the quantity of power developed, as determined by the said calculation.

6. During the construction of the works for the

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

development and utilisation of the water power privilege hereby demised, the said Minister of Lands and Forests, or any engineer appointed by him for the purpose, shall have free access to all partes of the works for the purpose of inspecting the same and of ascertaining that the construction thereof is in accordance with the plans and specifications approved of by the said Minister.

7. The granting of these presents shall not interfere with, lessen or restrict the right of timber owners or others to drive their logs or timber down the said waters, or that part hereby demised, and if any dam, weir, or other structure be erected or built in connection with the development of the water power situated on the premises hereby demised with the object, intention or effect of damming the water or impeding the flow thereof, full and proper provision as now by law required, shall be made by the said lessee for the safe and convenient passage of logs and timber over the same.

8. Upon complaint in writing being made that any municipal corporation is granting bonuses by supplying power, light or heat below cost, to manufacturer or others, whether the said corporation is the lessee of the water power privileges hereby demised or is receiving power therefrom from or through the lessee, the Lieutenant Governor-in-Council may refer the matter to the said Hydro-Electric Power Commission, who may dispose of the same in manner provided by Chapter Fifteen, of the Ontario Statutes of 1906, or any amendment thereto.

9. The said lessee shall whenever so required by the proper officer or authority in that behalf erect and maintain a durable and efficient fishway for the free passage of fish at all times and seasons.

10. During the continuance of this lease the said lessee shall keep and maintain all dams, weirs, tunnels, races, flumes, sluices, pits and other structures and works necessary for the development and use of the water power or privilege aforesaid in good repair and condition and shall not wilfully or otherwise injure or destroy the same or any part thereof, but at the expiry or sooner determination thereof, shall leave all such structures and works in good repair and condition, reasonable

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

use and wear thereof and damage by fire or tempest only excepted and so that their subsequent usefulness shall not be lessened by any act of the said lessee.

11. The Lieutenant Governor-in-Council may cancel this lease for non-payment of the rent hereby reserved as aforesaid within ninety days after the time the same is payable, whether the same has been demanded or not, or upon report by the said Minister of Lands and Forests, that the conditions as to construction of the works or the development or supply of power have not been complied with or that at any time after the water power privilege has been developed either in whole or to the extent to which the lessee is bound or required to develop the same, the said lessee has ^{continuously} ~~continually~~ failed or neglected for the space of one year effectually to produce power from the said privilege, either for his or its own use or for that part of other persons unless hindered by unavoidable accident, or that the lessee has failed or neglected to comply with any of the conditions hereof or any Order-in-Council respecting any matter or thing arising hereunder concerning which such Order is made and publication in the "Ontario Gazette" of any Order-in-Council cancelling this lease shall be sufficient proof that the same has been duly and lawfully cancelled. Provided that thirty days' notice in writing shall be given the said lessee before any such cancellation, in order that they may have an opportunity of being heard, should they so desire.

12. The said lessee shall not obstruct the traffic to and along the lands herein described or interfere with the transportation of the public along and over the waters in that vicinity and shall, if required, provide such locks, canals and passages or other means as may be necessary for the proper and safe surmounting or passing of any dam or other work made or erected by the said lessee as may be required for the purposes of navigation by the Government of Canada.

13. The said lessee shall not have the power or authority under these presents to overflow or cause to be overflowed any land or lands other than those hereby demised, and it is distinctly understood and agreed that should any lands other than those hereby demised be overflowed or damaged, the Crown or the

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

-2-

Government of Ontario, shall in no wise be responsible for damage done thereto to the owner or owners thereof.

14. The power and authority to acquire water powers and works by purchase, lease or otherwise, or without the consent of the owners thereof conferred upon the said Power Commission by Chapter Fifteen of the Ontario Statutes of 1906, shall be exercisable by the said Power Commission in respect of the lands and water powerprivileges hereby demised, and any and all works connected therewith.

15. At the expiry or sooner determination of this lease the said lands hereby demised, together with the water power or privilege aforesaid shall revert to and become the property of Us, Our Heirs and Successors, as fully as if these presents had never been executed, together with all buildings, dams, weirs, tunnels, races, flumes, sluices, pits and other structures and works situate thereon, provided nevertheless that within a reasonable time to be fixed by the said Power Commission the said lessee may remove all machinery employed by it in the development or use of the said water power privilege, but failing such removal within the time so fixed, such machinery shall become the property of and be vested in Us, Our Heirs and Successors, to all intents and purposes whatsoever. Provided that where any such buildings or structures are of a permanent character and necessary or useful for the proper development and utilization of the water power privilege aforesaid, the Lieutenant Governor-in-Council may upon report in that behalf by the said Hydro-Electric Power Commission pay the lessee by way of compensation therefor and purchase thereof, such sum or sums as he may deem proper upon the same being appropriated for the purpose by the Legislative Assembly of the Province.

16. The Minister referred to herein shall be and include the Minister of Lands and Forests or any Minister of the Crown performing the duties of the Minister of Lands and Forests, in his absence or during a vacancy in that office and the Minister may refer any and all matters and things arising under or by virtue of or in connection herewith to the Hydro-Electric Power Commission of Ontario for investigation, consideration and report.

17. The granting hereof or the requirements herein,

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

as to the development of power from the said water power privilege shall not be or be deemed to be a guarantee by the said Minister of the Government of Ontario, that the said or any quantity of power is capable of being generated from the said privilege and the said lessee shall have no recourse against the said Minister or the said Government in case the said or any quantity of power cannot be generated therefrom.

18. These presents and the term or terms hereby created shall not be assigned or transferred without the written consent of Our said Minister, or of some officer duly authorized by him or by general regulation to give such consent.

19. The word "lessee" herein shall mean and include the lessee herein named and its successors and assigns.

20. The acceptance of rent hereunder shall not be or be deemed to be a waiver of any of the terms or conditions herein expressed concerning the construction of works, development or supply of power or otherwise.

21. All plans and specifications for the construction of further works required in connection with water power development on the lands herein described, shall be submitted to the said Minister for approval before the said development is begun and the construction of any of the said works, and the height to which the Water may be held by any dam constructed at the said works shall be approved and the control and operation of said dam or dams shall at any and all times be subject to the ruling of the Minister of Lands and Forests.

The lessee shall submit to the Minister a certified yearly statement compiled from monthly records, shewing the elevation of head water and tail water, the operating head and the volume of water in cubic feet per second, passing through the different openings, and also setting out the total average horsepower developed during each month.

AND LASTLY this lease is accepted by the lessee subject to the right of the Government of Canada, if any, to control the navigation of the said waters, and it is hereby understood and agreed that the lessee shall have no recourse against the Government of Ontario by reason of any damage that may be hereafter sustained by him in consequence of any works constructed, or to

ONTARIO
DEPARTMENT OF SURVEYS
OFFICE OF SURVEYOR GENERAL

Toronto, 11th June, 1900.

Sir:-

In reply to your letter regarding Water Power Lease No. 41, I beg to advise that this Lease was sent to the Provincial Secretary's Department for signature, and has only just been forwarded to the Local Master, in the district of Kenora, from whom you will receive your advice regarding same. The License of Occupation I note, has already been received.

I do not know if you were forwarded a copy of this lease, but as I have an extra copy on the file, I am sending it to you herewith.

Yours very truly,

W. H. Smith
Surveyor-General
Deputy Minister.

A. F. MacKenzie, Esq.,

June 16, 1930.

Dear Mr. Heenan:

Your office communicated to me this morning a complaint you have received, concerning the Department's failure to provide a fish ladder at the dam where power is developed for the use of the Indian Residential School near McIntosh. I may say that, three years ago, the Provincial Game and Fisheries Department asked that we consider the erection of a fish-way, or ladder. The Department asked the Dominion Water Power and Reclamation Service, which had built the dam, for a report. The expense would be between \$1,500 and \$2,000, and, as very few use the upper lakes which were affected and as there was a seasonal natural spillway, I did not think favourable consideration should be given. It was further reported that there had been very poor fishing in the upper lakes for some years, previous to the construction at the Indian School.

I gave this information to the Provincial Department of Game and Fisheries and, in September, last, the Deputy Minister promised to communicate with me if the expense of constructing a fish ladder was necessary, but I have heard nothing further from him.

Yours very truly,

Duncan C. Scott

OFFICE OF
Local Master of Titles
for District of Kenora.

Sir:

I beg to advise you that a Patent from the Crown to you, as Lessee of Location
S.P. 111, lying west of the Township of Little, in the District
of Kenora, which Location is subject to a Patent from the Crown to
the District of **KENORA** has been received by me from the Crown Lands Department in
order that you as the Lessee therein named, should be entered as owner thereof, under Sections 19
and 169 of the Land Titles Act, Revised Statutes of 1897, Chapter 138, and you have been entered
accordingly.

Under section of 172 of the Act I am authorized to issue a Certificate of Ownership to a Patentee
upon repayment of my actual disbursements unless where, on account of dealing with the land, special
proceedings are necessary. The Government defrays the other expenses incidental to the registration of
the land in this office, and to the issue of the Certificate of Ownership upon an Office Copy of the Lease,
and also ordinary postages.

You will please fill up the enclosed statement of your address and return to me at once. Upon its
receipt the Certificate will be forwarded to you as soon as fourteen days have elapsed from the date of this
notice. The delay of fourteen days is to allow the Sheriff and Municipal Treasurer to notify me in case
they have claims against the land under writs, or for taxes.

The Original Patent remains in my office, as it is superseded by the entry of Ownership.

To
Asst. Dept. and Secretary
Dept. of Indian Affairs
Ottawa, Canada.

Your obedient servant,

C. A. Cunningham

ONTARIO."

MAIL TO THE GAME AND
FISHERIES DEPARTMENT.

Toronto 2, July 30th, 1930.

Sir:-

With further reference to your letter of the 5th of September, 1929, your file 130-7-16, with reference to the dam at Canyon Lake, McIntosh, and the suggested inclusion of a Fish-way therein, I would advise that we have now received the following report from our Seasonal Biologists in this connection:-

"We understand that in 1925 and in the succeeding years many pike, pickerel and muskies tried to ascend the river but were unable to do so because of the presence of the dam. As a consequence many of these fish got stranded on the rocks and died. Since 1925 the number of fish coming up to the dam each year is said to have diminished greatly. Moreover, fishing is said to have become much poorer during the same period and hence we are of the opinion that this dam is having a very detrimental effect on fish migration and consequently on all the other phases of fish life which that involves.

We recommend that a fishway be constructed at the earliest possible date and in our opinion a fishway could best be constructed in this location by blasting a channel through the rock, over which the water now spreads, to a point a short distance below the dam. From there a short fishway might be constructed. There would appear to be sufficient water for such purposes even in a dry season such as the present one".

It is the opinion of this Department that these recommendations are reasonable and that the suggestions made in regard to the fishway are logical, and we trust that some steps will be taken by your Department as soon as possible with a view to giving effect to these recommendations.

I have the honour to be, Sir,

Your obedient Servant,

W. J. R. G. G. G.
Deputy Minister.

Ottawa, August 2, 1930.

Sir:

I wish to refer to your 40103 W R of September 22nd, 1927, enclosing Mr. Craig's report - forwarded by Mr. Attwood - with reference to a fish ladder at the McIntosh Indian Residential School. Mr. Craig's recommendation, if a fish ladder was necessary, involved over \$1,000, but he stated that it was possible the Ontario Department of Fisheries could suggest a cheaper installation and that, in any case, it would be advisable that the type of fish ladder be approved by the Ontario officials.

In view of the expense and the last paragraph of Mr. Gow's report of August 8, 1928, forwarded under cover of your 40103 of August 14th of that year, the Department took no action. The question has been raised on two or three occasions since and I am now in receipt of a letter from the Deputy Minister of the Game and Fisheries Department, Toronto. He quotes from a report of their Seasonal Biologists. It is claimed that the dam is having a very detrimental effect on fish migration, and it is recommended that a fish-way be constructed at the earliest possible date. The report goes on to state: "In our opinion, a fish-way could best be constructed in this location by blasting a channel through the rock, over which the water now spreads, to a point a short distance below the dam. From there, a short fish-way might be constructed. There would appear to be sufficient water for such purposes, even in a dry season such as the present one."

Mr. McDonald, the Deputy Minister, is of the opinion that this recommendation is reasonable and he asks our Department to take the necessary steps.

Would you please let the Department have a report on the cost of this proposal and indicate if you could arrange to have a fish ladder, as suggested, constructed. I concur in the earlier recommendation of your officer, that the Ontario authorities should approve of the type of ladder before construction.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy & Secretary.

CHAP. 42.

An Act to amend the Fisheries Act.

[Assented to 14th June, 1929.]

HIS Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

1. The *Fisheries Act*, chapter seventy-three of the Revised Statutes of Canada, 1927, is amended by adding to section two thereof the following paragraphs:
 “(d) “fishing vessel” includes any ship or boat, or any other description of vessel used in fishing.
 “(e) “Canadian” means a British subject resident in Canada.”
2. Section seven of the said Act is amended by inserting after the word “may” in the first line thereof the following words:—“ in his absolute discretion,”
3. The said Act is further amended by inserting the following section immediately after section eight thereof:—
 “8A. The Minister may cancel any license issued under the authority of this Act, if it has been ascertained by the report of a commissioner appointed under the provisions of the *Inquiries Act*, chapter ninety-nine of the Revised Statutes of Canada, 1927, that the operations under such license are not conducted in conformity with law.”
4. Section twenty-eight of the said Act is repealed and the following is substituted therefor:—
 “28. (1) No one shall maintain a pound or enclosure in which lobsters, legally caught during the open season, shall be retained for sale during the close season at a place where the pound or enclosure is located, or for export therefrom, except under a license from the Minister, and no lobsters shall be taken from any such pound or enclosure, and disposed of during the close season at the place where it is located, except under a certificate from a fishery officer, setting forth the pound from which the lobsters were taken and that they had been legally caught during the open season.”

Marking
of pounds

(2) Each such pound or enclosure shall be marked with the name of the licensee and the number of his license. Such marking shall be in black on a white ground, and the letters and figures shall be at least six inches in height.

Fee

(3) The annual fee for such license shall be seventy-five dollars."

Fishery
regulations
by Governor
in Council.

5. Section forty-six of the said Act is amended by adding to subsection one thereof the following paragraphs:—

"(h) to prescribe the size or sizes of containers in which oysters may be sold, and how such containers shall be marked;

(i) to provide for the grading and inspection of oysters;

(j) to prescribe how incorrectly marked containers of oysters shall be re-marked and dealt with."

Publication.

6. Section forty-six of the said Act is further amended by repealing subsection two thereof and substituting the following subsection therefor:

"(2) Such regulations shall take effect from the date of the publication thereof in the *Canada Gazette* or from the date specified for such purpose in such regulations, and such regulations shall have the same force and effect as if enacted herein, notwithstanding that such regulations extend, vary or alter any of the provisions of this Act respecting the places or modes of fishing: Provided that any regulation made under the provisions of paragraph (g) shall take effect at the expiration of six months from the date of its publication in the *Canada Gazette*."

7. The said Act is further amended by inserting the following section immediately after section sixty-nine thereof:

"69A. (1) Every person shall be guilty of an offence, and shall incur therefor a penalty of not less than one hundred dollars and not more than two thousand dollars, recoverable with costs upon summary conviction, who at any time, except under license from the Minister,—

Departure
from
Canadian
port.

"(a) with intent to fish or to cause any other person to fish with a vessel that uses an 'otter' or other trawl of a similar nature for catching fish in the sea, leaves or departs from any port or place in Canada for the purpose of such fishing; or

Bringing in
fish caught
beyond
territorial
waters.

"(b) knowingly brings into Canada any fish taken or caught in the sea beyond the territorial waters of Canada with any vessel that uses an 'otter' or other trawl of a similar nature, or any vessel that uses an 'otter' or other trawl of a similar nature for catching fish in the sea beyond the territorial waters of Canada, if the leaving or departure from Canada of such vessel

ARCHIVES PUBLIQUES
CANADA

constituted an offence under this section, and moreover the fish or vessel so brought in shall be confiscated to His Majesty for violation of this Act, in the manner provided by section eighty-two of this Act.

"(2) No such vessel shall carry on fishing operations from or to any Canadian port or ports, unless such vessel is registered as a British ship in Canada and is owned by a Canadian or by a body corporate incorporated under the laws of the Dominion of Canada or of one of the Provinces thereof, and having its principal place of business in Canada. Vessels to be registered.

"(3) No such vessel shall carry on fishing operations from or to any Canadian port or ports, unless it restricts its fishing operations to waters that are at least twelve miles distant from the nearest shore on the Atlantic sea-coast of Canada. The proof that such fishing operations are so restricted shall at all times lie on the Captain of the vessel: Provided that this subsection shall not apply to small draggers operated by inshore fishermen if exempted from the provisions of this subsection by special permit which the Minister is hereby authorized to issue for that purpose. Fishing restricted to 12 mile limit

"(4) The Minister may determine the number of such vessels that shall be eligible to be licensed. Exception

"(5) Regulations may be made under the provisions of section forty-six of this Act,— Regulations

(a) prescribing the form of license;

(b) specifying the evidence to be submitted with an application for a license;

(c) fixing the conditions under which a license shall be issued;

(d) making any other provisions respecting licenses.

"(6) The burden of proving absence of intent or knowledge, when intent or knowledge is necessary to constitute an offence under this section, shall lie upon the person accused, and intent or knowledge shall be presumed unless negatived by proof. Burden of proof

8. Subsection one of section eighty-seven of the said Act is repealed and the following is substituted therefor:—

"87. (1) Every penalty or forfeiture imposed by this Act or by any regulation made hereunder, may be recovered or enforced on parole complaint, before any fishery officer who is authorized by the Governor in Council to exercise the powers of a justice of the peace, stipendiary magistrate or justice of the peace, in a summary manner. Before whom to be sued for

CHAPTER 73.

An Act respecting Fisheries and Fishing.

SHORT TITLE.

1. This Act may be cited as the Fisheries Act. 1914. Short title
c. 8, s. 1.

INTERPRETATION.

2. In this Act, and in any regulation made hereunder, Interpreta-
tion
unless the context otherwise requires.

(a) "fish" includes shell fish, crustaceans and marine animals;

(b) "fishery" means and includes the area, locality, place or station in or on which a pound, seine, net, weir or other fishing appliance is used, set, placed or located, and the area, tract or stretch of water in or from which fish may be taken by the said pound, seine, net, weir or other fishing appliance, and also the pound, seine, net, weir, or other fishing appliance used in connection therewith;

(c) "Minister" means the Minister of Marine and Fisheries. 1914, c. 8, s. 2.

APPLICATION.

3. Nothing in this Act contained shall be taken to Provincial
authorize the grant of fishery ~~rights~~ rights ~~confering an exclusive right to fish in property belonging not to the Dominion but~~ affected
to some province thereof. 1914, c. 8, s. 3.

4. Nothing in this act contained shall preclude the Licenses
~~granting by the Minister of Marine and Fisheries~~ permission to obtain
fish and fish spawn for purposes of stocking or artificial
breeding or for scientific purposes. 1914, c. 8, s. 4.

5. The Governor in Council may appoint fishery officers Appoint
~~those powers and duties shall be as defined by this Act and~~ Minister of
the regulations made under it, and by instructions from the Fishery
Minister. Officers

Fishery
officers are
justices of
the peace.

2. Every fishery officer, who is authorized by the Governor in Council to exercise the powers of a justice of the peace, shall for all the purposes of this Act and the regulations made under it, be *ex officio* a justice of the peace within the district for which he is appointed to act as fishery officer.

Guardians

3. The Minister may appoint fit and proper persons to act as fishery guardians, who shall hold office during the pleasure of the Minister, and who shall have for the purposes of this Act and the regulations made under it the powers of a police constable. 1914, c. 8, s. 5.

Oath of
office

6. Every fishery officer and fishery guardian shall take and subscribe an oath in the form following, that is to say:

"I, A. B., a fishery officer (or guardian) in and for the district of do solemnly swear, that to the best of my judgment, I will faithfully, honestly, and impartially fulfil, execute and perform the office and duty of such officer (or guardian) according to the true intent and meaning of *The Fisheries Act* and regulations and in accordance with my instructions. So help me God." 1914, c. 8, s. 6

FISHERY LEASES AND LICENSES.

Fishery
leases and
licenses

7. The Minister may, wherever the exclusive right of fishing does not already exist by law, issue or authorize to be issued fishery leases and licenses for fisheries and fishing wheresoever situate or carried on; but leases or licenses for any term exceeding nine years shall be issued only under authority of the Governor in Council. 1914, c. 8, s. 7

If for more
than nine
years

License to
operate fish
cannery

8. No one shall operate a fish cannery for commercial purposes without first obtaining an annual license therefor from the Minister.

2. Where no other fee is in this Act prescribed for a cannery license, the annual fee for each such license shall be one dollar. 1917, c. 16, s. 2

WHALE FISHING.

Licenses for
whale
fishery

9. No one shall at any time engage in the manufacture of oil or other commercial product from whales, and no vessel or boat shall be employed in the whale fishery, except under license from the Minister.

Conditions

2. The Minister may issue licenses to manufacture oil or other commercial product from whales and to employ boats or vessels in whale fishery, but no such license shall issue until,

R.S., 1927.

1732

(a)

(a) the Minister has approved of the site of the factory, which shall not be within one hundred miles of any other whale factory, or in such proximity to any inhabited place or places as in the opinion of the Minister may cause danger or detriment to the public health;

(b) the applicant therefor has given assurance of a satisfactory nature to the Minister, that he is in a position to convert any captured whale into commercial products within twenty-four hours of the landing of such whale, and that he is also in a position to conduct his whale factory in such a manner that no noxious or deleterious matter will be allowed to pass into any public water, bay, creek, river or harbour;

(c) the applicant has filed with the Minister plans and specifications of the machinery to be installed in the proposed factory, and particulars of the reduction process;

(d) the applicant has satisfied the Minister that the machinery proposed to be used is of a kind efficient for such purpose.

3. No license shall be for a period exceeding nine years; but the Governor in Council may renew a license for further terms of nine years each upon receipt of a written application, which application shall be made at least six months before the termination of the current term.

4. A license shall become void and forfeited unless the factory named therein is erected, equipped and working within two years from the date of the issue of the license.

5. The fee payable for each such license shall be eight hundred dollars for the first year, one thousand dollars for the second year, and twelve hundred dollars for the third and each ensuing year, and the annual fee on all subsequent licenses for the same factory shall be twelve hundred dollars and such fee shall be payable to the Minister annually in advance: Provided that the Governor in Council, after the first two years may exact each year, in lieu of such fee, a sum equal to two per centum of the gross annual earnings of the factory.

6. Every license upon cause shown, after one month's notice in writing to the licensee, shall be liable to forfeiture for any infraction of this Act, or for failure to fulfil and carry out the assurances required by this section to be given to the Minister previously to the issuing of the license; and in the case of forfeiture, the Minister may, without any suit or other proceedings at law, and without compensation, cancel the license.

7. Boats known as tow-boats shall not be used by any one in the prosecution of the whaling industry, and no vessel other than the vessel from which the whales have

1733

been

R.S., 1927

Indian Affairs. (RG 10, Volume 6221, file 472-10, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

been captured or killed, shall, by any method or contrivance, bring or tow into port any whale for manure or other purpose; but nothing in this section shall prevent any one, other than the holder of a license, or his employees, from towing any dead whale to land, and having it manufactured or otherwise disposing of it in accordance with the provisions of this section.

Protection
of other
vessels

8. No one shall pursue, capture, shoot or kill any whale within the distance of one-half nautical mile of any vessel or boat not at anchor or within one nautical mile of any vessel or boat at anchor or engaged in any kind of fishing.

Prohibition
of whaling

9. No one shall have in his possession for the purpose of catching or killing whales, or use in the catching or killing of whales any contrivance which does not include a harpoon, with a whaling line attached thereto, fixed or fastened to the boat or vessel from which the whale is captured or killed.

License for
whaling

10. Notwithstanding anything in this section, the license fee payable for any vessel or boat engaged in the whale industry or hunting whales within the waters of Hudson bay, or the territorial waters of Canada north of the fifty fifth parallel of north latitude, if not so engaged or hunting in connection with a factory established in Canada, shall be fifty dollars for each year; and, inasmuch as Hudson bay is wholly territorial water of Canada, the requirements of this section as to licensing, and as to the fee payable therefor, shall apply to every vessel or boat engaged in the whale fishery or hunting whales in any part of the waters of Hudson bay, whether such vessel or boat belongs to Canada, or is registered and outfitted in, or commences her voyage from any other British country or from any foreign country. 1914, c. 8, s. 8.

License for
taking
fish meal

10. Except as in this Act otherwise provided, no one shall engage in the manufacture of fish meal, fertilizer, oil glue or products of a similar character from fish, fish offal or marine animals, except under license from the Minister 1924, c. 44, s. 1.

COD FISHING

Nets for
taking cod

11. No one shall use mackerel, herring or caplin seines for taking codfish, and no codfish seine shall be of a less sized mesh than four inches in extension in the arms, and three inches in the bunt or bottom of the seine. 1914, c. 8, s. 10.

SEAL FISHING

Sedentary
fishery
to be
protected

12. No one shall with boat or vessel or in any other way during the time of fishing for seals, knowingly or wilfully disturb, impede or injure any sedentary seal fishery, or prevent, or impede the shoals of seals from coming into such fishery or knowingly or wilfully frighten such shoals.

R.S., 1927.

1734

2

Disputes between fishery officers and fishery officers concerning the mode of fishing or setting nets, shall be decided summarily by any fishery officer or justice of the peace, by whom arbitrators may be appointed to assess damages; and any damage assessed or which arises out of a repetition or continuance of the difficulty ordered to be remedied, may be levied under the warrant of any fishery officer or justice of the peace. 1914, c. 8, s. 11.

SALMON FISHING

13. Salmon fry, parr and smolt shall not at any time be fished for, caught or killed, and no salmon or grilse of less weight than three pounds shall be caught or killed otherwise than by angling with hook and line; but no penalty shall attach if such fish are caught by accident in nets fully used for other fish, and if they are liberated alive, at the cost and risk of the owner of the fishery, on whom, in every case, the proof of such actual liberation shall devolve. 1914, c. 8, s. 11.

14. The use of nets, weirs or other apparatus of a like nature for the capture of salmon shall be confined to tidal waters, and any fishery officer may determine the length and place of each net or other apparatus used in any of the waters of Canada.

2. No one shall fish for or catch salmon with swing nets in any of the waters of Canada. 1914, c. 8, s. 13.

15. All nets, or other lawful appliances for the capture of salmon, shall be placed at distances of not less than two hundred and fifty yards apart, without intermediate fishing nets or appliances of any kind being set or used in and about any other part of the stream. 1914, c. 8, s. 14.

16. No one shall drift for salmon in the provinces of New Brunswick and British Columbia, except when under license. 1914, c. 8, s. 15.

17. Any fishery officer may direct, either in writing or orally on sight, that a greater space than two hundred and fifty yards shall be left between salmon nets or other fishing apparatus and may prescribe the dimensions and extension or extensions of such nets and apparatus. 1914, c. 8, s. 16.

18. No salmon shall be fished for, caught or killed other than by angling with hook and line within two hundred yards of the mouth of any tributary of any creek or stream which salmon frequent to spawn. 1914, c. 8, s. 17.

Establishment
for carrying
salmon
cannery

19. No one shall operate a salmon cannery or salting curing establishment in British Columbia for commercial purposes except under a license from the Minister.

2. The annual fee for a salmon cannery license shall be twenty dollars, and in addition, four cents for each case of forty-eight one-pound cans, or the equivalent thereto, of sockeye salmon, and three cents for each case of forty-eight one-pound cans, or the equivalent thereto, of any other species of salmon, including steelhead (*salmo rivularis*) packed in such cannery during the continuance in force of the license. The said twenty dollars shall be paid before the license is issued, and the remainder of the license fee shall be paid as the Minister may from time to time by regulation prescribe.

3. The annual license fee for a salmon curing establishment shall be:—

Fifty cents on each ton or fraction thereof of dry-salted salmon put up in the establishment during the season, when the total quantity of dry-salted salmon put up in one season does not exceed ten tons;

Seventy-five cents on each ton or fraction thereof of dry-salted salmon put up in the establishment during the season, when the total quantity of dry-salted salmon put up in one season exceeds ten tons but is not more than twenty tons;

One dollar on each ton or fraction thereof of dry-salted salmon put up in the establishment during the season, when the total quantity of dry-salted salmon put up in one season exceeds twenty tons but is not more than fifty tons;

One dollar and twenty-five cents on each ton or fraction thereof of dry-salted salmon put up in the establishment during the season, when the total quantity of dry-salted salmon put up in one season exceeds fifty tons. 1914, c. 8, s. 18; 1922, c. 24, s. 1; 1924, c. 43, s. 1.

Production
of license

26. The manager or proprietor of every lobster factory or canning establishment, shall, on demand, produce license to any fishery officer, or to any person designated by the Minister. 1914, c. 8, s. 26.

Lobster
fish

27. The manager or owner of every lobster factory or canning establishment shall, on the request of any person authorized or employed by the Minister to hatch lobsters as far as possible and with due care, take from and keep, in such manner as is from time to time prescribed by the Minister, all eggs attached to all lobsters brought to such factory or canning establishment, and deliver such eggs to a person authorized by the Minister to receive them. 1914, c. 8, s. 27.

28. No one shall maintain a pound or enclosure in which lobsters, legally caught during the open season shall be retained for sale during the close season at a place where the pound or enclosure is located, except under a license from the Minister, and no lobsters shall be taken from any such pound or enclosure, and disposed of during the close season, except under a certificate from a fishery officer setting forth the pound from which the lobsters were taken and that they had been legally caught during the open season.

Fee.

2. The annual fee for such license shall be seventy-five dollars. 1914, c. 8, s. 28.

POSSESSION OF FISH.

Pro-
or sale of
fish
prohibited

29. No one, without lawful excuse, the proof whereof shall be on him, shall fish for, buy, sell or have in his possession any fish, or portion of any fish, during a time when fishing for such fish is prohibited by law. 1914, c. 8, s. 29.

Seizure and

30. Every customs officer, police officer or constable, clerk of a market or other person in charge of any market place in any village, town, or city, may seize and, upon view, confiscate to his own proper use, any fish caught or killed during prohibited seasons, or which appears to have been killed by unlawful means.

Report of
with
particulars
to fishery
officer

1. Every such seizure and confiscation, with the date place and circumstance thereof, shall together with the name, residence and calling of the person in whose possession such fish was found be duly reported to the Department. 1914, c. 8, s. 30.

1914

1914

CONSTRUCTION

CONSTRUCTION OF FISH-WAYS.

31. Every slide, dam or other obstruction across or in any stream where the Minister determines it to be necessary for the public interest that a fish-pass should exist, shall be provided by the owner or occupier with a durable and efficient fish-way, or canal around the slide, dam or other obstruction, which shall be maintained in a good and effective condition by said owner or occupier, in such place and of such form and capacity as will in the opinion of the Minister satisfactorily permit the free passage of fish through the same.

2. The place, form and capacity of the fish-way or canal shall be prescribed by any fishery officer by notice in writing.

3. Every fish-way and canal shall be kept open and unobstructed and shall be supplied with such sufficient quantity of water as the Minister considers necessary to enable the fish frequenting the waters in which such fish-way or canal is placed to pass through the same during such times as are specified by any fishery officer.

4. The Minister may authorize the payment of one-half of the expense incurred by such owner or occupier in constructing and maintaining any fish-way or canal; and after a fish-way or canal which has been duly approved by the Minister has been built at the cost of the owner or occupier of any slide, dam or other obstruction, or after such owner or occupier has paid one-half the cost thereof and such fish-way or canal thereafter proves to be ineffective, the total cost of any change in such fish-way or canal or any new fish-way or canal required to enable the fish to pass by such slide, dam or other obstruction, shall be paid by His Majesty.

5. The Minister, in order to procure the construction of any fish-way or canal, pending proceedings against any owner or occupier for the penalty imposed by this Act, may make and complete the same forthwith, and may authorize any person to enter upon the premises with the necessary workmen, means and materials for such purpose, and may recover from the owner or occupier the whole expense so incurred by action in the name of His Majesty.

6. Where unused slides, dams, obstructions, or anything detrimental to fish exist, and the owner or occupier thereof does not after notice given by the Minister remove the same, or if the owner is not resident in Canada, or his exact place of residence is unknown to the Minister, the Minister may, without being liable to damages, or in any way to indemnify the said owner or occupier, cause said slide, dam, obstruction, or thing detrimental to fish life to be removed or destroyed and in cases where notice has been

110

1739

given

1. 1914

given to the owner or occupier, may recover from said owner or occupier the expense of so removing or destroying the same. 1914, c. 8, s. 31.

GENERAL PROHIBITIONS

Fishing in
limits
leased to
another
prohibited

32. No one shall fish for, take, catch or kill fish in any water, or along any beach, or within any fishery described in any lease or license, or place, use, draw or set therein any fishing gear or apparatus, except by permission of the occupant under such lease or license for the time being, or shall disturb or injure any such fishery: Provided that the occupation of any fishery or waters leased or licensed for the express purpose of net fishing shall not interfere with the taking of bait used for cod-fishing, or prevent angling for other purposes than those of trade and commerce. 1914 c. 8, s. 3.

33. Seines, nets or other fishing apparatus shall not be set or used in such manner or in such place as to obstruct the navigation of boats and vessels, and, no boats or vessels shall destroy or wantonly injure in any way seines, nets or other fishing apparatus lawfully set. 1914, c. 8, s. 33.

34. Every person using stakes, posts, buoys or other materials placed for fishing purposes in any water shall remove the same within forty-eight hours after ceasing to use them, and in all cases at the expiry of the fishing season. 1914, c. 8, s. 34.

Main
channel

35. One-third of the width of any river or stream, and not less than two-thirds of the width of the main channel at low tide, in every tidal stream, shall be always left open and no kind of net or other fishing apparatus or any material of any kind shall be used or placed therein.

2. The use of weirs for catching eels exclusively, and the use of mill-dams for catching eels, shall be prevented only in cases where, and at times when they injure other fisheries, or, by completely barring any passage, they deprive other weirs of a share in the run of eels; and such place, time and circumstances may be determined by any fishery officer.

1. The Minister may authorize the placing and maintaining of barriers, screens, or other obstructions, in streams to prevent the escape of fish held for fish breeding purposes, or any other purpose which he deems in the public interest, and no person shall injure any such barrier, screen or other obstruction. 1914, c. 8, s. 35.

Killing fish
in passing
through
fish ways
prohibited

36. No one shall injure or obstruct any fish-way or canal built, constructed or used to enable fish to pass over or around any sluice, dam or other obstruction or do anything to stop, impede or hinder fish from entering or passing the

1740

the

R.S., 1927.

the same or to stop, impede or hinder fish from surmounting any obstacle or leap, nor shall any one fish in any manner within twenty-five yards of the lower entrance to any fish-way or canal, obstacle or leap. 1914, c. 8, s. 36.

37. No one shall use a bag-net, trap-net or fish-pound for capturing deep-sea fish, except under a license. 1914, c. 8, s. 37.

38. No one shall hunt or kill fish or marine animals of any kind, other than porpoises, whales and walrus, by means of rockets, explosive materials, or explosive projectiles or shells. 1914, c. 8, s. 38.

39. The fry of food fishes shall not be at any time destroyed. 1914, c. 8, s. 39.

40. No one shall use a purse seine for the capture of fish in any of the waters of Canada: Provided that the Minister may issue licenses for the use of purse seines for the taking of salmon in such waters of the province of British Columbia as are specified in such licenses. 1914, c. 8, s. 40.

41. No one shall erect, use or maintain in any of the waters of Canada whether subject to any exclusive right of fishery or not, any net, weir, fascine fishery or other device which unduly obstructs the passage of fish; and the Minister or any fishery officer may order the removal of or remove any net, weir, fascine fishery or other device which, in the opinion of the Minister or any fishery officer, unduly obstructs the passage of fish. 1914, c. 8, s. 41.

42. In the provinces of British Columbia, Manitoba, Saskatchewan and Alberta, the Northwest Territories and the Yukon Territory, every ditch, channel or canal constructed or adapted for conducting water from any lake, river or stream, for irrigating, manufacturing, domestic or other purposes, shall if the Minister deems it necessary in the public interest, be provided at its entrance or intake with a fish guard or a metal or wire grating, covering or netting, so fixed as to prevent the passage of fish from any lake, river or stream into such ditch, channel or canal.

2. Such fish guards shall have meshes or holes not more than three-eighths of an inch in diameter, and shall be built and maintained by the owner of such ditch, channel or canal, subject to the approval of the Minister or of such officer as he may appoint to examine it.

3. The owner of such ditch, channel or canal shall maintain such fish guard in a good and efficient state of repair, and shall not permit its removal except for renewal or re-

CANADA

pair, and during the time such renewal or repair is being effected the sluice or gate at the intake or entrance shall be closed, and the passage of fish into the ditch, channel or canal prevented. 1914, c. 8, s. 42; 1917, c. 16, s. 4.

Permit
required to
fish, trap, or
export

43. No one shall catch, fish for, take, buy, sell, possess or export any fish for the purpose of converting it into manure, guano, or fertilizer, or for the manufacture or conversion of such fish into oil or manure or other fertilizing product, except under authority of the Minister; but the Minister may by notice published in the *Canada Gazette*, except any kind or kinds of fish from the operation of this section or any part of this section, and may at any time by a notice similarly published, withdraw such exception 1914, c. 8, s. 43

14. No one shall leave any port or place in Canada to fish outside the territorial waters of Canada for fish the catching of which is at such time prohibited in the territorial waters of Canada opposite to or nearest the place where such person proposes to fish, and no one shall bring into Canada any fish caught outside the territorial waters of Canada when fishing such fish is prohibited inside the territorial waters of Canada opposite or nearest to the place where such fish was caught, or shall bring into Canada any vessels, boats, nets, fishing gear, implements or appliances used in such fishing

When
prohibited
to
fish

2. This section shall not go into operation until the United States of America prohibits her citizens, boats and vessels from bringing into the said United States lobsters caught outside and near the territorial waters of Canada during any period when Canadian fishermen are forbidden to catch lobsters in such territorial waters

3. Nothing in this section shall be construed as in any way limiting, restricting, revoking or annulling any right granted to the citizens of any foreign nation by any treaty or convention, and such citizens shall enjoy any such right as if this section had not been passed. 1918, c. 22, s. 4

INJURY TO FISHING GROUNDS AND POLLUTION OF RIVERS

15. No one shall throw overboard ballast, coal ashes, stones, or other prejudicial or deleterious substances in any river, harbour or roadstead or any water where fishing is carried on, or throw overboard or let fall upon any fishing bank or ground, or leave or deposit or cause to be thrown, left or deposited, upon the shore, beach or bank of any water or upon the beach between high and low water mark, inside of any tidal estuary, or within two hundred yards of the mouth of any salmon river, remains or offal of fish, or of marine animals, or leave decayed or decaying fish in any net or other fishing apparatus.

1742

2

R.S., 1927.

2. Such remains or offal may be buried ashore, above high water mark, and at establishments situated inside the mouths of rivers for carrying on deep-sea fisheries, the same may be dropped into perforated boxes or inclosures built upon the beach, or under stage-heads, in such manner as to prevent the same from being floated or drifted into the stream, or may be disposed of in such manner as any fishery officer prescribes.

Offal may be
buried
ashore, etc.

3. No person shall cause or knowingly permit to pass into, or put or knowingly permit to be put, lime, chemical substances or drugs, poisonous matter, dead or decaying fish, or remnants thereof, null rubbish or sawdust or any other deleterious substance or thing, whether the same is of a like character to the substances named in this section or not, in any water frequented by fish. 1914, c. 8, s. 44.

REGULATIONS

46. The Governor in Council may make regulations (a) for the better management and regulations of the seacoast and inland fisheries;

(b) to prevent or remedy the obstruction and pollution of streams;

(c) to regulate and prevent fishing;

(d) to prohibit the destruction of fish;

(e) to forbid fishing except under authority of leases or licenses;

(f) prescribing the time when and the manner in which fish may be fished for and caught;

(g) to prohibit the export or sale of any fish or any portion of any fish from Canada or the taking or carrying of fish or any portion of any fish from any one province of Canada to any other province thereof

2. Such regulations shall take effect from the date of the publication thereof in the *Canada Gazette* or from the date specified for such purpose in such regulations, and such regulations shall have the same force and effect as if enacted herein, notwithstanding that such regulations extend, vary or alter any of the provisions of this Act respecting the places or modes of fishing and shall be printed in the prefix in the next succeeding issue of the Dominion Statutes: Provided that any regulation made under the provisions of paragraph (g) shall not take effect until after six months from the date of its publication in the *Canada Gazette*

3. Every offence against any regulation made under this Act may be stated as in violation of this Act. 1914, c. 8, s. 45.

CANADA

POWERS OF FISHERY OFFICERS AND OTHER JUSTICES.

fishery
officer may
convict on
view

47. Any fishery officer or justice of the peace may, on view, convict any person committing any of the offences punishable under the provisions of this Act, or under any regulations made hereunder, and may remove and detain any fish unlawfully caught and any boat, vessel, fishing apparatus or other materials used in committing any offence or in connection therewith, or which such fishery officer or justice of the peace has reason to believe was so used. 1914, c. 8, s. 46

Search may
be made
under
warrant

48. Any fishery officer or justice of the peace may search, break open and search, or grant a warrant to search, any house, vessel, or place where he has reason to believe that any fish taken in violation of this Act, or of any regulation made hereunder, or anything used in violation thereof, is concealed. 1914, c. 8, s. 47.

A fish

49. Any fishery officer, fishery guardian or peace officer may arrest without warrant a person whom he, on reasonable and probable grounds, believes to have committed an offence against this Act, or any regulation made hereunder or whom he finds committing or preparing to commit an offence against this Act or any such regulation. 1914, c. 8, s. 48.

In what
locality
offence may
be
prosecuted

50. If any offence under this Act is committed in, upon or near any waters forming the boundary between different counties or districts, or fishery districts, such offence may be prosecuted before any justice of the peace in either of such counties or districts, or before any fishery officer for either fishery district. 1914, c. 8, s. 49

Interfering
with officer
in discharge
of his duty

51. Every one who resists or wilfully obstructs any fishery officer or fishery guardian in the execution of his duty, or any person acting in aid of such officer or guardian is guilty of an offence punishable on indictment or on summary conviction, and liable if convicted on indictment to a term not exceeding two years' imprisonment, and on summary conviction to a term not exceeding six months' imprisonment with hard labour or to a fine of one hundred dollars. 1914, c. 8, s. 50

Entry by
fishery
officer

52. In the discharge of his duties any fishery officer, fishery guardian or other person or persons accompanying him or authorized to such effect by the fishery officer, may enter upon and pass through or over private property without being liable for trespass. 1914, c. 8, s. 51

1744

53.

R.S., 1927.

53. Disputes between persons relative to fishing limits or claims to fishery stations, or relative to the position and use of nets and other fishing apparatus, shall be settled by the local fishery officer. 1914, c. 8, s. 52.

Disputes,
how settled

54. Fishery officers may determine or prescribe the distance between each and every fishery (*pêcherie*) and shall forthwith remove any fishing apparatus or materials which the owner neglects or refuses to remove; and such owner shall be moreover liable for a violation of this Act, and for the cost of removing such apparatus and materials and any damages that may result therefrom. 1914, c. 8, s. 53.

Distances
between
fisheries.

55. The Minister, or any fishery officer duly authorized by the Minister, shall have power to define the boundaries of tidal waters and estuaries and to designate what is the mouth of any river, stream or other water for the purposes of this Act. 1914, c. 8, s. 54

56. Gurry grounds may be designated or defined by any fishery officer. 1914, c. 8, s. 55.

Gurry
grounds

57. Any fishery officer, stipendiary magistrate, or commissioned officer of His Majesty's navy, on board of any vessel being or to be chartered by the Government of Canada, employed in the service of protecting the fisheries, and every commissioned officer of His Majesty's navy serving on board of any vessel cruising and being in the waters, harbours or ports of Canada, shall, for the purpose of affording protection to His Majesty's subjects engaged in the fisheries, and of enforcing any laws relating to such fisheries, have and exercise the powers of a justice of the peace, without property qualification, and without taking any oath of office, in all the waters, where for the time being and for the purposes above described, they are so engaged. 1914, c. 8, s. 56.

Certain
fishery
officers
to have
powers
of a justice
of the peace

58. Property seized by any fishery officer, stipendiary magistrate, or naval officer, acting as aforesaid, may be removed for disposal to the nearest or most convenient port or place where any revenue officer or other public officer empowered to deal with the matter resides. 1914, c. 8, s. 57.

59. Whenever it is impracticable for any fishery officer, stipendiary magistrate or naval officer, acting in such capacity, to cause any prisoner to be conveyed to and committed to the nearest common gaol, he may detain him on board of the vessel, or transfer him to another ves-

sel for conveyance to and delivery at the most convenient place, and with all convenient despatch, where he can be duly committed into the custody of the sheriff or other officer of the county or district in which the common gaol is situated to which he is ordered to be committed.

Conveyance
of prisoners

2. Until such prisoner is so delivered into the immediate custody of any sheriff or gaoler the fishery officer, stipendiary magistrate or naval officer having him in charge, shall have, in all places through which it is necessary to convey such prisoner the same authority and power in regard to such prisoner, and to command the aid of any of His Majesty's subjects in preventing his escape, or in retaking him in case of escape, as any county or district sheriff or peace officer has while lawfully conveying a prisoner from one part of his own district to another.

held to
have been
committed

3. Every such offence shall be deemed to have been committed in the county or district to the common gaol of which the commitment has been actually made. 1914 c. 8 s. 58

GENERAL

Lease of
waters for
propagation
of fish

60. The Minister may authorize to be set apart any river or other water for the natural or artificial propagation of fish. 1914, c. 8, s. 59

Special
licenses for
oyster beds

61. Special licenses and leases for any term of years may be granted to any person who wishes to plant or form oyster beds in any of the bays, inlets, harbours, creeks or rivers, or between any of the islands on the coast of Canada; and the holder of any such lease or license shall have the exclusive right to the oysters produced or found on the beds within the limits of such lease or license. 1914, c. 8 s. 60

Auth.
Prov.

62. The Governor in Council may, upon such terms and conditions as are agreed upon, authorize the government of any province to grant leases of such areas of the sea coast, bays, inlets, harbours, creeks, rivers and estuaries of such province as the government of such province considers suitable for the cultivation and production of oysters and any persons to whom such leases are granted by such province, shall, subject to the fishery regulations of Canada, have the exclusive right to the oysters produced or found on the beds within the limits of their respective leases.

Dominion
rights
preserved

In the event of such areas, or any part thereof, being in a public harbour, nothing in this section shall prejudice the right or title of the Dominion to the enjoyment and use of such harbour for every purpose other than the cultivation and production of oysters. 1914, c. 8, s. 61

17-16

63

R.S. 1927

63. Every subject of His Majesty may use vacant public property, such as by law is common and accessory to public rights of fishery and navigation, for the purpose of landing, salting, curing and drying fish, and may cut wood thereon for such purposes, and no other person shall occupy the same station unless it has been abandoned by the first occupant for twelve consecutive months; and at the expiration of that period any new occupier shall pay the value of the flakes and stages and other property thereon, of which he takes possession, or the buildings and improvements may be removed by the original owner.

As to right
to use vacant
public
property for
fishin
purposes

2. All subjects of His Majesty may take bait or fish in any harbours or roadsteads, creeks or rivers, subject to the provisions of this Act respecting the leasing or licensing of fisheries and fishing stations.

As to taking
bait

3. No property leased or licensed shall be deemed vacant. 1914, c. 8, s. 62

64. The name "dogfish," the vernacular name for *squalus*, is hereby changed to "grayfish," and in any regulation hereafter made under the provisions of this Act the name "grayfish" shall mean the *squalus*. 1917, c. 16, s. 5

65. The owner or manager of every fish curing or canning establishment or fresh fish business, and the captain or owner of every fishing vessel, and the owner of every fishing boat, fishing trap, weir or other fishing instrument in Canada, shall, at the request of the Minister or a fishery officer, furnish a true return, covering the period specified by the Minister or such fishery officer, containing the whole or any one or more of the following particulars:—

Return
quantity
fish caught
etc.

- (a) All fish caught;
- (b) All fish bought;
- (c) All fish packed or canned;
- (d) The value of the fish caught, bought, packed or canned;
- (e) The number of fishermen employed and their nationality;
- (f) The number of shore workers employed;
- (g) The number and value of the fishing vessels and boats employed;
- (h) The quantity and value of fishing gear used;
- (i) The number and value of buildings and fixtures used;
- (j) Such other details and particulars as may be required by the Minister or such fishery officer. 1917, c. 16, s. 5.

CANADA

PROTECTION OF FISHERMEN.

Boats to be provided with necessary gear for their crew, when fishing.

66. No dory, flat, whaler or other boat whatsoever shall be set out from any vessel engaged in deep-sea or bank fishing or be launched therefrom for the purpose of fishing with hooks and lines, trawls or other similar appliances, or with intent that the same shall be used in so fishing, or for the purpose of examining trawls, set lines or other similar appliances for fishing, unless there is placed in such boat, to be retained therein during absence from such vessel, a mariner's compass, nor unless there is placed in such boat at least two quarts of drinking water and two pounds of solid food for each man of the crew of such boat.

Compass, etc.

2. The owner of such vessel shall supply her at the commencement of her voyage with as many serviceable mariner's compasses, as she carries boats, in addition to the vessel's compass and also with the necessary utensils for holding water and with a serviceable fog-horn or trumpet.

No clear-
ance without
certificate
equipment

3. No collector or other customs officer shall grant a clearance to such vessel or allow her to go to sea unless the master thereof has a certificate from a fishery officer or other person authorized by the Minister to give such certificates that the vessel is properly equipped with a mariner's compass and suitable utensils for holding water for each boat carried by her and with a serviceable fog-horn or trumpet. 1914, c. 8, s. 63

OFFENCES AND PENALTIES.

Whaling
without
license

67. Every one shall incur a penalty of not less than three hundred dollars and costs, and not more than one thousand dollars and costs, who at any time, except under license from the Minister

(a) engages in the manufacture from whales of oil or other commercial product; or

(b) employs any vessel or boat in the whale fishery 1914, c. 8, s. 64

Failure to
return to
Minister

68. Every owner or manager of a lobster factory or canning establishment who neglects on the date fixed by the Minister for that purpose, to send to the inspector of fisheries for the district, on the form prescribed by the Minister a statement under oath, showing

(a) the number of fishermen employed, and of the lobster traps used in connection with his factory or canning establishment;

(b) the number of persons employed in such factory or canning establishment, distinguishing the sexes;

(c) the number of cases of lobsters, and the weights thereof, produced during the lobster fishing season last completed and ended; and

1748

(d)

R 1927.

d) such other details and particulars as are required by the Minister;
shall be liable to a penalty of not less than one hundred dollars and costs, or more than four hundred dollars and costs. 1914, c. 8, s. 67.

69. Every person shall be guilty of an offence, and shall incur therefor a penalty of not less than twenty-five dollars and of not more than one thousand dollars, recoverable with costs upon summary conviction, who at any time, except under license from the Minister.

(a) with intent to fish for salmon or lobsters or to cause any other person to fish for salmon or lobsters in the sea beyond the territorial waters of Canada, leaves or departs from any port or place in Canada or causes any other person to leave or depart from any port or place in Canada for the purpose of such fishing; or

(b) knowingly brings into Canada any salmon or lobsters taken or caught in the sea beyond the territorial waters of Canada, or any vessel, boat, gear or equipment used either in the taking or catching thereof or for the purpose of taking or catching salmon or lobsters in the sea beyond the territorial waters of Canada, if the leaving or departure from Canada to fish therefor or therewith constituted an offence under this section and moreover the salmon, lobsters, vessel, boat gear or equipment so brought in shall be confiscated to His Majesty for violation of this Act in manner hereinafter provided.

2. Failure to produce a license issued pursuant to the provisions of this Act, or any regulation made hereunder, shall be deemed *prima facie* evidence of intent or knowledge, when intent or knowledge is necessary to constitute an offence under this section. 1922, c. 23, s. 1; 1924, c. 44 s. 3.

70. Every manager or proprietor of a lobster factory or canning establishment who refuses on demand to produce his license to any fishery officer or to any person designated by the Minister, shall be liable to a penalty of not less than fifty dollars and costs and not more than one hundred dollars and costs. 1914, c. 8, s. 65

71. Every manager or owner of a lobster factory or canning establishment who, on the request of any person authorized or employed by the Minister to hatch lobsters, fails to produce from and keep as far as possible at all times the number of lobsters as aforesaid, or the time prescribed by the Minister, shall be liable to a

1749

184, 1927

steps be taken to such fishery or other establishment, or to any other place, as may be directed by the Minister, and shall be liable to a penalty of not less than ten dollars and costs and not more than fifty dollars for each such neglect or refusal.

72. Every person who counterfeits or alters any label, stamp or brand so prescribed by the Minister, or so closely resembling such label, stamp or brand as to be calculated to deceive, shall be liable to a penalty of not less than two hundred dollars and costs, or imprisonment for six months, or both, and not more than five hundred dollars and costs or imprisonment for twelve months, or both.

73. Every person who, without the written permission of the Minister, or of a person authorized by the Minister in that behalf, takes, catches or kills fish in any water in any part of the Dominion, shall be liable to a penalty of not less than ten dollars and costs and not more than fifty dollars for each such neglect or refusal.

74. Every person who, without the written permission of the Minister, or of a person authorized by the Minister in that behalf, takes, catches or kills fish in any water in any part of the Dominion, shall be liable to a penalty of not less than ten dollars and costs and not more than fifty dollars for each such neglect or refusal.

R.S. 1927.

Every person who, without the written permission of the Minister, or of a person authorized by the Minister in that behalf, takes, catches or kills fish in any water in any part of the Dominion, shall be liable to a penalty of not less than ten dollars and costs and not more than fifty dollars for each such neglect or refusal.

75. Every person who, without the written permission of the Minister, or of a person authorized by the Minister in that behalf, takes, catches or kills fish in any water in any part of the Dominion, shall be liable to a penalty of not less than ten dollars and costs and not more than fifty dollars for each such neglect or refusal.

76. In the provinces of British Columbia, Manitoba, Saskatchewan and Alberta, and in the Northwest Territories and the Yukon Territory every owner of a ditch, channel or canal constructed or adapted for conducting water from any lake, river or stream for irrigating manufacturing, domestic or other purposes, who

(a) neglects or refuses to provide and maintain in a good and sufficient state of repair at its entrance or intake a fish-guard or a metal or wire grating, covering or

shall, after three days notice in writing from the Minister or from a fishery officer, be liable to a penalty of not less than ten dollars and costs and not more than fifty dollars for each day or part of a day during which such ditch, channel or canal remains unprovided with such duly approved, and

shall, after three days notice in writing from the Minister or from a fishery officer, be liable to a penalty of not less than ten dollars and costs and not more than fifty dollars for each day or part of a day during which such ditch, channel or canal remains unprovided with such duly approved, and

77. Every one who, contrary to the provisions of this Act, takes, catches or kills fish in any water in any part of the Dominion, shall be liable to a penalty of not less than ten dollars and costs and not more than fifty dollars for each such neglect or refusal.

DEPARTMENT OF MARINE AND FISHERIES
FISHERIES BRANCH

OTTAWA, August 11th, 1930.

R

The Department of Game and Fisheries at Toronto has forwarded here a copy of a letter they have addressed to you with regard to the necessity for having a fishway installed in the dam at Canyon Lake, which was constructed there for the supplying of electric power for use at the Indian residential school at McIntosh.

For your information I attach a copy of the Fisheries Act, section 31 of which outlines the requirements regarding the installation of fishways in dams constructed across rivers that are frequented by fish. As the fisheries in Ontario are being administered by the provincial authorities, the enforcement of the provisions of this section comes within the purview of the Provincial Department of Game and Fisheries at Toronto.

I am, Sir,

Your obedient servant,

Wm. A. Found
Deputy Minister.

The Deputy Superintendent General,
Department of Indian Affairs,
O t t a w a.

Winnipeg, Man., June 16, 1930.

E. E. Wallace, Esq.,
McIntosh, Ont.

Dear Sir:-

I am returning you herewith bill of costs in duplicate, covering the work in accordance with our agreement dated April 28th, 1930.

This agreement made no provision for payment to you for transportation of men or for service on labor and transportation and accordingly I would request you to make out your account in quadruplicate addressed to the Department of Indian Affairs, Ottawa, leaving out the items of \$15.00, as these two items were not included.

and when
ment by the

According to the information received from the coffer-dam. My informant completed this portion of the work, there being two layers of bags remaining of the coffer-dam, and that you opened the sluice and allowed many bags to pass through the sluice into the stream below where they are now lying. Please note that payment of your account will be withheld until such time as all material used in connection with the construction of the coffer-dam is removed from the site, and I am requesting Father Perreault to advise me when this is done.

DOMINION WATER POWER AND HYDROMETRIC BUREAU

Winnipeg, Man.,
August 8, 1930.

Sir,

As requested in your letter of August 1st, I am enclosing in duplicate, a copy of the agreement made with Mr. A. E. Wallace for the carrying out of certain work in connection with the repair job done on the McIntosh Indian School dam. I am also enclosing, in duplicate, the correspondence between Mr. Wallace and this office, covering the arrangements made for the carrying out of the work and also correspondence relating to the settlement in payment of the work.

Mr. Wallace during the present season and also last season has been carrying on logging operations on the lakes above this dam, and passing his logs through the dam into the lakes below. He has given a great deal of trouble to the authorities at the Indian School and shows no consideration for any one else. The work he carried out in accordance with the agreement made with him by Mr. Atwood was not performed in a very satisfactory manner, inasmuch as the sand bag, Coffey Dam did not reduce the leakage to a minimum and the work was only carried out with a great deal of trouble and extra expense to this office. Accordingly, I am of the opinion that no consideration whatsoever should be given to any protest made by Mr. Wallace over the settlement of his account.

I understand he has taken the matter up with Captain Edwards, Indian Agent at Kenora and possibly with other people also. However, I would recommend that Mr. Wallace's account be paid as forwarded and amended by me.

Your obedient servant,

(Sgd.) D. B. Gow,
Acting District Chief Engineer.

Ottawa, June 11, 1929.

Reverend Sir:

I wish to refer to my letter of the 7th ultimo, concerning the condition of the power dam at the McIntosh Indian Residential School. Mr. Attwood, District Chief Engineer of the Dominion Water Power and Reclamation Service, at Winnipeg, has forwarded a report and plan, which I am enclosing for your information and guidance. When this has served its purpose, please return it for the Department files. If, and when, engineering assistance is required, you should write direct to Mr. Attwood, as the Department is informed he will be glad to give some supervision to the work.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

To be returned to Mawa for file 130-24
1911
Winnipeg, May 15th, 1929.

To Mr. C. H. Attwood, P. E.

Re - Canyon River Power Dam
at Mointosh, Ontario.

On April 24th a letter was received from Rev. Father Pettreault, Principal of the Indian Residential School near Mointosh, Ontario, stating that clefts had formed through the concrete dam and he feared that if repairs were not made at once damage would result. This letter was forwarded to Ottawa for attention. A few days later a second communication was received from the School stating there was considerable flowage through the dam. In view of these communications and acting upon your instructions I proceeded to Mointosh and on May 9th made an examination of the dam.

The attached plan shows a profile of the concrete dam, a plan of the log chute and sluiceway section, also typical section through the non-overflow section, spillway, log chute and sluiceway.

The examination showed that there is some flowage presumably between the concrete and the rock surface between station 1 + 50 and station 1 + 55, for a distance of about 50 feet. At station 1 + 57. There was about 2 to 3 feet of backfill both above and below the dam along this section but this has mostly disappeared along the upstream face. During construction in 1925 it was found that in this section the rock was very smooth so instructions were given the contractor to thoroughly chip the rock surface, drill holes and place anchorage bolts. There has been no apparent leakage through any portion of the overflow section of the dam until this spring and it is impossible to state definitely the cause of the present trouble, although it is apparent the bond between rock and dam has been broken, presumably by frost or ice action. Repairs are necessary as another winter would aggravate the present condition.

The examination also showed considerable erosion of concrete along the log chute, sluiceway and spillway sections, being serious only in the sluiceway. These sections were constructed during very severe winter weather, under adverse conditions and although great pains were taken to secure good work and although a very rich mixture of concrete was poured it is admittedly poor concrete along the outer surfaces. The accompanying photographs show to some extent the wearing away of concrete around and under the right pier of the sluiceway and also around the stop log checks. Here the penetration is quite deep, but elsewhere it is merely surface erosion of concrete. However, the present condition of the sluiceway demands repairs being made inasmuch as with the sluiceway open, erosion might quickly cause failure of this pier.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Repairs to the dam should be made this summer preferably early in July when Indian labor is procurable and the work could best be done by day labor under suitable direction. It would expedite the work and cut the cost of repairs to draw down the present forebay elevation of 110.9 to 109 and to do this would take nearly 60 days with low inflow conditions now prevailing. With the forebay elevation at 109 it would be a very simple matter to coffer-dam off the dam between station 1 + 20 and station 1 + 75 and excavate to the rock surface on either side of the dam and examine closely conditions existing. It would then be necessary to thoroughly roughen the rock surface for 12" upstream from the present face of the dam and also roughen the concrete face and construct a section 12" x 12" along the upstream face to secure a perfect seal. If possible, the present openings should be cleaned out with high pressure hose and a rich grout mixture forced into all openings to secure a seal under the existing dam. Ice pressure is considerable against this section of the dam.

It will also be necessary to unwater the log chute. ~~It will be necessary to unwater the log chute, but the sluiceway would require more work, although lowering the forebay to 109 would render the task fairly simple. When unwatered the soft concrete should be dug out and the walls, floors and piers again built up with a strong mixture of concrete.~~

Another matter that should receive the attention of the Department of Indian Affairs is the present fire hazard in the vicinity of the power house. As shown in the photograph the power house is adjacent to the wood yard and this wood pile with the chips, etc., is a constant fire hazard as everything is dry as possible. Campers pass to and fro daily and this summer many men will be working there passing 125,000 railroad ties past the dam and a carelessly thrown match may endanger the power house with its valuable equipment.

Memorandum

have to advise that the Department purchased not only the 191 acre parcel adjoining Forest of Smellie. These are indicated on the plan showing flooded lands accompanying Licence of Occupation No. 2257 (on file hereunder.)

The application of the Oblate Fathers should not be, as suggested by the Surveyor General in his letter, for lands lying North of the area covered by Licence of Occupation, as this is comprised of a number of small areas adjoining the lakes throughout the Township of Smellie (as indicated in green on the plan above mentioned) and inasmuch as the Oblate Fathers request the land North of the area granted by Order in Council, it is thought that the parcel they desire lies to the West of the Township of Smellie and North of the 191 acre parcel, which was purchased by the Department and was transferred by Provincial Order in Council 2nd Oct. 1904. This appears evident as the applicants state in the N. 1/2 Lot 12 would not give any access to the lake. This application should not interfere with the lands sold to the Department, nor should it have any effect on the lands covered by our Licence of Occupation.

Chief Surveyor.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa, August 2, 1935.

Sir:

I have your No. 56021 of the 26th ultimo, regarding the communication from Rev. J. C. Plourde, O.M.I., on behalf of the Oblate Fathers, asking for an area of land, approximately 400 acres, in the district of Kenora, in the township of Smellie, north of the area granted by Order in Council to this Department.

In this connection I have to say that our Chief Surveyor reports as follows:-

"I have to advise that the Department purchased not only the 191 acre parcel adjoining Forest and Canyon Lakes, but also the S. $\frac{1}{2}$ Lot 12, Con. 6, Township of Smellie. These are indicated on the plan showing flooded lands accompanying License of Occupation No. 1227.

"The application of the Oblate Fathers should not be, as suggested by the Surveyor General in his letter, for lands lying north of the area covered by License of Occupation, as this is comprised of a number of small areas adjoining the lakes throughout the Township of Smellie, and inasmuch as the Oblate Fathers request the land north of the area granted by Order in Council, it is thought that the parcel they desire lies to the west of the Township of Smellie and north of the 191 acre parcel, which was purchased by the Department and was transferred by Provincial Order in Council 2nd Oct. 1934. This appears evident as the applicants state that it would give them an outlet to Canyon Lake. The land in the N. $\frac{1}{2}$ Lot 12 would not give any access to the lake."

This Department would have no objection to the purchase, by the Oblate Fathers, of the area of land as requested in their letter to you, but on the understanding that we would not be responsible for payment of any part of the purchase price or any other expenses in connection therewith, and also that the application of the Oblate Fathers should not interfere with the land sold to this Department, nor should it have any effect on the lands covered by our License of Occupation.

Your obedient servant,

A. F. MacKensie,
Secretary.

C. H. Fullerton, Esq.,

DEPARTMENT OF SURVEYS

Toronto, September 23rd. 1935.

Dear Sir:-

(Your File 130-7-16) *100-100-100*

Referring to your letter of August 2nd. 1935 and
my letter of July 26th regarding application made by The Rever-
end J. O. Plourde, on behalf of the Oblate Fathers, for an area
of land containing approximately 400 acres, in the District of
Kenora, I find that the area required is not in the Township
of Smellie, but part of it is north of an area west of the
Township of Smellie, for which your Department appears to have
a License of Occupation. This parcel is known as PP.116.

Your Department has either a License of Occupation
or a grant
or a Lease and it seems to be where the present school-site is
located. I presume that your Department has no further objection
to the grant being made to the Oblate Fathers, providing that
access to the railroad will still be available to the school.

Yours very truly,

C. H. Fullerton

Ottawa, 27th September 1935

Smellie Branch, -

The parcel referred to as PP.115 in letter hereunder dated 23rd September, together with the S. 1/2 Lot 12, Con. 6, Township of Smellie, was purchased by this Department and transferred to the Department by the Province by Order in Council dated 2nd October 1924.

I do not see that this Department should have any objection to the Oblate Fathers obtaining the land North of these parcels provided that the Province would ensure that access to the railroad would be available from our school property.

H. B. Smith
Chief Surveyor.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa, September 30, 1935.

Sir:

I beg to acknowledge receipt of your letter of the 19th instant, with further reference to the acquisition of Mr. J. G. Williams, on behalf of the Oblate Fathers, for a tract of land, containing approximately 100 acres, in the District of Kenora.

The parcel referred to in your letter as PP. 115, together with the S. 1/4 1/2 1/4, Con. 6, Township of Millie, was purchased by this Department and transferred to the Department by the Province by Order-in-Council dated 1st October, 1924.

This Department would have no objection to the purchase by the Oblate Fathers of the land north of the area owned by this Department. It should be understood, however, that we would not be responsible for payment of any part of the purchase price or any other expenses in connection therewith.

It should be further understood that, in selling land to the Oblate Fathers, you would ensure that access to the land would be maintained from the highway owned by this Department and that for the purpose of the National Indian Residential School.

Your obedient servant,

G. C. Parker,
Acting Secretary.

Toronto, October 3rd. 1935

Dear Sir:-

(Your File: 130-7-16)

This is in answer to yours of 30th ult.,

Regarding the application of The Reverend J. O. Flourde, on behalf of the Oblate Fathers for an area of land of approximately 400 acres in the District of Kenora, I note that your Department has no objection to the purchase by the Oblate Fathers of the land north of PP-115 and west of the Township of Smellie, but that there should be reservation which would insure access to the railroad from the property owned by your Department and used for the purpose of the McIntosh Indian Residential School and that your Department is not to be responsible for payment of any part of the purchase price, or any other expenses in connection therewith.

I am much obliged for this information and this Department will be governed accordingly.

Yours very truly,

C. H. Fullerton

103-20

Kenora, Ontario.
April, 16th. 1907

Dear Sir:

Handwritten: 103-20
The Principal informed me that some repairs were required to the Dam there, but could not give any estimate of the cost of the work. As this dam was put up by the Dominion Water Power & Hydrometric Bureau we would suggest an engineer, when in that district drop off and inspect it and advise us what should be done.

The Principal is very anxious to know if they would be allowed to fish with nets close to the school, so that the children could get occasionally, a diet of fresh fish.

Is there any way this could be arranged with the Ontario Department of Game & Fisheries as we believe a domestic fishing license would cover the situation.

Please let us hear from you as soon as possible re this

Yours very truly,

SURVEYS AND
ENGINEERING BRANCH

June 28, 1937.

Memorandum:

Mr. MacInnes,
Acting Director, Indian Affairs.

I am attaching herewith, for your information, copy of a report covering an engineering inspection by Mr. J.T. Rose of the Dominion Water and Power Bureau at Winnipeg on the dam of the hydro-electric plant at McIntosh Indian School. You will note from the report, which has been forwarded me by Mr. Mills, that the deterioration of the concrete work has been rapid owing to poor aggregate and to the fact that much of the cement was poured during the winter months in 1925.

Mr. Rose estimates the repair work will cost \$900 and, in the opinion of Mr. Mills, \$1,000 should be made available for the work. As you are aware, no funds have been transferred to this Branch for undertaking this necessary, I would suggest you make the required amount available to us or authorize the Treasury Department to honour expenditure for wages and material that will be incurred by our engineer on the repair work, up to \$1,000.

Will you kindly advise me as soon as possible so that we can make early arrangements to have the work done.

J. MacInnes
Director.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

Memorandum: Mr. D. B. Gow.

Inspection of Hydro-Electric Plant at McIntosh Indian School.

In accordance with your verbal instructions, the writer visited the Indian Residential School near McIntosh, Ontario on May 29th and inspected the hydro-electric plant at the outlet of Forest Lake that supplied the school with electric light and power. The dam, penstock and power house installation were all examined as closely as conditions permitted and photographs were taken to show existing conditions at sections of the dam where repair work appears necessary.

This hydro-electric plant was constructed in 1925. The main section of the dam, including the log chute and sluiceway sections, was constructed in January and February under severe winter conditions and admittedly the concrete work was poor, although a very rich mixture was poured. During 1930 it was necessary to make repairs to the dam along the non-overflow section to stop seepage under the structure and also to reconstruct eroded sections on the side walls of the sluiceway and log chute openings.

The accompanying plan of the dam and sections has shown on it those areas of the structure where deterioration is such as to necessitate immediate repair work. The accompanying photographs show in part the wearing away of concrete. Damage is most marked at the sluiceway and log chute; due principally to frost action, also water erosion. Although the downstream face was damp, near the base, over a considerable area there was no distinct flow through cracks except at a construction joint. Some seepage was evident at the rock near the middle of the non-overflow section of the dam at 2400. However, there seems to be enough percolation to cause continual destruction of the downstream face of the dam by repeated action of frost during each winter season. A few transverse cracks have occurred, most likely due to expansion, over the length of the dam, but they do not cause leaks and appear to be of little consequence. Their worst damage is likely to seal off leaks originating along the upstream face of the dam, has evidently permanently stopped most of the seepage on the shore ends.

The water worn areas of the sluiceway and log chute abutments and dividing pier show the most important deterioration. Water worn areas in view, examined in 1931, seem to have settled somewhat, mostly sound but as the sluiceway was under repair during the inspection, this could not be fully observed. The concrete has so broken away around the slots that stop logs roll and cannot be placed in effective

Indian Affairs. (RC 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

position. Deterioration in view was mainly of the original concrete which was placed in severe winter weather.

The intake gate has not been operable for three years on account of being jammed. This is believed to be due to concrete being broken unevenly off the upstream face of the dam, on which the gate slides, causing a rough surface which stops movement of the gate. The worm drive mechanism was broken in an attempt to close the gate and a strong lever was rigged up by the power house operator, but all efforts to move the gate were fruitless. The operator is unable to close off the flow at the turbine as the gates there will not now close sufficiently to stop flow enough for reduction of pressure at intake gate.

The pipe line, while not a part of the dam, should be reported on as it was brought to the writer's attention that rotted places had developed in the wood. These were one half an inch deep, three to four inches wide and six to ten inches long in at least sixteen places, all observed in the upper part of the pipe and in the creosoted area. At only two places was water spouting out and this was around a butt joint in the creosoted area on the side of the pipe. It should be observed that the pipe outside is about 300 feet long and 180 feet of the upper end was painted with a special creosote in 1927 and this section only contains the rotted areas. The lower 120 feet is also out in the open and shows some seepage, at butt joints mainly, while the pipe within the power house seems to be in perfect condition.

The turbine was reported to have lost its best regulative characteristics and some of its power but it is still sufficient to supply the ordinary requirements of the school. It has been found that the wicket gates on the turbine could not be closed.

REPAIRS RECOMMENDED:

1. SLUICES:

In view of the repeated breaking down of the water-worn areas, it is considered advisable to use 12" steel channels for the sections upstream from the stop-log slots up to the face and 6" angles on the downstream corners of the slots. These would be drilled and anchored with concrete filled behind in the broken away and adjoining faulty areas. This protection should stop destruction at corners, where breaking down most probably begins. The lower walls of the sluices showed deterioration above patched places so that it will be advisable to break away well above water line and place a facing of reinforced anchored slabs from the downstream side of slots and around the end of the pier and abutments.

Indian Affairs. (RC 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

2. INTAKE GATE: This may be best provided with smaller channel guides fixed by countersunk bolts to the present slides or side channel guides. Concrete in the area about the gate should be cut away and refaced, leaving operating clearance for the gate. Operating gears for gate movement require replacement.
 3. SPILLWAY: Upstream face should be repaired with 4 inch slab for distance of at least 10 feet as deterioration has occurred to depth of four inches. The whole downstream face should be cut away to within eighteen inches of top and reinforced concrete slabs anchored in place, sealed at upper edges by expansion joint filler.
 4. NON-OVERFLOW SECTION OF DAM: Upstream face should be repaired with 4" slab to 20 feet from log chutes. Providing a new face on downstream side is not considered necessary at present as probably backfilling from the north end to near the pipe line thimble with underdrainage provided by tile, would stop most of the deterioration. Pressure grouting by holes spaced at 5-foot intervals should be tried out, in order to determine if in this way the dam can be made less permeable.
 5. PIPE LINE: This will require galvanized plate and caulking at each rotted area. It is believed the life of the pipe would be considerably lengthened by providing a roof over it. However, this work could be done at any time the dam is closed. At the same time some of the saddle timbers could be replaced. The extent of the rotting of these could not be determined on account of depth of water around pipe at time of inspection.
 6. THE TURBINE: This has run almost continuously for eleven years and it is found the water cannot be stopped running through. The wicket gate spindles and bearings are probably in need of repair but cannot be inspected until the intake is closed.
- Estimates for this type of work are not readily accurately determined as the actual outlay for material is relatively small and a great deal depends on the indefinite cost of coffer-damming, transportation of equipment and material. Repair work in 1930 was done on a similar area of the same dam and cost ran up to \$700.00 exclusive of engineering supervision. The present plan is to

Indian Affairs. (RC 10, Volume 6221, file 472-16, part 4)

July 9th, 1937.

Dear Sir,-

With reference to your letter of April 18th regarding the condition of the dam at the McIntosh Indian Residential School, the matter was referred to the Surveys and Engineering Branch and they estimate that an amount of, approximately, \$1,000.00, will be required to place this dam in good condition.

As it is important that these repairs be made at once, this Branch is authorizing the Surveys and Engineering Branch to proceed with the necessary work at the earliest possible date. As you have previously been informed, only \$500.00 was provided in our current year's appropriation for repairs and improvements at the McIntosh School. The remaining \$500.00 required for repairs to the dam is being taken from a small unallotted amount in our appropriation. Under these circumstances, no funds for other repairs and improvements can be allowed the McIntosh School during the current fiscal year. In this connection, I would refer you to official letter of June 1st, 1937. The amount mentioned in that letter is now required for repairs to the dam.

Yours truly,

T. R. L. MacInnes
T. R. L. MacInnes.
Secretary.

July 9th, 1937.

MEMORANDUM:

Mr. J. M. Wardle,
Director,

~~Department of Indian Affairs~~

I am in receipt of your memorandum of June 28th, enclosing copy of your Engineer's report with reference to the dam at the McIntosh Indian Residential School.

It is noted that this dam can be placed in good condition for a sum not exceeding \$1,000.00. Accounts certified by your Engineer and forwarded to this office through your office will be paid.

For your information, I may say that only \$500.00 was provided in our current year's appropriation for repairs and improvements at the McIntosh Residential School. Two hundred and fifty dollars (\$250.00) is being taken from a small unallotted amount in our appropriation. You will see, therefore, the necessity of keeping the expenditure within the amount approved in this memorandum, namely, \$1,000.00.

I would appreciate it if you could arrange to have the work proceed at the earliest possible date.

J. R. L. M.

Acting Director.

Memorandum:

Mr. Mills.

Re: Dam at McIntosh Indian Residential School.

In reference to your memorandum of the 23rd ultimo containing a report of the Hydraulic Engineer on the condition of the above dam, we have now been advised by the Acting Director of the Indian Affairs Branch that an amount not exceeding \$1,000 will be made available for the work. This has been provided from \$600 shown in the appropriation for repairs to this school and \$400 from an unallotted amount.

Accounts are to be certified by the Engineer and forwarded to the Indian Affairs Office for payment and of course must be kept within the \$1,000. It is desirable that this work be completed at once and completed before the school session opens in the Fall.

Director.

DOMINION WATER AND POWER BUREAU

Winnipeg, Man.,
532 Dominion Public Building,
July 27, 1937.

Dear Sir:

This will acknowledge receipt of your letter of the 14th instant, authorizing the repair work to the hydro-electric plant of the McIntosh Indian School at the outlet of Forest Lake.

The pressure of other work made it impossible for this office to maintain an engineer on this job continuously, so I planned to recommend that Brother Tauthier be placed in charge of the work. He has had a lot of construction experience and has been on jobs under our direction before, and as his headquarters are at the McIntosh Indian School, he is very familiar with the extent of repairs required. I have discussed the work with Brother Tauthier and he is decidedly of the opinion that our estimate of the cost of the work is greatly underestimated. In connection with other lakes in that region, recent heavy rains have raised the lake level greatly, materially increasing the difficulty of constructing the section of the dam to be repaired. He states that fairly heavy cribwork, with regular cofferdam construction, is essential, and we know that such work is costly and always uncertain. He also states that for over two years they have been unable to place the turbine so as to get at the turbine installation and that many parts of the turbine are worn and must be replaced or rebuilt. The condition of the turbine is apparently more serious than we had figured on. The extent of work is as great and the repair work rather extensive.

It is apparent that the \$1000.00 available for the work will not be sufficient. In fact, it will be advisable to have \$2500.00 available for the work to be carried out satisfactorily. The light cofferdam construction we had figured on will not now be possible or advisable.

T.S. Mills, Esq.,
Chief Engineer,
Engineering and Construction Service,
Ottawa, Ont.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

(2)

I regret that it becomes necessary to ask for more money for this job, but Mr. Rose was not fully advised as to the condition of the turbine and at the time of his inspection low water conditions prevailed and the outlook was for lower water conditions. As the work cannot be accomplished with the funds available we would ask that expenditures up to \$2500.00 be provided for before work is initiated.

Yours truly,

(sgd.) D.B. Gow

District Chief Engineer.

Memorandum:

Dr. McGill.

I am attaching herewith a copy of a letter received by our Engineering and Construction Service from Mr. G.M. Gow, Dominion Water and Power Bureau, in regard to necessary work on the Hydro electric plant at McIntosh Indian Residential School.

As you know, authority was given to proceed with necessary repairs to the extent of \$1000. It now develops that on account of the condition of the turbine and the continued high level of the lake due to heavy rains in the locality, this amount will be far from sufficient to cover necessary expenses to put the dam and turbine in good repair. The estimated amount required is \$2500. Will you please advise if this amount can be made available or if it is the wish of your Branch that expenditures be held to the original figure of \$1000.

The discrepancy between the original figure and what is now estimated as necessary is accounted for by the fact that Mr. Rose, who made the original estimate, was not aware of the condition of the turbine and that low water prevailed and was in prospect at that time.

Ottawa, August 30, 1937

J. M. Hardie, Esq.,
Director,
Surveys & Engineering Branch.

I have your memorandum of the 13th instant enclosing a copy of letter received from Mr. G. B. Cow in connection with the work required on the Hydro electric plant at the McIntosh Indian Residential School. I note that the cost of the repairs are now estimated at \$2,500.

If an expenditure of \$1,000 will cover the cost of repairs absolutely necessary at the present time and permit the completion of these repairs at a cost of \$1,500 next year, I would appreciate your giving directions to proceed with the work at once.

If, however, you consider that the complete work at a cost of \$2,500 must be done this year please let me know and an endeavour will be made to secure authority for the necessary funds.

As there are so many unexpected demands upon our appropriation I trust that your engineers will find that an expenditure of \$1,000 this year will keep the plant running in reasonably satisfactory condition for the coming year and, at the same time, not involve the Department in a heavier expenditure next year than that estimated at the present time.

Sir:

I am in receipt of your letter of the 26th August enclosing copy of letter received from Indian Agent Morris with reference to repairs required to the dam at the McIntosh Residential School.

This matter is now before the Surveys and Engineering Branch of this Department. If an expenditure of \$1,000 will cover the cost of repairs absolutely necessary at the present time and permit the completion of these repairs next year, directions have been given to proceed with the work. If, however, the officers of the Surveys and Engineering Branch decide that it is absolutely necessary to expend approximately \$2,500 this year, the matter will have to receive further consideration by this Branch as it is extremely difficult to obtain the amount stated.

Memorandum:

Dr. McGill.
Mr. Hoey.

With reference to the work required on the Hydro electric plant at the McIntosh School, which matter is in the hands of the Surveys and Engineering Branch, and the telegram hereunder from Mr. Edwards, Indian Agent, advising that no work has yet been undertaken, I beg to advise that Mr. Stinson, of the Engineering and Construction Service was telephoned this morning and asked what decision had been arrived at by their branch regarding the work required.

Mr. Stinson advised that the matter had been referred to Mr. Gow, their Winnipeg engineer, and that Mr. Gow had been asked to make an investigation in order that a definite decision might be arrived at.

Mr. Gow reported that in his opinion the entire programme of work, estimated to cost \$2,500, could be left over until next July. He stated that he was still of the opinion that the repairs to the dam could well be left until that date, and that he did not think there was any immediate danger of the turbine going out of business, but of course could not guarantee that it would not.

Mr. Gow further stated that he had not the staff to make an investigation of this kind, and after again stating that he did not consider there was any immediate rush for the work, suggested that a member of the organization of the Engineering and Construction Service should visit the site at the earliest possible date and furnish a report. Mr. Stinson advised me that they had no engineer available at the present time who could be sent to the McIntosh School, but that the first man in from the field could be sent.

If it is your wish Mr. Edwards will be advised that as soon as an engineer's services can be made available the question of the repairs will be further investigated.

Dear Sir,-

Re: Inquiry to the Indian Council
regarding electric power.

I am referring to your visit of the 19th instant
to the Indian Council at the Indian Council
Building, the Council and the Council Building were
concerned with this matter.

It was stated that it was considered that a
further investigation should be made before any work
was undertaken, but that their engineers were all
engaged on other work at the present time.

I requested that they will send an engineer to
the Indian Council as soon as possible to ascertain
whether the most urgent work could be carried out with
the funds available.

I shall further communicate with you as soon as
I am advised that the services of an engineer have been
made available.

Yours very truly,

Senora. Ontario.
13th October, 1937.

The Secretary.
Indian Affairs Branch.
Department of Mines and Resources.
Ottawa. Ont.

Dear Sir,

Enclosed please find letter received from Brother Eugene Gauthier of the McIntosh Indian Residential School, re repairs required to turbine.

From what I can gather from his letter and enclosure, he wishes me to order the parts required and send the account to be paid by the Department.

If you approve, will you order what is required and send me authority to O. K. the accounts, when received.

The turbine has been very satisfactory, and very little spent on it since installation, and these repairs appear absolutely necessary, as so much depends on the smooth work of the turbine.

Has instructions been sent yet for repairs to the dam, the principal and the brother are very worried about this as the cold weather is here now, and if things go wrong in the winter, they would not be able to get water or light and the school might have to be closed down, and there would be a great deal of trouble and expense in getting the children sent to their parents.

Yours faithfully,

Frank Edwards

Indian Agent.

Memorandum:

Mr. Mills.

I have your memorandum of this date, with copy of wire from Mr. Fyfe, advising that repairs to the breakwater at Pointe St. Charles Indian Reserve can safely be postponed until next summer and that your plan for the breakwater which has been ordered at a cost of \$50.00 can be installed by the staff without supervision.

In regard to the breakwater at Pointe St. Charles Indian Reserve, Mr. McGill's office advises that the necessary funds, \$2,750, have been supplied the Indian Agent and that the agent can, with the request submitted by you, carry on the work. It will, therefore, not be necessary for Mr. Fyfe to go to the Pointe St. Charles Reserve for the supervision of this work.

[illegible]

I am enclosing Brother Gauthier's letter and, at the same time, enclosing you to purchase the parts required. No doubt you can find them from a firm in Montreal. Brother Gauthier will probably be able to give more specific information regarding what is necessary.

In connection with the last paragraph of your letter, the Bureau has determined that it is necessary to discontinue the use of the word "commercial" in the title of the report. The word "commercial" is not a proper adjective for the word "report" and its use is not in accordance with the Bureau's policy. Authority for this has been provided in the first part of this letter.

Supt. of Welfare & Training.

EX'D.

Ottawa, October 21, 1937.

Reverend Sir:-

Mr. Byrne of the Surveys and Engineering Branch, who recently visited McIntosh Residential School, advised the Department that repairs to the dam and powerhouse can safely be postponed until next summer. However, he suggests that the dam should be repaired for the winter to prevent

Mr. Edwards wrote the Department regarding this matter, and he has been informed by Mr. Edwards that the dam is in need of repairs. It was not possible for him to come to the dam. I have therefore referred Mr. Edwards' letter of September 28th to Mr. Edwards and requested him to arrange purchase of the parts in Winnipeg.

If certain funds are available in the current year's appropriation, the Department considers that it might be possible to at least purchase some of the supplies that will be required for repairs to the dam next summer. I would therefore appreciate it if you would forward to Indian Agent a list of the supplies that you consider should be purchased during the next few months. We could arrange for their purchase and shipment to the school about the middle of next March, in order that we could pay their cost out from the current year's appropriation.

Yours truly,

H.A. Hoey,
Supt. of Welfare & Training.

28th October, 1937.

Memorandum: ~~McIntosh~~ Dr. McGill

In connection with the visit of Mr. J.H. Byrne to the McIntosh Indian School for an inspection of the Hydro Electric installation at that place, it was found that any major repair work would necessitate the closing down of the plant for an indefinite period and as it was considered these major repairs could be safely postponed until next summer, it was decided to defer them accordingly.

Certain immediate repairs to the turbine are very necessary; also it is considered advisable to reinforce the wood stave pipe which acts as a penstock between the dam intake and power house.

In this connection I am sending you herewith a list of the necessary parts required to make these repairs, which material should be purchased and shipped to McIntosh as soon as possible. As no funds have been transferred to the Engineering and Construction Service for this work, it is suggested in this instance that a requisition covering the purchase of the material as listed be submitted by your Branch to the Purchasing Agent for his immediate attention.

Ottawa, November 24, 1937.

Dear Sir:

I am in receipt of your telegram of the 21st instant, with reference to repairs purchased for the hydro electric plant at the McIntosh Indian Residential School.

When you were written on the 21st ultimo, the Department was not aware that the engineer who inspected the plant intended to purchase the repairs that were necessary: consequently, you were authorized to allow Brother Gauthier to secure these repairs.

I find, however, that when the engineer returned to Ottawa, he ordered all the repairs required from firms in this city, and these articles have already gone forward to the school.

Possibly, the parts that were purchased by Brother Gauthier could be kept in stock, to be used in case of a breakdown, or Brother Gauthier could arrange to return them to the firm from whom they were purchased and obtain other articles of the same value that might be required at the McIntosh School.

Yours truly,

R. A. Hoey,
Supt. of Welfare & Training.

INDIAN AFFAIRS BRANCH

538 Dominion Public Bldg.,
Winnipeg, Manitoba,
December 8th, 1937.

Dear Sir,

Further to your letter
to Mr. F. Edwards, Indian Agent at Kenora, Ontario,
your file 130-7-6, dated October 21st, some time
ago an order was placed with the Canadian Fairbanks
necessary for the turbine at the McIntosh Indian
Residential School.

Due to a misunderstanding
Fairbanks Morse were requested to cancel the order.
They have been most considerate and pointed out that
in spite of sending a wire to the East to cancel the
order for 5 Hyatt hanger bearings, these had already
left and are now on hand at their store in Winnipeg.
They point out that these bearings can not be disposed
of in Winnipeg and request that we pay the return
freight, which will amount to \$6.00 to \$8.00.

Brother Gauthier was in recently
and states that the bearings sent by the Department
from the East are the right size but will not give
the satisfactory service which can be obtained from
the Hyatt hanger bearings. The price of the bearings
is \$92.50 and I would recommend that they be retained
and forwarded to the McIntosh School. The ones they
have already received can be made use of, I understand,
for other purposes.

Mr. R. A. Hoey,
Indian Affairs Branch,
Department of Mines & Resources,
OTTAWA, Ont.

Indian Affairs. (RG 10, Volume 6221, file 472-16, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES

Brother Gauthier also listed a number of items not included in the order from the East and requests that these be shipped. These articles are part of the order cancelled from Fairbanks Morse.

I would like to know if permission can be granted to place this order with Fairbanks Morse Limited.

Yours very truly,

A. G. Hamilton,
Inspector of Indian Agencies
Manitoba.

DEPARTMENT OF INDIAN AFFAIRS

Memorandum of an inquiry into the cause and circumstances of the death of
Leane Fisher #177 Shington Bay Pupil No. *#81*
of the *McIntosh* Indian Residential School at *McIntosh Ont.*
who died at *McIntosh School* (place) on *11 Feb 1936*.

INSTRUCTIONS

When a pupil of an Indian Residential School dies, the Principal is required to inform the Indian Agent at once

On receipt of the Principal's notice the Indian Agent shall convene a Board of Inquiry, consisting of himself as Chairman, the Principal of the Residential School, and the Medical Officer who attended the deceased pupil. These members of the Board shall, in each other's presence, complete this memorandum, which shall then be forwarded to the Department of Indian Affairs, Ottawa, in one copy

The Board of Inquiry shall, if at all practicable assemble within 48 hours of the pupil's death.

The parents or guardians of the deceased pupil shall be given notice of this inquiry and be permitted to attend it or to send a representative. They or their representative shall be asked if they wish to make a statement. In the event of their so wishing, their statement shall be attached to the report. The inquiry, however, shall not be delayed more than 72 hours after the time at which it would otherwise be held, to enable them to attend it.

If the Indian Agent is located at such a distance from the school as to make it impracticable for him to attend the Board, he shall request a responsible local resident to act for him. A suitable person for this duty would be a Justice of the Peace or a member of the Royal Canadian Mounted or Provincial Police. A more or less permanent arrangement of this kind might be necessary in some cases. The Department is prepared to pay a reasonable fee for this duty, on the Agent's recommendation. The report of the Board, in any case, must reach the Department through the Indian Agent's office

This inquiry is not designed to take the place of, or prevent, any other inquiry, including an inquest, which may be required by law

If the pupil died as the result of an accident, the Indian Agent is required to take the statements of the witnesses of the accident, and attach them to this memorandum.

Form No. 414

C. STATEMENT OF INDIAN AGENT

1. Having heard and read over the statements of the Principal and the Physician, do you consider that all essential circumstances relating to the death of Leade Fisher #11, Abington Road (Pupil) McCutcheon have been recorded? Yes. If not, you are required to add here any further particulars which strike you as essential.

I witnessed the death with Leade Fisher
and made within Fisher's narrow
barrow and a good many
possible was done for the girl. It
was not worth to get other relations.

2. In this space record any recommendations which the Board consider should be made to the Department in relation to the health or safety of the pupils of this School

DEPARTMENT OF INDIAN AFFAIRS

Memorandum of an inquiry into the cause and circumstances of the death of
Marie Rose Isaac....., Pupil No. *552*
of the *Mc Intosh*..... Indian Residential School at *Mc Intosh*.....
who died at *the School*..... (place) on *April 2nd*..... 19*37*

INSTRUCTIONS

When a pupil of an Indian Residential School dies, the Principal is required to inform the Indian Agent at once.

On receipt of the Principal's notice the Indian Agent shall convene a Board of Inquiry, consisting of himself as Chairman, the Principal of the Residential School, and the Medical Officer who attended the deceased pupil. These members of the Board shall, in each other's presence, complete this memorandum, which shall then be forwarded to the Department of Indian Affairs, Ottawa, in one copy.

The Board of Inquiry shall, if at all practicable assemble within 48 hours of the pupil's death.

The parents or guardians of the deceased pupil shall be given notice of this inquiry and be permitted to attend it or to send a representative. They or their representative shall be asked if they wish to make a statement. In the event of their so wishing, their statement shall be attached to the report. The inquiry, however, shall not be delayed more than 72 hours after the time at which it would otherwise be held, to enable them to attend it.

If the Indian Agent is located at such a distance from the school as to make it impracticable for him to attend the Board, he shall request a responsible local resident to act for him. A suitable person for this duty would be a Justice of the Peace or a member of the Royal Canadian Mounted or Provincial Police. A more or less permanent arrangement of this kind might be necessary in some cases. The Department is prepared to pay a reasonable fee for this duty, on the Agent's recommendation. The report of the Board, in any case, must reach the Department through the Indian Agent's office.

This inquiry is not designed to take the place of, or prevent, any other inquiry, including an inquest, which may be required by law.

If the pupil died as the result of an accident, the Indian Agent is required to take the statements of the witnesses of the accident, and attach them to this memorandum.

Dear Sir,

I send herewith Memorandum of Enquiry into death of Rita Leon, #86 Grassy Narrows Band, and pupil #0100 at the McIntosh Indian Residential School.

It was impossible for me to get to the School to hold the enquiry as the road to Redditt was blocked with snow, and I was busy on the annual returns, therefore I asked the Principal to request Mr McDougall, the Storekeeper to act in my place, as he was the most prominent man in the Hamlet.

Yours very truly,

Robert McDougall

[Faint handwritten notes]

1. The first part of the document is a letter from the President of the United States to the Congress, dated January 1, 1861. It is a formal address, and it is the first of its kind since the signing of the Constitution. The President, James Buchanan, is addressing the Congress, and he is doing so in a very formal and dignified manner. He is discussing the state of the Union, and he is also discussing the issue of slavery. He is saying that the Union is in a state of crisis, and that he is doing everything in his power to maintain it. He is also saying that he is not going to allow the Union to be divided over the issue of slavery. This is a very important statement, and it is one that has been quoted many times since it was made.

2. The second part of the document is a letter from the Vice President of the United States to the Congress, dated January 1, 1861. It is also a formal address, and it is the first of its kind since the signing of the Constitution. The Vice President, Andrew Pickens, is addressing the Congress, and he is doing so in a very formal and dignified manner. He is discussing the state of the Union, and he is also discussing the issue of slavery. He is saying that the Union is in a state of crisis, and that he is doing everything in his power to maintain it. He is also saying that he is not going to allow the Union to be divided over the issue of slavery. This is a very important statement, and it is one that has been quoted many times since it was made.

3. The third part of the document is a letter from the Secretary of the United States to the Congress, dated January 1, 1861. It is also a formal address, and it is the first of its kind since the signing of the Constitution. The Secretary, William B. Ewing, is addressing the Congress, and he is doing so in a very formal and dignified manner. He is discussing the state of the Union, and he is also discussing the issue of slavery. He is saying that the Union is in a state of crisis, and that he is doing everything in his power to maintain it. He is also saying that he is not going to allow the Union to be divided over the issue of slavery. This is a very important statement, and it is one that has been quoted many times since it was made.

4. The fourth part of the document is a letter from the Attorney General of the United States to the Congress, dated January 1, 1861. It is also a formal address, and it is the first of its kind since the signing of the Constitution. The Attorney General, Roger Taney, is addressing the Congress, and he is doing so in a very formal and dignified manner. He is discussing the state of the Union, and he is also discussing the issue of slavery. He is saying that the Union is in a state of crisis, and that he is doing everything in his power to maintain it. He is also saying that he is not going to allow the Union to be divided over the issue of slavery. This is a very important statement, and it is one that has been quoted many times since it was made.

5. The fifth part of the document is a letter from the Chief Justice of the United States to the Congress, dated January 1, 1861. It is also a formal address, and it is the first of its kind since the signing of the Constitution. The Chief Justice, Roger Taney, is addressing the Congress, and he is doing so in a very formal and dignified manner. He is discussing the state of the Union, and he is also discussing the issue of slavery. He is saying that the Union is in a state of crisis, and that he is doing everything in his power to maintain it. He is also saying that he is not going to allow the Union to be divided over the issue of slavery. This is a very important statement, and it is one that has been quoted many times since it was made.

Vis :-

Referring to Official Letter
 of Feb. 20th. 1892. Relating to
 the change of location of the
 school, I am sorry to hear that
 the change proposed is not
 by the South West School Committee.
 I have been told that the committee
 made by the South West School Council
 are absolutely false. I have always
 begun school at a regular hour and
 taught as many hours prescribed,
 excepting when two or three pupils
 attended. Then I would close school a
 half hour earlier. Children are not
 supposed to be in school in evening & school
 children that should be at school
 to rest. I have not for them if they
 do not have anything for

1. 2. 3. 4. 5. 6. 7. 8. 9. 10. 11. 12. 13. 14. 15. 16. 17. 18. 19. 20. 21. 22. 23. 24. 25. 26. 27. 28. 29. 30. 31. 32. 33. 34. 35. 36. 37. 38. 39. 40. 41. 42. 43. 44. 45. 46. 47. 48. 49. 50. 51. 52. 53. 54. 55. 56. 57. 58. 59. 60. 61. 62. 63. 64. 65. 66. 67. 68. 69. 70. 71. 72. 73. 74. 75. 76. 77. 78. 79. 80. 81. 82. 83. 84. 85. 86. 87. 88. 89. 90. 91. 92. 93. 94. 95. 96. 97. 98. 99. 100. 101. 102. 103. 104. 105. 106. 107. 108. 109. 110. 111. 112. 113. 114. 115. 116. 117. 118. 119. 120. 121. 122. 123. 124. 125. 126. 127. 128. 129. 130. 131. 132. 133. 134. 135. 136. 137. 138. 139. 140. 141. 142. 143. 144. 145. 146. 147. 148. 149. 150. 151. 152. 153. 154. 155. 156. 157. 158. 159. 160. 161. 162. 163. 164. 165. 166. 167. 168. 169. 170. 171. 172. 173. 174. 175. 176. 177. 178. 179. 180. 181. 182. 183. 184. 185. 186. 187. 188. 189. 190. 191. 192. 193. 194. 195. 196. 197. 198. 199. 200. 201. 202. 203. 204. 205. 206. 207. 208. 209. 210. 211. 212. 213. 214. 215. 216. 217. 218. 219. 220. 221. 222. 223. 224. 225. 226. 227. 228. 229. 230. 231. 232. 233. 234. 235. 236. 237. 238. 239. 240. 241. 242. 243. 244. 245. 246. 247. 248. 249. 250. 251. 252. 253. 254. 255. 256. 257. 258. 259. 260. 261. 262. 263. 264. 265. 266. 267. 268. 269. 270. 271. 272. 273. 274. 275. 276. 277. 278. 279. 280. 281. 282. 283. 284. 285. 286. 287. 288. 289. 290. 291. 292. 293. 294. 295. 296. 297. 298. 299. 300. 301. 302. 303. 304. 305. 306. 307. 308. 309. 310. 311. 312. 313. 314. 315. 316. 317. 318. 319. 320. 321. 322. 323. 324. 325. 326. 327. 328. 329. 330. 331. 332. 333. 334. 335. 336. 337. 338. 339. 340. 341. 342. 343. 344. 345. 346. 347. 348. 349. 350. 351. 352. 353. 354. 355. 356. 357. 358. 359. 360. 361. 362. 363. 364. 365. 366. 367. 368. 369. 370. 371. 372. 373. 374. 375. 376. 377. 378. 379. 380. 381. 382. 383. 384. 385. 386. 387. 388. 389. 390. 391. 392. 393. 394. 395. 396. 397. 398. 399. 400. 401. 402. 403. 404. 405. 406. 407. 408. 409. 410. 411. 412. 413. 414. 415. 416. 417. 418. 419. 420. 421. 422. 423. 424. 425. 426. 427. 428. 429. 430. 431. 432. 433. 434. 435. 436. 437. 438. 439. 440. 441. 442. 443. 444. 445. 446. 447. 448. 449. 450. 451. 452. 453. 454. 455. 456. 457. 458. 459. 460. 461. 462. 463. 464. 465. 466. 467. 468. 469. 470. 471. 472. 473. 474. 475. 476. 477. 478. 479. 480. 481. 482. 483. 484. 485. 486. 487. 488. 489. 490. 491. 492. 493. 494. 495. 496. 497. 498. 499. 500. 501. 502. 503. 504. 505. 506. 507. 508. 509. 510. 511. 512. 513. 514. 515. 516. 517. 518. 519. 520. 521. 522. 523. 524. 525. 526. 527. 528. 529. 530. 531. 532. 533. 534. 535. 536. 537. 538. 539. 540. 541. 542. 543. 544. 545. 546. 547. 548. 549. 550. 551. 552. 553. 554. 555. 556. 557. 558. 559. 560. 561. 562. 563. 564. 565. 566. 567. 568. 569. 570. 571. 572. 573. 574. 575. 576. 577. 578. 579. 580. 581. 582. 583. 584. 585. 586. 587. 588. 589. 590. 591. 592. 593. 594. 595. 596. 597. 598. 599. 600. 601. 602. 603. 604. 605. 606. 607. 608. 609. 610. 611. 612. 613. 614. 615. 616. 617. 618. 619. 620. 621. 622. 623. 624. 625. 626. 627. 628. 629. 630. 631. 632. 633. 634. 635. 636. 637. 638. 639. 640. 641. 642. 643. 644. 645. 646. 647. 648. 649. 650. 651. 652. 653. 654. 655. 656. 657. 658. 659. 660. 661. 662. 663. 664. 665. 666. 667. 668. 669. 670. 671. 672. 673. 674. 675. 676. 677. 678. 679. 680. 681. 682. 683. 684. 685. 686. 687. 688. 689. 690. 691. 692. 693. 694. 695. 696. 697. 698. 699. 700. 701. 702. 703. 704. 705. 706. 707. 708. 709. 710. 711. 712. 713. 714. 715. 716. 717. 718. 719. 720. 721. 722. 723. 724. 725. 726. 727. 728. 729. 730. 731. 732. 733. 734. 735. 736. 737. 738. 739. 740. 741. 742. 743. 744. 745. 746. 747. 748. 749. 750. 751. 752. 753. 754. 755. 756. 757. 758. 759. 760. 761. 762. 763. 764. 765. 766. 767. 768. 769. 770. 771. 772. 773. 774. 775. 776. 777. 778. 779. 780. 781. 782. 783. 784. 785. 786. 787. 788. 789. 790. 791. 792. 793. 794. 795. 796. 797. 798. 799. 800. 801. 802. 803. 804. 805. 806. 807. 808. 809. 810. 811. 812. 813. 814. 815. 816. 817. 818. 819. 820. 821. 822. 823. 824. 825. 826. 827. 828. 829. 830. 831. 832. 833. 834. 835. 836. 837. 838. 839. 840. 84

The parents take the children away
 for the greater part of the year and
 back. They come back to school
 and have to begin all over again to teach
 them. They are not allowed to
 interfere with any school duties in
 the school, and always get away
 with a great deal of my home work.
 In the same connection I would
 respectfully report having been told to
 please my further information in the
 matter that I had been already been
 reported to the Department.
 The children appear to have had of Mrs.
 Stearns and seems determined to
 discontinue her, claiming that she
 gives no satisfaction, and that they must
 have a teacher. With this, there is some
 jealousy in the matter, and I am of
 the same opinion as Mrs. School
 Inspector O'Brien (with whom I discussed
 the trouble some time ago) in that
 it would be advisable to make a
 change: giving Mrs. Stearns some
 other school and appointing a male
 teacher at Little Bay; but Mrs. Stearns
 is now married and
 permanently settled at Little Bay, who
 had verbally explained to me her un-
 willingness to leave that place.

She

The further letter - that the South
Bay Indians are desirous to have
Mr. Goddard who is in charge of
Dunsmuir school, for their school.
I consulted Mr. Goddard about it and he
says they have much better things
with him and wish to induce him
to South Bay, but that he told them
he would not go unless the salary
was raised.

Generally, I can report nothing to the
satisfaction of Mrs. Asanow, as she
has always insisted this requirement
of this office, in the official capacity.

I have the honor to be,

Yours obedient servant,
R. W. Ross

Sir,

I have to ack. the recd. of
your letter of the 10th inst. No 1585
284? enclosing a letter from the
Rev. Father Lacombe in which that gentleman
states that in compliance with the
instructions of the Dept. Mrs. Chas.
Lacombe has agreed to be
appointed to the school, and he
recommends that Mrs. Lacombe
formerly teacher at Mist Bay Reserve,
be appointed on trial to the South
Bay school, and that Mr. Lacombe
be transferred to the North Bay school,
and that the school at South Bay
be closed.

I am, Sir, very respectfully,
Yours truly,
J. A. G. G. G.

The Ohio Valley, from the Atlantic
Atlantic Ocean (a former teacher of South Day)
has the "nothing" and he will give up
no more my wife Sarah Howard will
come. She may have come already.
For the first day I feel I am
in a better position than I have ever before
I consider to be fit both intellectually and
morally, to fill the position in a satisfactory
manner. It is, however, also a high
of them, have the, inform the Superintendent,
in order that they may be as satisfactory
for the relations which the time will come.

I have the honor to be,
 Sir,
 Your obedient servant,
Robert B. Lewis

I have the honor to quote here-
under a letter from Rev. G. A. Bates, D.D.,
Father Superior of Michemichang, under
date 10th Oct. respecting teaching of the
Sight Day and Night Day Indian children.
Rev. Superior who had been appointed to teach
at Night Day and to give them a thought that
he was already in the place, that he had
taught another school and could not come,
in the school at Night Day was enough again
and to teach the people I appointed another
of Michemichang and another one may be
found. He is married to Charles Day
Father of the other Charles Day who is
married to the teacher of Michemichang,
Superior of the place, and he was
at Night Day and at Michemichang, and
all have in my name to go again to Night
Day. (Sincerely)

Secretary
Department of Indian Affairs,
Ottawa.

REPORT

Hon. J. A. Macdonald
16 July 1881

My dear Sir

I have the honor to acknowledge the receipt of your letter of the 14th inst. in relation to the proposed purchase of land for the purpose of establishing a reserve for the Indians of the St. Lawrence River. I have the honor to inform you that the Department has no objection to the purchase of the land proposed, provided that the purchase is made at a reasonable price and that the land is suitable for the purpose intended. I have the honor to inform you that the Department has no objection to the purchase of the land proposed, provided that the purchase is made at a reasonable price and that the land is suitable for the purpose intended.

I have the honor to be, Sir,

Very respectfully,
J. A. Macdonald

Indian Office, Manitowaning, November 2nd 1899

I have the honor to report that the South Bay Chief reports that the Teacher of the School has left and that the School has been closed for over three weeks.

I have the honor further to report that I have this day notified the Rev Father Artus, Superior of Mikwenikong to nominate some qualified Teacher to fill the vacancy.

In reporting this matter I would fully recommend that the Government should pay anything for the short time the teacher above referred to has been a source of annoyance since her appointment and in my opinion took the School only with the intention of teaching out the last quarter in order to get the benefit of the holidays.

She is not entitled to the full amount of the quarter as holding the same pending the decision in the matter. In any event she is not entitled to more than the proportion of the quarter which she has held. I do not consider she is entitled to anything as she should have resigned and given at least a month's time to get another teacher in her place.

The Secretary

Department of Indian Affairs.

Attest -

27th December 1897

Sir

I have the honor to report that the Rev. J. A. Arthur, Superior of the Mission at Manitowaning, advises me that he has nominated Mrs. Elyse King as temporary teacher of the Sunday Day School until such time as he can procure the services of a permanent and qualified teacher.

Mrs. King has taught before and quit on account of ill health. I would therefore most respectfully recommend that the appointment of Mrs. King as temporary teacher of the Sunday Day School be confirmed by the Department.

I have the honor to be

William Prendergast, M. A.
Inspector Separate Schools.

268140

174 Business General

Letter

The permanent stay of a teacher in one of these remote places is only made possible by keeping a companion with her which means that two persons must live on the small salary. You will remember that I drew attention to the case of Miss Moran at South Bay in a letter in July 1900.

The teachers now engaged at South Bay and Wikwemikong sing receive \$200 per annum, at each of the other three places mentioned the salary is \$250 per annum. You will agree I am sure that these salaries are exceedingly small for teachers who are doing such good work and who are under considerable expense in reaching these remote places and in maintaining themselves there.

I would respectfully urge the Department of Indian Affairs to increase the salaries of these five teachers and make their remuneration sufficient to enable them to ameliorate the hard conditions of their posts

Your obedient servant

Wm Prendergast

William Prendergast, B. H.
Inspector Separate Schools.

268140
124 Express Crescent,
Toronto.

Jan 15th 1904

I beg leave to draw your attention to some facts concerning the Indian schools situated at Roman Catholic missions on Manitoulin and the north shore of Georgian bay. Many of these, notably the ones South Bay, Wikwemikongsing, West Bay, Sagamok and Sheshegwaning, are situated in remote places, far from white settlements and distant from railway communication. It was always difficult to secure teachers with even a small degree of skill for these schools and I will admit that the salaries paid some persons who 'kept school' were quite equal to what they earned.

In August Rev Fr Paquin induced the ladies who have charge of the Industrial school for girls at Wikwemikong to also take charge of these five schools. I have inspected them twice since then and have no hesitation in saying that they are doing well. It is not alone nor even chiefly that the children have acquired book knowledge but more important still, the influence of these ladies has been a civilizing one. They have taught their pupils cleanliness and industry, - or at least have made a good start in that direction for neither of these are subjects in which the Indian makes rapid progress. The girls have been taught plain sewing and other elementary branches of domestic science. The material for this purpose has been provided by the teachers at their own expense.

Indian Affairs. (RG 10, Volume 6222, file 473-1, part 1)

CANADA

Dear Sir.

In my capacity of Superior of the Indian Missions of the Northwest, I have the honor to acknowledge the receipt of your letter of the 11th inst. and in reply to inform you that the Indian Mission is located therein, I feel bound to call the attention of your Department to the fact that the salaries of the teachers at Sheshegwaing, South Bay, and Wikwemikonsing receive a salary of \$200.00. The teachers at West Bay and Sagamok receive a salary of \$230.00. These salaries were fixed long ago, when the cost of living was lower than now, when teachers could be had for a lower salary than now, and for teachers of inferior capacity, mostly Indians or Half-Breeds of no training. And your Department must remember what trouble there was in keeping those teachers at their post for any length of time, and what poor results were obtained. It is all different now. The present teachers, as the Inspector Mr. Prendergast must have reported, are ladies of education and training and are doing very good work. No competent teacher can be hired at present for less than \$300.00, and to teach in districts affording all the comforts of civilisation. Nothing but a much higher salary would induce them to go and bury themselves among an uncongenial population for ten months, and in an out of the way place, lacking every comfort and convenience. Now that we have teachers willing to do this hard work,

Indian Affairs. (RG 10, Volume 6222, file 473-1, part 1)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

It is but just to pay them an adequate salary. I may add that this voluntary exile of ten months year after year, is made possible for these ladies only by keeping a companion with them: hence the cost of living is made double.

For the reasons alleged above, I respectfully but earnestly request your Department to take such steps and exert such influence as will be necessary to have the salary of the above mentioned teachers raised to the sum of \$300.00. If you allow me to make comparisons with salaries paid elsewhere, you will readily see the justice of my request. I find in the general Report of your Department for 1902, that the teachers at Naughton with an average of 4 pupils, at Port Elgin with 8 pupils, at Shesheganah with 7 pupils, at Buzwah with 6 pupils, at Cape Croker with 7 pupils, at Christian Island with 11 pupils, at Sidney with 10 pupils, receive a salary of \$300.00. whilst the teachers at Sagamok with an average of 20 pupils, at West Bay with 26 pupils, receive only \$250.00, and the teachers at South Bay with an average of 23 pupils, at Wikwemikonsing with 12 pupils, and at Shesheganing with an average of about 18 pupils (non official), receive only \$200.00. I hope that my request which is also the teachers' request will receive favourable attention from your department.

Your obedient Servant

Indian Affairs. (RG 10, Volume 6222, file 473-1, part 1)

Copy for No. 1 of South Bay.

Ottawa, July 14, 1910.

Sir,

I have to acknowledge the receipt of your letter of the 6th instant in reference to increases to the salaries of the teachers at Wikwemikong, Sheshegan, South Bay, West Bay, and Ojibway schools.

In reply I beg to say that the salary of Miss Mowbray was increased to \$350.00 from April 1st, 1910, and that of Miss Marshall at Sheshegan to \$400.00 from that the same date. Evidently you were not aware of these increases had been made.

Miss Frances Solomon is only temporarily engaged as a substitute to the late Miss Johnson at West Bay, but if a permanent teacher with proper qualifications is secured the Department will pay a salary of \$400.00.

In view of the satisfactory record of Miss St. James, teacher of the South Bay school, her salary will be increased to \$400.00 to take effect from the 1st instant.

A special report on the work of the teachers at the Wikwemikong day schools is being called for and when this is received the question of increase will be given consideration.

16th February 1912

Sir:-

398744

I have the honor to report that Miss Kintz the Lady Superior of the Holy Cross Mission at Wikwemikong has just informed me, personally, that it is her intention to replace Miss St. James at South Bay, with Miss E. Leusch. The school authorities have been contemplating this change for some time as Miss St. James requires a rest and as Miss Leusch has had many years of successful experience as teacher of Indian schools I would recommend that the change be approved of by the Department.

Miss Leusch has taught at Sagamok and last year was in charge of the Girls' Industrial school at Wikwemikong, since which time she has given her time to other work in connection with the Mission. It is the intention of the Mission authorities to simply have ~~the~~ these two exchange places. It is intended to make the change at once.

Your obedient servant

W. H. Morris

Ottawa, August 18, 1916.

Rev. Sir,-

I have to acknowledge the receipt of your letters of the 8th and 13th instant in further reference to the change of teachers in the Indian schools conducted under the auspices of your church.

The Department has noted that it has been decided to continue Miss Moffitt at Opekegok.

With regard to the other changes recommended by you I beg to say that the Misses Burke, whose engagement you recommend for the West Day and Wickenburg schools, were both previously in the service of the Department and should have known that it was necessary for them to make their applications to the Department. It is a question, had they done so, whether they would have been employed, as the Department is in receipt of a number of applications from experienced Roman Catholic teachers who are possessed of higher qualifications. As you are practically committed to their employment, Miss Mary Burke may be placed in charge of the West Day School at a salary of \$500.00 per annum and Miss Annie Burke may act as assistant teacher at Wickenburg at a salary of \$450.00 per annum.

With regard to the employment of Miss Hickey I may say that the Department does not approve of the employment of aliens, but, as you are again committed in her case,

Rev. L. N. Dumas, B.J.,
Principal,
Spanish River Industrial School,
Spanish, Ont.

she may take charge of the South Bay School on the same conditions as were applied to Miss Moffitt's engagement at Cape Croker in 1903, which were that she be possessed of the required qualifications and be a British subject. The Department will require Miss Micokey at the first available opportunity to take out her naturalization papers and secure a provincial certificate as was done by Miss Moffitt. Miss Micokey will be paid at the rate of \$500.00 per annum.

Your obedient servant,

CANADA

June 14th, 1917.

Sir,-

Inspector Finn reports that Jerome Kitchekog a pupil of the South Bay school has defective eyesight. You should have this boy examined by the Agency medical officer as soon as soon as possible and report the doctor's decision to the Department.

Arrangements should also be made for someone living near this school to look after the school garden during the holidays so that it will not be destroyed by pigs etc. No doubt some of the nearby pupils will have sufficient interest in the garden to attend to this matter.

Your obedient servant

Ottawa, June 18, 1918.

I have to acknowledge the receipt of your letter of the 13th instant, in which you state that Miss Evelyn Dolan, teacher in charge of the Kabanai school on the Manitoulin Island Unceded Reserve, has resigned her position, to take effect at the end of the current quarter, and that Miss Marcella Mickey has resigned her position as teacher at the South Bay school and recommend that Miss Mickey be transferred to the Kabanai school for the next term, as the South Bay school should be closed for a time on account of the attendance being so small.

In reply I beg to say that Miss Dolan's resignation is accepted and the transfer of Miss Mickey to take charge of the Kabanai school after the summer holidays is approved. She will be paid a salary at the same rate as she received at the South Bay school, viz.- \$500.00 per annum. Kindly inform her accordingly.

In regard to the South Bay school I have to ask you to be good enough to state why the attendance at this school is so small, as the teacher in her report for last year stated that there were fifteen children on the roll. Kindly state also whether you think any of the children on the reserve should be sent to the Spanish River Industrial school, if this school is closed.

Your obedient servant,

June 27th, 1918.

Sir:-

In reply to the last paragraph of Official Letter No. 464780/I of the 18th Instant, I have the honor to report that the attendance at the South Bay School being so small, is that the school is situated at the old south bay village, and all the Indians in that section have moved out on farms, some are living at too great a distance from the school for the children to attend regularly, especially during the winter months.

I would recommend that some of the children living in this section of the reserve be sent to the Industrial School at Spanish, if the school in question is closed.

Your obedient servant,

Indian Agent.

The Secretary,

543006

Sir:-

I have the honor to report that the Indians of the Manitoulin Island Unceded Reserve have made application to this office to have South Bay School re-opened after the mid-summer holidays as there are now twenty pupils of school age in the vicinity of the school, and the parents of the children will not consent to send any more children to the Spanish Industrial School, as it is claimed by the Indians that the building at Spanish is situated in an unhealthy place.

As these Indians are very anxious to have this school re-opened, and they will not under any conditions consent to have their children sent to the Industrial School at Spanish, therefore, I would most respectfully recommend that the South Bay School be re-opened after the holidays, as the children at South Bay will have to receive an education.

Very respectfully,

The Secretary,

Ottawa, December 17, 1920.

Sir,-

I have to acknowledge the receipt of your letter of the 13th instant, informing the Department of the resignation of Mr. Lawrence Peltier, teacher of the South Bay Indian School, taking effect at the end of the present quarter.

In reply I beg to say that the resignation of Mr. Peltier is accepted.

It will be necessary to secure the services of another teacher as soon as possible in order to re-open the school after the Christmas holidays. You should, therefore, make arrangements with a view to obtaining a suitable person, and it should be well for you to consult the District Inspector for the district and the local church authorities. All nominations which you receive should be submitted for the consideration of the Department and full particulars should be given as to the qualifications and experience which the applicant possesses.

I may add that the Department has no teacher in view for this school. You should give this matter your prompt attention and endeavour to have a teacher to re-open the school in the beginning of the New Year.

Mr. Peltier's school return should be prepared by him and forwarded through your office promptly at the end of the present quarter in order that payment of salary and bonus due him may be paid.

19-5-1
158-33, Indian Office, Manitowaning,
January 4th, 1921.

Referring to Official Letter
No. 19-5-1 of December 17th, last, in regard to
securing the services of a suitable teacher to
take charge of the South Bay Indian School after
the Christmas holidays, I have the honour to
report that I have taken this matter up with
the local church authority but did not have any
success as he could not name a suitable teacher.

As the parents of the children
at South Bay are anxious to have the school re-opened
I have secured the services of a fairly well educated
Indian, Alexander Tredeau by name, to take charge of
this school until the services of a suitable teacher
can be obtained. The local church authority is
agreeable to Mr. Tredeau taking charge.

I would most respectfully recommend
that Mr. Tredeau be left in charge of this school until
the services of a qualified teacher can be obtained, as
the pupils are all juniors.

Your obedient servant,

Indian Agent.

OTTAWA, October 25th, 1921.

Sir, -

I have to acknowledge the receipt of your letter of the 17th instant, in which you request that an increase be granted in the salary of Miss Priscilla Lavalles, teacher of the South Bay Indian Day School, in view of the work which she is performing, and in order to retain her services; also enclosing a resolution of the Band approving of an increase being granted.

In reply I beg to say that in view of your report regarding the services which Miss Lavalles is rendering at this school, the Department will agree to an increase in her salary of \$200 per annum from the 1st of September, last. This will make her salary from that date at the rate of \$700 per annum, and she will also receive the bonus during the present fiscal year at the rate of \$150, which will be paid on a monthly basis of \$15.00 per month. This increase in salary is granted on the understanding that she will continue her work as teacher of this school during the present school year ending June 30th, next.

I might add that the Indians have not sufficient funds to the credit of their interest account at the Department to provide for this increase, and it is being paid from our appropriation for Indian education, ~~xxxxxxxxxxxxxxxxxxxx~~

You should inform Miss Lavalles of the increase granted, and ascertain from her definitely whether she is prepared to remain as teacher during the present school year, and you should inform the Department of her decision. As soon as this information is received, the balance of salary due her at the increased rate for the days she taught in the September quarter will be paid, provided she consents to remain the balance of the school year.

Sir:-

With reference to Official Letter No. 19-5-I dated the 25th, instant, relative to an increase in salary for Miss Priscilla Lavalles as teacher of the South Bay Indian Day School, in reply I have the honor to report that Miss Lavalles has advised me that in view of the fact that her salary will be increased \$200.00 per annum from the 1st of September, last, she is willing to continue her work as teacher of this school during the present school year ending June 30th, next.

Would the Department kindly forward a cheque in favor of Miss Lavalles, for the balance of salary due her at the increased rate for the days she taught in September quarter 1921.

Your obedient servant,

Indian Agent.

The Secretary,

OTTAWA, May 8th, 1922.

Sir, -

I have to acknowledge the receipt of your letter of the 4th inst., informing the Department that Miss Lavallee, teacher of the South Bay school, has been appointed to the Kaboni school for the next school year, beginning September 1, 1922.

In reply I beg to say that the Department will approve of the transfer of Miss Lavallee from the South Bay school to the Kaboni school from the above date. The salary allowed her at Kaboni will be at the same rate as she is now being paid as teacher of the South Bay school, viz: \$100 per annum, plus any bonus provided by law.

It is noted that you have informed Mrs. Chas. King, the present teacher of the Kaboni school, that her services will not be required after June 30th, 1922, the end of the present school year.

Both Miss Lavallee and Mrs. King should prepare their quarterly returns promptly at the end of the current quarter and forward them through your office in order that payment of salary and bonus due can be made.

It will be necessary to obtain the services of a qualified person to succeed Mrs. King at the Kaboni school. The name of the person to be appointed should be submitted for the approval of the Department.

Your obedient servant,

Russell T. Ferrier,
Supt. of Indian Education.

Madam, -

Replying to your letter of the 27th ultimo requesting certain information concerning conditions at the West Bay Indian Day School, I beg to say that living quarters are provided for a teacher at this school. There is only one teacher employed. There is a Roman Catholic Church close by the school.

It is hoped that you will be able to accept the position offered as teacher of this school, and I shall be pleased to hear as soon as possible as to whether you will accept or not.

Your obedient servant,

J. D. McLean,
Asst. Deputy and Secretary.

Madam:-

I have to acknowledge receipt of your letter of the 2nd instant, regarding for a position as teacher in an Indian Day School.

You have been appointed as teacher at the South Bay Indian Day School, and it is desired, to begin duties on September first, next. The salary allowed will be at the rate of \$100 per month plus any bonus provided by law.

There is a teacher's residence in connection with this school, and it would be necessary, if you accept, that you do your own housekeeping. There is only one teacher employed at this school, and when there is a teacher's residence, which you must attend.

I shall be pleased to hear of your reply. Please advise me if you will accept this position and, if so, please advise me of the date you will begin duties on or about September first, next.

Your obedient servant,

A. F. MacKenzie,
For Asst. Deputy and Secretary.

OTTAWA, July 27th, 1922.

I have to acknowledge the receipt of your letter of the 22nd instant applying for a position as teacher in an Indian day school, and stating the qualifications which you possess.

In reply I beg to say that we have a vacancy for a Roman Catholic teacher at the South Bay Indian Day School, Manitoulin Island, to begin duties on or about September 1st, next. I cannot state your religion, but, if a Catholic, we would be pleased to accept your services for this school.

The salary allowed will be at the rate of \$650 per annum plus any bonus provided by law.

There is a teacher's residence in connection with this school, and it would be necessary, if you accept, that you do your own housekeeping. There is only one teacher employed at this school.

I shall be pleased to have an immediate reply, stating the religion to which you belong, and whether you could accept the above position.

Any further information desired will be furnished upon request.

Miss Aia Bush,

Ottawa, August 4, 1922.

I have to acknowledge receipt of your letter of the 2nd instant, requesting further information regarding the South Bay Indian Day School.

If you do not desire to occupy the living quarters provided for the teacher, it is suggested that arrangements could be made to live with an Indian family.

There is a Roman Catholic Church near the school. The last service was held for the school in 1917, but I am not aware as to the distance from the school.

The bonus that will be allowed teachers for the present fiscal year has not yet been decided. This matter is now under consideration.

The enrolment last school year was 24, with an average attendance of 15.

I shall be pleased to hear from you at once, as to whether you will accept the position offered you as teacher of the South Bay Indian School or not.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy & Secretary.

Sir:

With reference to the engaging of a teacher for the South Bay Indian Day School for the next school year, beginning September 1st, next, I beg to say that the Department has endeavoured to obtain the services of a teacher for this school, but we have not been successful, owing to the isolation and living conditions.

I have, therefore, to request that you will take this matter up with the authorities of the Roman Catholic Church and endeavour to have them nominate a suitable teacher for this school. The name, qualifications and experience of the teacher nominated should be forwarded for the approval of the Department.

This matter should receive your prompt attention.

SEP 2 1922

Sir:-

574414

Referring to Official Letter No. 19-5-1 of the 21st instant, in regard to taking the matter up with the Roman Catholic Church authorities in connection with securing the services of a suitable teacher to take charge of the South Bay School, I have the honour to report that I have asked the Rev. G.A. Artus, S.J., in charge of the Roman Catholic Mission at Wikwemikong to nominate a suitable teacher for this school, and he has named Mrs. Philip King, an Indian woman of the Manitoulin Island Unceded Reserve who is married and has four children between the ages of eleven and five years, and has not had any experience in teaching school.

Mrs. King called at this office to-day and explained that it is sixteen years since she left the Boarding School at Wikwemikong and has not had any experience whatever in the way of teaching school, and that she did not feel inclined to take charge of South Bay School but the Rev. Father Artus insisted that she should.

As Mrs. King has not had any experience in teaching and has a family of small children to take care of, therefore, I cannot see how she can give justice to the pupils at South Bay in the class-room and I cannot recommend to the Department to approve of her services.

Your obedient servant,

Indian Agent.

Chief of the Band
at the
Reserve

The Superintendent,
Indian Affairs,
Ottawa.

May I ask one or two questions relative to
the property of Reserves & school, in Indian
Reserves.

The Indians here seem to have the idea that, as
a teacher is bound to consult with the council
before filling up a requisition for supplies, there
is no space on the requisition form for the
council to sign, or even give their address.

(1) That individuals may come on school property
and take what they like, without being
paid for it, that was done in 1901, when
the school was damaged & the teacher
was not responsible for property, and
that large number of things were taken
that property.

(3) That there is a certain amount of land
in school property, and that the school
property, which is not school property, is
not the same as the school property.

Indian Affairs. (RG 10, Volume 6222, file 473-1, part 1)

(3)

That, because I take in boarders of the mixed band, there being no boarding in the South Bay Band, there is a great deal of boarder going on, all falsehoods.

I wish to state clearly that I have as many, perhaps more, mixed band in my school, and that it is absolutely necessary for me to board these children in order to get them to school, they live 4 miles away. In addition I am helped in the house, and I am about to coach a boarder for the Entrance Examination this will be the first Indian pupil from this

I may also state that the South Bay band had many opportunities to board with me, living only 2 miles away.

The committee of the Mixed Band wanted their children to go to school, and the Mixed Band and my own band in this respect, a man is now appointed to superintend the

I am very successful as Mr. Lewis can testify. The chief of the South Bay band should be notified as to the future conduct of his own band, and not come to the teacher to demand an explanation as to how matters stand for and against any individual of his band. I am not willing to receive any more, and I am sorry that I have to tell the children under my charge that I cannot accept any more.

I have commenced in English classes for the
winter evenings, twice a week, in my house,
for all my pupils. I am also master of the
church, and have all the boys' instruction at my
house every Friday evening.
I have given prizes for good work done, in
the shape of money, to pupils of this school, in
short I have sacrificed a comfortable life here
in a town or city, with a good school, and
club, and friends, all, etc. to come here.
I say then, this is more of a missionary life
and method also, and I am working, etc.,
with the people of this mission.
They say that too much money is being spent
on this school and house, but I may add that
I have not even had pencils to give our pupils
to write with, I have only a few 10, pencils.
They have been to me to see the condition of the
school, and to see how much of money that I have
money for his own uses.
You will see from the above that, etc., etc.,
etc., and have promised to stop here, etc.,
kind of protection, etc., etc., and to stop, etc.,
etc., etc., with regard to the school, etc., etc.,
and a promise of good treatment from the
the land.
I am, Sir, your obedient servant,
Teacher

Her. I beg to submit the following for your
consideration and further action.

to how the money is spent, and as to who
they consider that I should get for my
chief, and the council. They are very
supplicating, but I have no power to place
any one under that chief, and I am
of his commands, as though I was myself an
Indian. I am not writing in haste, but
I cannot to receive orders from any but the
chief, and I am not writing in haste, but
They are jealous of the "unceded band here,
and I have the authority of a council, and I
am not writing in haste, but I am not writing in haste,
as required by my superior.

[illegible]

one of these pupils is likely to go up the
 the Indian Commission next year, I think
 it would be a shame to place any difficulty
 in her path.

Moreover, I have a precedent in sending pupils
 in your report for Indian Education 1898, both
 last and at this time.

I should, however, advise it to be in such a way
 as not to interfere with any other work.

I have investigated the "past record" of the school
 and have found it to be very good, and I find that every teacher gets
 his share of promotion from the South
 Bay band.

The members of this band have lately stolen
 lumber, and broken up the interior of a powder
 house, and by past teachers, and committed
 in the meantime, when I was at the school, they
 they are "paying for everything on school property,"
 and no longer entitled to any, and I think
 the band should be removed from the school
 here as teachers, as their children are making such
 rapid progress in English.

I may add in closing, that I have 10 band
 pupils, and 11 South Bay band pupils on my
 register at present.

The day before, has been to do everything
 to help these pupils, I have even to have
 with the help of the South Bay band.

Ottawa, November 21, 1922.

I have to acknowledge the receipt of your letter of the 14th instant, with reference to conditions at the South Bay Indian Day School.

In reply I beg to say that you are relative, the Indian agent. You are not obliged to take any orders from the Chief or councillors but, at the same time, you should treat them with as much respect as possible, because if they become unduly offended with you, general conditions will not be very pleasant.

With reference to the boarding of pupils, I beg to say that the Department considers that this should not be done. While we realize that your motives are of the best, your action will, no doubt, be misrepresented. It is possible that some deserving pupils will suffer from the decision of not allowing them to board with you but it is considered that this decision will, in the end, prove the most satisfactory for all concerned.

The Department is writing Mr. Agent Lewis regarding the Indians taking the lumber. He is also being requested to inform them that they must not interfere with the teacher or the school.

Your last requisition was received and forwarded to the Government Stationery Office on the 14th instant. This included a supply of lead pencils and it is hoped that these will reach you in the near future.

We are also advising Mr. Agent Lewis regarding the Department's decision that it is considered pupils should not board in the teacher's residence.

Ottawa, November 21, 1922.

The Department understands that some of the members of the South Bay Band have lately stolen lumber and broken up the interior of a poultry house at the South Bay Indian Day School.

You should make immediate enquiries regarding the matter and if the lumber can be recovered, the lumber should be returned, if possible, and you should give the police notice of the matter. If the situation of such will receive more drastic action.

Both the chief and Indians should be informed that they must not interfere with either the school or the teacher. From reports received from the inspector it appears that the present teacher is fully qualified for his work and good results will be obtained if the Indians second the efforts of the teacher by sending their children to school regularly.

The Department trusts that you will take up this matter with the South Bay Indians in the very near future and it is hoped that as a result of your action conditions on this reserve, as regards the conduct of the school, will improve and that the Indians will not interfere with the teacher's work.

I understand that the teacher has had three or four of the pupils boarding with him. While the teacher's motives are, no doubt, of the best, his action will probably be misrepresented by some of the Indians and, consequently, the Department considers that it would be in the best interests of all if pupils were not boarded in the teacher's residence. Mr. Lloyd is being advised accordingly.

I would be pleased to hear from you in the near future regarding the action you have taken in this matter.

Sir:-

I am in receipt of Official Letter No. 19-5-1 of the 21st instant, in regard to information the Department has received in connection with matters at South Bay School, and in reply I have the honour to report that I visited South Bay on the 22nd instant and made an investigation of the trouble existing between the teacher and the South Bay Indians and found that the charge made against the members of South Bay Band stealing lumber from the interior of the poultry building to be without foundation, and when the teacher, Mr. Lloyd was questioned about the matter he admitted that he did not see any of the Indians of South Bay Band taking the lumber but thought that it must have been Edward Kitchake who took the lumber as he is erecting a new house. After making further enquiries in this case I was informed that the teacher had a member of the Manitoulin Island Unceded Band putting down some oilcloth and doing some work around the residence at the school and it was he who took the lumber to do some repairing which was required.

The chief and Indians of the South Bay Band are not interfering with either the school or the teacher, but on account of the members of the band not receiving any fall interest payment some of them are not very well pleased and they claim that it is the high cost of keeping the school open that is using their money, and I understand that the chief has asked Mr. Lloyd to consult the band for advice before he would requisition for supplies for the residence, such as tables, oilcloth for the floors etc., as they would like to keep the high cost of the upkeep of the school as low as possible.

No doubt but what Mr. Lloyd is fully qualified as a teacher and good results will be obtained if he remains in charge of the school as the children are attending regularly and are taking more interest in their work than they have for some time, but I might say that on account of the condition of the teacher's health he is not very well adapted to teach among Indians and more especially in such a remote place as South Bay, and I will ask you to let me know if he forwards his resignation at any time as he has taken a dislike to the South Bay Indians and is on bad terms with the Roman Catholic Missionaries.

Your obedient servant,

The Secretary,
Department of Indian Affairs,

Wilmington July 4, 1920

R. J. Lewis Esq.
Indian Agent
Wilmington Del.

Dear Sir - At a meeting of the Indians of
Wilmington Island held this day
in Council and called in accordance
with the rules of the Band.

Moved by Dan. Warrigwanne.

Seconded by John Warrigwanne.

Carried. That the Department of Indian
Affairs be informed the following that
for some time past that South Bay Band
have been relating it very difficult for
the teacher and the duties of the South
Bay School.

The South Bay Band asserts that
the school was paid for by the Department only
and that the Government has no say in
the affairs of education of the children
attending that school. That the profits of the
South Bay Band are brought to the
attendance of our children at this school
and in this way caused is not instead of
harmony which should exist in all schools
of this State of affairs and it will
be very bad indeed.

December 12th, 1922.

Sir:-

578495

I have the honour to enclose herewith a copy of a resolution by the chief and councillors of the Manitoulin Island Unceded Band, dated the 4th instant, requesting that the Department of Indian Affairs be informed that during sometime in the past the South Bay Band have been making it very difficult for the teacher and his duties at the South Bay School.

With regard to this complaint, it appears that when Mr. Lloyd, the teacher at South Bay School, had trouble with two members of the South Bay Band he went to the council at Wikwemikong and put his case before the chief and members of the Manitoulin Island Unceded Band.

So far both pupils of the Manitoulin Island Unceded and the South Bay Bands have been attending the South Bay School and all have been treated alike. The whole trouble exists between the Indians and the teacher, and the only way it can be settled is to close the school for the present.

Your obedient servant,

The Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Sir:-

In reply to Official Letter of the 6th instant, in regard to Mr. Lloyd, teacher at South Bay, closing the school, I have the honour to report that when I arrived home from visiting the Whitefish Lake Reserve on the evening of the 8th instant I found that Mr. Lloyd had closed the school at South Bay and was boarding at the hotel in this village, and after making some enquiries I was informed that he and two Indians of South Bay Band had some dispute over the caretaking of the school, and Mr. Lloyd immediately closed the school and left.

I had him return and reopen the school on Monday morning and told the Indians about warning that they must not interfere with the school building or the teacher, and as far as possible to be friendly to him, but I cannot estimate the amount of time how long it will last, as Mr. Lloyd has not been accustomed to residing among Indians in such a remote locality as South Bay, and he seems quite timid of the South Bay Indians.

As it seems impossible for Mr. Lloyd to get along with the South Bay Indians and the Roman Catholic Missionaries and as long as he is in charge of the school there will be more or less unrest among the Indians, therefore, I would respectfully recommend that the school be closed at the end of the current quarter until the services of a suitable teacher is secured.

Your obedient servant,

Sir:-

I have your numbers 158-30 of the 24th ultimo and two of the 12th instant, one enclosing a communication from certain Indians of the unceded portion of the band.

In reply I beg to state that you should inform Mr. Lloyd, the teacher of the South Bay Indian Day School, that in view of the lack of harmony between himself and a portion of the band, it is thought advisable to close the school on the 31st of January, next. This is in line with our policy of giving teachers a month's notice.

You may also inform Mr. Lloyd that if no further trouble obtains, and if the attendance of the children of the South Bay and Manitoulin Island portion of the band is good, the Department may decide to continue the school activity at South Bay. In this event we may offer Mr. Lloyd re-engagement, if his services are available and upon your recommendation.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

Dear Sir,

No action has been taken yet, and Mr. Lewis was trying to hush the matter up, but I don't know if he will succeed.

There is one man here who is the only member of the band, Ed. Kitchiey. He is now living in a house which has been rented on land from the school for a year. He is now making the school in fact of the school building, but he is now trying to advise the band to have no school or teacher, in fact, to sell the house & school.

The others are fairly quiet, but they are doing the devil's work as to men.

Could nothing be done at this time, I am now calling upon the agent, the agent is now in the house and is now in the house.

I am in receipt of Official Letter No. 19-5-1 of the 18th instant, authorizing that I should inform Mr. Lloyd, the teacher at South Bay, that the Department thought it advisable to close the school on the 31st of January next, and in reply I have the honour to report that I have advised Mr. Lloyd accordingly.

I might say for the information of the Department that I have had much difficulty in keeping this school going since the present teacher has taken charge, as there was lack of harmony between he and the South Bay Band and also between he and the Roman Catholic Missionaries, and I might say further confidentially that he is bent on marrying an Indian girl of the Manitowaning Indian Band who is only fifteen years of age. Other friends along with myself have tried to give him some advice but without avail as he claims that he is old enough to take care of himself. This of course is a personal matter, but as Mr. Lloyd was hired and sent up here by the Department I thought it wise to inform the Department of his actions.

OTTAWA, January 3, 1923.

Sir: -

I have to acknowledge the receipt of your letter of the 27th ultimo, regarding the closing of the South Bay Indian Day School at the end of the present month, viz: January 31, 1923.

In reply I beg to say that there has been a lack of harmony in the work at this school, and, after giving full consideration to all the circumstances which have arisen since you took charge of the work, the Department has decided that it is advisable to adhere to its decision that this school be closed on the above date. There has been no question as to your ability to perform the duties of teacher, but there has been a lack of tact on your part in dealing with the Indians. We regret that there is no other vacancy to which you could be transferred at the present time.

We have informed Mr. Agent Lewis of the closing of this school on the 31st instant.

Your obedient servant,

J. D. McLean,
Asst. Deputy and Secretary.

Indian Office, Linton, Ont.,
January 18th, 1933.

Sir:-

With reference to your letter No. 12-E-I of January 1st, 1933, in previous correspondence in connection with the school at South Bay being closed on the 31st inst., I have the honour to report that Mr. Lloyd, the teacher, has been informed accordingly, and he has replied that the Department forward his cheque for the number of days he will teach in January, which will be twenty one days, as he does not wish to be delayed here under expense after he has enough teaching. As soon as the school closes he will make out his report for the month and the same will go forth to the Department without delay.

I might say for the information of the Department that I understand that it will take all of Mr. Lloyd's earnings for December quarter to pay up the account which he has run in a general store in this village, and therefore, he has to ask the Department to forward whatever money will be due him at the end of the current month to reach here before the school closes, which will be on the 31st instant. It is his wish to leave as soon as the school closes and if his wages for teaching during the current month is not here he will not have the means to pay his railway fare.

If the Department can see its way clear to forward an advance cheque covering payment of twenty one teaching days in the current month including the portion of bonus for the quarter which will be due Mr. Lloyd at the end of the month, I would most respectfully request that the Department would do so, in order that he may be able to leave as soon as the school closes.

January 25, 1923.

MEMORANDUM FOR FILE:

On September 14th, 1922, Mr. W. H. Lloyd called at the Department and made application for an Indian school. His qualifications were good and he was appointed to the South Bay Indian Day School at a salary of \$700 per annum plus any bonus provided by law. As Mr. Lloyd was badly in need of funds, we made an advance for transportation expenses.

Shortly after Mr. Lloyd arrived on the reserve, he tactlessly aligned himself with the unceded portion of the South Bay Band and incurred the displeasure of the other faction. Further, he unwisely took into the teacher's residence, as boarders, four pupils, one of which was a 15 year old girl. This Department ordered a discontinuance of the practice of taking pupils into the teacher's residence, but Mr. Lloyd's associations with certain Indians continued to be unpleasant.

Early in December, after a wordy combat with two members of the band, Mr. Lloyd was scared off the reserve and he remained in Manitowaning a few days until our agent, Mr. R. J. Lewis, had poured oil on the troubled waters. Our representative reported that, as the teacher could not live in harmony among the Indians, and as he was on bad terms with the missionary, it would be advisable to close the school.

In December the Department gave Mr. Lloyd a month's notice, and, when we learned from our agent that he was about to marry a 15 year old Indian girl, there was directed a definite notice of dismissal as from January 31st. It was hoped that such action would result in an indefinite postponement of the alliance, which, at best, would be unfortunate.

Mr. Lloyd has written several letters to the Department, appealing against our decision; he has interested Mrs. Wilson of the Red Cross Society of this city; he has directed communications to the Minister of Justice and to His Excellency the Governor General. *claw Gov a*

This Department prepared cheques for Mr. Lloyd's salary and bonus up to the end of the current month - a total of \$295. These were directed to Mr. Agent Lewis with instructions to personally supervise the closing of the school and residence, to see that Mr. Lloyd settled any accounts incurred by himself and to have him leave the reserve.

Manitoulin Island,

Jan. 11th, 1923.

J. E. Earl Byng,

Château Hall,

Ottawa, Ont.

Your Excellency,

I am taking a great liberty in writing to you in this manner, and I am hoping that my letter may be read by you, and that you may use your influence in my case, although you must have more distressing cases which come under your notice.

I am a fully qualified School-master, a graduate in arts, but owing to war disability, I have had to take charge of small elementary schools, but I hope, in the near future to be able to take up my old work as a specialist in Classics, etc.

I have been very weak and unwell since I came out of hospital, and I was actually a patient at the Christie Street Hospital, Toronto, when Your Excellency visited that institution last year.

Last September, on my return from a visit to my parents in the old country, I was sent down here by the Department of Indian Affairs, to take charge of the above school. The trip, which had been mainly for my health, cost me a great deal of money, I was therefore glad to get into a position on my return. I understood from the officials that my position as teacher was for a year's duration, at least, I therefore did not commence saving any money, and having to supply my own food

Indian Affairs. (RG 10, Volume 6222, file 473-1, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

etc. I was barely able to pay my way for the first two months, so that I have practically nothing saved up. During my sojourn here as teacher, I have given myself body and soul to the work before me, I have tried to be warm, generous hearted to all. I had even intended giving myself entirely to this work among the Indians. God only knows how I have tried. But it is generally admitted that I have the most difficult school, and people generally, to deal with. There has been trouble with a small band of Indians, and I may be guilty of lack of tact in dealing with these people. But I was inexperienced among a people of whom I knew nothing, that is the best excuse that I can make. Moreover, I was positive of success and only needed time to work myself into the confidence of these people. Success was apparent already, and 1200 of the Indians have already testified to my ability as a teacher, and only about 20 men are against me. It is ^{to} please these few men of the South Bay band, that the Department has decided to close this school on the 31st inst. without giving me a chance to have the case investigated, or to find another school, it being the wrong time of the year to find vacancies. I feel hurt, because I gave up a head-mastership to go overseas as a soldier, and now I am about to be thrown out of employment, owing to a few men who have always given trouble to every teacher here, so far.

I am asking for nothing more than justice and fair play, from a government and country which I tried to serve faithfully, and I hope and pray, with all my heart, that Your Excellency may use your influence in having my services retained as teacher, at least until March 31st, or June 31st.

The Department of

Indian Affairs. (RG 10, Volume 6222, file 473-1, part 1)

file
2-1
January 25, 1923.

Dear Mr. Bladen:

I have your letter of the 23rd instant, enclosing a copy of a communication to His Excellency from Mr. W. H. Lloyd, Teacher of the South Bay Indian Day School, on Manitoulin Island.

Mr. Lloyd is, I believe, a returned soldier, and when he applied for a position in September, last, this Department was pleased to give him an opportunity. Not long after he commenced duties, he was hopelessly involved in the petty squabbles of the Indian band, and, generally speaking, carried off his temper, as has been the case in all his associations.

Mr. Lloyd is, to put it mildly, a very excitable type and he has been guilty of some astonishing actions. In December we requested his resignation, to take effect at the end of the current month. Our representative is to hand him his salary and bonus cheques, and I understand that he will be more independent, financially, than he has been for some months.

It would be advisable to state to Mr. Lloyd that you have learned the Department of Indian Affairs has already taken action, and that due consideration has been shown in his case.

Yours very truly,

(sd) J. D. McLean

Deputy Superintendent General.

In reply to Official Letter of the 25th instant, No. 19-5-1, in regard to Mr. W. H. Lloyd, teacher of South Bay School, writing to the Department to the effect that the Indian Council at Wikwemikong, in December, passed a resolution offering to Mr. Lloyd, from band funds, the sum of \$15 for his expenses at the time he closed the school and left the reserve, I have the honour to report that I have not received any such resolution from the Manitoulin Island Unceded band and to-day I have been talking with the secretary of the band and he informed me that no such a resolution was passed in council, at Wikwemikong.

I cannot recommend that the \$15 in question be paid to Mr. Lloyd out of the funds of the Manitoulin Island Unceded Band for two reasons, in the first place no such a resolution was passed by the council at Wikwemikong, and in the second place I consider that Mr. Lloyd has received ample payment from the Department for the number of days he taught at South Bay School.

Your obedient servant,

The Secretary,
Department of Indian Affairs,

Sir:-

In reply to Official Letter No. 19-5-1 of the 25th, instant, and previous correspondence in connection with the closing of the South Bay School at the end of the present month, I have the honour to report that Mr. Lloyd, the teacher, closed the school at the end of last week, came to Manitowaning on Saturday, and left for some part unknown to me early Monday morning. Yesterday I went to South Bay and found everything in the school building and residence in good order. An inventory of all the articles was made, then the buildings were securely locked.

I enclose herewith a voucher in favour of Messrs. J.C. Irving & Co. amounting to \$1.75 for a padlock and hasp I purchased to lock the front door of the teacher's residence.

Your obedient servant,

H. H. H. H.
Indian Agent.

Ottawa, Feb. 3, 1923.

Sir:

I have your No. 156-31 of the 30th ultimo, with reference to the closing of the South Bay Indian Day School.

In reply I beg to state we are pleased that you found everything in order, and I trust that the property of the Department is properly safeguarded until such time as a school is re-opened at this point. A few months without teaching activity may have a bad effect upon certain members of the South Bay band. They will have to learn that the teacher at the school can be successful only with the cooperation of the Indian parents.

The account of Messrs. J. C. Irving & Co. is being dealt with on another file.

Your obedient servant,

J. D. McLean,
Asst. Deputy & Secretary.

RECORDS

100-31,

Indian Office, Manitowaning,
August 16th, 1923.

Sir:-

I have the honour to report that I am in receipt of an application for the position as teacher in the South Bay Indian School from Miss Carrie Harrison, 420 Southern Ave., Fort William, Ont. She claims to have had upwards of ten years experience teaching in Indian Schools and holds satisfactory reports from different school inspectors on her work.

As the applicant has had ten years experience in Indian Schools no doubt but the Department will be satisfied with her efficiency as a teacher, therefore, I would ask the Department to advise whether she should take charge of the South Bay School for the next school term.

Up until the present time I have not received any further applications for this position.

Your obedient servant,

J. A. [Signature]

19-5-1

Sir,-

I have to acknowledge the receipt of your letter of the 16th instant, in which you advise the Department of the application of Miss Carrie Harrison for the appointment of teacher at the South Bay Indian day school.

As you are aware, the Department has allowed this school to remain closed for some time with the hope that the Indians of the South Bay Band would realize that a school can only be successful if the Indian parents co-operate.

Before considering Miss Harrison's application, the Department desires a definite recommendation from you regarding the advisability of re-opening this school at the present time.

Your obedient servant,

A. J. Lewis, Esq., for Asst. Deputy and Secretary.

August 37th, 1923.

Sir:-

In reply to Official Letter No. 19-5-1 of the 20th, instant, in regard to the advisability of re-opening the South Bay School, I have the honour to report that as there are a number of children at South Bay which should be attending ~~the school~~ I ~~will not respectfully request~~ that the school be re-opened.

Of course there are a number of the Indians at South Bay who do not wish the school to be re-opened as they have not any children to educate and have not any consideration for the children who should be attending school, but I might say that if this school is re-opened I believe that the Indian parents will co-operate much better than in the past year.

Your obedient servant,

[Handwritten signature]

Sir,-

I have to acknowledge the receipt of your letter of the 27th instant, in which you recommend re-opening the South Bay Indian day school.

In reply I beg to say that the Department will consider the re-opening of this school if you can secure the services of a suitable teacher.

With reference to Miss Carrie Harrison, whom you mentioned in your letter of the 14th instant, I beg to say that, from records on file in the Department, it is ascertained that she would not be a suitable teacher and her appointment, therefore, cannot be approved.

You should endeavour to secure a suitable teacher for this school, and, if successful, you may submit your recommendation with reference to the Department.

The name, age, qualifications of the teacher proposed, should be forwarded for the Department's approval.

Your obedient servant,

A. E. MacKenzie,
for Asst. Deputy and Secretary.

Ottawa, Sept. 7, 1903.

Sir:

With reference to official letter of the 6th
of August, 1903, from the
Hon. Secy. of the Interior, in relation to
the Goulais Bay Indian Day School.

A teacher is needed, however, at the South Bay
Indian Day School, in the Northwest Territory. The appointment
of a teacher for this school has been put in the hands
of the Hon. Secy. of the Interior, Mr. A. J. McKensie, M.P., who
has been directed to select a suitable person for the position.
The salary for this position is \$1,000 per annum, and the
teacher is to be appointed for a term of three years.
At the present time the only person who has been
recommended for this position is Mr. A. J. McKensie, M.P.,
who is a resident of the Northwest Territory.

A. F. McKensie,
Acting Asst. Deputy and Secretary.

Sir:

I have to acknowledge receipt of your letter of the 24th instant, informing the Department that Mr. Peter MacDonald is unable to accept the position as teacher of the South Bay Indian Day School.

In this connection I wish to refer you to official communication of the 21st instant, in which you were informed that if he did not accept, the appointment of Miss Loretta Bush would be satisfactory. You should correspond with Miss Bush and ascertain definitely whether she will accept, and, if so, arrange with her to take up duties as soon as possible.

The salary allowed Miss Bush will be at the rate of \$650 per annum, based on a payment of \$65 per month for the 10 teaching months. She will also be entitled to any bonus provided by law, which, during the present fiscal year, amounts to \$15 per month. When you have a reply from Miss Bush, please advise the Department as to whether she will accept the position and, if so, the date upon which she will commence teaching.

INDIAN AGENT'S OFFICE

Manitowaning, Ont.

May 20th, 1924.

I have the honour to report that I visited South Bay Indian School on the 19th, instant, and found that the attendance has been below the standard required by the Department to warrant a school to be continued.

The majority of the pupils attending this school are young and reside a long distance from the school so that during the rough weather they cannot attend, and four of the older pupils will have to be sent to the Spanish Boarding School after the mid-summer holidays as they have lost their mother and there is not any person to take care of them.

A number of the Indian families are removing from South Bay in the near future, and the teacher in charge of the school at the present time has informed me that it is her intention to not remain in charge of the school for another year, so taking all things into consideration I consider it advisable for the Department to close the school during the coming year.

If the school is kept open the Department will have to make a number of repairs in the classroom, in the teacher's living quarters and the fence around these buildings, and then there would be no pupils during the next school term that there would not be any pupils attending.

I would recommend to the Department to close the school for the next year or so, and any children of school age be sent to the Spanish Boarding School.

Your obedient servant,

R. J. Moore
Indian Agent.

Ottawa, May 23rd, 1924.

I have to acknowledge the receipt of your letter of 19th instant, in which you recommend that owing to the poor condition of the South Bay Indian Day School be closed after the end of the present school year, viz: June 30th, next.

In reply I beg to say that in view of your report as to the number of pupils who will be available and the condition of the building, it is considered that it would be advisable to carry out your suggestion. It is noted that the present teacher is unable to obtain the services of another teacher for the next school year. No action need be taken by you in carrying out the repairs mentioned in our letter of the 20th instant, which were brought to the attention of the Department by the Separate School Inspector in a report on his inspection of this school.

When the school closes, you should arrange to have the building properly secured and all furniture and school material stored. It may be possible to utilise some of the classroom material at other schools, and, if so, you may have the same transferred where required. A list of school material and classroom equipment, as well as any furnishings in the teacher's residence, remaining on hand after any distribution to the other schools is made should be prepared and forwarded for the information of the Department.

The necessary arrangements should be made when the Spanish Residential School re-opens after the summer holiday. Indian children referred to by you placed in that

The teacher complains that the school house is too low, and that two rounds of logs might be removed - as there is no ceiling in the building. One window is wanting and the glass in the teacher's room is wanting; also the whole building needs to be plastered between the logs - and two doors are required for the closets.

I would respectfully recommend that authority be given to have the necessary repairs done as soon as possible.

I have the honor to be,

Yours truly, servant,

under date 26th September, last, I
have the honor to enclose herewith an
account for \$7.41, from Alvin Bellin,
for repairs to the South Bay Indian
School house, and in regard to the

estimated cost of repairs
authorized by the D. Department, and
respectfully state that the
expenses were necessary and well
incurred.

A staircase was made by means of
ropes & means of access to the Garret
teachers. Three lengths of 1/2 inch rope
were used.

The rope was too short on account of
the weight of the building. The rope cost 36[¢] and the
labor cost 1.00.

Ottawa, October 20th, 1896.

Referring to a communication of the 20th instant, which was written from your office during your absence, I beg to inform you that if you consider it advisable to spend the sum of \$14.25 in having the South Bay Indian School house plastered, between the ^{logs} ~~ends~~, and white-washed, the Department is willing that you should have the work done. If you decide to have these repairs made you should, when the work is performed,

Respectfully,
 Assistant Commissioner
 Indian Affairs.

Yours truly,
 J. A. G. Stewart

Indian Office, Manitowaning, August 19th 1

I have the honor to enclose herewith
a letter received from the South Bay chief
respecting certain repairs that are necessary
to the South Bay School.

I would most respectfully recommend
that permission be given to expend \$7.00 in
making the necessary repairs.

Indian Affairs. (RG 10, Volume 6222, file 473-5, part 1)

Ottawa, 30th August, 1899.

I have the honour to acknowledge the receipt of your letter of the 10th instant, inclosing a letter from the Chief of South Bay, respecting certain necessary repairs for their School-house, and asking permission to expend the sum of \$7.00 in making such repairs, and in reply I beg to say that you may expend the amount asked for for that purpose.

Your obedient servant,

J. D. MOLEAD

Secretary.

C. J. O. Sims, Esq.,

Indian Agent,

Manitowaning,

SCHOOLS,
21 1899.

The Secretary General of Indian Affairs

213972

I wish to call your attention upon the manner how Mr. Agent Sims of Nanaimo received this morning Mrs. Lagima, the new teacher at South Bay.

This lady came yesterday night to Nitwemikong, and she told me that the school was so cold now that neither herself nor the children could remain in it safely, until it is repaired. Cold air comes in from the floor and by cracks in the door, and as some of the stove pipes are too bad, they can make no fire. - She said that the chief has been notified already twice by her predecessor, but that he only had the school whitewashed and went away. - I answered that Mr. Agent Sims was the right man to receive her complaints and to see that the necessary repairs may be made at once.

She added that there were no books except a few ones, all in pieces, no chalk, etc. - She said, in order that she might teach with no interruption. I proposed to let her have some of the books of our school at Nitwemikong, provided Mr. Agent Sims approves of it.

Now she went to Nanitowaning, where Mr. Sims asked her very abruptly why she was not at South Bay. - She began saying that I advised her to go, but he did not let her speak and said: "It does not matter what Father Arthur said... etc. -". This poor young woman was then so intimidated, that she could not well say what she wanted, and she went away, after being told: "We can do nothing more for that school!"

Now, Dear Sir, was it not the duty of Mr. Sims, to receive, if not with kindness, at least with politeness, Mrs. Lagima, and

* Know that one must have great patience to deal with the Indians, and must take great pain to do some good to them; but, be it by the religious motive of charity like the missionaries, or only by a motive of justice and faithfulness to duty, all who are in charge ought to be able to resign themselves to it.

— besides, is it not greatly desirable that the Agents should show to the people that they sympathize with the missionaries, understanding that in them the Government has the greatest and the most devoted assistance for the good civilization of the Indians?

I acknowledge the receipt of your letter of the 14th instant regarding the state of the school house at Wikwezi-kong, and in reply to inform you that the same has been examined by the 10th ulto, to have certain repairs made and no doubt will be ready for use. Referring to the question of the supply of stationery, I have to say that there is a sufficient supply of stationery as upon receipt of a requisition from the teacher, stating what is required, a sufficient supply will be forwarded from the Government Stationery Office.

I have also, in further reference to the school building, that Mr Inspector Prendergast, in his last report, dated 30th May, 1899, states that it is quite suitable for school purposes. It would also appear that the teacher might not have suffered from fire in the building.

Your obedient servant,

Rev. G. A. Arthur, S. J.

Indian Offices, Manitowaning, September 28th/ 99

I have the honor to enclose herewith an account in my favor amounting to \$7.00 being amount paid by me for repairs to the South Bay School.

The Chief, who done the repairing, told me at the time I paid him for the repairs, that the School was in a good state of repair, and neat and clean.

21-113

The principal men of the South Bay band of Indians
at this time assembled together and took the following decision

As an English lady is coming to teach, the school has to be improved on
adding to it 1° a small shed to protect the entrance-door; 2° a second room for
the teacher for the purpose of a kitchen 20 x 12; 3° a shed for the wood 20 x 10.

Besides as we cannot expect that with the small salary that is paid, the
teacher could provide himself with a cook-stove, stove, chairs, bed, chairs and
table, we want that the Department would approve of the purchase of
those articles of furniture, and also of a broom, a rail and some
fishes.

The expenses would likely be as follows for the material

1° shed 20 x 12 lumber and 4 pieces of scantling
2° shed 20 x 10 addition to roof for same 1200' lumber (500 dressed 600 undressed 4 in wide)
3° kitchen 20 x 12 for roof, 2500' Second P. for floor,
4° lumber, one window, two doors, and shingles = 41.00
5° dressed 600 undressed lumber 94.00
expenses for work at one dollar a day = 10.00

Furniture 30.00

In all 128.00

Although we think that all this is necessary, if we wish to have
a competent teacher, the Department must approve of the expenses.

Indian Affairs. (RG 10, Volume 6222, file 473-5, part 1)

Amount required, we would at least have at once the furniture, hoping
that the rest could be done later on in the spring.

18-11-1900

Indian Office, Manitowaning, 26th November 1900

Sir,

I have the honor to report that Mr Separate School Inspector J. P. White, reports to this Office that the seating capacity of the South Bay School is insufficient for the number of pupils that attend during the full term. He states that there is room for at least two more desks and recommends that these be provided.

I would most respectfully recommend that authority be given to purchase the seats and Desks as recommended by the Inspector.

Mr White also says that the School has made wonderful progress for the short time Miss Moran has had charge of it and that it is a pity that something could not be done to augment her salary, as she is most deserving of it.

I have the honor to be

Sir

Indian Office, Manitowaning, 18th September, 1911

158--10-

Sir,

I have the honor to report that Rev Father Artus informs me that the school room at South Bay is inadequate for the attendance.

The Reverend Gentleman says that there is now a regular attendance of 29 pupils and that four children have to sit at each desk.

In order to provide more room a partition that is now between the School room and the Teacher's compartment would require to be removed and this would add considerable to the size of the School.

The new addition built for the Teacher's accommodation last year is quite sufficient for the Teacher to live in and removing the partition would not interfere with the new part in any way.

The probable cost of these repairs would be about \$10.00 and I would most respectfully recommend that the same be done.

It will also be necessary to supply additional desks, but this matter can be attended to after the improvements are made if the Department so wills.

Your obedient servant

Ref.: Your Letter 190 No.

I have the honor to report that the School building at South Bay is totally unfit for the purpose for which it is used.

The building is of logs the first tier of which are sunk in the ground, the roof leaks badly, the floor originally made from rough boards is very uneven and about half rotten, the window sash are worn out, the ceiling is very low, in fact a new building is required. It would not be wise to expend any money on the old log building. Also suitable desks are required to the number of sixteen.

It will cost ~~in~~ about five hundred Dollars to make the above mentioned repairs.

If possible steps should be taken at once to have the work done before winter sets in as it will not be possible to spend another winter in the old building. As the work cannot be done in time for the reopening of the school another building in the village can be rented for school purposes for a time, I am informed by the teacher.

Trusting this matter may meet with the approval of the Department and steps taken at once to make the repairs.

I have the honor to be

Sir

OTTAWA, 2nd August, 1904:-

The Deputy Superintendent General:-

Mr Agent Sims reports that the school building at South Bay is totally unfit for use and says that it would cost about \$500.00 to repair it. He recommends the erection of a new building.

In this connection I beg to refer you to Mr Inspector O'Brien's remarks concerning this building. He visited the school on the 7th June last and reports as follows:-

"The schoolhouse is a wretched old log building too small to accommodate the whole attendance properly. In a small corner the teacher and her companion live. The efficiency with which they discharge their duties, and their self-sacrifice and devotion to the service would warrant them in asking for more comfortable quarters".

"I would recommend a new building like that at West Bay."

It seems to me that it would be a waste of money to spend \$500.00 in repairs as suggested by the Agent. It would be better to put up an entirely new building and I would suggest that the Agent be authorized to submit the question of taking sufficient funds from their capital for this purpose, to the Indians, as they have enough funds to their credit to stand the outlay.

OTTAWA, 5th August, 1904:-

312.

I have to acknowledge the receipt of your letter of the 26th ult. reporting that the school building at South Bay is totally unfit for use and recommending an expenditure of \$300.00 to have it put in repair. In reply I beg to say that the Department considers that this is too large a sum to expend in repairing an old building and that it would be much better to put up a new schoolhouse. As the South Bay Band is well off it would like you to submit the question of the erection of a new schoolhouse out of their capital funds to them, as soon as possible and report the result.

Your obedient servant,

J. D. MOLEAN

South Bay Indian Reserve
22nd August 1907

Meeting of the South Bay Band of Indians
in Council, called in accordance
with the rules of the Band to consider
the question of the erection of a
new School house on the reserve.
After duly discussing the matter
it was proposed by John Shawande,
and seconded by John B. Shawande,
that the Department of Indian
Affairs be requested to erect
a new School house on this
Reserve, of the dimensions of
eighteen feet by thirty feet and ten
feet high and that the expense
of erecting and equipping the said
School be defrayed from the
capital funds of the Band.

Sir,

Referring to Official letter dated 21st Instant inclosing a plan and specifications for a new school-house at South Bay.

I have the honor to report that I have been able to obtain one offer only for the contract which I have received from Mr W. J. Berry of Providence Bay who offers to complete the building as per the plans and specifications for the sum of \$525.00.

Considering the difficulty there is in getting the building material to the spot and also the high price of material and work at the present time, I consider the offer made by MR Berry very reasonable and as he is a first class mechanic I would recommend the Department to accept his offer.

Owing to the lateness of the season I trust the Department may favor me with a prompt reply as the wet season will soon set in and it would be well to have the building completed with as little delay as possible.

Mr Berry assures me that if awarded the contract he will proceed with the work immediately.

I have the honor to be
Sir

Your obedient servant

Ottawa, 4th October, 1904.

His Excellency

The Governor General in Council.

The undersigned begs to report that the Indian Agent for the South Bay Band of Indians has forwarded to the Department, with his endorsement thereon, a resolution from the Indians of that band in favour of the erection of a school house on their reserve, on Manitoulin Island, and of charging the cost thereof, which is estimated at about \$575.00, to the capital at their credit.

As the work when completed would be in the nature of a permanent improvement and properly represent capital, the undersigned to recommend that, under the provisions of Section 130 of the Indian Act (as added thereto by Sec. 11 of Chap. 32, Vic., 27-28), authority be given for the expenditure thereon of the sum above mentioned from the capital at the credit of the South Bay Band, which amounts to \$17,363.10.

Superintendent General
of Indian Affairs.

Ottawa, November 18th, 1904.

Memorandum,

Mr. Benson.

Will you please let me know what steps have been taken with reference to building a schoolhouse on South Bay Indian Reserve, Manitoulin Island, how far the work has progressed and what if any action has been taken with regard to its being held in abeyance.

L. L. L. L. L.

Department of Indian Affairs.

OTTAWA, 21st November, 1904

The Deputy Superintendent General:-

In reply to your enquiry of the 18th instant with reference to the proposed new schoolhouse at South Bay, I beg to say that a resolution was passed by the Band in Council authorizing the Department to erect a new building out of their capital funds on the 22nd August last. Plans and specifications were prepared and sent to Mr Agent Sims who notified the Department that he had received an offer from Mr W.J. Berry of Providence Bay to complete the building according to these plans for the sum of \$525.00. Mr Sims who wrote on the 29th September last, asked for a prompt reply on account of the lateness of the ~~xxxx~~ season and stated that Mr Berry assured him that if awarded the contract, he would proceed with the work immediately. A memorandum was prepared for submission to the Governor-General in Council for authority to take the requisite amount from the capital funds of the Band. This memo. was dated 4th Oct. last, ~~xxxx~~ and was approved of by the Minister. On the 5th ulto. Mr Sims was wired to accept Berry's offer for the new schoolhouse at South Bay.

A letter has reached me to-day from the Rev. Father Baudin of Wikwemikong, dated the 16th inst. from which it would appear that nothing has been done in connection with the new schoolhouse and that the old one is in such a wretched condition at present

that it will be uninhabitable when the cold weather
sets in.

There is nothing on file to show why Mr
Berry has not proceeded with the work.

*Extract from a Report of the Committee of the
Honourable the Privy Council, approved by
the Governor General on the 12th November, 1904.*

On a memorandum dated 4th October, 1904, from the Superintendent General of Indian Affairs stating that the Indian Agent for the South Bay Band of Indians has forwarded to the Department of Indian Affairs, with his endorsement thereon, a resolution from the Indians of that Band in favour of the erection of a school house on their reserve on Manitoulin Island, and of charging the cost thereof which is estimated at about \$575.00 to the capital at their credit.

The Minister recommends as the work when completed would be in the nature of a permanent improvement and properly represent capital, that under the provisions of Section 139 of the Indian Act (as added thereto by Sec. 11, of Ch. 32, Vol. 57-58), authority be given for the expenditure of the sum above mentioned from the capital at the credit of the South Bay Band which amounts to \$17,302.10.

The Committee advise that the requisite authority be granted.

of the Privy Council.

The Honourable

The Superintendent General
of Indian Affairs.

Sir,

I have the honor to acknowledge receipt of your Telegram dated 21st Instant as follows "Advise Contractor Berry Department requires immediate performance of Contract for School house as same is urgently needed"

I beg to report that since awarding the contract to Mr Berry I have repeatedly urged him to push the work forward in order to have the building completed before the bad weather set in.

He assured me before I asked the Department to accept his offer that he would commence the work the following week. I have just returned from interviewing him personally and he informs me that he deeply regrets the delay but that it has been caused by matters entirely beyond his control that the workmen who agreed to go right on and do the work have disappointed him and that it took longer time than he figured on to get the materials together.

He has given me his assurance that the work will now be commenced without delay and that he will have it rushed to completion.

Regretting the delay in this matter but assuring you that I have done everything I possibly can to hurry matters up

I have the honor to be

Sir

Your obedient servant

Frank Pedley Esq
Deputy Superintendent Gen'l of Indian Affairs
Ottawa, Ont.

[Signature]
Indian Agent.

House of Commons

H. H. H. H. Thessalon, Jan. 4th. 1905

Dear Pedley,

W. J. Berry who was given the contract for building the schoolhouse at South Bay is not able to complete this fall. He has the sash and doors all made and if he would lose the contract. Kindly advise me if it will be called so I can let him know. *Settle let him go on with it.*

Yours truly,

Alfred B. Brewster

Frank Pedley Esq.,

Deputy Superintendent General,

Indian Affairs,

OTTAWA.

Indian Affairs. (RG 10, Volume 6222, file 473-5, part 1)

OTTAWA, 18th January, 1908

Dear Sir,

In reply to your letter of the 14th inst. regarding the delay in the completion of the schoolhouse at South Bay, although the delay has been put to considerable inconvenience through Mr. Perry's not having carried out his contract for building the schoolhouse at South Bay, it will consent to extend the time provided he commences operations early in the spring and has the building completed without delay. Upon receipt of your assurance that all will be done, our Agent will be instructed to advise the school committee of the same.

House of Commons,
OTTAWA.

Indian Office, Manitowaning, Ontario.

12th December 1904-

158---13

Sir,

Referring to the contract awarded W. J. Berry of Providence Bay, for the erection of a school building at South Bay.

I have the honor to report that I visited the above mentioned School on the 8th Instant and find that the Contractor has again disappointed me as he has not even commenced the work. In view of the number of times he has failed to do as he agreed I would recommend that the contract to him be cancelled.

As it is out of the question to have the work done now until Spring I find that there are certain small repairs that are absolutely necessary to the old building in order that it may be made habitable for the Winter, and I think an expenditure of not more than \$15.00 would make the old place so that the teacher and children will be able to keep warm during the cold weather and I would most respectfully ask for authority to incur an expenditure up to the amount mentioned in repairs. These can be done during Christmas holidays and not interfere with the teaching days.

Regretting that the contractor has turned out to be a humbug and trusting that better results will follow

I have the honor to be

Sir

Sir,

Referring to Official letter of date 17th December last regarding the erection of a School building at South Bay and authorizing me to cancel the contract with Mr Berry, and enter into arrangements with another responsible person for the work submitting any offers received to the Department.

I have the honor to report having invited offers for the work from all local builders and have received only two offers one from the Wikwemikong Mission which Institution asks the sum of \$1040.00 and the other from Mr Neil McMartin^{of Manitowaning} who asks the sum of \$748.00 to build the School house according to specifications.

Either of the tenderers are responsible and competent to do the work satisfactorily and as Mr McMartins' Tender is by far the most reasonable I would recommend that it be accepted. The work can commence early in May if the contract is awarded soon.

Your obedient servant

The Secretary
Department of Indian Affairs

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Department of Indian Affairs.

OTTAWA, 12th April, 1905

The Deputy Superintendent General:-

Re erection of a new schoolhouse at South Bay.

Mr W.J. Berry of Providence Bay tendered for this building last fall at the sum of \$525.00 and his offer was accepted. Owing to the lateness of the season he was not able to commence work and Mr Dymont, M.P. wrote last January stating that he had got out some of the material and asking that the time for commencing operations be extended until the spring. You replied to Mr Dymont that upon receipt of his assurance that this would be done, the Agent would be instructed not to call for other tenders.

Before Mr Dymont's letter was received, Mr Sims had been authorized to cancel Mr Berry's contract and enter into arrangements with other responsible persons for the work. Mr Sims now submits two offers, one for the Wikwemikong Mission for \$1040.00 and the other from Mr Neil McMartin of Manitowaning for \$743.00. Both these tenders are much higher than Mr Berry's and exceed the amount appropriated by Order in Council.

I would suggest that Mr Dymont be asked if Mr Berry is still prepared to carry out his tender, as the work should be undertaken at once.

OTTAWA, 15th April, 1905

Sir,

On the 14th inst. the following telegram was sent

"Are you prepared to commence building schoolhouse
South Bay early in May. Answer".

to which you replied by wire to-day:-

"Am ready. Everything in shape. Doors and sashes
are made. Can start any day".

In view of your statement the Department has decided
to allow you to carry out your original contract for

the building of the schoolhouse and the house for the
teacher at South Bay. The cost of the building and the house
will be paid by the Department.

Your obedient servant,

Providence Bay,

No 151721----5

Indian Office, Manitowaning, Ontario.

29th June 1966-

158---15

Sir,

Referring to Official letter dated 9th Instant with reference to the erection of a new school building at South Bay by Mr W. J. Berry.

I have the honor to report that on the 22nd Instant I visited South Bay and laid out the ground for the contractor who had the material on the ground.

I again visited South Bay yesterday and find that he has the work started.

Miss St James, the teacher, has asked that a belfry be added to the building and also a small shed for the school wood to be built of the dimensions of 12 feet by 14 feet.

Mr Berry states that he will put up a belfry and hang the old bell therein and build the wood shed for a further sum of \$65.00.

If the Department has funds enough at its disposal to admit of this extra

BRANG

Sir,-

In September last Trust Fund cheque, No. 934, was issued in favour of W. J. Berry, for the amount of \$590 for building a school house at South Bay Indian Village, together with wood-shed, belfrey, &c., Of this \$575.00 was charged to the Capital of the South Bay Band, and \$15.00 to the Interest Account of the same Band. I should like to know if public tenders were called for for the erection of this school house, and if not, why? Kindly let me have a copy of the Order-in-Council authorizing this expenditure, fund of the South Bay Band.

I am, Sir,

Your obedient servant,

Auditor General.

Deputy Superintendent General
of Indian Affairs,

Ottawa.

Indian Affairs. (RG 10, Volume 6222, file 473-5, part 1)

Ottawa 2nd June, 1908.

Sir,

In reply to your letter of the 20th ultimo, I beg to say that tenders were called for the erection of the school house, wood-shed etc, at South Bay Village. The contract was awarded to Mr W.J. Barry, the lowest tenderer. A copy of the order-in-Council authorizing payment of \$575.00 from Capital of the South Bay Band is enclosed herewith.

24th September 1906-

158--14

I have the honor to report that I am advised by Miss Zoe StJames, teacher, at South Bay school, that the floor and door of one of the closets was destroyed by animals during vacation.

The cost of repairing this will not amount to more than \$5.00 and I would most respectfully ask for authority to have the repairs made.

In this same connection I beg to report that Miss St James has drawn my attention to the fact that the school yard should be fenced so as to keep horses and cattle away from the school grounds, she also says that if they put out their washing that it must be guarded until dry and taken in at once or it would be trampled under foot by the animals running at large.

I think it would be well, providing there are funds available, to have the school yard fenced and if this meets with the approval of the Department I will have an estimate⁴ of the cost of having a fence erected.

I have the honor to be

Sir

Your obedient servant

25th February 1907-

I have the honor to inclose herewith an account amounting to \$3.00 in favor of Simon Naganigwane for his services in making ditches at the South Bay School.

I beg to report that this labor was absolutely necessary as owing to the thawing of the snow the water backed up at the end of the building and was commencing to flood the school room. In view of the circumstances I authorized the labor of cutting ditches through the ice which diverted the water from the school.

13th February 1908-

168-15 Sir,

Referring to Official letter of above number and date and more particularly to the concluding paragraph thereof with reference to fencing the school yard at the South Bay School.

I have the honor to report that it is proposed to fence a yard five rods by fifteen rods, the kind of a fence most suitable would be a wire fence the cost of building same I estimate as follows,

| | |
|---|-------|
| 40 rods wire fencing 30 inches high at 60 ¢ per rod | \$24. |
| Two Small Gates at \$2.75 each | 5.50 |
| One large Gate 8 feet wide | 5.00 |
| Forty seven fence posts at 10 ¢ each | 4.70 |
| Right | |
| Knightsbraces for corners at 25 ¢ ea | 1.25 |
| 100 feet lumber for anchors on corner posts | 1.00 |
| Nails and spikes | 1.00 |
| Labour and teaming | 1.00 |

If at all possible I would recommend that the work be authorized in order that the posts may be got out this winter by the Indians and the work done the first thing in the spring. As the school premises are new on the high road it is very inconvenient for the teacher not to

The Secretary have the grounds enclosed.

5th October 1908-

Sir,

I have the honor to report that when I was arranging the school yard at South Bay to have the wire fencing put up I found that I had to leave the girls' closet outside the fence as it was at such a distance from the school that it was an impossibility to enclose it.

When I was at the school the other day the teacher called my attention to this and requested that the closet be moved inside the fence. I made arrangements with chief David Shuwande to move it and dig a new pit and crib it up the same as where it formerly was. This will cost about \$5.00 and as the labor is necessary to be done before the cold weather sets in I thought it well to authorize the work before submitting same to you and trust same will be approved of.

13th June 1910

153---16

Sir/

Referring to Official letter of date 9th April last asking for a report on the condition of the South Bay school with recommendations as to the repairs that are necessary to the building.

I have the honor to report that the building does require a stone foundation in the worst way and it will be necessary to raise the building one foot when the foundation is being put in as one end of it is very close to the ground and every spring the snow backs up around it and water runs through the school room. The spot where the school is built is under a large hill and the ground behind it is very wet during the Spring freshet. I had a practical stone mason look over the building and he offers to do the work of putting in the foundation, raise the building one foot, build abutments under the centre of the school of stone and complete the whole work of foundation including materials for the sum of \$150.00. The name of the mason is Mr. Thomas Pellard and I would most respectfully recommend that he be given the contract to do this work for the sum above stated. It will be some time yet before the work could be proceeded with as the weather has been so wet that the roads around South Bay at the present time

The Secretary

CANADA

are not in a condition to haul stone on but if the Department decide to have the work done it would be well to authorize same at once in order that the contractor may make arrangements with the Indians to quarry the stone and get it on the ground as soon as the roads will permit. There will probably be some plastering to do to the interior after the building has been raised as the plastering in several places is showing signs of weakness. The steps will also require to be extended one foot but this is only a trifling matter.

Your obedient servant

Indian Agent.

reference
No 151721/5

Indian Office, Manitowaning, Ont.

30th June-1910

15-11 Sir,

Referring to official letter of 20th Instant authorizing certain repairs to the South Bay School and asking for a resolution of the band authorizing the expenditure from the capital funds.

I have the honor to report that it is an utter impossibility for me to get a resolution from this band at this season of the year as they are nearly all absent from the reserve and will not return till some time in the fall and I very much fear that this band will not pass any such a Resolution. The South Bay Indians are very few in number but they are furnishing education facilities for members of other bands who reside near school and they are constantly complaining of this.

When they passed the Resolution in 1904 authorizing the erection of the school building they did not receive any interest distribution for several times and there was very great dissatisfaction among them on account of this so that with this fact before me I am positive that they will refuse to pass a Resolution authorizing any further expenditure from their funds. On looking over the last quarterly return from the South Bay school I find there are 23 Pupils enrolled thereon out of which there are only 3 children who really belong to the South Bay Band. The most of the pupils attending this school are children of West Bay Indians. On the 22nd of August 1904 in reply

Referring to official letter of date 5th July last and previous correspondence regarding repairs to the South Bay School.

I have the honor to enclose herewith accounts in duplicate in favor of Chas. S. King amounting to \$4.75 for labor in making repairs to the closets and fixing the steps at the approach to the school.

In regard to the repairs necessary to the interior of the school room I have the honor to report that in order to have the necessary plastering done after the foundation had been completed it would have necessitated the closing of the school for two weeks or better and on consultation with the teacher we thought it would be better to put up with the condition of the school for this winter and have the repairs made at next midsummer. There is also the question of a small addition to the teacher's quarters which is badly needed for a kitchen as the present shed is a very miserable affair and there should be a kitchen built about 14 feet by 16 feet one story high. If this can be arranged the whole thing could be done at the same time.

Ottawa, April 21, 1911.

Sir,

I beg to advise you that the Department has authorized an expenditure of \$12.50 per annum for prizes for the Wikwaukongasing and South Bay schools in your Agency. Purchases will be made quarterly and instructions have been given to have the accounts forwarded through your office. This request was made on behalf of the teachers by Rev. Father Papineau, the Missionary of that district.

Your obedient servant,

Asst. Deputy and Secretary.

Ottawa, April 21, 1911.

Sir,

Referring to your request to be allowed a grant for prizes for the children attending the West Bay, Nekeewanning, South Bay and Wixewikongasing schools I beg to say that the Department appreciates the efforts that are being made to induce regular attendance and is prepared to make a grant of \$6.25 each quarter for this purpose. Payment will be made upon the receipt of accounts showing the articles purchased with prices and the amount for each school should be ^{sent} separately in order that the expenditure for each school may be shown in the books of the Department. The accounts for the West Bay and Nekeewanning schools should be forwarded through the office of Mr. Thorburn, the Indian Agent, and those for the other two schools through Mr. Sims' office. The Agents will be advised that this expenditure has been authorized. The first expenditure may be incurred at the end of this quarter.

Your obedient servant,

Asst. Deputy and Secretary.

27th July 1911

Sir/

I have the honor to report that some time ago Miss St. James, the teacher at South Bay, informed me that the residence occupied by her at the school had been broken into by some person or persons unknown during her absence at vacation. At the same time she informed me that this was a second time that this had occurred, but, that she had not mentioned the matter in the first instance. I told Miss St James that I would see the Chief and ask him to exercise due vigilance in trying to catch the offender or offenders which I did. To-day the chief called to inform me that he was not successful in finding out who the guilty person was and further informed me that the house had been entered again. It does not appear to be the intention of the person or persons who break into the house to steal anything as at both the other times nothing was taken. It annoys the teacher very much for this kind of thing to occur and I think the best way to prevent a recurrence of this annoyance will be to have tight shutters made for all the windows that are on the ground floor and these put on and fastened securely so as to make it difficult for any one to

make

~~CONFIDENTIAL~~

Rev. Father P^uquin who visited the Department yesterday in discussing school matters on Manitoulin Island stated that it would not be long till the day school at South Bay would have to be closed for lack of attendance as many of the Indians from that district. This should be kept in mind when the question of expending a comparatively large sum in remodelling the teacher's quarters is under consideration.

File
No. 151721/5

Indian Office, Manitowaning, Ont.

13th February 1912

Sir:-

Referring to official letter of date 8th Inst. in which you instruct me to forward without delay the account for prizes distributed to the children of South Bay school and further informing me that I was advised on 21st April last that authority for this expenditure was granted.

I have the honor to report that your letter under date 21st April last, File No. 152019/5 informed me that an expenditure of \$12.50 per annum had been authorized for the Wikwemikong^{ing} and South Bay Schools for prizes.

On the 11th July last an account for \$6.37 in favor of the South Bay teacher was sent the Department and subsequently paid by official cheque. - Again on Oct. 6th another account in favor of the same person was rendered the Department amount \$5.30, this was also paid.

Now as these two accounts amounted to a trifle more than the yearly amount I was told had been authorized and on receipt of a third account last month I immediately wrote Miss St. James the teacher at South

Bay as follows. " date Jan. 2. 1912. Madam. I am in receipt of bills aggregating the sum of \$6.30 which accompanied your quarterly report. I presume the bills were purchased by you for the school. I have forwarded the account to the Department and will be glad to pay the same to you as soon as it is received. I have also forwarded to you \$12.50 to your account for the year 1911-12. I am, Madam, very respectfully,
Yours faithfully,
J. H. McLeod
Indian Agent
Manitowaning, Ont.

Department of
Indian Affairs
Ottawa.

Under date 15th Ult. Miss St James replied to the

Indian Affairs. (RG 10, Volume 6222, file 473-5, part 1)

PUBLIC ARCHIVES

above quoted letter as follows. "Sir, In reply
"to yours of January second permit me to inform
"you that the Department granted \$6.25 quarterly
"to be expended for prizes. As the Department made
"this grant to several schools at the same time I
"did not receive the letter, hence I cannot give
"the date of letter nor the file number but I shall
"write for it, and as soon as I receive it I shall
"forward it to you immediately"

I have not heard from Miss St. James since.
As the foregoing letters speak for themselves I
do not see how the Department could expect me to
forward accounts for over fifty per cent more than
the amount authorized in so far as I was concerned.

If you did authorize Miss St James to expend
\$25.00 per annum for prizes and not \$12.50 as you
told me I certainly will be pleased to forward you
the account on receipt of authority from you to do
so.

Your obedient servant

Indian Agent.

Indian Affairs. (RG 10, Volume 6222, file 473-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa, February 17, 1912.

REV. SIR,

In April 21st, last, you were informed that the Department would make a grant of \$6.25 each quarter for the purchase of prizes for the children attending the West Bay, Shesheganing, South Bay and Wikwemikongasing Schools. This authority has evidently been misunderstood, as the teachers are sending in accounts for prizes to the extent of \$6.25 from each school, which would be at the rate of \$25.00 per annum. This is more than the Department pays at any school for prizes and is more than can be allowed for those particular schools. The intention was to make a small grant of \$6.25 for the combined schools quarterly, instead of a total grant of \$6.25 at the end of the year for each school. The Agents are being advised that the Department cannot pay this large grant for prizes, but, as the sum of \$6.25 may be a little small, the sum will be changed to \$10.00 per annum for each school, or \$2.50 quarterly.

Your obedient servant,

Assistant Deputy and Secretary.

REV. MRS. A. YAPINEAU, S.J.,
Wikwemikong, Ont.

Indian Affairs. (RG 10, Volume 6222, file 473-5, part 1)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

I have to acknowledge the receipt of your letter of the 15th instant in reference to the purchase of prizes for the South Bay School.

In reply I beg to say that in official letter of April 21st, last, the intention of the Department was that \$12.50 should be the total expenditure at both schools for the year, or \$6.25 for each school. The Rev. Father Dupinseau, who was informed of the grant, has evidently misunderstood the Department's letter and told the teachers that the grant would be \$6.25 for each quarter.

The amount, \$4.25, for the year may be a little small and the Department has decided to increase it to \$10.00, or \$2.50 per quarter for each of the two schools. You will be good enough to at once advise the teachers accordingly, so that they will not make purchase for the current quarter over that amount. In the reaction as the other prizes were evidently purchased in good faith you should submit the accounts for payment.

Your obedient servant,

Assistant Deputy and Secretary,

J. B. D. Sims, Esq.,

Indian Office, Manitowaning,

October, 8th, 1912.

Sir :-

I have the honor to report that there is a new stove needed for the South Bay Indian School. The one they are using now is part of two old stoves and it is in very poor condition. I would most respectfully recommend that authority be given to purchase a new stove and have it jacketed with zinc or galvanized iron at a cost not to exceed \$ 23.00.

Your obedient servant,

Indian Agent,

The Secretary,

Department of Indian Affairs,

Ottawa, Ont..

copy. for Mrs

Ottawa, November 4, 1912.

Sir,-

I have to acknowledge the receipt of your letter of the 27th Sept. enclosing requisitions for supplies for the South Bay School.

In reply I beg to say that the stationery asked for will be ordered from the Government Stationery Office and you may purchase the yarn, wool, crochet hooks, brooms and combs asked for.

You may also purchase six shades for the teacher's residence and lumber for the making of the kitchen cabinet or cupboard.

The sum of \$10.00 will be allowed for the purchase of material for instruction in domestic science to the girls.

You may supply Miss Leush with sufficient paint to paint the inside of the old building, upon condition that the work is done by the boys of the school.

Mr. MacKenzie of this Department, who recently visited this school, reports that a new box stove is needed and you may purchase one similar to that installed at the Wikwemikongsing School and have it jacketed in the same way. It is understood that there is an Indian on the reserve who is competent to do the tinmithing work and you may let him have this job.

Six outside blinds for the protection of the windows

Wm. McLeod, Esq.,
Indian Agent,
Manitowaning, Ont.

windows of the teacher's residence may also be furnished. The teacher has also asked for a strip of oilcloth and three chairs for use in the dormitory upstairs. These you may purchase.

As it is the intention of the teacher and her companion to keep during the winter months a number of the children who reside at a distance from the school you may purchase for them two single iron beds and mattresses. These should be inexpensive, but of a good serviceable kind.

It is noted that the contractor who excavated the cellar for the addition to the teacher's residence did not remove the clay from the yard and I have to ask you to be good enough to obtain an estimate of the cost of having this moved across the road to the plot of ground which it is proposed to use for a school garden.

In connection with the proposed garden, if the Indians will complete the clearing of at least half an acre in the lot directly opposite the school-house, the Department will next spring be prepared to provide a suitable wire fence. I have to ask you to be good enough to submit an estimate of the cost of the fencing for half an acre.

You may also have two eave troughs placed on the addition to the building, as arranged for by yourself and Mr. MacKenzie.

Your obedient servant,

(Signed) S. Stewart

Assistant Secretary.

Ottawa, July 23, 1913.

Sir,-

I beg to inform you that the Department has ordered for the South Bay School from the E. W. Meyer Co., Toronto, a teacher's desk to be shipped to your address at Manitowaning. When it arrives you will be good enough to make arrangements to have it sent to the school.

In your report for last month you mention the matter of drainage and the Department approves of your having the work carried out as outlined in that report. Conditions as they have existed during the past two years are most unsatisfactory and the Department wishes to improve them if at all possible.

Sir :-

I have the honor to enclose herewith an account in favour of Neil McMartin amounting to \$ 2.05 for glass and putty furnished to the South Bay Indian School.

I have the honor to report that I authorized the purchase of those articles on account of the windows in the School and the teachers residence being in such a condition that it was necessary, some were broken for the past three years, which the teachers had patched, more were damaged during the time the school was closed when the quarantine was on, and two or three were broken during the summer holidays.

Your obedient servant,

Wm. L. L.

June 14th, 1915.

Sir,-

I have the honor to enclose herewith an account in favor of Charles S. King amounting to \$ 15.00 for labor at south Bay School and erecting a flag pole. I had no authority to have the flag pole erected, but the Department sent the school a flag and it was necessary to erect the pole. The doors and windows of the school and teacher's residence had to be repaired, and the fence around the school and garden, also the residence had to be banked around on account of the cellar filling with water in the wet weather. The Department authorized me to have the garden ploughed and harrowed, Official Letter No. 151721/5 dated the 30th of October last, but later on in the season it will require some more fresh earth to be drawn.

I would most respectfully recommend that this account of \$ 15.00 be paid.

Your obedient servant,

Indian Agent.

EXTRACT

ORIGINAL ON 151721-6 A.

REPORT OF INSPECTOR J.P. FINE ON THE SOUTH BAY SCHOOL.

BLACKBOARDS,- Some of the boards on the side of the room should be placed lower down so that the small children could write on them.

HEATING,- There should be a jacket placed around the school.

1. Walls should be whitewashed.
2. A gate for bringing in the wood should be made near road fence north of the school.
3. I understand all the garden which the teacher planted was invaded by the pigs from time to time and now there is no more garden. If the garden was surrounded by a close wire fence or net this nuisance could be stopped, I think.

Date of Inspection,-October 19th, 1915.

Ottawa, November 12th, 1915.

Sir,-

In reporting on the South Bay school, Inspector Finn recommends that a jacket be placed around the stove.

You will be good enough to have this done as soon as possible.

Inspector Finn, also, reports that the school garden was destroyed by pigs. The next time you visit this school, the Department wishes you to examine the fence around the garden and report what repairs are required, so that the pigs will be unable to destroy the garden another year.

Your obedient servant,

Assistant Deputy and Secretary.

SI, -

Miss Fagan, teacher of the South Bay school, in her report for the year ended December 31st, last, states that the school is in need of whitewashing.

You may have this school whitewashed during the Easter holidays, if you can find any one to do this work.

The teacher also states that a school garden was started there last year, but on account of the poor condition of the fence all the pigs of the neighbourhood devoured all the crops. In this connection I beg to refer you to official letter of the 19th of November, last, in which you were authorized to have the garden in connection with this school fenced with a close woven wire fencing, in order to keep the pigs out.

Your obedient servant,

Asst. Deputy and Secretary.

Sir,-

Referring to that portion of your report on the South Bay School for the month of March in which you state that the plaster on the walls and ceiling in the classroom is broken and requires repairing, also the woodwork in this room requires re-painting I beg to say that you may have the necessary repairs made to the walls and ceiling and also have the woodwork painted. This work should be attended to at the same time as the whitewashing, which was authorized in official letter of the 15th instant,

Your obedient servant,

J. D. McLEAN

Extract from Inspector's Report on the South Bay Day
School dated May 19, 1916. Original on 151721-6

482259

Water Closets.- They need repairing.

The water runs down from the hill into the woodshed and
freezes to the depth of three feet and the consequence
is that the wood from the shed cannot be used during the
winter time, the door being frozen up, etc. I would
suggest that the shed be raised up so that the water
might run under it. The water might be turned away from
the buildings by putting a ditch on the side of the hill
above them.

Indian Affairs. (R. 10, Volume 6222, file 473-5, part 1)

Ottawa, June 7, 1916.

Mr. Inspector Finn in his report on the South Bay Day School states that the closets need repairing and that the water runs down from the hill into the woodshed and freezes to the depth of three feet and the consequence is that the wood from the shed cannot be used during the winter time, the door being frozen up. He suggests that the shed be raised up so that the water might run under it or that the water be turned away from the buildings by putting a ditch on the side of the hill above them.

You will be good enough to give an estimate of the cost of having the necessary repairs made to the closets.

Kindly state which you consider would be the best way to handle the water from the hill and give an estimate of the probable cost of doing the work done.

Your obedient servant,

Asst. Deputy and Secretary.

C. G. V.
Sir:

With reference to Official Letter No. 151721/5 of June 7th last, with reference to the estimate cost of having the necessary repairs made to the closets at the South Bay School, also which I consider would be the better way of keeping the water from running through the woodshed, and in reply I have the honor to report that about \$10.00 would repair the closets, and put them in a fit condition.

With regard to the woodshed I consider all that is necessary is to raise the door a little higher, so that if we happen to have another wet icy winter similar to the last one the ice would not interfere. By raising the building would not help matters any on account of not being floored. It would be out of the question for the Department to consider putting a ditch on the side of the hill above the school as it would cost hundreds of dollars to clear the ground and dig through the rock and gravel.

Your obedient servant,

The Secretary,
Department of Indian Affairs,
Ottawa, Ont..

Ottawa, September 15, 1916.

Sir,-

I beg to acknowledge the receipt of your letter of the 31st ultimo in reference to repairs to closets and shed at the South Bay school, and in reply to inform you that the repairs to the closets may be carried out at the estimated cost. The shed should also be put in such condition that the water will not interfere with the opening and closing of the door or the procuring of wood therefrom.

The Department has no profile of the school site to refer to, but I am of the opinion that it should be an ~~easy matter to~~ *to prevent the water entering the shed and if necessary to raise the grade of shed floor with earth or stone and provide a door opening on a side where the ice cannot accumulate. If this is possible and can be economically done, you should attend to this at the same time as the repairs are being made to the closets.*

The expenditure, on account of the shed, should not however, exceed \$10.00.

Your obedient servant,

~~Asst.~~ Asst. Deputy and Secretary.
